

Committee of the Whole Revised Agenda

Monday, June 2, 2025, 7:00 p.m.

Council Chambers

Whitby Town Hall

This meeting will be available for viewing through the Town's **live stream feed** while the meeting is in progress. Please visit whitby.ca/CouncilCalendar for more information about the live stream and archived videos.

This meeting will be held in a hybrid in-person and virtual format. In accordance with Section 8.1 of Procedure By-law # 8081-24, Members of Council may choose to attend in-person or participate virtually.

Should you wish to provide comments regarding a matter being considered below, please submit written correspondence and/or a Delegation Request Form.

- **To submit written correspondence**, please email your correspondence to the Office of the Town Clerk at clerk@whitby.ca by noon on the day of the meeting. Correspondence must include your full name, address, and the item on the agenda that your correspondence is related to.
- **To speak during the Committee meeting either in-person or virtually**, please submit a Delegation Request Form online to the Office of the Town Clerk by 8 a.m. on the day of the meeting. Should you be unable to access a computer, please call 905.430.4300 to speak with a Staff Member in the Office of the Town Clerk.
- **To speak virtually during the Public Meeting under Section 5.4 of the agenda**, please submit a Delegation Request Form online to the Office of the Town Clerk by 8 a.m. on the day of the meeting. Those wishing to speak in-person are encouraged to submit a Delegation Request Form, but are not required to pre-register in order to speak at the Public Meeting.

A Revised Agenda may be published on a later date. Late items added or a change to an item will appear with an asterisk beside them.

-
1. **Call To Order: The Mayor**
 2. **Call of the Roll: The Clerk**
 3. **Declarations of Conflict of Interest**
 4. **Consent Agenda**

5. Planning and Development

5.1 Presentations

- 5.1.1 Andrew Grunda, Chief Executive Officer, Watson and Associates Economists Ltd. (In-Person Attendance)
Re: PDP 23-25, Planning and Development (Planning Services) Department and Financial Services Department Joint Report
Development Fees Review Study Update

Refer to Item 5.4.1, PDP 23-25

- 5.1.2 Lashia Jones and Laura Walter representing Stantec Consulting Ltd. (Virtual Attendance)
Re: PDP 31-25, Planning and Development (Planning Services) Department Report
Heritage District Review and Update: Status Report

Refer to Item 5.5.1, PDP 31-25

5.2 Delegations

- *5.2.1 Victoria Mortelliti and Stacey Hawkins representing Building Industry and Land Development Association and Durham Region Homebuilders Association (In-Person Attendance)
Re: PDP 23-25, Planning and Development (Planning Services) Department and Financial Services Department Joint Report
Development Fees Review Study Update

Refer to Item 5.4.1, PDP 23-25

- *5.2.2 Daniel MacPherson, Resident (In-Person Attendance)
Re: PDP 26-25, Planning and Development (Planning Services) Department Report
Official Plan Amendment, Draft Plan of Subdivision, and Zoning By-law Amendment Applications, Anatolia Investments Corp., 975 Conlin Road, 961 Conlin Road, 4605 and 4625 Garrard Road, File Number: DEV-31-24 (OPA-2024-W/10, SW-2024-04, Z-15-24)

Refer to Item 5.5.4, PDP 26-25

- 5.2.3 Mallory Nieves and Josh Berry representing Anatolia Investments Corp. (In-Person Attendance)
Re: PDP 26-25, Planning and Development (Planning Services) Department Report
Official Plan Amendment, Draft Plan of Subdivision, and Zoning By-law Amendment Applications, Anatolia Investments Corp., 975 Conlin Road, 961 Conlin Road, 4605 and 4625 Garrard Road, File Number: DEV-31-24 (OPA-2024-W/10, SW-2024-04, Z-15-24)

Refer to Item 5.5.4, PDP 26-25

- *5.2.4 Mallory Nieves representing Menkes Champlain Inc. (In-Person Attendance)
Re: PDP 27-25, Planning and Development (Planning Services) Department Report
Sign By-law Variance to Permanent Sign By-law for 1655 Stellar Drive (Menkes Champlain Inc.) File Number: SB-01-25

Refer to Item 5.5.5, PDP 27-25

- *5.2.5 David McKay representing MHBC Planning Limited on behalf of 5515 Garrard Reestate Inc. (Virtual Attendance)
Re: PDP 28-25, Planning and Development (Planning Services) Department Zoning By-law Amendment Application, MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc., 5515 Garrard Road, File Number: DEV-34-24 (Z-16-24)

Refer to Item 5.5.6, PDP 28-25

- *5.2.6 Brandon Graham representing Whitby Curling Club (Virtual Attendance)
Re: PDP 29-25, Planning and Development (Planning Services) Department Report
Zoning By-law Amendment Application, Whitby Curling Club, 815 Brock Street North, File Number: DEV-35-24 (Z-17-24)

Refer to Item 5.5.7, PDP 29-25

5.3 Correspondence

5.4 Public Meetings

- 5.4.1 PDP 23-25, Planning and Development (Planning Services) Department and Financial Services Department Joint Report
Re: Development Fees Review Study Update

Consideration of Report PDP 23-25 will be held in a Public Meeting format in accordance with the requirements of the Building Code Act, 1992. Section 13.4 of the Procedure By-law regarding the hearing of delegates shall apply.

Recommendation:

1. That the Development Fees Review Study prepared by Watson and Associates Economists Ltd. (Attachment 1) be received for information;
2. That the proposed amendments to the Planning Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
3. That the proposed amendments to the Building Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
4. That the proposed amendments to the Engineering Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
5. That the recommended fees take effect on July 1, 2025;
6. That all Planning, Building and Engineering Services Fees be indexed January 1st, annually, based on the Consumer Price Index – All Items, for the Province of Ontario published by Statistics Canada in the month of May of the previous year;
7. That the Town Clerk be directed to bring forward a by-law to amend the Fees and Charges By-law to give effect to the recommendations contained in Report PDP 23-25;
8. That Council approve additional staff resources for each of the following full-time positions, including the associated capital and operating costs:
 - Planner II, Development Review (Planning Services);
 - Planner II, Zoning & Regulation (Planning Services);
 - Water Resource Engineer (Engineering Services);
 - Program Manager, Development Infrastructure (Engineering Services);
 - 2 Building Inspector II's (Building Services);
 - 1 Senior Plans Examiner (Building Services); and,
9. That P&D-0012 be removed from the New and Unfinished Business List.

5.5 Staff Reports

- 5.5.1 PDP 31-25, Planning and Development (Planning Services) Department Report
Re: Heritage District Review and Update: Status Report

Recommendation:

That Report PDP 31-25 be received for information, as an update to the ongoing Review and Update of the Brooklin HCD Plan and the Werden's Plan Neighbourhood HCD Plan.

5.5.2 PDP 24-25, Planning and Development (Planning Services) Department Report

Re: Zoning By-law Amendment to Remove Holding (H) Symbol, West Whitby Holdings Inc., 915 Rossland Road West, File Number: DEV-13-25 (Z-06-25)

Recommendation:

1. That Council approve an Amendment to Zoning By-law 1784 (File No. Z-06-25) for the removal of the Holding (H) Symbol, as outlined in Planning Report PDP 24-25; and,
2. That a by-law to amend Zoning By-law 1784 be brought forward for Consideration by Council.

5.5.3 PDP 25-25, Planning and Development (Planning Services) Department Report

Re: Draft Plan of Subdivision and Zoning By-law Amendment Application, Minto Communities Inc., Columbus Road West at Baldwin Street North, File Numbers: DEV-27-22 (SW-2022-06 and Z-19-22)

Recommendation:

1. That Council approve the Draft Plan of Subdivision (File Number: SW-2022-06), subject to the comments included in Report PDP 25-25 and the Conditions of Draft Plan Approval included in Attachment #9;
2. That Staff be authorized to prepare a Subdivision Agreement;
3. That Council approve the amendment to Zoning By-law #1784 (File Number: Z-19-22) and that a Zoning By-law Amendment be brought forward for consideration by Council at a later date;
4. That Williams and Stewart Associates Ltd. be appointed as the Control Architect for the Draft Plan of Subdivision; and,
5. That the Clerk forward a Notice to those parties and agencies who requested to be notified of Council's decision.

5.5.4 PDP 26-25, Planning and Development (Planning Services) Department Report

Re: Official Plan Amendment, Draft Plan of Subdivision, and Zoning By-law Amendment Applications, Anatolia Investments Corp., 975 Conlin Road, 961 Conlin Road, 4605 and 4625 Garrard Road, File Number: DEV-31-24 (OPA-2024-W/10, SW-2024-04, Z-15-24)

Recommendation:

1. That Council approve Official Plan Amendment Number 145 to the Whitby Official Plan (File: OPA-2024-W/10), as shown on Attachment #9, and that a By-law to adopt Official Plan Amendment Number 145 be brought forward for consideration by Council;
2. That Council approve the Draft Plan of Subdivision (File: SW-2024-04), subject to the comments included in Planning Report PDP 26-25 and the conditions of draft plan approval included in Attachment #13;
3. That Staff be authorized to prepare a Subdivision Agreement;
4. That Council approve an amendment to Zoning By-law 1784 (File: Z-15-24), and that a by-law to amend Zoning By-law 1784 be brought forward for consideration by Council; and,
5. That the Clerk forward a Notice to those parties and agencies who requested to be notified of Council's decision.

5.5.5 PDP 27-25, Planning and Development (Planning Services) Department Report

Re: Sign By-law Variance to Permanent Sign By-law for 1655 Stellar Drive (Menkes Champlain Inc.) File Number: SB-01-25

Recommendation:

That Council approve the request for a variance to the Town of Whitby Permanent Sign By-law #7379-18 for the Menkes Whitby Business Park, located at 1655 Stellar Drive.

5.5.6 PDP 28-25, Planning and Development (Planning Services) Department Report
Re: Zoning By-law Amendment Application, MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc., 5515 Garrard Road, File Number: DEV-34-24 (Z-16-24)

Recommendation:

1. That Council approve an amendment to Zoning By-law No. 1784 (Z-16-24), subject to the comments included in Report PDP 28-25; and,
2. That a by-law to amend Zoning By-law #1784 be brought forward for consideration by Council at a future date.

5.5.7 PDP 29-25, Planning and Development (Planning Services) Department Report
Re: Zoning By-law Amendment Application, Whitby Curling Club, 815 Brock Street North, File Number: DEV-35-24 (Z-17-24)

Recommendation:

1. That Council approve an amendment to Zoning By-law # 2585 (File No. Z-17-24) as set out in Planning Report PDP 29-25; and,
2. That a by-law to amend Zoning By-law # 2585 be brought forward for consideration by Council.

5.5.8 PDP 30-25, Planning and Development (Planning Services) Department Report

Re: Housing Monitoring Report

Recommendation:

1. That Report PDP 30-25 be received for information; and,
2. That the Clerk forward a copy of Planning and Development Report PDP 30-25 to the Region of Durham, Community Growth and Economic Development.

5.6 New and Unfinished Business - Planning and Development

6. General Government

6.1 Presentations

6.2 Delegations

6.3 Correspondence

6.4 Staff Reports

*6.4.1 CAO 10-25, Office of the Chief Administrative Officer Report
Re: CUPE 53 Whitby Naming Rights Sponsorship of Arena 5 at Iroquois Park Sports Centre

Recommendation:

That Council approve entering into a third one (1) year sponsorship agreement effective until May 1, 2026 with CUPE 53 Whitby for a Naming Rights Sponsorship at Iroquois Park Sports Centre (IPSC), including keeping Arena 5 as "CUPE 53 Whitby Arena 5", based on the sponsorship package and other terms and conditions identified in Report CAO 10-25.

*6.4.2 CAO 14-25, Office of the Chief Administrative Officer Report
Re: 2024 Annual Sustainability and Climate Change Report

Recommendation:

1. That Report CAO 14-25 be received as information; and,
2. That the Clerk's office forward a copy of Staff Report CAO 14-25 to the Region of Durham's Sustainability Department.

*6.4.3 CAO 15-25, Office of the Chief Administrative Officer Report
Re: 2026 Workforce Plan Review

Recommendation:

That Council receive report CAO 15-25 regarding the 2026 Workforce Plan Review for information.

- *6.4.4 CAO 16-25, Office of the Chief Administrative Officer Report
Re: The IDEA Project, Journey to Inclusivity Status Update 2025
Recommendation:
That Council receive Report CAO-16-25 The IDEA Project, Journey to Inclusivity Status Update 2025 for information.
- *6.4.5 CLK 07-25, Office of the Town Clerk Report
Re: 2026 Council, Committee, and Public Meetings Schedule
Recommendation:
That Council approve the 2026 Council, Committee, and Public Meetings Schedule appended to this Report as Attachment 1.
- *6.4.6 FES 02-25, Whitby Fire and Emergency Services Report
Re: Whitby Fire and Emergency Services – 2024 Annual Report
Recommendation:
That Council receives, for information, and reviews Whitby Fire and Emergency Services (WFES) 2024 Annual Report.
- *6.4.7 FS 05-25, Financial Services Department Report
Re: Update on Property Tax Assessment Appeals and Adjustments
Recommendation:
That Report FS 05-25 be received as information.
- *6.4.8 FS 25-25, Financial Services Department Report
Re: Annual Insured Claims Report
Recommendation:
That report FS 25-25 regarding Annual Insured Claims be received as information.

6.5 New and Unfinished Business

6.5.1 Condemning and Combatting Islamophobia and Hosting an Interfaith Event

Recommendation:

Moved by Councillor Leahy

1. That the Town of Whitby Council condemn in the strongest terms possible the recent acts of Islamophobic vandalism and hate and restate its commitment to an inclusive and welcoming town for all;
2. That Council express its support for the past National Summit on Islamophobia with the participation of the Federal, Provincial and local governments;
3. That Council commit to looking for ways to educate residents about Islamophobia and ways to combat Islamophobia including a possible public information campaign;
4. That Council direct the CAO to support Muslim community members on how to report hate crimes; and,
5. That the Mayor and CAO consider hosting an interfaith event that would bring groups together and help symbolize our shared commitment to acceptance and tolerance in the spirit of cooperation and cohesion.

7. Adjournment

Town of Whitby

Staff Report

Report Title: Development Fees Review Study Update

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 23-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)
Financial Services Department

Submitted by:

R. Saunders, Commissioner, Planning
and Development
F. Wong, Commissioner, Financial
Services and Treasurer

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

P. Angelo, Director, Engineering
Services, ext. 4918

W. Kang, Director of Building Services &
Chief Building Official, ext. 5570

J. Taylor, Director of Planning, ext. 2908

E. Watson, Sr. Manager of Financial
Planning and Deputy Treasurer, ext.
2826

1. Recommendation:

1. That the Development Fees Review Study prepared by Watson and Associates Economists Ltd. (Attachment 1) be received for information;
2. That the proposed amendments to the Planning Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
3. That the proposed amendments to the Building Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
4. That the proposed amendments to the Engineering Services Fees included in Attachment #2 of Report PDP 23-25 be approved;
5. That the recommended fees take effect on July 1, 2025;

6. That all Planning, Building and Engineering Services Fees be indexed January 1st, annually, based on the Consumer Price Index – All Items, for the Province of Ontario published by Statistics Canada in the month of May of the previous year;
7. That the Town Clerk be directed to bring forward a by-law to amend the Fees and Charges By-law to give effect to the recommendations contained in Report PDP 23-25;
8. That Council approve additional staff resources for each of the following full-time positions, including the associated capital and operating costs:
 - Planner II, Development Review (Planning Services);
 - Planner II, Zoning & Regulation (Planning Services);
 - Water Resource Engineer (Engineering Services);
 - Program Manager, Development Infrastructure (Engineering Services);
 - 2 Building Inspector II's (Building Services);
 - 1 Senior Plans Examiner (Building Services); and,
9. That P&D-0012 be removed from the New and Unfinished Business List.

2. Highlights:

- Watson and Associates Economists Ltd. have been engaged to assist staff with the review of costs related to processing development fees, which include planning application fees, development engineering fees and building permit fees.
- Changes in legislation, application characteristics and cost-recovery levels have led a number of municipalities to undertake a review of their development fees to ensure they accurately reflect processing efforts and service costs.
- Anticipated growth in development will result in additional strains on staff resources to maintain expected levels of service.
- Two (2) additional full-time Planner II positions are required in 2025 for the Planning Services Division to assist in processing the increasing volume and complexity of development applications.
- Two (2) additional full-time positions, including: Water Resource Engineer and Program Manager, Development Infrastructure are required in the Engineering Services Division to assist in processing the increasing volume and complexity of development applications.
- Three (3) additional full-time positions, including: two (2) Building Inspector II positions and a Senior Plans Examiner to accommodate the increased volume in building permits.

- Additional staff resources as outlined in the Development Fees Review Study will be identified in future staffing forecasts and through the budget approval process as growth dictates.

3. Background:

Development Fees along with Development Charges are essential to ensuring the cost of growth is funded through the source of growth to the extent possible, thereby minimizing the impact on the taxpayer. The review of development related fees is based on the underlying assumption that these fees should offset the full cost of processing development applications and providing building code enforcement services in the Planning and Development Department. Watson and Associates Economists Ltd. have been engaged to assist staff with the review of costs related to processing development fees, which include planning application fees, development engineering fees and building permit fees.

The planning application and building permit fees were last updated in 2018 (CS 47-18), and the engineering review and inspection fees were last updated in 2021 (PW 43-21), all in conjunction with Watson & Associates. The Town strives to periodically review and update the costing model information to ensure it reflects actual processing efforts and service delivery costs. The recommended fee changes take into consideration legislative compliance, market competitiveness and by-law compliance.

The adoption of planning application fees and engineering review and inspection fees does not require a public meeting, however, the process for changing Building Code fees requires a statutory public meeting with at least 21 days' notice being provided to interested parties. As a result, the public meeting will be held on June 2, 2025 at 7 p.m. to hear public submissions with respect to building permit fees, however comments will also be taken related to planning and engineering fees.

Legislative Requirements

Development related fees are imposed under the authority of the Planning Act, the Municipal Act, and the Building Code Act.

Section 69 of the Planning Act, Planning Services Fees:

- Allows municipalities to impose fees through by-law for the purposes of processing planning applications;
- Defines the requirements of determining the fee;
- Restricts cross-subsidization of various fee types;
- Requires any discount in fees to be subsidized from the tax base;
- Allows fees to be designed to recover the anticipated cost of processing each type of application, reflecting the estimated costs, not the actual processing costs related to any one specific application;
- There are no explicit restrictions to direct costs, allowing fees to include direct costs, capital-related costs, support function costs directly related to the service provided and an apportioned amount of general overhead costs; and

- While there is no legislated appeal period related to the timing of By-law passage, or public process requirements, fees can be made under protest with appeal to the Ontario Land Tribunal (OLT).

Municipal Act, 2001 Part XII, Engineering Services Fees:

- Provides municipalities with broad powers to impose fees and charges via by-law, including imposing fees or charges for the following:
 - Services or activities provided or done by or on behalf of it;
 - Costs payable by it for services or activities provided or done by or on behalf of any other municipality or local board; and,
 - Use of its property including property under its control;
- Allows municipalities to charge for capital costs related to services that benefit existing residents;
- Does not impose explicit requirements for cost justification when establishing fees, however, municipalities should have regard for legal precedents and the reasonableness of fees and charges; and,
- While the statute does not provide for appeal of fees and charges to the OLT, appeals may be made to the courts if municipalities are acting outside their statutory authority.

Building Code Act, 1992, Building Services Fees:

- Allows municipalities to impose fees through the passage of a by-law;
- Fees charged must not exceed the anticipated reasonable cost of administering and enforcing the Act;
- Defines the process for annually reporting the amount of fees collected, the direct and indirect costs of delivering the services, and the amount of any reserved funds established;
- Defines the process for establishing fees, and requires at least one public meeting with at least 21 days' notice being provided to all interested parties; and,
- If certain Building Code enforcement fees are determined to be too high to ensure compliance, fees can be offset by other building code enforcement fees, as long as the quantum of the maximum fees possible is not exceeded.

4. Discussion:

Full Costing Methodology/Model

An Activity Based Costing model was utilized to calculate the full cost of the services provided by Town staff. This model is used across the province and provides defensible methodology that includes:

- Direct costs – operating costs associated with individuals directly participating in the service delivery activities;
- Indirect costs – operating costs associated with individuals supporting direct service departments (i.e. typical support functions such as HR, TIS, facility maintenance, finance, etc.); and,

- Capital costs – capital asset replacement costs associated with individuals directly participating in the service delivery activities.

The previous models from 2018 (Planning and Building) and 2021 (Engineering) were reviewed and updated to capture new and revised costing categories and to ensure current internal processes and staff effort estimates were reflected, in response to recent legislative changes.

Two costing scenarios were provided reflecting: an unrestricted service level where staff effort estimates were costed based on anticipated service levels irrespective of 2024 budget complement levels; and, a restricted service level where effort estimates were reduced to align with 2024 budgeted complement.

Staffing Capacity

Planning Services Division:

Based on average planning application volumes for 2017-2022 and 2024 budgeted staff complement, the model identified that 3.5 additional FTEs are required for processing planning applications reflecting changes in application volumes, new costing categories, and a realignment of efforts from Development Engineering Services to planning application processes. In 2025, two (2) additional Planner IIs are proposed – one in Development Review Services and one in Zoning and Regulation. Additional staffing requests, to meet the recommended level of FTEs proposed in the study, will be brought forward in future staffing forecasts and budget approval processes, as required.

Engineering Services Division:

Based on anticipated annual application volumes and to provide the required level of service in-house, the model identified 3.3 additional FTEs are required in the Engineering Services Division. In 2025, two (2) positions are proposed to be added, including a Water Resource Engineer and a Program Manager, Development Infrastructure. Additional staffing requests to meet the recommended level of FTEs proposed in the study will be brought forward in future staffing forecasts and budget approval processes, as required.

Building Services Division:

Based on average building permit volumes for 2018 – 2022, effort estimates and the 2024 budgeted complement, the model identified 9.2 additional FTEs would be required to provide the level of service underlying the effort estimates. While anticipated fees would adequately cover the costs associated with employing these additional FTEs, it is not realistic that the Town will be able to recruit this number of staff immediately and instead will increase the staff complement over time. In 2025, an additional three (3) full time positions are proposed, including 2 Inspector IIs and 1 Senior Plans Examiner. It is currently proposed that 3 additional FTEs will be included in both 2026 and 2027, to meet the recommendation of the study. Additional staffing requests will be advanced in accordance with growth and will be included in future staffing forecasts and budget approval processes.

All proposed positions will be recovered by Development Fees.

Building Permit Reserve Fund

The 2018 study resulted in establishing a Building Permit Reserve Fund Policy with a target reserve fund balance of 2.07 years of annual building permit costs including direct, indirect and capital costs. Based on discussions, it is recommended that the target reserve fund balance be increased to 3.0 times total annual costs. Based on current costing results, the 3.0 years of annual total costs would equate to \$14.3 million.

Existing and Recommended Fees

Based on the updated processing efforts at 2023 budgeted costs and current staff complement the existing fees generate a cost recovery as outlined in the table below.

Annual Application Costs and Revenue (2023 Totals in millions)*	Planning Application Fees	Development Engineering Fees	Building Permit Fees
Direct Costs	\$3.16	\$2.02	\$3.65
Indirect Costs	1.37	0.58	1.02
Capital Costs	0.55	0.37	0.81
Total Annual Costs	\$5.08	\$2.97	\$5.48
Total Revenue at Existing Fees	\$3.04	\$3.29	\$7.06
Overall Cost Recovery % (with no fee increase)	60%	111%	129%
*Total revenues and processing costs are calculated using forecasted average volumes.			

Planning Services Division:

It is recommended that most of the proposed fee increases under the Unrestricted Service Level scenario be implemented to ensure full cost recovery of annual costs to provide planning services, except for a limited number that are to be adjusted to account for such things as: encouraging non-residential development, ensuring alignment with comparators, and to reflect reasonableness when process mapping captured the most complex applications, not the average processing times (refer to Attachment #2). Planning application fees continue to be evaluated considering potential changes to development review processes, as a result of changes to the Planning Act.

Engineering Services Division:

Where applicable, it is recommended that the proposed fee increases under the Unrestricted Service Level scenario be implemented to ensure full cost recovery of annual direct, indirect and capital costs to provide these services (refer to Attachment #2). The only exception is for Environmental Compliance Approvals, where it is recommended that fees be increased in 2025, however only to a level that is consistent with other municipalities. Because this is a relatively new service, as the process develops, we will gain a better understanding of annual volumes and can adjust accordingly in the future.

Building Services Division:

The study confirmed most of the existing Building Permit Fees have maintained full cost recovery via annual indexing, and therefore no change is required to the majority of existing fees. However, the study has introduced 14 new fees and a minimum permit fee of \$300 which is recommended to be applied to 16 existing and 4 new fees, as outlined in Attachment #2.

The recommendations in this report related to additional staff and increase in fees to fully offset additional costs will not impact the property tax funded programs and services.

5. Financial Considerations:

Subject to Council's approval of the recommendations within this report, recruitment for the additional staff may begin immediately with a hire date of September 1st.

The incremental 2025 staffing costs within the three (3) Divisions will be offset by additional revenues from the recommended fee increases and not projected to impact the tax base.

The current and proposed fee increases, recommended for July 1, 2025 are listed in Attachment #2 of this report.

In addition, it is recommended that all Planning, Engineering and Building Services fees be indexed annually (on January 1st each year), based on the Consumer Price Index – All Items, for the Province of Ontario ("**CPI**") published by Statistics Canada in the month of May of the previous year. For clarity, the fees will be indexed effective January 1, 2026 based on CPI in May 2025 (which, at the time of writing this report has not been published by Statistics Canada yet).

Annual indexing allows fees to offset inflationary pressures on the expenditures and avoids large increases when the next study is completed. The previous policy indexed rates annually at a fixed 2.5% per year.

6. Communication and Public Engagement:

The process of establishing Building Code related fees is defined by the Building Code Act and includes at least one public meeting with at least 21 days' notice being provided to all interested parties. A public meeting is scheduled for a Committee of the Whole Meeting on June 2, 2025 at 7 pm. Notice of the public meeting related to the Building

Code Fees will be sent to interested parties and advertised relevant media and on the Town's website.

7. Input from Departments/Sources:

Staff from Financial Services and Planning & Development (including Planning Services, Engineering Services, and Building Services) along with other impacted departments were involved in the review of processes and development of the recommended fees.

8. Strategic Priorities:

The recommendations contained in this report support Strategic Pillar 4 in the Community Strategic Plan, specifically Objective 4.4: Ensure fiscal accountability and responsibly plan for growth and Action 4.4.1: Deliver services that respond to community needs while balancing the impact to taxpayers.

This report is in a fully accessible format, which also addresses the Town's Accessibility guiding principles.

Chapter 1

Introduction

1. Introduction

1.1 Background

The Town of Whitby (Town) reviews its development fees periodically to ensure they are reflective of processing/service delivery costs, compliant with legislation, and competitive with comparator municipalities. Development fees include planning application fees, development engineering fees and building permit fees. In 2018, the Town retained Watson & Associates Economists Ltd. (Watson) to undertake a review of its planning application fees and building permit fees. In 2021, a subsequent review was undertaken by Watson of the Town's development engineering fees.

Recently, a number of municipalities have undertaken updates to their development fees to address changes in legislation, application characteristics and cost-recovery levels with the intent of continuing to improve fee structures so that they more accurately reflect processing efforts and service costs. This technical report summarizes the legislative context for the fees review, provides in detail the methodology utilized to assess the full costs of service, and presents the financial implications of full cost recovery and the associated fee schedules.

1.2 Legislative Context for Development Fees Review

The context for the scope of this development fees review is framed by the statutory authority available to the Town to recover the costs of service. The statutory authorities that must be considered are:

- Section 69 of the *Planning Act*, which governs the imposition of fees for recovery of the anticipated costs of processing planning applications;
- Part XII (s. 391) of the *Municipal Act*, which governs municipal fees and charges generally which are not addressed in specific statutes (i.e. development engineering fees); and
- Section 7 of the *Ontario Building Code Act*, governing building permit fees.

The following summarizes the provisions of these statutes as they pertain to development fees.

1.2.1 *Planning Act, 1990*

Section 69 of the *Planning Act* allows municipalities to impose fees through by-law for the purposes of processing planning applications. In determining the associated fees, the Act requires that:

“The council of a municipality, by by-law, and a planning board, by resolution, may establish a tariff of fees for the processing of applications made in respect of planning matters, which tariff shall be designed to meet only the anticipated cost to the municipality or to a committee of adjustment or land division committee constituted by the council of the municipality or to the planning board in respect of the processing of each type of application provided for in the tariff.”

Section 69 establishes many cost recovery requirements that municipalities must consider when undertaking a full cost recovery fee design study. The Act specifies that municipalities may impose fees through by-law and that the anticipated costs of such fees must be cost justified by application type as defined in the tariff of fees (e.g. Subdivision, Zoning By-Law Amendment, etc.). Given the cost justification requirements by application type, this would suggest that cross-subsidization of planning fee revenues across application types is not permissible. For instance, if Site Plan application fees were set at levels below full cost recovery for policy purposes this discount could not be funded by Subdivision application fees set at levels higher than full cost recovery. Our interpretation of the Section 69 is that any fee discount must be funded from other general revenue sources such as property taxes. In comparison to the cost justification requirements of the *Building Code Act*, where the justification point is set at the aggregate level of the Act, the requirements of the *Planning Act* are more stringent in this regard.

The legislation further indicates that the fees may be designed to recover the “anticipated cost” of processing each type of application, reflecting the estimated costs of processing activities for an application type. This reference to anticipated costs represents a further costing requirement for a municipality. It is noted that the statutory requirement is not the actual processing costs related to any one specific application. As such, actual time docketing of staff processing effort against application categories or specific applications does not appear to be a requirement of the Act for compliance purposes. As such our methodology which is based on staff estimates of application

processing effort meets with the requirements of the Act and is in our opinion a reasonable approach in determining anticipated costs.

The Act does not specifically define the scope of eligible processing activities and there are no explicit restrictions to direct costs as previously witnessed in other statutes. Moreover, recent amendments to the fee provisions of the *Municipal Act* and *Building Code Act* are providing for broader recognition of indirect costs. Acknowledging that staff effort from multiple departments is involved in processing planning applications, it is our opinion that such fees may include direct costs, capital-related costs, support function costs directly related to the service provided, and general corporate overhead costs apportioned to the service provided.

The payment of Planning Act fees can be made under protest with appeal to the Ontario Land Tribunal (OLT) if the applicant believes the fees were inappropriately charged or are unreasonable. The OLT will hear such an appeal and determine if the appeal should be dismissed or direct the municipality to refund payment in such amount as determined. These provisions confirm that fees imposed under the *Planning Act* are always susceptible to appeal. Unlike other fees and charges (e.g. development charges) there is no legislated appeal period related to the timing of by-law passage, mandatory review period or public process requirements.

1.2.1.1 *More Homes for Everyone Act, 2022*

The Province recently approved the *More Homes for Everyone Act*. One of the amendments to the *Planning Act* enacted by the Act are requires municipalities to refund Zoning By-Law Amendment and Site Plan application fees if legislated timeframes for decisions/approvals are not met. Furthermore, the Act also includes the ability for municipalities to deem Site Plan applications incomplete and require additional information be provided with the submission of an application.

1.2.1.2 *More Homes Built Faster Act, 2022*

The *More Homes Built Faster Act, 2022* received Royal Assent on November 28, 2023. The Act imposes a number of changes to the *Planning Act*, and other growth management and long-range planning initiatives at the municipal level, amongst changes to other pieces of legislation. Some of the planning related changes include:

- Increased housing targets by municipality;

- Removal of planning policy and approval responsibilities for upper tier municipalities in the province;
- Integration of Place to Grow and Provincial Policy Statement; and
- Changes to expand/support rental and affordable housing supply opportunities.

In response to the ongoing legislative changes with respect to planning application review, the Town has undertaken a review of their development review process and identified associated changes. These include a two-stage pre-consultation process to ensure complete application submission and Town requirements for processing Land Division applications with the removal of Regional planning authority. The recommendations provided herein are provided in the context of the anticipated state of application review processes provided by Town staff during the review.

1.2.2 *Municipal Act, 2001*

Part XII of the *Municipal Act* provides municipalities and local boards with broad powers to impose fees and charges via passage of a by-law. These powers, as presented in s. 391 (1), include imposing fees or charges by a municipality:

- (a) “for services or activities provided or done by or on behalf of it;
- (b) for costs payable by it for services or activities provided or done by or on behalf of any other municipality or any local board; and
- (c) for the use of its property including property under its control.”

This section of the Act also allows municipalities to charge for capital costs related to services that benefit existing residents. The eligible services for inclusion under this subsection of the Act have been expanded by the *Municipal Statute Law Amendment Act*. Moreover, the amendments to the Act have also embraced the broader recognition for cost inclusion within municipal fees and charges with recognition under s. 391 (3) that “the costs included in a fee or charge may include costs incurred by the municipality or local board related to administration, enforcement and the establishment, acquisition and replacement of capital assets.”

Fees and charges included in this review, permissible under the authority of the *Municipal Act*, would include development services fees related to engineering review that are not specifically provided for under the *Planning Act*.

In contrast to cost justification requirements under other legislation, the *Municipal Act* does not impose explicit requirements for cost justification when establishing fees for municipal services. In setting fees and charges for these services, however, municipalities should have regard for legal precedents and the reasonableness of fees and charges. The statute does not provide for appeal of fees and charges to the OLT; however, fees and charges may be appealed to the courts if municipalities are acting outside their statutory authority. Furthermore, no public process or mandatory term for fees and charges by-laws is required under the Act. There is, however, a requirement that municipal procedural by-laws provide for transparency with respect to the imposition of fees and charges.

1.2.3 *Building Code Act, 1992*

Section 7 of the *Building Code Act* provides municipalities with general powers to impose fees through passage of a by-law. The Act provides that:

“The council of a municipality...may pass by-laws

- (c) Requiring the payment of fees on applications for and issuance of permits and prescribing the amounts thereof;
- (d) Providing for refunds of fees under such circumstances as are prescribed;”

The *Building Code Statute Law Amendment Act* imposed additional requirements on municipalities in establishing fees under the Act, in that:

“The total amount of the fees authorized under clause (1)(c) must not exceed the anticipated reasonable cost of the principal authority to administer and enforce this Act in its area of jurisdiction.”

In addition, the amendments also require municipalities to:

- Reduce fees to reflect the portion of service performed by a Registered Code Agency;
- Prepare and make available to the public annual reports with respect to the fees imposed under the Act and associated costs; and
- Undertake a public process, including notice and public meeting requirements, when a change in the fee is proposed.

O.Reg. 305/03 (which has since been replaced by O.Reg. 332/12) was the associated regulation arising from the *Building Code Statute Law Amendment Act, 2002*. O.Reg. 332/12 provides further details on the contents of the annual report and the public process requirements for the imposition or change in fees. With respect to the annual report, it must contain the total amount of fees collected, the direct and indirect costs of delivering the services related to administration and enforcement of the Act, and the amount of any reserve fund established for the purposes of administration and enforcement of the Act. The regulation also requires that notice of the preparation of the annual report be given to any person or organization that has requested such notice.

Relating to the public process requirements for the imposition or change in fees, the regulations require municipalities to hold at least one public meeting and that at least 21-days notice be provided via regular mail to all interested parties. Moreover, the regulations require that such notice include, or be made available upon request to the public, an estimate of the costs of administering and enforcing the Act, the amount of the fee or change in existing fee and the rationale for imposing or changing the fee.

The Act specifically requires that fees “must not exceed the anticipated reasonable costs” of providing the service and establishes the cost justification test at the global *Building Code Act* level. With the Act requiring municipalities to report annual direct and indirect costs related to fees, this would suggest that *Building Code Act* fees can include general corporate overhead indirect costs related to the provision of service. Moreover, the recognition of anticipated costs also suggests that municipalities could include costs related to future compliance requirements or fee stabilization reserve fund contributions. As a result, *Building Code Act* fees modeled in this exercise include direct costs, capital-related costs, indirect support function costs directly consumed by the service provided, and corporate management costs related to the service provided, as well as provisions for future anticipated costs.

Chapter 2

Activity Based Costing Methodology and Approach

2. Activity Based Costing Methodology and Approach

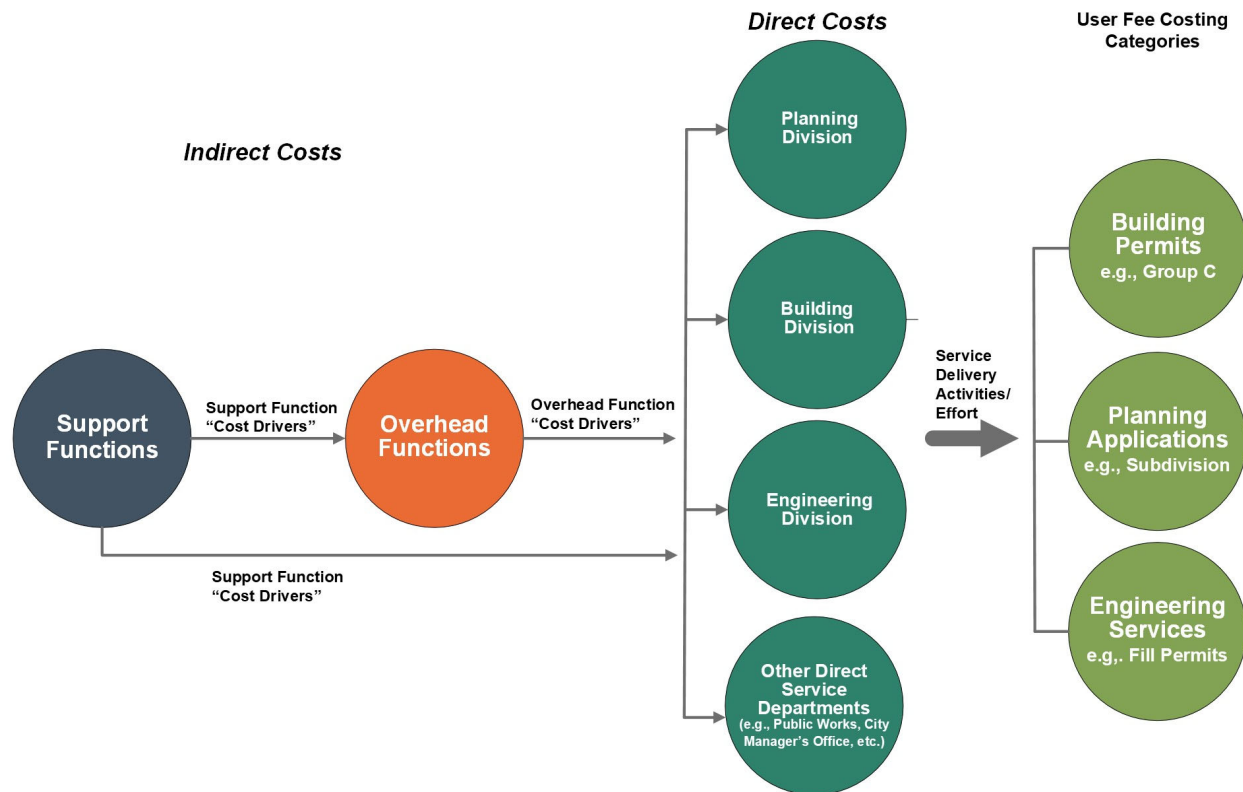

2.1 Methodology

An A.B.C. methodology, as it pertains to municipal governments, assigns an organization's resource costs through activities to the services provided to the public. Conventional municipal accounting structures are typically not well-suited to the costing challenges associated with application processing activities as these accounting structures are business unit focused and thereby inadequate for fully costing services with involvement from multiple business units. An A.B.C. approach better identifies the costs associated with the processing activities for specific application/permit types and thus is an ideal method for determining the full cost of processing and other user fee related activities.

As illustrated in Figure 2-1, an A.B.C. methodology attributes processing effort and associated costs from all participating municipal business units to the appropriate service categories (i.e. costing categories). The definition of these costing categories is further explained in Section 2.2. The resource costs attributed to processing activities and costing categories include direct operating costs, indirect support costs, and capital costs. Indirect support function and corporate overhead costs are allocated to direct business units according to operational cost drivers (e.g., information technology costs allocated based on the relative share of workstations supported). Once support costs have been allocated amongst direct business units, the accumulated costs (i.e., indirect, direct, and capital costs) are then distributed across the various costing categories, based on the business unit's direct involvement in the processing activities. The assessment of each business unit's direct involvement in the costing category review processes is accomplished by tracking the relative shares of staff processing efforts across the sequence of mapped process steps for each category. The results of employing this costing methodology provides municipalities with a better recognition of the costs utilized in delivering development review and approvals processes, as it acknowledges not only the direct costs of resources deployed but also the operating and capital support costs required by those resources to provide services.

Figure 2-1
Activity-Based Costing Conceptual Flow Diagram

2.2 Costing Category Definition

A critical component of the full cost fee review is the selection of development fee costing categories. This is an important first step as the process design, effort estimation and subsequent costing is based on these categorization decisions. It is also important from a compliance standpoint where, as noted previously, the *Planning Act* requires fees to be cost justified by application type consistent with the categorization contained within the Town's tariff of fees. Moreover, it is equally important in costing development engineering fees and building permit fees to understand the cost/revenue relationships within the Town's By-law, beyond the statutory cost justification for fees.

The costing categorization process for development fees occurred at the project initiation stage of the study process and through subsequent discussions with Town staff. Some of the key categorization decisions are summarized below:

- Planning application costing categories:
 - Reflect a two-stage application pre-consultation process;
 - a broader realignment of subdivision agreement and release processes from development engineering costing categories to planning applications and separate agreement processes for subdivision, site plan and condominium;
 - processing differences for Minor Variance applications by development type (i.e. residential and non-residential), as well as for draft approved and registered plans of Subdivision/Condominium;
 - anticipated process for Town approval authority of Land Division applications;
 - distinguish between simple, standard and complex processing characteristics for Official Plan Amendments and Zoning By-Law Amendments applications;
 - processing differences for Site Plan applications by development type (i.e. residential, non-residential and mixed-use), as well as for minor application amendments, communication towers, sales trailers and model homes; and
 - new costing categories for Heritage Permits (i.e. standard, delisting/de-designating, alteration/demolition), Street Name Change, Architectural Review, Letter of Undertaking, and Tree Removal Permits.
- Development engineering costing categories:
 - distinguish between development and non-development Site Alteration permits; and
 - new costing category for Environmental Compliance Approval (ECA) applications.
- Building permit costing categories were refined to better reflect the Town's by-law and development tracking system, including:
 - distinguish between low and medium density residential development types;
 - new costing categories for administrative processes, such as Amendments to Conditional Permits, Phased Permits, Application Resubmission, Written Compliance Request, Spatial Separation, Title Search, and Register/Discharge from Title; and

- new costing categories for permit types, i.e. Plumbing, Mechanical, and Other (e.g. fire alarm/sprinklers, solar panels, communication towers, storage tanks, change of use, etc.).

Tables 2-1 through 2-3 summarize the development fee costing categories for various development fees included in the A.B.C. model and later used to rationalize changes to the Town's development fee structure.

Table 2-1
Planning Application Fee Types and Costing Categories

Planning Application Types	Planning Application Costing Category
Pre-Consultation Meetings	Stage 1
	Stage 2
Subdivision	Plan of Subdivision
	Minor Redline Revision
	Major Redline Revision
	Extend Draft Approval
	Agreement
	Subdivision Agreement - Landscaping Processes
Minor Variance	Residential
	Non-Residential
	Draft Approved and Registered Plans of Subdivision/Condominium
Land Division	
Condominium	Plan of Condominium
	Agreement
Zoning By-law Amendment	Simple
	Complex
Lift Holding	
Official Plan Amendment	OPA - Simple
	OPA - Standard
	OPA - Complex
Heritage Permits	Standard
	Delisting or De-designating
	Alteration or Demolition
Site Plan	Residential
	Non-Residential
	Mixed-Used development
	Communication tower
	Sales trailer
	Model homes
	Agreement
	Minor Application - Minor Amendment (<= 300 sq.m)
	Minor Application - Minor Amendment (> 300 sq.m)
Part Lot Control	
Sign Variance	
Sign By-law Amendment	
Street Name Change	
Architectural Review	
Letter of Undertaking	
Tree Removal Permit

	Refund - Minimum
	Refund – Application Administrative functions performed
	Refund – Application reviewed but not issued
	Refund – Permit issued no construction commenced
	Written request for information concerning compliance with the Building Code and applicable law
	Spatial Separation Agreements or Agreements not otherwise noted in the schedule
	Title Search
	Registration on Title and Discharge from Title

2.3 Process Map Documentation

Once the costing categories have been established, the next step in the study process is to create a link between the direct service departments and the costing categories. This is done through the process of documenting the Town's review and approvals activities and generating process maps. The process maps were generated by starting with the processes established during the Town's prior reviews. The process maps from the 2018 Development Fee Review and 2021 Development Engineering Fee Review were reviewed and updated by Town staff to ensure that they were representative of the current internal processes of the Town. These process maps were then converted into data collection templates to receive level of processing effort estimates from Town staff.

2.4 Processing Effort Estimate Collection, Reasonability Check and Cost Allocations

Participating Town staff member's provided initial level of effort estimates for undertaking the activities documented in the process map templates. These are provided by staff within participating business units for typical process steps undertaken for each development fee costing category identified previously. The effort estimates received were applied against average annual application volumes for the period 2017-2022 to assess the average annual processing time per position spent on each development fee costing category.

Annual processing effort per staff position was measured against available staff processing capacity to determine overall service levels. The results of the initial capacity analysis were reviewed with Town staff. Effort estimates were subsequently refined by Town staff in consultation with the participating business units to better reflect current staff level utilization. These refinements provided for the recognition of efforts within the development fees review processes ancillary to direct processing tasks, i.e. application oversight activities by departmental senior management and administration and enforcement activities under the authority of the Building Code.

Two costing scenarios are provided in the analysis for each of development fee services (i.e. planning applications, development engineering and building permits). These scenarios reflect (1) an unrestricted service level where staff effort estimates were costed based on anticipated service levels irrespective of 2024 budgeted complement levels, and (2) a restricted service level where effort estimates were reduced to alignment with 2024 budgeted complement levels and current spending levels. The first scenario reflects the costs the organization would incur if sufficient staff complement were in place to meet planned levels of service. As considered in the previous development engineering fee review, where sufficient complement is not presently budgeted for the Town may consider contracted services. This scenario is provided to identify the potential additional complement requirements and fees that would result. The latter, the 2024 budget restricted service level scenario, reflects the fee recommendations at current Town costs of service. The staff capacity results underlying the costing model are provided in each of the respective chapters for planning application fees, development engineering fees and building permit fees.

2.5 Full Cost of Providing Development Application Review Services

As described in Section 2.1, the full cost of providing development application review and approvals services consist of direct, indirect, capital costs, and, in the case of building permits, contributions to the *Building Code Act* reserve fund. The following sections define each of these cost objects and how each of these are allocated to the individual costing categories.

2.5.1 Direct Costs

The following Town business units are directly involved in processing the development fees included in the review:

- Planning and Development Department
 - Planning Administration Division
 - Planning Services Division
 - Development Review Services
 - Policy and Heritage Planning
 - Zoning and Regulation Services
 - Building Services Division
 - Plans Examination Services
 - Building Inspection Services
 - Engineering Services Division
 - Development Engineering Services
 - Transportation Services
 - Infrastructure Engineering Services
 - Municipal Construction Services
- Operational and Fire & Emergency Services Department
 - Fire Administration Division
 - Fire Risk Management and Education Division
- Financial Services Department
 - Financial Planning and Risk Management Division
 - Taxation Services Division
 - Treasury Services Division

- Community Services Department
 - Administration Division
 - Facilities Division
 - Waste Management Division
 - Parks Maintenance Division
 - Roads & Traffic Division
 - Technical & Administrative Services Division
 - Parks Development and Design Division
- Chief Administration Office Department
 - Office of the CAO Division
 - Office of the Town Clerk Division
 - Mayor & Council Division
 - Strategic Initiatives Division
 - Corporate Communications and Creative Services Division
- Legal and Enforcement Services Department
 - Legal Services Division

Based on the results of the staff capacity analysis described above, the proportionate share of each individual's direct costs is allocated to the respective costing categories. The Town's 2023 Operating Budget was used to generate the direct cost allocations within the model and include the cost components such as:

- Labour costs (e.g. salary, wages, and benefits);
- Employee related costs (e.g. mileage, conferences, training, etc.);
- Utility costs;
- Administrative costs (e.g. postage, printing, supplies, etc.);
- Operating supplies;
- Services/contracted work;
- Vehicles and equipment costs; and
- Other miscellaneous service costs.

It should be noted that transfers to reserves (reserve funds) and transfers to capital have been excluded from the direct service costs, as these reflect financing costs and not service costs. Moreover, capital costs have been provided for separately within the analysis.

2.5.2 Indirect Costs

An A.B.C. review includes not only the direct service costs of providing service activities but also the indirect support costs that allow direct service business units to perform these functions. The method of allocation employed in this analysis is referred to as a step costing approach. Under this approach, support function and general corporate overhead functions are classified separate from direct service delivery departments. These indirect cost functions are then allocated to direct service delivery departments based on a set of cost drivers, which subsequently flow to development fee categories according to staff effort estimates. Cost drivers are a unit of service that best represent the consumption patterns of indirect support and corporate overhead services by direct service delivery business units. As such, the relative share of a cost driver (units of service consumed) for a direct department determines the relative share of support/corporate overhead costs attributed to that direct service department. An example of a cost driver commonly used to allocate information technology support costs would be a business unit's share of supported personal computers. Cost drivers are used for allocation purposes acknowledging that these business units do not typically participate directly in the development review process, but that their efforts facilitate services being provided by the Town's direct business units.

Table 2-4 summarizes the support and corporate overhead functions included in the development fees calculations and the cost drivers assigned to each function for cost allocation purposes. The indirect support and corporate overhead cost drivers used in the fees model reflects accepted practices within the municipal sector by municipalities of similar characteristics.

Table 2-4
Indirect Support and Corporate Overhead Functions and Cost Drivers

Indirect Cost Functions	Cost Driver
<u>Indirect Support Functions</u>	
Human Resource Services	Full time equivalents
Technology and Innovation	Personal computers
Records Management	Facility square footage
Asset Management Services	Operations vehicles
Operations Fleet Maintenance	Operations vehicles
Other Vehicle Maintenance	Operations vehicles
Building Inspectors Vehicles	Building vehicles
Engineering Inspection Vehicle	Engineering vehicles
Fire - Fleet Maintenance	Fire vehicles
By-Law Officers Vehicles	By-Law vehicles
Municipal Offices-Inside	Facility square footage
<u>Indirect Corporate Overhead Functions</u>	
Members of Council	Agenda items
Mayor & Council's Office	Agenda items
Chief Administrative Officer	Gross operating expenditures
Clerks Administration	Agenda items
Project Management	Gross operating expenditures
Finance & Admin. Services	Gross operating expenditures
Treasury Services	Gross operating expenditures
Corporate Revenues & Expenses	Gross operating expenditures
Legal Services	Gross operating expenditures

2.5.3 Capital Costs

The inclusion of capital costs within the full cost development fees calculations follows a methodology similar to indirect costs. Market-equivalent rents and/or replacement value of assets commonly utilized to provide direct business unit services have been included to reflect capital costs of service. The replacement value approach determines that annual asset replacement value over the expected useful life of the respective assets. This reflects the annual depreciation of the asset over its useful life based on current asset replacement values using a sinking fund approach. This annuity is then allocated across all fee categories based on the capacity utilization of direct business units. For market-equivalent rents, the annual rent costs are calculated based on market rate and floor space utilized and then allocated to the various fee categories in a similar manner.

The market-equivalent rate applied for facility space is \$29.39/square foot. This information is based on indexing the rates from prior studies based on the non-residential building construction price indexes published by Statistics Canada.

In addition to facility space, annual capital replacement costs have been estimated for computer hardware, software and the AMANDA development processing infrastructure and administration. Annualized project costs were also included for the building permit portal upgrade, electronic plans review solution update, and ERP Workday system. These annual capital costs estimates were then allocated to the fee categories based on staff resource capacity utilization.

2.6 Building Permit Stabilization Reserve Fund Policy

The *Building Code Act* recognizes the legitimacy of creating a municipal reserve fund to provide for service stability and mitigate the financial and operational risk associated with a temporary downturn in building permit activity. Specifically, a reserve fund should be maintained to reduce the staffing and budgetary challenges associated with a cyclical economic downturn and the requirement for ongoing legislative turnaround time compliance. Without such a reserve fund, reduced permit volumes during a downturn could result in budgetary pressures and the loss of certified Town building staff, which would be difficult to replace during the subsequent recovery when mandatory permit processing turnaround times apply.

Although the Act does not prescribe a specific methodology for determining an appropriate reserve fund, municipalities have developed building permit reserve funds providing service stabilization. Previous fee review studies undertaken by the Town established the need for a Building Permit Stabilization Reserve Fund. A target reserve fund balance was established based on the witnessed reduction in building permit activity during recessionary periods when compared with the long-run average to ensure that sufficient reserve fund levels are attained to sustain operations through a downturn in permit activity and acknowledging the Town's responsibility to manage some of the cost impacts.

The 2005 Study measured the impact of historic development on presumed long-term staffing levels to arrive at a target reserve fund balance of 2.07 years of annual building permit costs, including direct, indirect and capital costs. The balance in the Town's reserve fund at the beginning of 2023 was \$15.6 million.

Chapter 3

Planning Application Fees Review

3. Planning Application Fees Review

3.1 Staff Capacity Utilization Results

The planning application review process considered within this assessment involves to varying degrees, staff from multiple departments and divisions across the organization. The planning application processing effort estimates in this report reflect the Town's current business processes and modifications in response to recent legislative changes. To measure the reasonableness of the processing effort estimates an assessment relative to historic average annual application volumes as prepared. Average planning application volumes for the period 2017-2022 and 2024 budgeted staff complement were considered in the assessment.

Table 3-1 summarizes the staff capacity utilization and number of full-time equivalent (FTE) positions attributable to planning application processes. Planning application processes would consume approximately 26 FTE staff positions across the organization based on the unrestricted service level scenario. This scenario would require approximately 3.5 FTE staff position more than currently budgeted in 2024 (i.e. restricted service level scenario). Adjusted for 2024 budgeted complement and compared to average annual staff capacity utilization in the 2018 fee review, the Town deploys approximately 12 more FTE annual for planning applications today. This increase in staff resource consumption reflects changes in underlying application volumes, new costing categories included in the modeling and a realignment of efforts from the Development Engineering Services from engineering fees to planning applications.

The following observations are provided based on the results of the capacity analysis presented in Table 3-1.

- On average approximately 42% (13.6 FTEs out of 33.6 FTEs) of available staff resources within Planning Services Division would be fully consumed processing planning applications based on the unrestricted service level scenario. These include the business units of Development Review Services, Policy and Heritage Planning, and Zoning and Regulation Services. Adjusting for 2024 budgeted complement under the restricted service level scenario, approximately 11 FTE staff positions are reflected in the fee calculations. These divisions continue to

provide the largest amount of effort to planning applications within the Town. This level of planning recovery is comparable with levels of participation in other Greater Toronto Area (G.T.A.) municipalities, reflecting a significant amount of non-planning application processing effort provided by planning departments for corporate management, policy initiatives, OLT appeals, and public information tasks.

Table 3-1
Planning Application Resource Utilization by Department/Division (in FTE)

Town Department/Division	FTEs within Costing Model	Planning Applications		
		Capacity Utilization	Unrestricted Service Level Scenario FTE	Restricted Service Level Scenario FTE
Planning Services Division	33.6	41.8%	13.6	11.0
Engineering Services Division	43.0	20.9%	9.0	8.1
Strategic Initiatives	5.6	18.9%	1.1	1.1
Community and Marketing Services & Parks	28.0	2.1%	0.6	0.6
Office of the Town Clerk	15.0	3.8%	0.6	0.6
Legal and By-law Services	29.0	1.1%	0.3	0.3
Chief Administrators Office	5.0	3.3%	0.2	0.2
Fire & Emergency Services	14.0	1.1%	0.2	0.2
Building Services Division	25.3	0.4%	0.1	0.1
Corporate Services (Finance)	24.0	0.4%	0.1	0.1
TOTAL	222.5	11.5%	25.7	22.1

- The Engineering Services Division provides the second largest allocation of annual staff resources in the costing model. Nine FTE staff positions would be fully consumed annually by planning application review for the business units of Development Engineering Services, Transportation Services, Infrastructure Engineering Services, and Municipal Construction Services. This accounts for approximately 20% of their available staff resources. Considering the 2024 budgeted complement under the restricted service level scenario for the Engineering Services Division, the fee calculations include cost recovery for 8.1 FTE staff positions.
- A number of other Town business units such as Strategic Initiatives, Community and Marketing Services & Parks, and Office of the Town Clerk that provide relatively small allotments of effort to planning applications (3 F.T.E.s). These

business units provide a small number of staff positions with specific planning application review requirements.

3.2 Planning Applications Annual Costing Results

Table 3-2 presents the Town's annual costs of providing planning application review and approval services. The annual costs reflect the organizational direct, indirect, and capital costs for the two scenarios described in section 2.4, i.e. (1) unrestricted service level, and (2) the restricted service level (2024 budgeted complement). The annual cost and revenue estimates are provided in aggregated for all application types based on existing fees and average historic planning application volumes levels. Costs and revenues are denominated in 2023\$, with revenues modelled from current planning application fee schedules applied to average application volumes and charging parameters. The charging parameters for these applications were derived from historical applications and development fee revenue data provided by Town staff. It should be noted that average annual revenues have not been estimated for Heritage Permits, Architectural Review, and Tree Removal Permits as fees are currently not imposed for these services.

Annual costs of planning applications under the unrestricted service level scenario would total \$5.9 million. Reflecting the restricted service level scenario, the overall costs of service total \$5.1 million annually. In total, direct service costs represent 62% of annual costs (\$3.2 million). Indirect and capital costs constitute 27% (\$1.4 million) and 11% (\$0.5 million) of total costs, respectively. Estimated annual planning application revenues total \$3.0 million. This represents a total cost recovery of approximately 52%-60% under the unrestricted and restricted service level scenarios respectively.

Section 3.3 provides the comparison of costs and revenues for each costing category and related full cost recovery fee recommendations for each scenario.

Table 3-2
Annual Planning Application Costs and Revenues (2023\$)

	Unrestricted Service Level Scenario	Restricted Service Level Scenario
<u>Annual Costs by Component</u>		
Direct Costs	3,621,697	3,157,835

Planning Application Fees	(3,043,256)	(3,043,256)
Total Annual Planning Application Fee Revenues (2023\$)	(3,043,256)	(3,043,256)
Annual (Surplus)/Deficit	2,851,223	2,036,177

3.3 Planning Application Type Impacts

The *Planning Act* requires fees to be cost justified at the application type level. Moreover, OLT decisions require that there is consideration given to the marginal costs of processing applications of varying size and complexity. In this regard, planning application review processes have been costed at the application type and sub-type level. This level of analysis goes beyond the statutory requirements of cost justification by application type to better understand costing distinctions at the application sub-type level to provide the basis for a more defensible fee structure and better alignment with revenue expectations.

Table 3-3, summarizes the per application processing costs for each scenario and compares them with per application revenues derived from the Town's current fee structure and historical average application characteristics.

Table 3-3
Planning Application Costs and Revenues by Costing Category (2023\$)

3.4 Rate Structure Analysis

Calculated fee structure alternatives are provided for both scenarios based on the cost revenue impacts presented in Table 3-3 and historic average application characteristic underlying planning applications. The fee schedule alternatives for the unrestricted and restricted service level scenarios are provided in Table 3-4. These alternatives are provided in comparison to the Town's current planning application fees.

Chapter 4

Development Engineering Fees Review

4. Development Engineering Fees Review

4.1 Staff Capacity Utilization Results

The effort estimates were provided by Town staff and applied to anticipated annual application volumes. This enabled an assessment of the average annual processing time per staff position spent on development engineering services. Annual processing effort per staff position was compared with current staff complement to inform the unrestricted service level scenario. As summarized in Table 4-1, this assessment determined that approximately 17.9 FTE staff positions would be fully consumed by these activities annually. This scenario would require approximately 3.3 additional FTE staff positions in the Engineering Services Division than currently budgeted in 2024 (i.e. restricted service level scenario). As such, this has resulted in operational impacts to service delivery requiring peer review services.

Table 4-1
Development Engineering Resource Utilization by Department/Division (in FTE)

Town Department/Division	FTEs within Costing Model	Development Engineering		
		Capacity Utilization	Unrestricted Service Level Scenario FTE	Restricted Service Level Scenario FTE
Engineering Services Division	43.0	41.3%	17.8	14.5
Community and Marketing Services & Parks	28.0	0.5%	0.1	0.1

TOTAL	222.5	8.0%	17.9	14.6

4.2 Development Engineering Annual Costing Results

Table 4-2 presents the Town's annual costs of providing development engineering review and inspection services. The annual costs reflect the organizational direct, indirect, and capital costs for unrestricted and restricted service level scenarios. The annual cost and revenue estimates for all costing categories is based on typical application characteristics for small subdivisions (\$1 million in infrastructure), large subdivisions (\$4.6 million in infrastructure) and site plans (\$335,000 in infrastructure). Annual costs and revenues are denominated in 2023\$, with revenues modelled from current development engineering and site alteration fee schedules applied to average application volumes and charging characteristics. Average annual revenues have not been estimated for environmental compliance approval applications as this would represent services for which fees are currently not imposed by the Town.

Annual costs of development engineering fees under the unrestricted service level scenario would total \$3.6 million. Adjusted costs to reflect 2024 budgeted staff complement levels under the restricted service level scenario, the annual costs of service total \$3.0 million annually. In total, direct service costs represent 68% of annual costs (\$2.0 million). Indirect and capital costs constitute 20% (\$0.6 million) and 12% (\$0.4 million) of total costs, respectively. Estimated annual development engineering revenues total \$3.3 million. This represents a total cost recovery of approximately 92%-111% under the unrestricted and restricted service level scenarios respectively.

Table 4-2
Annual Development Engineering Services Costs and Revenues (2023\$)

	Unrestricted Service Level Scenario	Restricted Service Level Scenario
<u>Annual Costs by Component</u>		
Direct Costs	2,432,609	2,022,498
Indirect Costs	697,933	580,778
Capital Costs	448,748	367,222
Total Annual Development Costs (2023\$)	3,579,289	2,970,499
<u>Estimated Annual Revenues</u>		
Development Engineering Fees	(3,288,495)	(3,288,495)
Total Annual Development Engineering Fee Revenues (2023\$)	(3,288,495)	(3,288,495)
Annual (Surplus)/Deficit	290,794	(317,997)

4.3 Development Engineering Fee Type Impacts

Table 4-3 summarizes the costs and revenues of providing development engineering services by costing category for each scenario. Average revenues per costing category were derived from the Town's current fee structure and historical application characteristics identified by staff during the costing category determination stage of the assignment. The following observations are provided for the types of development engineering fees included in the modeling under the restricted service level scenario:

- Subdivision design review and inspection fees represent the largest portion of services, accounting for \$1.6 million annually. These costs reflect a reallocation of development engineering staff effort from development engineering fees to planning application fees, as determined through the process mapping end effort estimation stage of the assignment. In the context of these service costs, current subdivision design review and inspection fees are recovering approximately 130% of full costs. The fee structure generally produces greater than cost recovery from larger applications (as defined by the capital costs of infrastructure) to assist in the under recovery from smaller applications.
- Site plan review and inspection activities account for \$1.2 million in annual costs of service. In total, current fees are generally recovering full costs of service at

99% cost recovery. Similar to the cost recovery performance witnessed for subdivisions, residential in-fill lots generally under recover the full costs of service, which are support by larger site plan applications.

- Site alteration permits recover approximately 47% of annual costs, with non-development site alterations of less than 500 m³ recovering marginally less at 40% of cost recovery.
- Environmental compliance approvals are a new service being provided by the Town for which the modeling was provided to determine a fee. The costing model identifies a full cost fee per application based on the underlying processing activities of \$9,514.

Table 4-3
Development Engineering Services Costs and Revenues by Costing Category
(2023\$)

Category	Avg. Cost / Application		Avg. Revenue / Application	Cost Recovery %	
	Unrestricted Service Level Scenario	Restricted Service Level Scenario		Unrestricted Service Level Scenario	Restricted Service Level Scenario

Environmental Compliance Approval (ECA)	10,323	9,514	-	n/a	n/a

4.4 Rate Structure Analysis

The development engineering fee structure recommendations are detailed in Table 4-4. This table summarizes the Town's current fees for subdivision, site plan, site alteration permits and environmental compliance approvals, as well as the calculated fees to achieve full cost recovery under unrestricted and restricted service level scenarios. The fee calculations are based on the costing results by costing category provided in the prior section and maintenance of the Town's exiting fee structures. The gradation of fee structure by infrastructure intervals and minimum fees have been maintained in the fee recommendations.

Table 4-4
Comparison of Development Engineering Fees
under the Town's Current By-Law and Fee Calculation Scenarios

Development Engineering Fee By-Law - Type	Existing Fees (2023\$)		Calculated Fees (unrestricted service level)	Calculated Fees (restricted service level)

Chapter 5

Building Permit Fees Review

5. Building Permit Fees Review

5.1 Staff Capacity Utilization Results

The building permit review process considered within this assessment principally involves the Town's Buildings Services Division, as well as other divisions with direct involvement to a lesser degree. The building permit review processing effort estimates in this report reflect the Town's anticipated business processes under the unrestricted service level scenario. These effort estimates were revised to align with the Town's 2024 budgeted complement in a subsequent restricted service level scenario. The staff capacity assessment was based on average permit volumes and characteristics for the majority of permit types during the period of 2018-2022.

Table 5-1 summarizes the staff resource capacity utilization and number of FTE positions attributable to building permit activities. These include staff positions from Building Services, as well as for all other Town departments with direct involvement in building permit processes. Building permit activities would consume approximately 40 FTE staff positions across the organization based on the unrestricted service level scenario. This scenario would require approximately 9.2 FTE staff position more than currently budgeted in 2024 (restricted service level scenario). Compared to average annual staff capacity utilization in the 2018 fee review, with adjustment for 2024 budgeted staff complement levels, the Town deploys approximately 3.1 more FTE staff positions annually for building permit processes in 2024.

The following observations are provided based on the results of the capacity analysis presented in Table 5-1.

- The Building Services Division contributes 85% of the annual processing effort for building permit processes annually. The unrestricted service level scenario would suggest a staff complement of 34 FTEs would be required to provide the level of service underlying the effort estimates. Adjusting this complement to 2024 budgeted levels under the restricted service level scenario would reduce the amount of effort included in the modeled costing to 25 FTE staff positions from the Building Division.

- Fire & Emergency Services Department provides the second largest allocation of staff resources to activities required under the *Building Code Act*. In total, approximately 2.1 FTE staff positions are consumed by these activities annually.
- Division in planning services contributes efforts equal to 2 FTE staff positions annually to building permit activities.
- Other divisions in finance, legal and development engineering collectively provide the equivalent of 1.8 staff positions of effort annually.

Table 5-1
Building Permit Resource Utilization by Department/Division (in FTE)

Town Department/Division	FTEs within Costing Model	Building Permits		
		Capacity Utilization	Unrestricted Service Level Scenario FTE	Restricted Service Level Scenario FTE

TOTAL	222.5	17.9%	39.9	30.7

5.2 Building Permit Annual Costing Results

Table 5-2 presents the Town's annual costs of providing building permit services in aggregate. The annual costs reflect the two costing scenarios, i.e. unrestricted service level, and the restricted service level scenario. The costs are provided by component including the organizational direct, indirect, and capital costs. Annual revenues reflect actual building permit revenues for the period 2018-2022 underlying the staff effort estimates, indexed to 2023\$.

Annual costs of building permits under the unrestricted service level scenario would total approximately \$7.1 million. Reflecting the 2024 budgeted staff complement under

the restricted service level scenario, the overall costs of service totals \$5.5 million annually. Direct service costs represent 67% of annual costs (\$3.6 million). Indirect constitute 19% (\$1.0 million) of total costs, and capital costs represent 15% (\$0.8 million) of total costs. Estimated annual building permit revenues total \$7.1 million. This represents a total cost recovery of approximately 100%-130%, with an average annual contribution to the Building Permit Reserve Fund of approximately \$1.6 million under the restricted service level scenario. Fees would only recover costs of service under the unrestricted service level scenario, with no reserve fund contribution provided.

Table 5-2
Annual Building Permit Costs and Revenues (2023\$)

	Unrestricted Service Level Scenario	Restricted Service Level Scenario
<u>Annual Costs by Component</u>		
Direct Costs	4,680,372	3,650,015
Indirect Costs	1,318,860	1,020,913
Capital Costs	1,083,256	808,986

Total Annual Development Engineering Fee Revenues (2023\$)	(7,064,927)	(7,064,927)
Annual (Surplus)/Deficit	17,561	(1,585,013)

5.3 Full Cost Building Permit Fees

Table 5-3 summarizes the Town's costs of providing building permit services on a per permit basis for both the unrestricted service level and restricted service level scenarios. The costs per permit type reflects the full cost of service by costing category as defined in Chapter 2. Costs are compared with revenues derived from the application of current permit fees to average permit charging parameters (e.g. average permit size). Historical permit applications were provided by Town staff to determine average permit size characteristics for revenue purposes.

The findings in Table 5-3 indicates that building permits for new construction are generally recovering the full costs of service, where as alteration and other minor permits are under recovering full costs. This is a trend generally witnessed in municipal building permit reviews. The table also provides the costs permit fee for new administrative costing categories (e.g. conditional permit amendments, resubmissions, written compliance request, etc.), plumbing/mechanical permits, and other permits (e.g. fire alarm/sprinklers, solar panels, storage tanks, change of use, etc.).

5.4 Fee Structure Recommendations and Building Code Act Reserve Fund Design

5.4.1 Building Code Act Reserve Fund Design

The *Building Code Act* financial reporting regulations recognize the legitimacy of creating a municipal reserve fund(s) to manage Building Code responsibilities. While the Act does not prescribe a specific methodology for determining an appropriate reserve fund, municipalities have developed building permit reserve funds providing service stabilization. Building permit reserve funds should be developed to reduce the staffing and budgetary challenges associated with a cyclical economic downturn and the requirement for ongoing legislative turnaround time compliance. Without such a reserve fund, reduced permit volumes during a downturn could result in severe budgetary pressures and the loss of certified Town building staff, which would be difficult to replace during the subsequent recovery when mandatory permit processing turnaround times apply. A reserve fund stabilization policy will provide the Town with the ability to retain a sustainable portion of the qualified staff across a future economic downturn, while recognizing the Town's need to manage resources through resource management until permit volumes improve during an economic recovery.

The Town's prior development fee review studies recommended a policy for the creation of a Building Code Act Stabilization Reserve Fund. The policy established a reserve fund for the purposes of stabilizing service delivery during periods of economic downturn, particularly in light of the regulated turnaround times for permit review and inspection activities. The 2005 Study measured the impact of historic development on presumed long-term staffing levels to arrive at a target reserve fund balance of 2.07 years of annual direct costs. The target balance was measured to ensure that the Town had a measure of determining when an appropriate balance was achieved to mitigate potential impacts of service delivery related to future downturns in activity.

Based on discussions with Town staff, the target reserve fund balance has been recommended to be adjusted to reflect broader industry practice and recognition for current economic conditions. As such that the reserve fund target has been adjusted to 3.0 times total costs (i.e. including indirect and capital costs). This change is being proposed to account for both direct and indirect costs being maintained during a

downturn in permit activity. Based on current costing results, the 3.0 years of annual total costs would equate to \$16.5 million (i.e. \$5.5 million x 3.0).

The Town's reserve fund balance at the beginning of 2023 was \$15.6 million. Factoring the current reserve fund position into the overall cost recovery performance at average historic volume levels, the Town's current permit fees would ensure sustainability in approximately 1 year under the restricted service level scenario. It should be noted that the that the Town anticipates significant one-time draws from the reserve fund for capital expenditures in 2024. As such, the term to sustainability may be extended beyond one year. Under the unrestricted service level scenario, average annual permit fee increases of 2.4% would allow the Town to achieve the 3.0 x multiple in five year (approximate time for the next fee review).

5.4.2 Rate Structure Analysis

Accounting for financial performance at average historic permit volumes and 2024 budgeted staff complement levels under the restricted service level scenario, current building permit fees are sufficient to recover the full costs of service and provide funding for sustainability over a period of economic downturn. However, if the Town was to increase its staff complement consistent with the unrestricted service level scenario, fees would increase by approximately 2.4% annually each year over the next 5 years. Table 5-4 provides the calculated fees under both scenarios for the Town's consideration. Moreover, the Town should monitor financial performance in coming years to ensure operational funding sustainability and re-examine building permit fees when the reserve fund target multiple is secured.

Mechanical - System add-ons (space heater, roof top unit, etc.)	Flat	-	1,708	1,239

Chapter 6

Conclusions

6. Conclusion

Summarized in this technical report is the legislative context for the imposition of development application fees (i.e. planning application fees, development engineering fees, and building permit fees), the methodology undertaken, full cost of service determination, and the calculated fees to achieve full cost recovery and building permit reserve fund sustainability. In developing the fee calculations for the Town's consideration, cost recovery fee structure costs were determined for two scenarios (1) an unrestricted service level scenario, and (2) a restricted service level scenario reflective of 2024 budgeted levels. The unrestricted service level scenarios is provided for consideration to guide future operational investments and inform future fee adjustments.

The intent of this review is to provide the Town with fee structure recommendations, for their consideration, to appropriately recover the service costs from benefiting parties relative to the costs of service being provided. The Town will ultimately determine the service level investments underlying the fee calculations, level of cost recovery, and phasing strategy that is suitable for their objectives in this context. Furthermore, planning application fees continue to be evaluated in light of potential changes to development review processes in the Town as a result of changes to the *Planning Act* made through the *Cutting Red Tape to Build More Homes Act*, *More Homes for Everyone Act*, and *More Homes Built Faster Act* amendments.

The fee calculations based on the findings of this study are presented in Tables 3-4 for planning application fees, Table 4-4 for development engineering fees, and Table 5-4 for building permit fees, respectively. Table 6-1 provides the overall anticipated annual financial performance the three development fee service areas for each scenario. Under the unrestricted service level scenario, annual costs of development fees total approximately total \$16.6 million. Under the restricted service level scenario, annual costs of development fees total approximately total \$13.5 million. The calculated fees provide for full cost recovery with provision for building permit services sustainability.

Table 6-1
Estimated Annual Financial Performance with Development Fee Calculation
Scenarios (2023\$)

Unrestricted Service Level Scenario Annual Costs and Revenues	Planning Application Fees	Development Engineering Fees	Building Permit Fees	Total Development Fees
<u>Annual Costs by Component</u>				
Direct Costs	3,621,697	2,432,609	4,680,372	10,734,677
Indirect Costs	1,617,693	697,933	1,318,860	3,634,485
Capital Costs	655,090	448,748	1,083,256	2,187,094

Note 1:

Complex amendment – A proposal involving a change in land use designation or policy which requires major technical studies and extensive analysis and consultation.

Simple amendment – A site specific proposal which is small in scale and involves a land use with minor and predictable impacts.

Note 2:

Complex amendment – associated with an Official Plan Amendment, Plan of Subdivision Application, an application that requires the review of technical support documents or studies or any amendment deemed to be complex by the Commissioner of Planning and Development.

Note 3:

Minor - includes small scale building additions, temporary use by-laws, telecommunication towers, accessory structures, amendments to site plan agreements for alterations to site works and related plans. May also include other small-scale developments as determined by the Commissioner of Planning and Development.

Major - All other forms of development and application types.

Peer Review:

An applicant is responsible for 100% of the Municipality's full costs of undertaking a Peer Review of a development application study/report. The review fees are to be paid in advance of any work being undertaken.

- 1 **Town Benchmark Contribution:** This fee is applied to all new residential subdivision developments to assist in establishing/reestablishing local survey benchmarks (vertical and horizontal) throughout the Town. The established fee is meant to recover staff time and other costs associated with the annual Benchmark contract and are based on the actual contract costs from the previous year and the averaged residential building permits issued for the previous two years.
- 2 **Engineering Peer Review Administration Fee:** This fee is intended to recover staff time and costs for managing and administering Engineering Peer Review undertakings funded by the Developer/Subdivider which are not collected through other Town mechanisms.

- 3 **Engineering Structure Inspection Fee:** This fee is applied to all new developments where municipally owned structures (e.g. retaining walls, culverts, bridges, etc.) with a span equal to 3.0m or greater will be constructed. The established fee is to recover the costs associated with completing the mandatory inspection of each structure in accordance with the requirements of the Ontario Structures Inspections Manual. Structures of this size are required to be inspected every two years regardless of the timing for assumption through the subdivision process.
- 4 **Site Alteration Permit:** A permit issued by the Commissioner pursuant to the provisions of the Site Alteration By-law 7425-18 and the Site Alteration Guidelines for the purpose of dumping, removing of topsoil from land, or the alteration of the grade of land by any means including placing fill, clearing and grubbing, the compaction of soil or the creation of impervious surfaces, or any combination of these activities.
- 5 **Permit Condition Amendment Fee:** Where the total permitted fill quantity is made up of multiple sources and/or the fill source is not initially confirmed at the time of permit issuance, the approved permit conditions may be amended with each accepted source site, up to the maximum permitted fill quantity. A Permit Condition Amendment Fee would apply for each request to amend the permit
- 6 **Permit Extension Fee:** A Permit Renewal Fee shall be required should additional time be required to complete the original approved scope of work, the approved permit may be extended one (1) time to double the permit term.
- 7 **Site Alteration Overfill Fee:** If through a site alteration permit, it has been determined that an applicant has placed more fill than what was approved, an additional fee shall be paid by the Applicant(s). Refer to Guidelines to Site Alterations in the Town of Whitby, Appendix E.
- 8 **Road Damage Contribution / Inspection Fee:** A per cubic meter of imported/exported material fee for degradation/long term damages of public infrastructure and staff inspection cost may be required prior to final approval of the Site Alteration Permit. Land developers are required to provide a financial security equivalent to the applicable road damage contribution / inspection fee in lieu of the road damage contribution / inspection fee.
- 9 **Road Replacement Fee (Inc. Inspection and Administration):** If it is determined by the Town that the roads will not support the projected trucking activity, the Applicant will be required to pay a Road Replacement Fee which will cover the cost to reconstruct the roadway following completion of the trucking activities.
- 10 **Immediate Road Damage Refundable Deposit:** A refundable security is required for the potential repair/replacement of the roadway and entrance immediately in the vicinity of the site works due to trucking activity within the public right of way.
- 11 **Development Site Area:** The total area disturbed due to construction works.
- 12 **Residential Infill Development (or Infill Lot):** The development of a new or re-development of an existing lot with a new building or structure beyond that of the original footprint, that includes an increase of the lot imperviousness, altering of drainage pattern and/or grading of the lots. These developments are subject to a Grading, Servicing and Drainage Permit application as per the Town's Infill Development By-law 8067-24 and a Building Permit Application where an Engineering Review Fee and refundable deposits are required, as per the Town's Consolidated Fees & Charges By-law.

Report Title: Heritage District Review and Update: Status Report

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 31-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

Roger Saunders, Commissioner of
Planning and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Dave Johnson
Planner II – Heritage
x3166

1. Recommendation:

1. **THAT report PDP 31-25 be received for information, as an update to the on-going Review and Update of the Brooklin HCD Plan and the Werden's Plan Neighbourhood HCD Plan.**

2. Highlights:

- The Town, along with its retained consultants, Stantec, is currently undertaking a review and update of its two Heritage Conservation District (HCD) Plans - Brooklin HCD Plan and Werden's Plan Neighbourhood HCD Plan. The purpose of this report is to update Council on work to-date on this project.
- A Public Information Centre (PIC) was held on April 10th, 2025, with a concurrent survey seeking public input. The PIC was attended by approximately 18

residents from both the Werden's Plan Neighbourhood HCD and the Brooklin HCD.

- Stantec has completed a Phase One Background and Analysis report, summarized in this report.

3. Background:

Enabled by the Ontario Heritage Act, Heritage Conservation Districts (HCDs) are identified by municipalities as locations where history is embraced, and heritage resources are to be preserved. Broadly speaking, an HCD allows municipalities to protect an entire area containing heritage character, buildings, and/or landscapes.

The Town of Whitby currently has two HCDs – Brooklin and Werden's Plan Neighbourhood (Southwest quadrant of Downtown Whitby), each with their own Heritage Conservation District Plan (HCD Plan). An HCD Plan is a policy and guidance document that helps protect cultural heritage resources and manage change within an HCD.

To implement the HCD Plan, the Town uses a heritage permit system for certain things like additions, new design, or major alterations to buildings to manage change over time.

A brief overview, highlighting key elements of the Town's two HCDs, is provided below.

Brooklin HCD:

- Designated in 2007 as the Town's first HCD.
- Contains 185 properties.
- A former rural village with a main commercial corridor and adjacent residential streets.

Werden's HCD:

- Designated in 2017, and approved, as amended, by the Local Planning Appeal Tribunal in 2019.
- Contains 250 properties.
- Town's largest concentration of historic residences.

The boundaries of each HCD are illustrated in Attachment #1.

4. Discussion:

The Review and Update of The Town's two existing Heritage Conservation District Plans was initiated in January 2025. The purpose of the review and update is to:

- continue to best conserve the cultural heritage resources within each district, while also encouraging compatible redevelopment;
- bring the HCD Plans into conformity with recent legislative changes and current land use policies;
- create more user-friendly HCD Plans for the public and Town staff; and

- provide greater clarity and enhance consistency between the two HCD Plans, where appropriate.

The HCD Plans Review and Update will not include a review or update of the existing HCD boundaries.

The project is taking place in two Phases, as follows:

Phase 1: Background Review (January to June 2025):

- Background Review and data collection;
- Town staff and Heritage Whitby Advisory Committee (HWAC) meetings and presentations;
- Technical Advisory Committee (TAC) meeting;
- Public Information Centre (PIC) 1;
- Fieldwork;
- HCD Plans Review; and,
- Committee/Council meeting.

Phase 2: HCD Plans Update (July to December 2025):

- Draft Updated HCD Plans;
- TAC 2;
- PIC 2;
- HWAC presentation of draft updated HCD Plans;
- Final HCD Plans; and,
- Committee/Council meeting.

Since January 2025, site visits and significant background work has been undertaken to gain an understanding of each HCD Plan and collect relevant data.

On April 10, 2025, a Public Information Centre (PIC) 1 was held for the project. Related materials, including links to an engagement survey, were posted to the Town's HCD website following the event. Feedback on the existing Plans was also gathered from the project's Technical Advisory Committee and the Town's Heritage Whitby Advisory Committee.

Phase 1 Report

Stantec has prepared a Phase One Background and Analysis Report (Attachment #2) on the Town's two Heritage Conservation District Plans which includes a review of existing conditions, an engagement summary, Strengths/Weaknesses/Opportunities/Threats (SWOT) Analysis of each HCD Plan, and preliminary recommendations for their updates to the HCD Plans. The Phase 1 Report identifies what is working well; what has been challenging to implement; opportunities to refine and/or enhance policies or guidelines; as well as how any threats to existing HCDs can be mitigated through the review and updated HCD Plans. The Phase 1 Report also identifies priorities and direction for next steps in the review and update of the HCD Plans.

The following is a summary of the key findings of the SWOT analysis (Section 8 in Attachment 2).

Brooklin HCD Plan

Overall, Stantec's SWOT analysis has determined the policies and guidelines of the Brooklin HCD are generally being met.

Strengths of the Brooklin HCD Plan include:

- limited alterations of many heritage properties;
- minimal unsympathetic alterations to properties (including to windows, doors, painting, siding and roof cladding); and
- new development that has largely followed the policies and guidelines of the HCD Plan.

The primary weakness of the Brooklin HCD Plan was identified as being a relatively brief and broad Statement of Cultural Heritage Value or Interest (CHVI) and lack of a clear list of Heritage Attributes. In addition, Stantec identified challenges discerning contributing vs. non contributing properties as well as policy gaps for sympathetic development and infill, sustainability and accessibility, and signs.

Opportunities identified in the report for Brooklin HCD Plan, that could help mitigate the threat of development pressures include:

- An updated Statement of Cultural Heritage Value of Interest to include Heritage Attributes for the HCD to assist the Town when determining whether new development, additions, public works, etc. have a positive or negative impact on the Districts' attributes.
- Enhanced HCD Plan education and alignment by developing a digital form/checklist with heritage guidelines as well as material regarding the benefits of HCDs and potential effects on property insurance.
- Alignment of HCD Plan with updated provincial (Ontario Heritage Act) and municipal (Official Plan) policies.

The main threat to the Brooklin HCD continues to be development pressures.

Werden's Plan Neighbourhood HCD Plan

Stantec's SWOT analysis for the Werden's HCD Plan also identified the policies and guidelines of the Werden's HCD Plan are generally being met.

Strengths of the Werden's HCD Plan include:

- new development, additions, and alterations that has largely followed the policies and guidelines of the HCD Plan.
- limited alteration of public and private landscapes.
- many of the heritage properties in the HCD have seen relatively little change since the establishment of the District.

The primary weaknesses of the Werden's HCD Plan were identified as the Statement of Cultural Heritage Value and Heritage Attributes as well as a lack information regarding compatible sustainable design and accessibility improvements.

Opportunities to enhance the character of the HCD and mitigate the threats posed by development pressures include:

- an updated Statement of Cultural Heritage Value to include Heritage Attributes for the HCD;
- guidance where sympathetic intensification of existing land-uses may be suitable;
- contemplation of whether a number of mid-20th century residences along Byron Street should be considered "contributing" properties to the HCD as well as applicable policies and guidelines for alteration, additions, or replacement of these buildings;
- enhanced HCD Plan education and alignment by developing a digital form/checklist with heritage guidelines; and;
- updated policies for tree planting and removal, and additional dwelling units.

The greatest threat to the Werden's Plan HCD, similar to the Brooklin HCD, was considered to be development pressures, particularly given the neighbourhood's prevailing low density nature in proximity to intensification areas and corridors.

Preliminary Recommendations and Directions:

Based on the consultant's review and input from the public, Stantec has made the following preliminary recommendations (Section 9 in Attachment 2):

- Bring Brooklin and Werden's Plan HCD's into conformity with recent changes to the Ontario Heritage Act. Updated HCD Plan policies and objectives will also strengthen alignment with Official Plan, Zoning, and other applicable Town plans and strategies.
- Update the Statements of Cultural Heritage Value or Interest and more clearly articulate the list of Heritage Attributes for both HCD's.
- Align classification system/nomenclature of heritage properties across the two HCD Plans and ensure alignment with updates to the Ontario Heritage Act.
- Incorporate mapping which identifies the classification of each property within each HCD Plan.
- Incorporate / strengthen policies and/or guidelines on the following topics:
 - Sustainability and accessibility;
 - New development and alterations;
 - Demolitions;
 - Signs - including their type and placement;
 - Tree removals and replacement; and
 - Construction and placement of additional dwelling units.

Finally, the consultant has also recommended increased public awareness and a checklist for heritage attributes to assist with implementation of the policies and guidelines in the HCD Plans.

Next Steps

Over the coming months, Stantec will work with Town staff to develop Draft Updates for both the Werden's HCD Plan and Brooklin HCD Plan. Phase 2 will also include consultation with the public, HWAC, and the internal TAC. The final recommended updates to the HCD Plans will then be brought forward for Council's consideration.

5. Financial Considerations:

Budget for the Town's Heritage Conservation District Plan Review and Update was included in previously approved Capital Budgets, and as carry forward items for the 2025 Budget.

6. Communication and Public Engagement:

In Person Engagement

The Town of Whitby and Stantec held PIC 1 on April 10th, 2025, to introduce residents of the two Heritage Conservation Districts to the project. A notice was sent to all property owners in the Brooklin and Werden's Plan Neighbourhood HCDs two (2) weeks in advance of the PIC.

The PIC took place at Town Hall and included a series of display boards providing general information about the project, and District-specific information for each of the HCDs. This included information about the current objectives for each District, the characteristics that make these areas special, and items for the community to consider when providing comments about what they would like to see in the updated plans.

Town of Whitby Staff and Stantec team were available at the PIC to answer questions and explain the project. Information was also provided on how residents and business owners can continue to engage in the project.

Online engagement

In addition to in-person engagement opportunities, links to an initial engagement survey were made available on the Town's Heritage Website. The surveys were distributed to PIC attendees and remained posted on the project web page from April 11 to May 2, 2025. A total of nine (9) responses were received - 2 from Brooklin and 7 from Werden's Plan. Survey questions focused on general challenges and opportunities managing change and redevelopment in Heritage Conservation Districts.

All project information, including copies of materials from the PIC, is being hosted on the Town's [Heritage Conservation Districts](#) webpage. A detailed description of

engagement done to date can be found in Section 6 of Stantec's report (Attachment 2).

7. Input from Departments/Sources:

Stantec attended and presented at the March 11, 2025, meeting of Heritage Whitby Advisory Committee. Stantec presented an overview of the Brooklin and Werden's HCD Plans and the review and update project to the Committee. Committee members were then given an opportunity to provide feedback on strengths and weaknesses of the two HCD Plans as well as the clarity/ user-friendliness of the HCD plans.

A Technical Advisory Committee (TAC) of Town Staff has been established for the project. The first TAC meeting was held on April 10th, 2025. Stantec delivered a presentation, provided an overview of the HCD's and the project and sought feedback from the group.

8. Strategic Priorities:

Protecting heritage properties supports Pillar #1 of the Community Strategic Plan, Whitby Neighbourhoods, by promoting and strengthening the local arts, culture, heritage, and the creative sector.

Heritage conservation further supports Pillar #2, Whitby's Natural and Built Environment, by enhancing community connectivity and beautification.

Limitations and Sign-off

The conclusions in the Report titled Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis are Stantec's professional opinion, as of the time of the Report, and concerning the scope described in the Report. The opinions in the document are based on conditions and information existing at the time the scope of work was conducted and do not take into account any subsequent changes. The Report relates solely to the specific project for which Stantec was retained and the stated purpose for which the Report was prepared. The Report is not to be used or relied on for any variation or extension of the project, or for any other project or purpose, and any unauthorized use or reliance is at the recipient's own risk.

Stantec has assumed all information received from the Town of Whitby (the "Client") and third parties in the preparation of the Report to be correct. While Stantec has exercised a customary level of judgment or due diligence in the use of such information, Stantec assumes no responsibility for the consequences of any error or omission contained therein.

This Report is intended solely for use by the Client in accordance with Stantec's contract with the Client. While the Report may be provided to applicable authorities having jurisdiction and others for whom the Client is responsible, Stantec does not warrant the services to any third party. The report may not be relied upon by any other party without the express written consent of Stantec, which may be withheld at Stantec's discretion.

Executive Summary

The Town of Whitby (the Town) retained Stantec Consulting Ltd. (Stantec) to review and update the Town's two established Heritage Conservation District (HCD) Plans. The purpose of the review and update is to improve the consistency between the two HCD Plans, reflect the current land use and heritage policy context, bring the HCD Plans into conformity with recent legislative changes, and create more user friendly HCD Plans for public and staff. This project is a two-phase undertaking: Phase 1 includes analysis of the existing conditions of the two HCDs, the applicable policy framework, and the completion of a strengths, weaknesses, opportunities, and threats (SWOT) review. Phase 2 includes preparation of updated HCD Plans that reflect the Phase 1 findings. Changes to the established HCD boundaries are not a part of this review and update.

This report is the result of the Phase 1 background and analysis. It contains the following sections:

Background of the Existing HCD Studies and Plans

The Brooklin HCD Plan was designated under Part V of the *Ontario Heritage Act* (OHA) in 2007 by By-law 6085-08 and 6086-08. The overall purpose of the Brooklin HCD Plan is to conserve the heritage value identified in the Heritage Character Statement, including a balance between the built heritage, views, and landscape elements. The three objectives of the HCD Plan are focused on helping the public and the Town manage change within the HCD.

The Werden's Plan Neighbourhood HCD (Werden's HCD) was designated under Part V of the OHA in 2017 by 7297-17 and approved as amended by the Local Planning Appeal Tribunal on May 13, 2019.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

Executive Summary

May 2025

Summary of Applicable Policy Framework

The Project Team completed background review of the applicable provincial, regional, and municipal planning frameworks as they relate to the conservation of heritage properties and cultural heritage landscapes. The existing land use policies and zoning for each HCD was also reviewed. The Town is currently undertaking an Official Plan and Zoning By-law review that includes updates to relevant cultural heritage policies. In general, the background review identified a policy framework that is supportive of the HCD Plans, though some conflicts and inconsistencies exist between HCD Plans and other policy frameworks this can be addressed through the HCD Update process.

Existing Conditions of the HCDs and Evolution of the HCD Plans

A review of the existing conditions of each HCD was completed to measure how the HCDs have performed since their designations and determine whether their HCD Plan objectives are being met. To identify the existing conditions of the HCDs, the Project Team collected inventory data during the field program using ArcGIS Collector. The existing conditions review also included summaries of the built form, landscaping, streetscaping, and vegetation, views and vistas, and transportation infrastructure in each HCD. To understand the changes that have occurred in the HCDs, available heritage permits, and development applications were reviewed and existing conditions compared to the 2006/2012 HCD study inventories. Understanding the evolution of each HCD helped to determine if the current policies are effectively meeting the goals and objectives of the each HCD. Both HCDs were determined to have remained relatively stable over time, with changes that comply with HCD Policies and Guidelines.

Consultation Summary

Phase 1 consultation included a kick-off meeting with Town staff in January 2025, a walking tour of each HCD with Town staff in February 2025, a Heritage Whitby Advisory Committee meeting in March 2025, and a Technical Advisory Committee (TAC) and Public Information Centre (PIC) 1 in April 2025. Attendees at PIC 1 and responses to

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

Executive Summary

May 2025

the PIC 1 survey indicated that, in general, the community feels that the objectives of the HCDs are being met, and the process for obtaining heritage permits has been straightforward. Some residents and TAC members identified particular areas of the HCD Plans that they would appreciate be updated. These areas included guidance related to additional dwelling units, tree removal/replacement, and clarity on lot coverage/setbacks for new construction.

SWOT Review and Preliminary Recommendations

Following completion of the SWOT review, the preliminary recommendations for updates to the Brooklin HCD and Werden's HCD Plans include:

- Inclusion of language and timelines to comply with changes to the OHA since 2023
- Review and clarifications to Statements of Cultural Heritage Value or Interest and identification of heritage attributes for each HCD
- Review and classification of properties that meet two or more criteria of *Ontario Regulation 9/06* for each HCD
- New policies and guidelines regarding new development, sustainability and accessibility, tree removal and planting, additional dwelling units, and demolition
- Alignment of policies and guidelines with existing Town planning documents

The Executive Summary highlights key points from the report only; for complete information and findings, the reader should examine the complete report.

Werden's HCD	Werden's Plan Neighbourhood Heritage Conservation District

1 Introduction

1.1 Study Purpose

The Town of Whitby (the Town) retained Stantec Consulting Ltd. (Stantec) to review and update of the Town's two established Heritage Conservation District (HCD) Plans: the Brooklin HCD Plan and the Werden's Plan Neighbourhood HCD Plan (Werden's HCD). The purpose of the review and update is to improve the consistency between the two HCD Plans, reflect the current land use and heritage policy context, bring the HCD Plans into conformity with recent legislative changes, and create more user friendly HCD Plans for the public and staff. This project is a two-phase undertaking: Phase 1 includes analysis of the existing conditions of the two HCDs, the applicable policy framework, and the completion of a strengths, weaknesses, opportunities, and threats (SWOT) review. Phase 2 includes preparation of updated HCD Plans that reflect the Phase 1 findings. Changes to the established HCD boundaries are not a part of this review and update.

This report is the result of the Phase 1 background review and analysis. It contains the following sections:

- background of the existing HCD studies and plans
- applicable policy framework
- existing conditions of the HCDs
- evolution of the HCD Plans
- consultation summary
- analysis of the HCD Plans
- SWOT review and recommendations

2 Background on the Existing HCD Studies and Plans

2.1 Brooklin HCD

2.1.1 Introduction

The Brooklin HCD was designated under Part V of the *Ontario Heritage Act* (OHA) in 2007 under By-laws 6085-08 and 6086-08. It was the first HCD designated by the Town and is located north of Highway 407 in Whitby (Figure 1). It contains 185 properties, composed mostly of residential properties, followed by commercial properties, parks, natural areas associated with Lynde Creek, mature trees, and landmark public buildings.

The creation of the 2006 Brooklin HCD Study was influenced by development pressures and urban expansion on the Village of Brooklin. The Whitby Local Architectural Conservation Advisory Committee had identified a large number of individual properties within the village for heritage significance. Brooklin was identified as a candidate for an HCD for its historic building stock and small village character, despite the heavy traffic and rapid urbanization influences (BRAY Heritage *et al.* 2006). The HCD Study was prepared by BRAY Heritage, Taylor/Hazell Architects Ltd., and Archaeological Services Inc. and adopted by Council in September 2006. An overview of the Brooklin HCD Study is contained in Section 2.1.2. The HCD Plan was also prepared by BRAY Heritage, Taylor/Hazell Architects Ltd., and Archaeological Services Inc. An overview of the HCD Plan is contained in Section 2.1.3.

2.1.2 HCD Study

The 2006 HCD Study provided an overview of the historical growth and development of Brooklin. The community was established in the mid-19th century, first developing along a plank road between Lake Ontario and Lake Scugog through the east portion of the village in 1845. Another plank road through the west portion of the village followed the

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

following year, now forming the layout of Highway 12. The village was surveyed in the 1840s and early 1850s. With the establishment of a post office in 1847, the village was named Brooklin. One of its earliest industries was a flour mill established on the banks of Lynde Creek in 1840, by John and Robert Campbell. In 1871, the Whitby, Port Perry and Lindsay Railway line opened through the village.

In the mid to late 19th century the village became home to prominent early families who constructed grand residences. Fires in 1880-1881 slowed the local economy. The economy was further impacted in the early 20th century with the decline of the milling industry in the community. The paving of Highway 12 through the community in the mid-1920s increased the amount of cottage-bound traffic passing through the community and provided a boost to local merchants. In the mid-20th century, Meadowcrest, a 600-residence subdivision, was laid out west of the village. Brooklin remained a small rural village until the late 20th century, when the province's growth strategy for the Greater Toronto Area extended municipal services to Brooklin and expanded its population (BRAY Heritage *et. al* 2006).

The HCD Study completed analysis and established a boundary of the HCD based on characteristics outlined in the *Ontario Heritage Toolkit* (the Toolkit) (Government of Ontario 2006). The HCD Study analysis determined that even with new subdivisions around the old village, the essential elements of the original village still existed. While the building stock and architecture was determined to be modest, the combination of the buildings, their heritage integrity, and the landscapes formed a rare surviving example of a rural Ontario village.

The Heritage Character Statement prepared for the Brooklin HCD Study is as follows:

Brooklin's heritage character derives primarily from its largely intact commercial main street, its modest scale of buildings, its predominant landscape features (parks, residential lots, creek), its landmark public buildings, its community event venues, and its retention of buildings and settings from all stages of its evolution.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

Character Defining Elements

The key elements that define local character are (in the downtown core):

- Commercial buildings next to or including residential units
- Street trees and landscaping in side yards
- Modest individual buildings with open side yards
- Mix of wood frame and brick masonry building construction
- Residential units set back; commercial built to street line
- Oddly shaped lots caused by the diagonal street alignment (in the rest of the central area)
- Balance of buildings and landscape (ie. large lots and gardens, small buildings)
- Views between buildings of trees/creek
- Mix of building ages and styles
- Mixing together of grand and modest housing
- Varied residential setbacks
- Landmark buildings at important junctions (retail, churches and mill)
- Community gathering places (park, churches, library, school, fraternal organizations)

(BRAY Heritage et al. 2006)

The Brooklin Heritage Character Statement and character defining elements include a balance between the level of significance between built heritage and landscape features, including views between buildings to the trees and creek. The HCD Study includes an inventory of built heritage resources (Appendix A of the HCD Study) and cultural heritage landscapes (Appendix B of the HCD Study). Inventory entries contained a brief overview of each resource including a description, evaluation, heritage significance, a photograph, and location map.

2.1.3 HCD Plan

The overall purpose of the Brooklin HCD Plan is to conserve the heritage value identified in the Heritage Character Statement, including the “sense of ‘porosity’ in the

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

District streetscape so that buildings are never so dominant that they block out views of natural elements” (BRAY Heritage *et al.* 2007). The three objectives of the HCD Plan are focused on helping the public and the Town manage change within the HCD. The HCD Plan is divided three sections including Policy, Guidelines, and Implementation.

No changes were made to the Heritage Character Statement and character defining elements from the HCD Study to the HCD Plan. The HCD boundary was modified slightly to include parts of the village core that contained significant built heritage or cultural heritage landscapes and areas flanking Way Street to capture cultural and natural heritage resources.

The overall goal of the HCD Plan is “to conserve and enhance the District’s heritage character while encouraging compatible new development” (BRAY Heritage *et al.* 2007).

The objectives of the 2007 HCD Plan are as follows:

Objectives for Landscape/Streetscape

- to encourage the retention and enhance of existing tree-lined streetscapes
- to retain the existing street pattern without widening existing pavement and road allowances
- to municipally adopt Highway 12 (Baldwin Street) and substantially reduce heavy traffic on this route
- to preserve and reinforce existing views along streets of landscape features such as mature street trees, Lynde Creek and Kinsmen Park, and of landmarks such as United Church
- to ensure that municipal improvements to public infrastructure in the District’s public realm, such as upgrades to public utilities, roadways and sidewalks, enhance the heritage character of the District
- to restore or reinstate, where possible, previously existing landscape and streetscape features of heritage value, such as the street trees in front yard setbacks (Baldwin Street), and fences on front and side yards (e.g Baldwin and Cassels)

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

Objectives for Heritage Buildings

- to retain and conserve the heritage buildings identified in the District Study and evaluated as Excellent, Very Good and Good
- to foster continuing use of heritage buildings and all measures available to the municipality to prevent their demolition
- to encourage retention and restoration of original features of heritage buildings, based on thorough archival and pictorial evidence and the assessment provided in the District Study
- to encourage property owners to maintain the exteriors of heritage buildings to prevent deterioration as well as damage from fire or the elements
- to provide additional protection to heritage resources in the District, Council shall consider designating under Part IV of the Ontario Heritage Act individual buildings (including interior elements), structures, and cultural landscapes, as identified in further study
- to address the option, but not encourage, moving structures within the District, as an alternative to demolition, identify recipient sites for such structures with the District that will, once the structure has been relocated, support and enhance District character

Objectives for New Development

- to encourage 'heritage friendly development' that is compatible with the arrangement, scale, architectural styles and materials that constitute the District's heritage character
- to provide a mix of land uses that will support and strengthen the existing commercial, residential and community service uses in the downtown core
- to fully plan for the adaptive re-use of existing and the redevelopment of lands within the District, prepare an urban design plan for the District, with terms of reference that ensure harmonization of the urban design plan with the policies and guidelines of the Heritage Conservation District Plan

Objectives for Economic Development

- to support revitalization of Brooklin's downtown core as a local service and regional speciality retail and tourism destination in ways that maintain the District's heritage character

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

Objectives for Community Support

- to foster appreciation of heritage character of the District through public consultation, dissemination of information on best conservation practices, and support for community events

The remainder of the HCD Plan sets forth the District policies and illustrative guidelines to achieve the above objectives, outlining policies and guidelines for heritage buildings, new construction, non-heritage buildings, streetscapes, landscapes, and archaeological sites. In-depth case studies are included for examples on applying the HCD guidelines. The HCD Plan concludes with its implementation process including the heritage permit process, an overview of available financial incentives, and direction for management and enforcement of the HCD Plan.

2.2 Werden's Plan Neighbourhood HCD

2.2.1 Introduction

The Werden's HCD was designated under Part V of the OHA in 2017 under By-law 7297-17 and approved as amended by the Local Planning Appeal Tribunal on May 13, 2019. It is located in the centre of Whitby, southwest of the downtown (Figure 2). It contains 250 properties, composed mostly of residential, with two churches, parks, and several institutional properties.

Interest in pursuing an HCD within Downtown Whitby began as early as the mid-1990s when an Official Plan (OP) policy identified Downtown Whitby, or a part of it, to be examined as a potential HCD. Following the establishment of the Brooklin HCD, interest continued to grow in establishing additional HCDs within Downtown Whitby. In 2012, the *Downtown Whitby Heritage Conservation District Study* was awarded to a consulting team led by Goldsmith Borgal & Company Limited (Goldsmith Borgal & Company Ltd 2013).

The *Downtown Whitby Heritage Conservation District Study* identified three separate areas for study. This included the Perry's Plan Neighbourhood, located to the north of the Study Area, the Four Corners area, located northeast of the Study Area, and the Werden's Plan Neighbourhood. In 2013, the study team recommended proceeding with the Werden's HCD to serve as a pilot project for the other two identified areas. This approach was supported by Town staff and Town council. In 2016, the *Heritage Conservation District Plan for Werden's Plan Neighbourhood, Whitby* was prepared by Goldsmith Borgal & Company Ltd. in association with Paul Dilse and The Landplan Collaborative, with the assistance of the Olde Whitby Neighbourhood Association and the Town of Whitby.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

2.2.2 HCD Study

The 2012 HCD Study provided an overview of the historical growth and development of downtown Whitby and Werden's HCD. The community grew around the intersection of Brock Street and Dundas Street. In 1846 landowner Peter Perry had 24 blocks of land surveyed north of Dundas Street to stimulate growth. Development in the Study Area accelerated in 1852 when Whitby was designated as the county seat of Ontario County and a courthouse was constructed within the present-day HCD. Around this same time, the Grand Trunk Railway was expected to be built through Whitby. These two events triggered a boom for the community. In 1854 Asa Werden had his land south of Dundas Street surveyed into 64 full blocks and eight half blocks to capitalize on the anticipated development (Goldsmith Borgal & Company Ltd 2013: 4).

This building boom proved short lived as Canada's economy entered a recession beginning in 1857 which severely curtailed development in Whitby and much of present-day Ontario. As a result, much of the land surveyed as Werden's Plan remained undeveloped and property owners tended to be members of Ontario County's professional class such as lawyers and judges connected to the County. Many of the large residences built by these prominent individuals remain in the Study Area (Goldsmith Borgal & Company Ltd 2013: 4).

By the late 19th century, most of Ontario's small towns, Whitby included, were in decline as people gravitated towards the province's industrializing urban centres like Toronto and Hamilton (Drummond 1987: 30). Within Whitby, this trend reversed beginning in the early 20th century as transportation improvements led to increasing interconnection with Toronto (Dominion Bureau of Statistics 1953). As a result, many of the vacant lots within the Study Area were developed during the mid-20th century (Goldsmith Borgal & Company Ltd 2013: 4).

While the Werden's HCD contains a variety of building styles, ages, and footprints, similarities that unite the neighbourhood were identified, including:

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

- Lots with front yards, deep backyards, and side yards that support mature trees
- Placement of detached garages at the rear or side of a property
- Structures one to two storeys in height
- Predominance of gable and hip roofs
- Predominance of brick exteriors, particularly red brick
- Prevalence of front porches

(Goldsmith Borgal & Company 2013: 29)

The HCD Study also identified six landmarks: the Methodist Tabernacle, the King Street School, the Ontario County Registry Office, the Ontario County Courthouse, St. Arsenije Sremac Serbian Orthodox Parish, and the Whitby Central Library.

The HCD Study recommended the following objectives to conserve the cultural heritage value or interest (CHVI) of the Werden's HCD:

- Preservation of the historic residential character of single-detached houses set on relatively large, and sometimes very large, lots planted in lawn, trees, and shrubs
- Preservation of the architectural integrity of the district's six landmarks
- Protection and enhancement of the street-tree canopy and the retention of interior streets showing a rural profile; and
- Enhancement of the district's livability by improving physical connections between Werden's Plan Neighbourhood District and Perry's Plan Neighbourhood District

(Goldsmith Borgal & Company 2013: 29)

2.2.3 HCD Plan

2.2.3.1 Cultural Heritage Value or Interest

The overall purpose of the HCD Plan is to preserve the Werden's HCD's small-town historic character and to manage physical change in the neighbourhood over the long term. To accomplish this, the HCD Plan contains a statement of cultural heritage value, goals, objectives, policies, guidelines, and an implementation strategy. The statement of

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

cultural heritage value or interest notes that the Werden's HCD retains many features from what it describes as "Whitby's unusually long historic period (mid-19th to mid-20th century) during which time Whitby remained a stable small town whose built-up part was confined to its 19th century footprint" (Goldsmith Borgal & Company 2017: 23).

The HCD Plan identified the following heritage attribute for the District:

- Patterns among residential buildings, views of historic landmarks, character of the public realm and features of private open space.

(Goldsmith Borgal & Company 2017: 26)

To illustrate the significance of each property within the HCD, the Plan divided properties into three classes to provide specific guidance regarding objectives for buildings:

- Historic properties: This class of properties includes those developed when Whitby was a stable small town, before its expansion in the mid-20th century
- Complementary properties: ...property that is compatible with the district's historic character...This class of properties includes properties dating, or appearing to date, from the mid-20th century and later
- Uncharacteristic properties: ...property that is neither historic nor complementary.

(Goldsmith Borgal & Company 2017: 33)

Objectives for Land Use

The HCD Plan contains the following land use objectives:

- To align land use designations with the neighbourhood's existing character
- To maintain the low-density residential appearance prevalent across the neighbourhood
- To recognize the place and function of five historic landmarks within the neighbourhood – St. Mark's United Church (Methodist Tabernacle), the former R.A. Sennett School (King Street School), the former Ontario County Registry Office, the Centennial Building (Ontario County Courthouse) and St. Arsenije Sremac Serbian Orthodox Church (St. Andrew's Church of Scotland) – and one

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

contemporary landmark- Whitby Central Library- and to prefer uses having public benefit and minimal disruption of building fabric and grounds when new uses may be proposed for them

(Goldsmith Borgal & Company 2017: 35)

Objectives for Buildings

The HCD Plan contains the following objectives regarding buildings:

- To protect the neighbourhood's historic residential streetscapes
- To maintain the neighbourhood's six landmarks
- To retain houses erected during Whitby's historic period, to retain exemplary houses which were built after the mid-20th century, and to favour the retention of the neighbourhood's remaining single-detached houses which to some degree complement houses erected during Whitby's historic period
- To consider buildings which are neither from the historic period nor are complementary to be candidates for demolition and replacement
- To encourage building maintenance and repair
- To encourage restoration of lost or hidden features and materials on buildings from the historic period where it is based on documentary and as-found evidence about the building or on comparable local examples
- To avoid damaging wall cladding material and trim, comprising distinctive features, disguising facades with incongruous elements or otherwise diminishing a building's heritage attributes
- To maintain the existing mix of single-detached house sizes as additions and new dwellings are accommodated in the neighbourhood
- To keep an ample amount of open space in front yards, side yards, and backyards when new dwellings are constructed
- To limit the height of residential additions and new dwellings out of respect for the prevailing height of houses in the neighbourhood
- To favour gable or hip roof dwellings
- To prefer locating floor space added onto an existing house away from public view
- To acknowledge the prevailing front yard setback in the siting of new dwellings

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

- To locate accessory buildings in side yards of backyards
- To prefer red brick as the wall cladding material for a new dwelling

(Goldsmith Borgal & Company 2017: 36-37)

Objectives for the Public Realm and Open Space

The HCD Plan contains the following objectives regarding the public realm and private open space:

- To discourage transforming district streets that show a rural section of shoulders or ditches into streets with a constructed urban section of curb and gutter
- To undertake a study of existing and proposed road character in advance of any public works projects proposed for the road right-of-way
- To facilitate the safe crossing of pedestrians from Werden's Plan Neighbourhood across major streets
- To support conditions suitable for the preservation of mature street trees
- To coordinate the renewal of the street tree canopy, replanting with a variety of indigenous shade trees, and taking into consideration the placement of concrete sidewalks, the burial of hydro wires and the viewing of historic architecture
- To acknowledge, preserve and enhance public open space in Celebration Square, the unopened Gilbert Street West right-of-way and former R.A. Sennett schoolyard, the courthouse block and Rotary Centennial Park
- To interpret in Rotary Centennial Park the history of Werden's Plan, the neighbourhood that has developed from it and the Town's first purchase of property
- To maintain the neighbourhood's generous amount of private open space in lawn, trees, shrubs, and herbaceous plants
- To minimize front yard parking
- To locate a new driveway, the width of a single car, in a property's side yard
- To discourage lot severance

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

2 Background on the Existing HCD Studies and Plans

May 2025

- To consider the merits of consolidating lots where buildings are neither from the historic period nor are complementary
- To protect significant trees on private property

(Goldsmith Borgal & Company 2017: 37-38)

Werden's Plan Neighbourhood HCD Plan Boundary

Disclaimer: This document has been prepared based on information provided by others as cited in the Notes section. Stantec has not verified the accuracy and/or completeness of this information and shall not be responsible for any errors or omissions which may be incorporated herein as a result. Stantec assumes no responsibility for data supplied in electronic format, and the recipient accepts full responsibility for verifying the accuracy and completeness of the data.

3 Policy Framework

3.1 Introduction

The responsibilities for long-term land use planning in Ontario is a shared responsibility between the Province, the Region, and municipal governments. The Province sets out broad direction for land use planning through the *Planning Act* and the *Provincial Planning Statement* (PPS). Decisions at the municipal level are required to be consistent with the PPS.

In some parts of the province, provincial plans provide more detailed and geographically specific policies to meet certain objectives, such as managing growth. Municipal decisions in areas with a defined provincial plan have a more stringent standard for compliance, as decisions are required to “conform” or “not conflict” with the policies in these plans.

Other Provincial regulatory systems are connected to land use planning, including the OHA. The OHA enables municipalities and the Province to preserve Ontario’s heritage by protecting heritage properties and archaeological sites. The OHA also provides specific guidance on implementing heritage conservation in HCDs.

At the regional and local level, OPs are the primary vehicle for implementing provincial land use policy. With OPs being updated regularly to reflect provincial interests, these documents are used as a tool to guide the integration of matters that impact land use decisions, such as infrastructure, housing, economic development, and cultural heritage. In addition, zoning is a tool enabled through the *Planning Act* and guided by municipal plans. Zoning further regulates the characteristics of the use of land within municipalities.

Together, the provincial and local policies and plans provide the framework for protection of built and cultural heritage resources. The following sections outline the existing policy framework within the Town of Whitby.

3.2 The Planning Act

The legal basis of Ontario's land use planning system is outlined by the *Planning Act* (Government of Ontario 1990). This legislative document identifies the approach to planning and assigns responsibilities and duties to those involved in the land use decision-making process, including policy development, land subdivision, development control, administration, and public participation. It sets out requirements for land use planning across the province.

Under the *Planning Act*, the Minister, the council of a municipality, a local board, a planning board, or the Ontario Land Tribunal (OLT) are responsible for carrying out the conservation of features of significant architectural, cultural, historical, archaeological, or scientific interest (Government of Ontario 1990). A key purpose of the *Planning Act* is to integrate matters of provincial interest into provincial and municipal planning decisions. Under the Act, the Minister of Municipal Affairs and Housing may also issue provincial statements on matters related to land use planning that are of provincial interest. Further policy guidance on these matters of provincial interest is provided in the PPS.

3.3 The Provincial Planning Statement, 2024

The PPS provides policy direction on matters of provincial interest related to land use planning and development. The PPS is applied province wide. On August 20, 2024, the Province announced the release of the new PPS, issued pursuant to Section 3 of the *Planning Act* (Government of Ontario 2024, Government of Ontario 1990). The new PPS replaces both the Provincial Policy Statement from 2020 and *A Place to Grow: Growth Plan for the Greater Golden Horseshoe*, also known as the Provincial Growth Plan (Government of Ontario 2020a and 2020b). The merging of these planning documents created a comprehensive, streamlined provincial planning framework to guide land use planning.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

The PPS includes properties designated under Part IV, Part V, or VI of the OHA as protected heritage properties. Under the PPS, “protected heritage property” is defined as follows:

property designated under Parts IV or VI of the Ontario Heritage Act; property included in an area designated as a heritage conservation district under Part V of the Ontario Heritage Act; property subject to a heritage conservation easement or covenant under Part II or Part IV of the Ontario Heritage Act; property identified by a provincial ministry or prescribed public body as property having cultural heritage value or interest under the Standards and Guidelines for the Conservation of Provincial Heritage Properties; property protected under federal heritage legislation; and UNESCO World Heritage Sites.

(Government of Ontario 2024: 50)

Relevant policies within the PPS that speak to the conservation of heritage resources include the following, with terms that are italicized being defined terms within the PPS:

- *Protected heritage property*, which may contain *built heritage resources* or *cultural heritage landscapes*, shall be *conserved*. (4.6.1)
- Planning authorities shall not permit development and site alteration on lands containing *archaeological resources* or areas of *archaeological potential* unless the *significant archaeological resources* have been *conserved*. (4.6.2)
- Planning authorities shall not permit *development* and *site alteration* on *adjacent lands* to *protected heritage property* unless the *heritage attributes* of the *protected heritage property* will be *conserved*. (4.6.3)
- Planning authorities are encouraged to develop and implement:
 - a. archaeological management plans for conserving *archaeological resources*; and
 - proactive strategies for conserving *significant built heritage resources* and *cultural heritage landscapes*. (4.6.4)

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

- Planning authorities shall engage early with Indigenous communities and ensure their interests are considered when identifying, protecting and managing *archaeological resources, built heritage resources and cultural heritage landscapes*. (4.6.5)
- A coordinated, integrated and comprehensive approach should be used when dealing with planning matters within municipalities, across lower, single and/or upper-tier municipal boundaries, and with other orders of government, agencies, boards, and Service Managers including managing natural heritage, water, agricultural, mineral, and cultural heritage and archaeological resources. (6.2.1 c)

(Government of Ontario 2024)

The PPS does not specifically identify HCDs, but it provides the framework for conserving protected heritage properties as seen in Section 4.6. In addition, the PPS outlines that development adjacent to protected heritage properties is required to assess the impacts to heritage resources. The PPS includes properties designated under Part V of the OHA as protected properties, thereby requiring that impacts to HCD character be considered as part of the planning process.

3.4 Ontario Heritage Act

The OHA was enacted in 1975 with the purpose of giving the province and municipalities the power to protect heritage properties and archaeological sites. In 1990, the act was part of a collection of Revised Statutes of Ontario (Chapter O.18). The OHA underwent comprehensive amendments in 2005 and 2023. The 2005 amendments strengthened and improved heritage protection in Ontario, as the province and municipalities were given new powers to delay and stop the demolition of heritage properties while an appeals process was established that respected the rights of property owners. The 2005 amendment also provided enhanced protection of marine heritage sites, archaeological resources, and HCDs.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

3 Policy Framework

May 2025

On January 1, 2023, changes made to the OHA under the *More Homes Built Faster Act, 2022* (Bill 23) came into effect as did regulatory changes to *Ontario Regulation* (O. Reg.) 9/06 and O. Reg. 385/21. With respect to HCDs, the 2023 amendments include the following:

- Adhere to the 90-day timelines for applications to alter or demolish a property protected under the OHA, issue a notice of intention to designate a property, or for Council to make decisions regarding the designation of a property
- Include clarification that the term “demolition” applies to the removal or demolition of heritage attributes in a designating by-law as well as a building or structure
- Adhere to the new process for appeals to the OLT for applications to alter heritage properties
- Adhere to the new process for objections for notices of intention to designate properties under the OHA
- Follow the guidance for designating properties under Part IV of the OHA by including a clear articulation of the heritage value of a property and its heritage attributes

(Government of Ontario 1990a)

3.4.1 Ontario Regulation 9/06

The 2023 amendments to the OHA established criteria for the evaluation of an HCD. The following is the prescribed criteria under O. Reg. 9/06 as amended by O. Reg. 569/22:

- At least 25 per cent of the properties within the municipality or defined area or areas satisfy two or more of the following:
 - i. The properties have design value or physical value because they are rare, unique, representative or early examples of a style, type, expression, material or construction method.
 - ii. The properties have design value or physical value because they display a high degree of craftsmanship or artistic merit.
 - iii. The properties have design value or physical value because they demonstrate a high degree of technical or scientific achievement.
 - iv. The properties have historical value or associative value because they have a direct association with a theme, event, belief, person, activity, organization or institution that is significant to a community.

- v. The properties have historical value or associative value because they yield, or have the potential to yield, information that contributes to an understanding of a community or culture.
- vi. The properties have historical value or associative value because they demonstrate or reflect the work or ideas of an architect, artist, builder, designer or theorist who is significant to a community.
- vii. The properties have contextual value because they define, maintain or support the character of the district.
- viii. The properties have contextual value because they are physically, functionally, visually or historically linked to each other.
- ix. The properties have contextual value because they are defined by, planned around or are themselves a landmark.

(Government of Ontario 2023)

3.5 Public Transportation and Highway Improvement Act

Under the *Public Transportation and Highway Improvement Act*, the Ministry of Transportation Ontario (MTO) regulates permit controlled areas for structures, roads, entrances, and the placement of signs. The Brooklin HCD contains provincial highways that are subject to MTO permit control, including Highway 12 (Baldwin Street) and Highway 7 (Winchester Road). Any land development, highway access, construction, utilities, or other activities near these provincial highways requires consultation with MTO to determine what type of permit(s) is needed. Permits may include Building and Land Use, Encroachment, Entrance, or Sign (MTO 2025).

3.6 Durham Region Official Plan

The Region of Durham's new *Envision Durham Regional Official Plan* was approved by the Province in part on September 3, 2024, and all remaining parts on December 13, 2024. The Plan replaces the former OP that was approved in 1993. The Region of Durham is defined by the Province as an upper-tier municipality that, as of January 1, 2025, does not have planning responsibilities. The Town has assumed approval authority for all Planning Act decisions, except those prescribed by the Ministry of Municipal Affairs and Housing (Durham Region 2025). The Town will be subsuming

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

relevant components of the Region's OP through the Town's OP review currently being undertaken.

Chapter 3 *Healthy Communities* in the OP highlights the significance of built and cultural heritage, such as historic and cultural downtowns, in contributing to the unique character and sense of place of the Region's urban and rural communities (Durham Region 2024: 27). Under Section 3.3, the Region is committed to maintaining vibrant neighbourhoods and building complete communities that includes heritage objectives that support the preservation of the Town's downtown, streetscapes, and neighbourhoods. For development, the heritage objectives in the OP promote a balanced approach to intensification in downtowns while preserving built and cultural heritage value and recommend the adaptive reuse of cultural heritage properties (Durham Region 2024: 45-46).

Section 3.3 *Complete Communities*, includes the following applicable policies for *Built & Cultural Heritage*:

- 3.3.32 Recognize downtowns and historical areas as key inter- and intra-regional destinations based on their historic and traditional function as centres for culture and commerce, their built form and their cultural and social importance.
- 3.3.33 Strengthen, restore and enhance the local, historical and cultural heritage, character and role of Durham's downtowns and historical areas as walkable centres of tourism, recreation, housing, employment, main street shopping and social gathering to foster cultural capital and a creative economy.
- 3.3.34 Encourage the conservation and enhancement of the district character and unique local, historical and/or cultural heritage of Durham's downtowns, especially during redevelopment or intensification of surrounding areas by considering:

- a) scale and massing of new buildings to complement the existing built form within the downtown;
- b) protecting important built elements and other heritage features, including façades and other built form, as part of development and redevelopment;
- c) a transition that supports a visual connection between historic neighbourhoods and new development;
- d) conserving cultural heritage of existing buildings and structures; and
- e) preserving and enhancing the urban tree canopy in downtowns.

3.3.39 Require area municipal official plans to support downtowns with policies that:

- a) strengthen the intended role and character of the downtown;
- b) enhance and conserve historic and cultural resources and functions;
- c) provide for appropriate development that addresses the built, natural and cultural heritage of the downtown within which it is situated;
- d) guide development, redevelopment and intensification while protecting and preserving built heritage resources, and cultural heritage landscapes;
- e) support the restoration and where appropriate, the adaptive reuse of built heritage resources;

- f) provide an appropriate interface or transition between new developments and protected heritage properties or heritage conservation districts;
- g) provide for development that is compatible with existing communities; and
- h) identify the core values and function of the downtown(s).

(Durham Region 2024: 57-59)

The Region's OP encourages municipalities to adopt cultural heritage policies as part of their official plans, and to utilize the OHA to conserve, protect and enhance the built and cultural heritage resources of the municipality.

3.7 Whitby Official Plan

The Town is currently undertaking its legislated five-year review of the *Town of Whitby* OP to bring the plan into conformity with new provincial legislation and the Region's OP. This includes a review of relevant cultural heritage policies. The current OP, consolidated in December 2024, sets out the general policy direction and planning framework to guide development in the Town to 2031. The OP sets out several policies that encourage the enhancement of Town's cultural heritage attributes. Under Section 6.1 *Cultural Heritage Resources and Archaeological Sources*, the Town's goal is: "To identify and conserve Whitby's cultural heritage resources and archaeological resources for the benefit of existing and future generations, to enhance Whitby's sense of community and identity, and to contribute to its sustainability and economic viability" (Town of Whitby 2024a: 105).

Generally, the cultural heritage objectives of the Town's OP are to:

- identify, conserve, and enhance cultural heritage resources in accordance with the Ontario Heritage Act and to ensure that such resources are protected through

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

the development approval process in accordance with applicable legislation, plans, programs, and guidelines (6.1.2.1)

- conserve and enhance the character of Heritage Conservation Districts through careful consideration of plans for change within and adjacent to the District (6.1.2.2)
- identify archaeological resources to ensure that such resources are conserved through the development approval process in accordance with applicable legislation (6.1.2.3)
- encourage the development of a municipal-wide culture of conservation by promoting cultural heritage initiatives as part of a comprehensive economic, environmental, and social strategy to recognize that cultural heritage resources contribute to achieving a sustainable, healthy, and prosperous community (6.1.2.4)

(Town of Whitby 2024a: 105)

Under Section 6.1.3 *Cultural Heritage Resources*, and Policy 6.1.3.1, the Town shall protect and conserve cultural heritage resources with applicable legislation, policies and recognized heritage protocols. This includes municipal heritage recognitions for properties such as those listed on the Town's Heritage Register, properties designated under Part IV (individual) and V (HCD) of the OHA, and those identified by Council as having cultural heritage value or interest. The OP enables the Town to designate built heritage resources and establish HCDs and other policies, guidelines, tools, and/or agreements to recognize, manage, and conserve cultural heritage resources (Town of Whitby 2024a: 105-106).

Section 6.1.3 provides additional direction on consulting with the municipal heritage committee regarding cultural heritage matters, the relocation and alteration of heritage resources, the requirement for cultural heritage impact assessments for development near heritage resources, and the potential use of financial incentives to encourage conservation and maintain the integrity of such resources.

The existing HCDs are recognized in the Town's OP. The Brooklin HCD falls within the Brooklin Community Secondary Plan (BCSP), and the Werden's HCD falls within the

Downtown Whitby Community Secondary Plan (DWCSP), which are discussed in the following sections.

3.7.1 Brooklin Community Secondary Plan

The BCSP was updated through the Town's OP Amendment #108, as approved by the Region of Durham on July 12, 2018, and as modified by Local Planning Appeal Tribunal on January 13, 2020. Section 11.4 of the OP, consolidated in December 2024, provides the updated vision and objectives for the BCSP. The BCSP provides a framework for development in Brooklin in a manner that maintains its small-town community character. The area is broken into north and south sections, with Winchester Road West/East as the dividing corridor. The north section, Downtown Brooklin Major Central Area North, includes the HCD. The objectives for this area, as a heritage downtown, include:

- a) To ensure Downtown Brooklin continues to be the focal area for shopping, dining, and entertainment.
- b) To ensure Baldwin Street is a safe, comfortable and accessible street for all users.
- c) To create a vibrant and pedestrian-friendly environment along Baldwin Street through an animated streetscape and by locating buildings close to the street.
- d) To conserve the heritage attributes of the significant cultural heritage resources identified in the Brooklin Heritage Conservation District Plan.
- e) To ensure new buildings are sensitive to, and maintain the heritage character of the Downtown as described in the Brooklin Heritage Conservation District Plan.

(Town of Whitby 2024a: 222)

To meet the objectives of the BCSP, its policies are divided into categories including general development, sustainability, community structure, intensification corridors, residential neighbourhoods, community central areas, Brooklin HCD Plan, land use designations, and other policy directions such as gateways, parking, roads and active transportation, servicing, and phasing of development.

The following policies throughout the BCSP are applicable to the Brooklin HCD:

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

3 Policy Framework

May 2025

- The historic downtown shall remain the commercial heritage of the community accommodating restaurants and small-scale shops, offices and personal services and limited infill residential development (11.5.4.3).
- The Brooklin HCD overlays much of the historic Downtown component of the Downtown Brooklin Major Central Area. The built form and design policies within the HCD Plan shall be used to evaluate development applications within the HCD along with the Brooklin Urban Design and Sustainable Development Guidelines (11.5.4.4).
- Along Baldwin Street, the unique main-street shopping environment shall be enhanced and further infill development encouraged, while protecting the historic character of Downtown Brooklin in accordance with the policy directives of the Brooklin HCD Plan and the Brooklin Urban Design and Sustainable Development Guidelines (11.5.4.5).
- Council shall also encourage and support mixed-use development comprised of ground level commercial uses with residential units located above, in order to support the vitality of the Downtown Brooklin Major Central Area (11.5.4.6).
- Behind the buildings along Baldwin Street, low rise mixed-use infill development is permitted and encouraged in accordance with the policy directives of the HCD Plan and the Brooklin Urban Design and Sustainable Development Guidelines (11.5.4.7).
- Within the historic Downtown, existing low density residential housing forms along Princess Street and Durham Street shall be conserved in accordance with the directives of the HCD Plan (11.5.4.8).
- Notwithstanding any other provisions of this Plan to the contrary, new automobile service stations/gas bars and new drive-through service facilities are not permitted within the Downtown Brooklin Major Central Area North. (11.5.4.9)

(Town of Whitby 2024a: 226)

Section 11.4.8 of the BCSP, includes the adherence of the secondary plan to the goal, policies, and guidelines in the Brooklin HCD (Town of Whitby 2024: 231). The land use designations in the Brooklin HCD include “Low Density Residential”, “Medium Density Residential”, “Institutional”, “Mixed Use 2 – HCD”, “Heritage Commercial”, “Major Open Space (Parkettes)”, “Natural Heritage System”, and “Natural Hazards”. See Section 3.9 for an overview on land use.

3.7.2 Downtown Whitby Community Secondary Plan (DWCSPP)

The DWCSPP was updated through the Town's OP Amendment #126, as approved by the Region of Durham on December 21, 2023. Section 11.3 of the OP, consolidated in December 2024, provides updated vision and objectives for the DWCSPP. This area applies to lands that are generally bound by the Canadian Pacific Railway line to the north, Garden Street to the east, Highway 401 to the south, and Cochrane/Annes Street to the west. Objectives of the DWCSPP applicable to the Werden's HCD include:

- Conserve and Enhance Cultural Heritage Resources (11.3.1.2.1)
- Provide the Right Built Form in the Right Place (11.3.1.2.2)
- Improve the Public Realm (11.3.1.2.3)
- Increase Access to Parks and Open Space (11.3.1.2.4)
- Encourage Sustainability (11.3.1.2.5)
- Design for Accessibility (11.3.1.2.7)
- Enhance Vitality and Viability of the Downtown (11.3.1.2.12)

To meet the objectives of the DWCSPP, policies are divided into categories including general development, sustainability, placemaking, cultural heritage resources, community structure, and land use designations, natural hazards, and other policy directions such as parking, roads, transit and active transportation, and servicing.

The following policies throughout the DWCSPP are applicable to the Werden's HCD:

- The unique character of Downtown Whitby, which is defined by heritage buildings, a vibrant retail main street, low to mid-rise built form and surrounded by low density mature neighbourhoods, should be maintained and enhanced. (11.3.2.5)
- Green infrastructure and Low Impact Development techniques, such as permeable paving, infiltration trenches, rain gardens and other stormwater management techniques, shall be considered wherever possible in the design of new development and through retrofit opportunities to adapt existing buildings for sustainable design. (11.3.3.2)

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

3 Policy Framework

May 2025

- The unique grid street layout and short block pattern within Downtown Whitby should be maintained and enhanced wherever possible to facilitate walkability and support greater connectivity within the Downtown. Schedule "H" identifies several new connections that will expand upon the historic grid street layout in accordance with Section 11.3.9 of this Plan. (11.3.4.1)
- Development and redevelopment shall be in accordance with the cultural heritage and archeological resource policies of Section 6.1 of this Plan. (11.3.5.1)
- The adaptive re-use of cultural heritage resources is encouraged. (11.3.5.2)
- Any proposed demolition of a cultural heritage resource must demonstrate that all alternative options have been considered and demolition is the only viable option. (11.3.5.3)
- Development and redevelopment adjacent to or incorporating cultural heritage resources shall be respectful of the resource, having regard for scale, massing, setbacks, building materials and design features, following established Heritage Conservation District Plans where applicable. Development and redevelopment may require a heritage permit, Cultural Heritage Impact Assessment and/or other relevant documentation required through the development process. (11.3.5.4)
- The Werden's Plan Neighbourhood Heritage Conservation District is located within Downtown Whitby and is subject to the policies of Section 11.3.6.2 of this Plan, as well as the Heritage Conservation District Plan. The Town may establish additional Heritage Conservation Districts within the Downtown Whitby Community Secondary Plan area under Part V of the Ontario Heritage Act, including the adoption of Heritage Conservation District Plans. (11.3.5.5)
- The permitted height and density of residential and mixed use intensification shall consider the local context and character of surrounding uses and built form, including surrounding mature neighbourhoods and cultural heritage resources, and should provide for appropriate built form transition to mature neighbourhoods and a built form character that fits in with the established character. (11.3.6.1.9)

(Town of Whitby 2024a: 204-208)

Section 11.3.6.2 of the DWCSPP include the adherence of the secondary plan to the goal, policies, and guidelines in the Werden's HCD Plan (Town of Whitby 2024a: 208). The land use designations in the Werden's HCD boundary include "Low Density Mature Neighbourhood", "Institutional", "Medium Density Residential", "Heritage Mixed Use

Area”, “Downtown Mixed Use Area”, “Existing Park and Open Space”, and an “Urban Square.” See Section 3.9 for an overview on land use.

3.7.3 Whitby Mature Neighbourhoods

The *Whitby Mature Neighbourhoods* report was prepared by SGL Planning & Design Inc. in 2021. The purpose of the report was to inventory and describe the character of the mature neighbourhoods in Whitby, including the Werden’s HCD, and identify options to manage new development, infill, and intensification. The report recommended OP amendments, with the addition of a new Section 4.4.3.13 Mature Neighbourhoods. OP Amendment #130 – Mature Neighbourhoods Study is currently under appeal. The recommended policies in Section 4.4.3.13 of the Town’s OP will be reviewed and applied to the updated Werden’s HCD Plan.

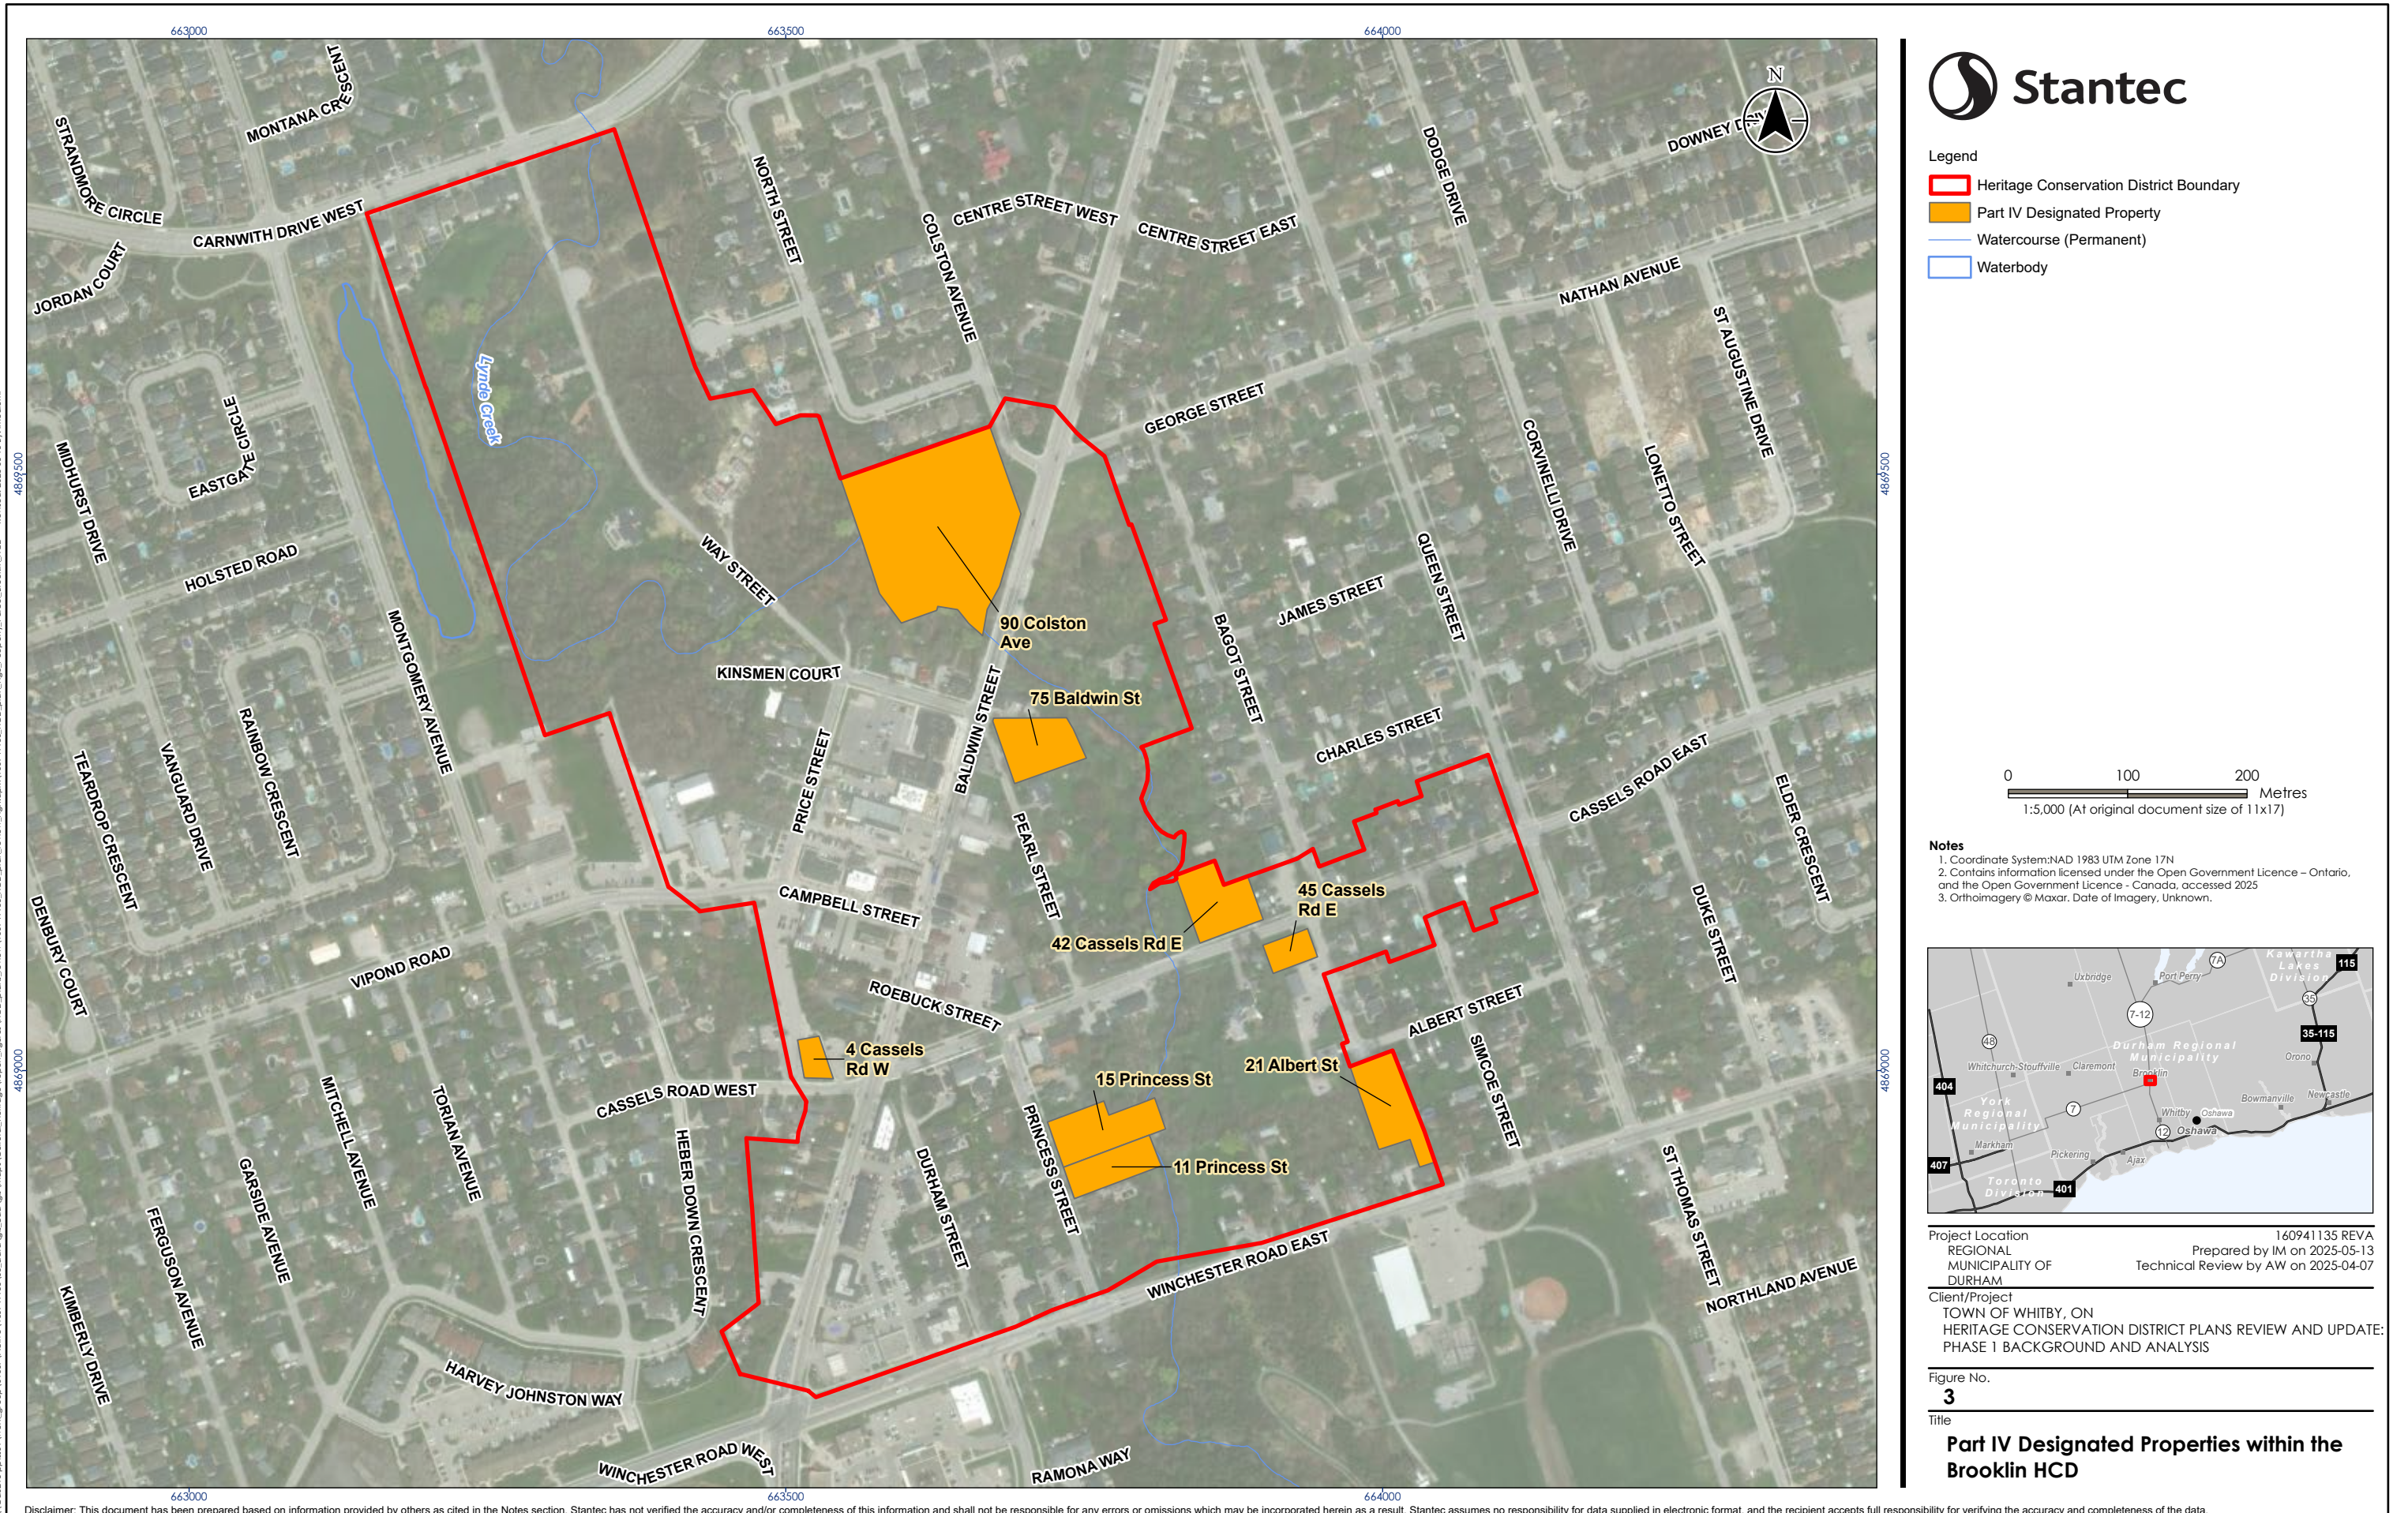

3.8 Municipal Heritage Properties

The Brooklin HCD contains eight properties designated under Part IV of the OHA (Figure 3). Five of these properties were designated following the establishment of the Brooklin HCD in 2007 (see Table 3-1). Werden’s HCD contains 25 designated properties under Part IV of the OHA (Figure 4). Since the establishment of the Werden’s HCD in 2017, no properties have been designated under Part IV of the OHA.

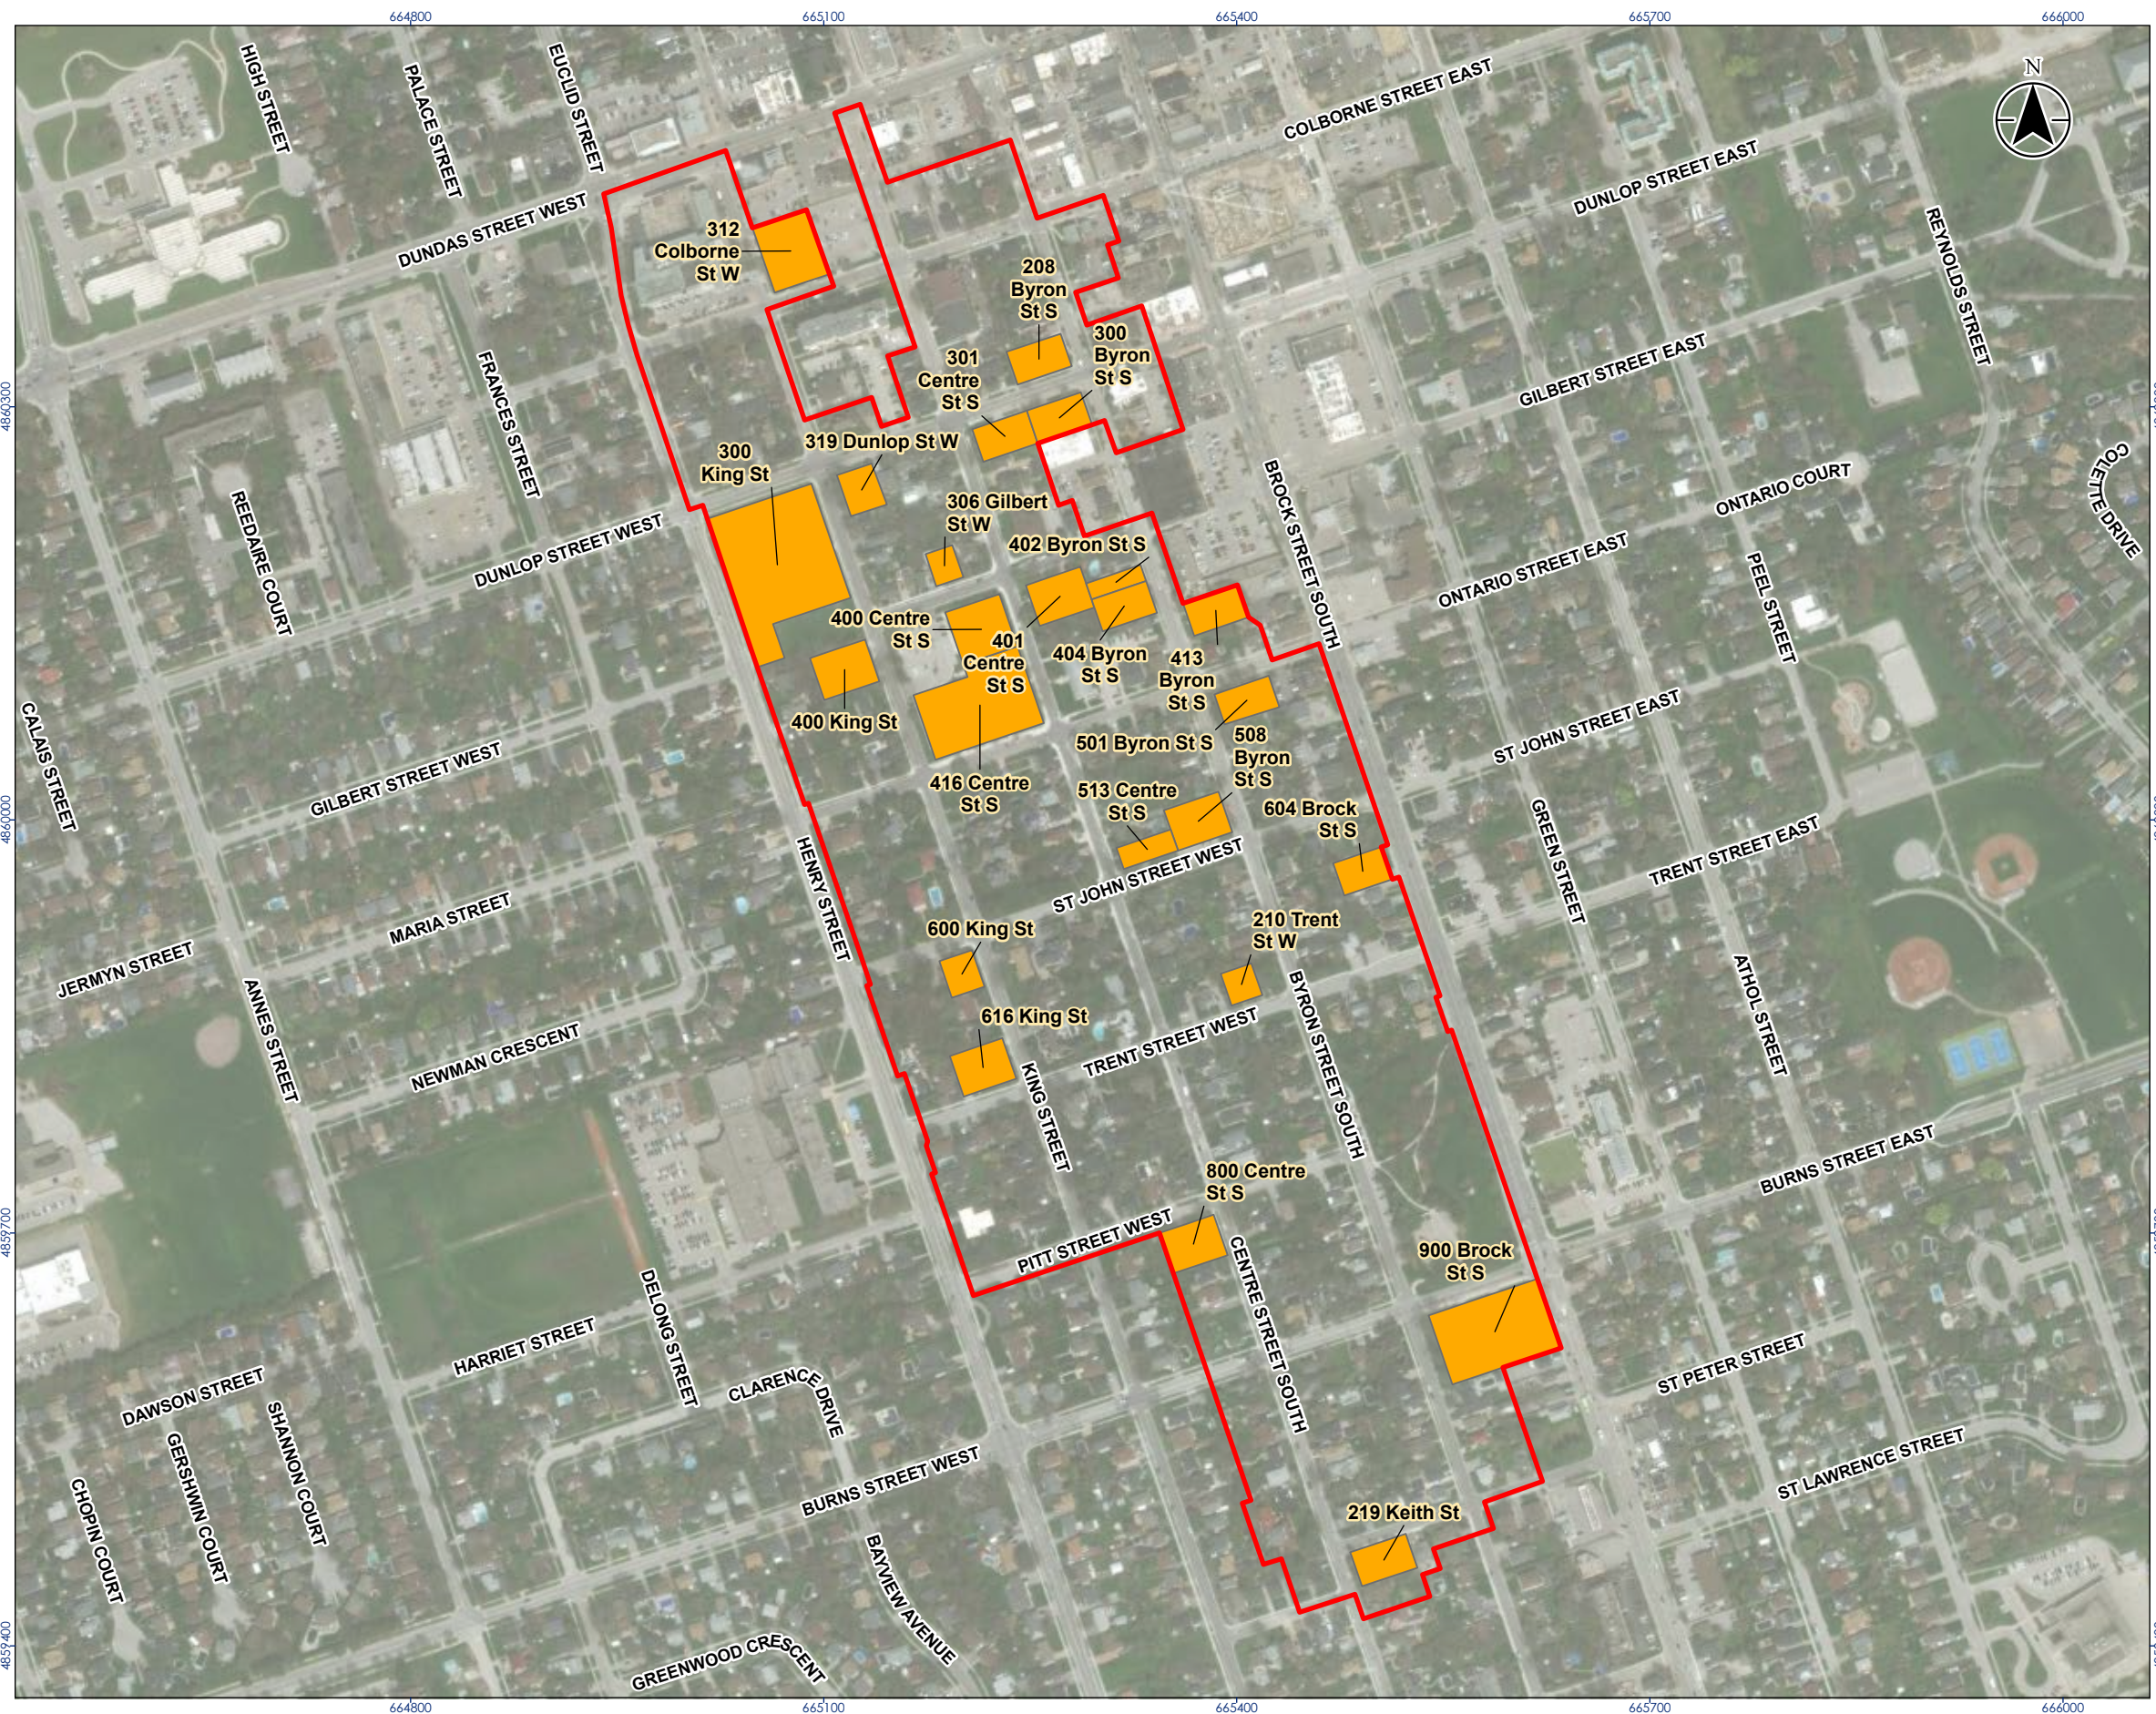

Table 3-1 Brooklin HCD Part IV designations since 2007

Municipal Address	Date	By-law
21 Albert Street (Brooklin Pioneer Cemetery)	2013	6721-13
75 Baldwin Street	2009	6239-09
42 Cassels Road East	2009	6238-09
45 Cassels Road East	2018	7427-18
4 Cassels Road West	2009	6237-09

Title
Part IV Designated Properties within the Werden's Plan Neighbourhood HCD

160941135 REVA
Prepared by IM on 2025-05-13
Technical Review by AW on 2025-04-07

3.9 Land Use Policies

Section 4 of the Town's OP outlines general policies for land use designations within the Brooklin and Werden's HCDs.

3.9.1 Brooklin HCD

The Brooklin HCD includes areas designated "Low Density Residential," "Medium Density Residential," "Mixed Use 2 - HCD," "Heritage Commercial," "Institutional," "Major Open Space (Parkettes)," "Natural Heritage System," and "Natural Hazards Overlay" (see Figure 5).

Low Density Residential Designation in the HCD is generally in accordance with the OP policies for Low Density Residential areas. These policies permit single detached, semi-detached, duplex dwellings, and similar built forms with a density of up to 35 dwelling units per hectare. New residential units in the Low Density Residential Designation can be intensified if they are in accordance with the lot sizes, driveway location and width, ensuring compatibility with adjacent and other lots on the street/area. Additionally, consideration must be given to retaining existing vegetation or compensating for loss of vegetation, and the development must comply with other Town OP policies.

Redevelopment of existing Low Density Residential lots is permitted when the interior side yard and front yard setbacks are consistent with those of dwellings and yards on the same side of the street.

The BCSP provides additional specific land use policies for Low Density Residential designations that generally recognize existing residential development, as well as future low density residential development on vacant and designated lands. New development in this designation shall be compatible with and fit in with the physical character of the neighbourhood, reflecting the prominent building type, height, scale, massing, and setbacks of the block and surrounding residential neighbourhood. The maximum building height for this designation is three storeys, with a minimum density of 25 units per net hectare and maximum density of 35 units per net hectare.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

Medium Density Residential in the HCD is to be in accordance with OP policies that permit street and block townhouses up to four storeys, with a density range of greater than 30 and up to 65 dwelling units per net hectare. Additional policies in the BCSP for Medium Density Residential are intended to provide for residential development at increased densities along arterial and collector roads and within and surrounding Community Central Areas to support future transit and active transportation, support commercial and mixed use nodes, create walkable higher density nodes and function as a transition in density and intensity of uses between Low Density Residential Areas and higher density mixed use and commercial areas.

The OP designates Mixed Use properties as those containing integrated development and redevelopment including residential, retail, office, restaurant, personal service, and comm/institutional uses. The BCSP contains policies for Mixed Use 2 – HCD land use designation in the HCD that are intended to accommodate low-rise, mixed use development within the HCD and to accommodate commercial uses in a mixed use format that complement the commercial development in the historic downtown and in the adjacent Major Commercial designation. The BCSP specifies that the range of permitted commercial uses shall complement but not compete with the Heritage Commercial designation, and that cultural heritage resources shall be conserved. This designation includes a minimum height of two storeys, maximum height of four storeys, and maximum density of 85 units per net hectare.

The HCD also contains a Heritage Commercial land use designation, which can be developed in accordance with Major Commercial land use policies in the OP that contain large, multi-functional commercial areas with a full range of retail, restaurants, entertainment, personal services, community, institutional, cultural, business and corporate professional services. Heritage Commercial land uses in the HCD are intended to permit a broad range of commercial uses while respecting the historical character of the Downtown. The BCP note that Baldwin Street shall be preserved as a primarily low-rise commercial/mixed use main street and pedestrian use shall be

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

reinforced. Cultural heritage resources shall be retained. Infill development shall be encouraged, but any new development shall maintain the heritage character of the Heritage Conservation District while also increasing the vibrancy and pedestrian comfort of the historic Downtown. New residential units shall not be permitted on the main floor of buildings facing onto Baldwin Street. Large scale buildings and uses such as department stores and grocery stores shall be directed to the adjacent Major Commercial designation, and not in the HCD. The maximum building height for buildings in this land use designation is three storeys.

The HCD also contains lands designated as Major Open Space (Parkettes), which are subject to Major Open Space policies of the OP. Permitted uses in this designation include active and passive recreational and recreational or conservation uses, forest, wildlife and fisheries management, community gardens and private recreation uses that have minimal negative impacts on the environment. Lands along Soper Creek also contain Natural Heritage System and Natural Hazards Overlay designations. OP and BCSP policies related to these land use designations generally require retention and enhancement of natural heritage areas wherever possible to protect habitats and species.

The OP further elaborates on the requirements and design guidelines for each designation.

(Town of Whitby 2024a: 232-250)

3.9.2 Werden's Plan Neighbourhood HCD

The Werden's HCD includes areas designated "Low Density Mature Neighbourhood," "Medium Density Residential," "Heritage Mixed Use Area," "Downtown Mixed Use Area," "Institutional," and "Existing Park and Open Space" (see Figure 6).

Low Density Mature Neighbourhood land uses in the Werden's HCD follow the same standard OP policies with additional policies from the DWCSP that recognize the

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

existing residential development and permit limited residential infill and intensification. New development and redevelopment within this designation shall be compatible with and fit in with the existing physical character of the neighbourhood. Within the HCD specifically, new development and redevelopment within this designation must be compatible with and fit in with the existing physical character of the neighbourhood. Development or redevelopment must also respect the prevailing front yard setback in the siting of new dwellings, and additions should be to the rear of existing dwellings away from public view. The land use designation requires front yard parking to be minimized, with the creation of new parking bays, and new driveways permitted in side yards or rear yards. Lot severances are discouraged, and the maximum building height is two storeys.

Medium Density Residential land uses in the Werden's HCD follow the same standard OP policies with additional DWCSPP policies that recognize the existing designated medium density developments as well as some areas for newer developments adjacent to the Mixed Use Corridors. New buildings and additions to buildings in this designation should be massed to establish a continuous streetscape and promote pedestrian scale, with consistent minimum and maximum setbacks. Maximum density is not established as in the Brooklin HCD, as density is intended to be a product of the built form requirement for height, setbacks, and stepbacks. The maximum height in this designation is four storeys.

The Heritage Mixed Use designation reflects the standard OP Mixed Use policies, with specific DWCSPP policies that are intended to permit a broad range of commercial, office, service, and community, institutional and residential uses in a mixed use environment, while respecting and maintaining the historic low-rise character of the area. Development and redevelopment must reinforce the main street historic character of Brock Street and Dundas Street by locating buildings and storefronts close to the public sidewalk, wherever possible. Compatible infill development is encouraged that respects and complements the existing historic built form. In this designation, new

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

residential units are not permitted on the main floor of buildings. The minimum and maximum building height is two storeys, and maximum density is not established, similar to the Mixed Use designation.

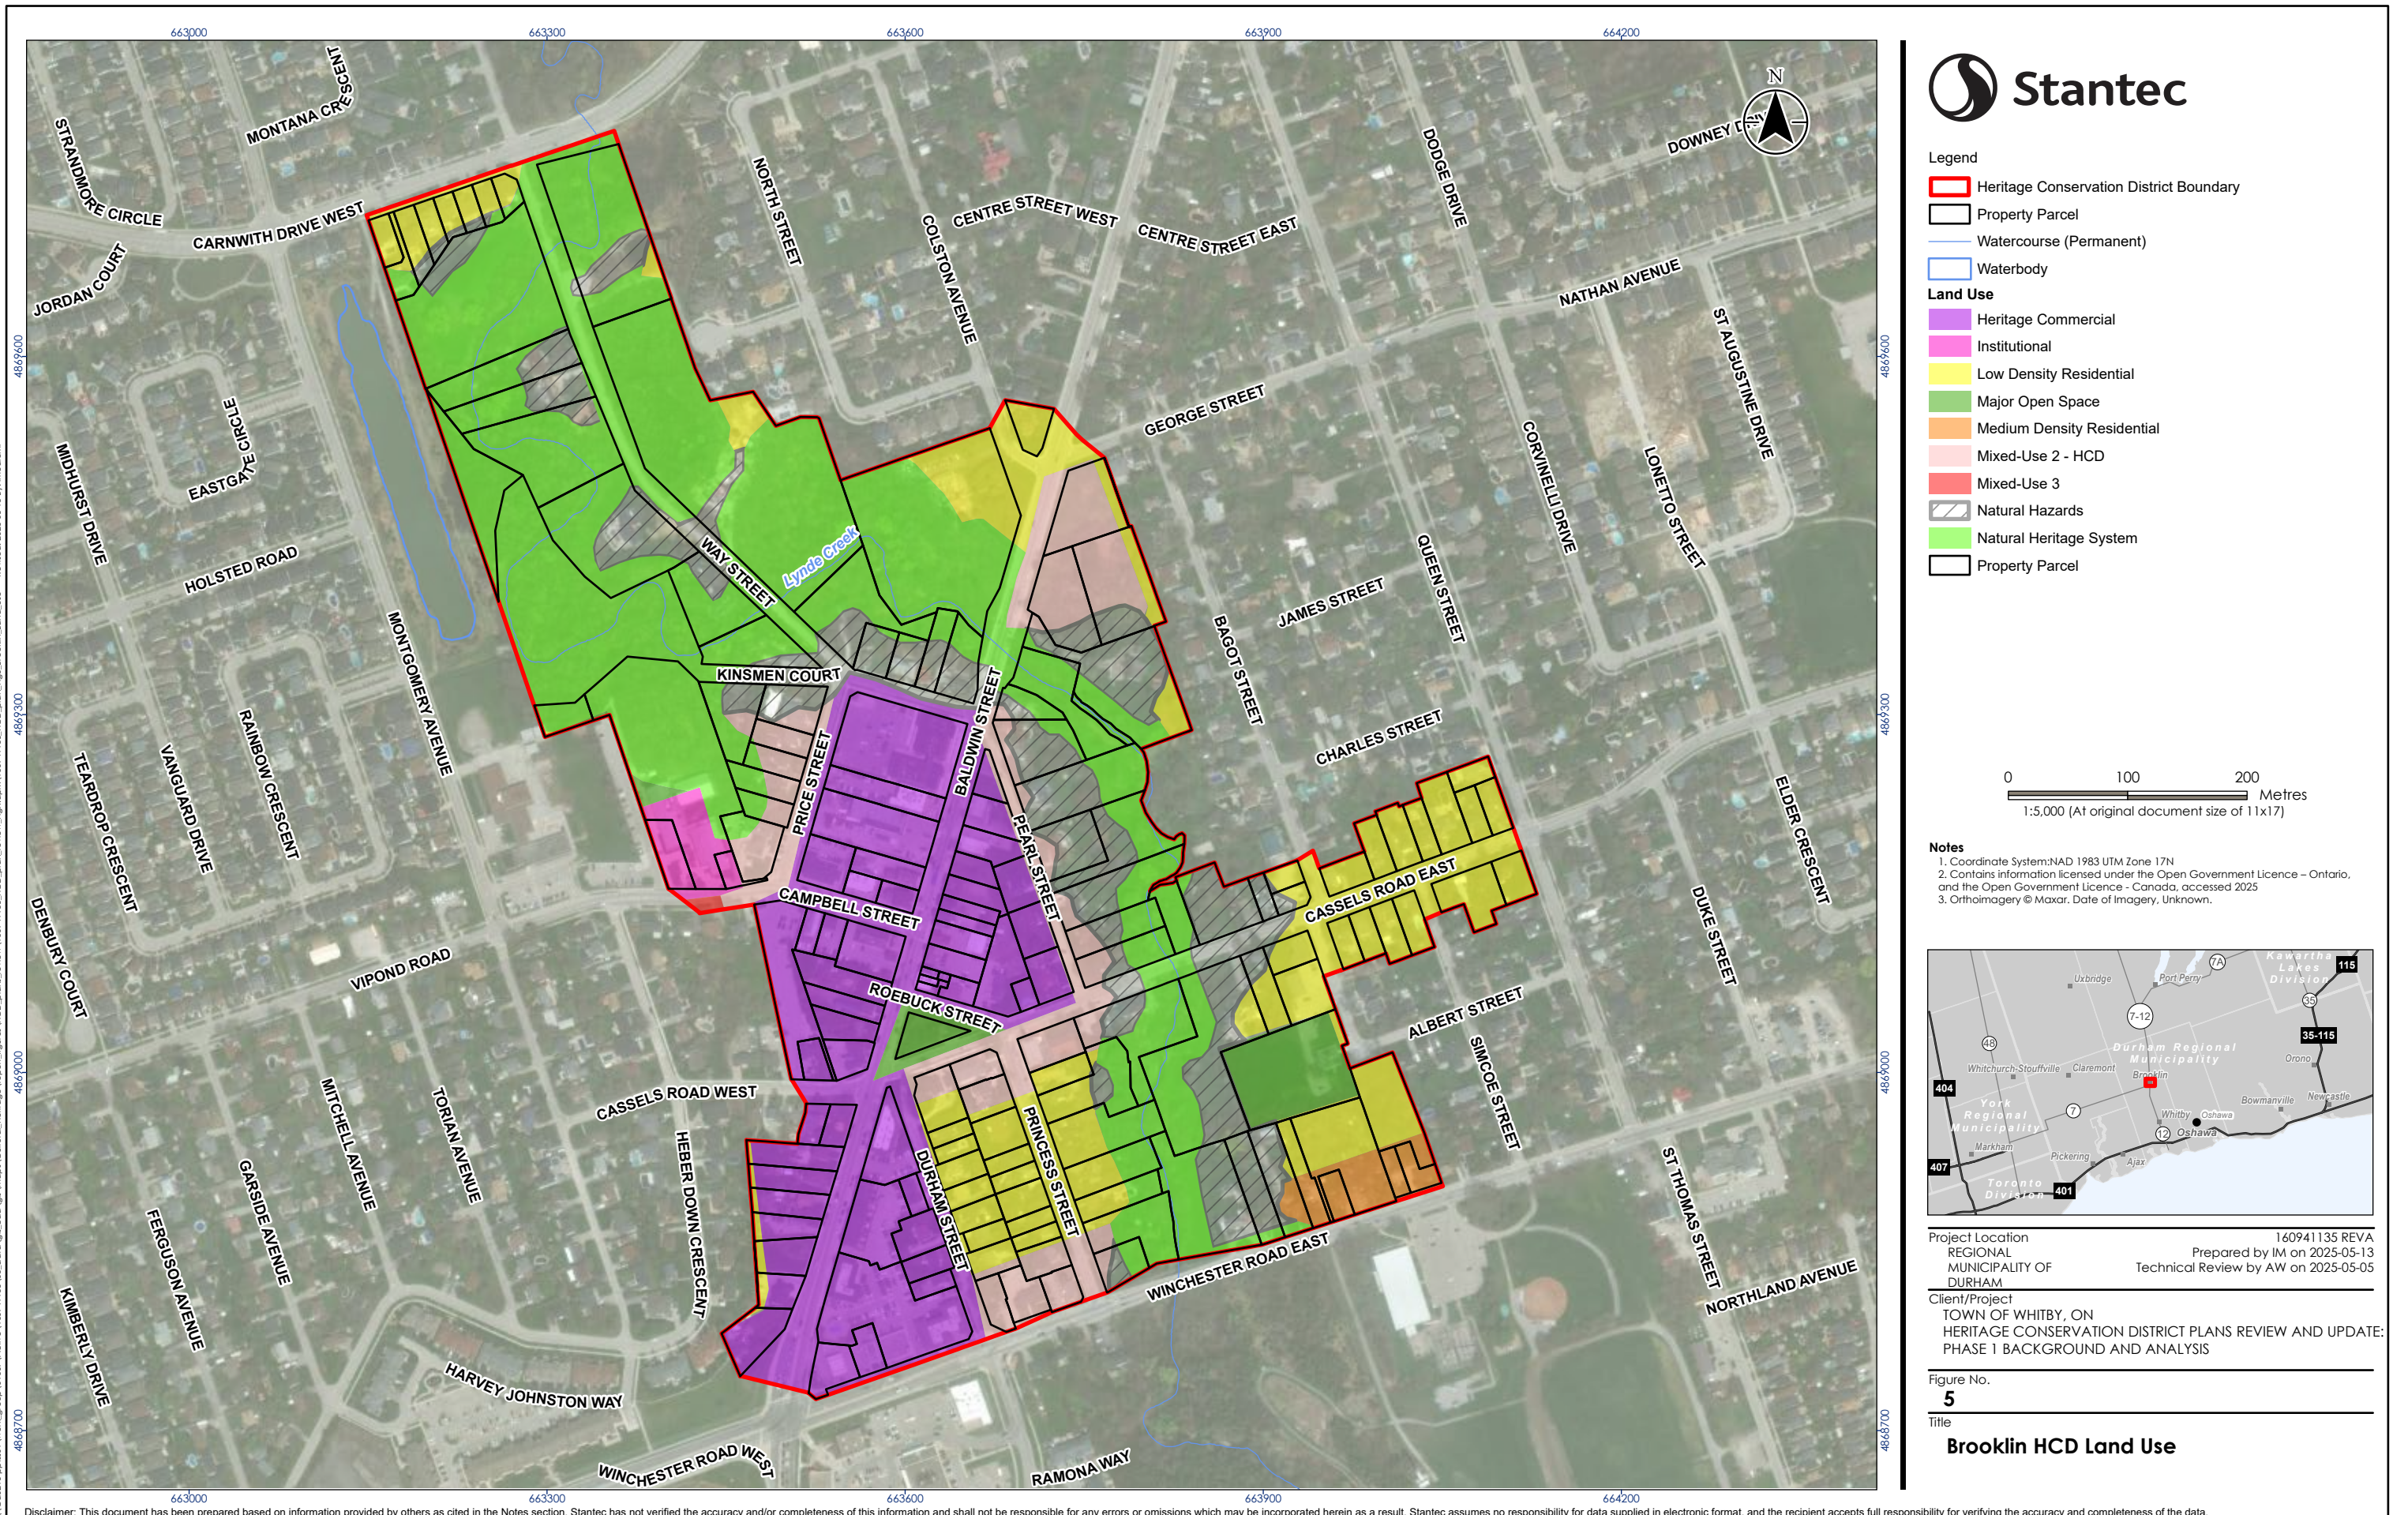

The Downtown Mixed Use designation is similar to the Heritage Mixed Use designation, with a focus on providing a mix of residential and commercial at a density that supports frequent transit service and a vibrant pedestrian-oriented environment. New development and redevelopment must transition in height and density adjacent to Low Density Mature Neighbourhoods, and adjacent heritage properties. The minimum building height in this designation is two storeys, and the maximum height is six storeys.

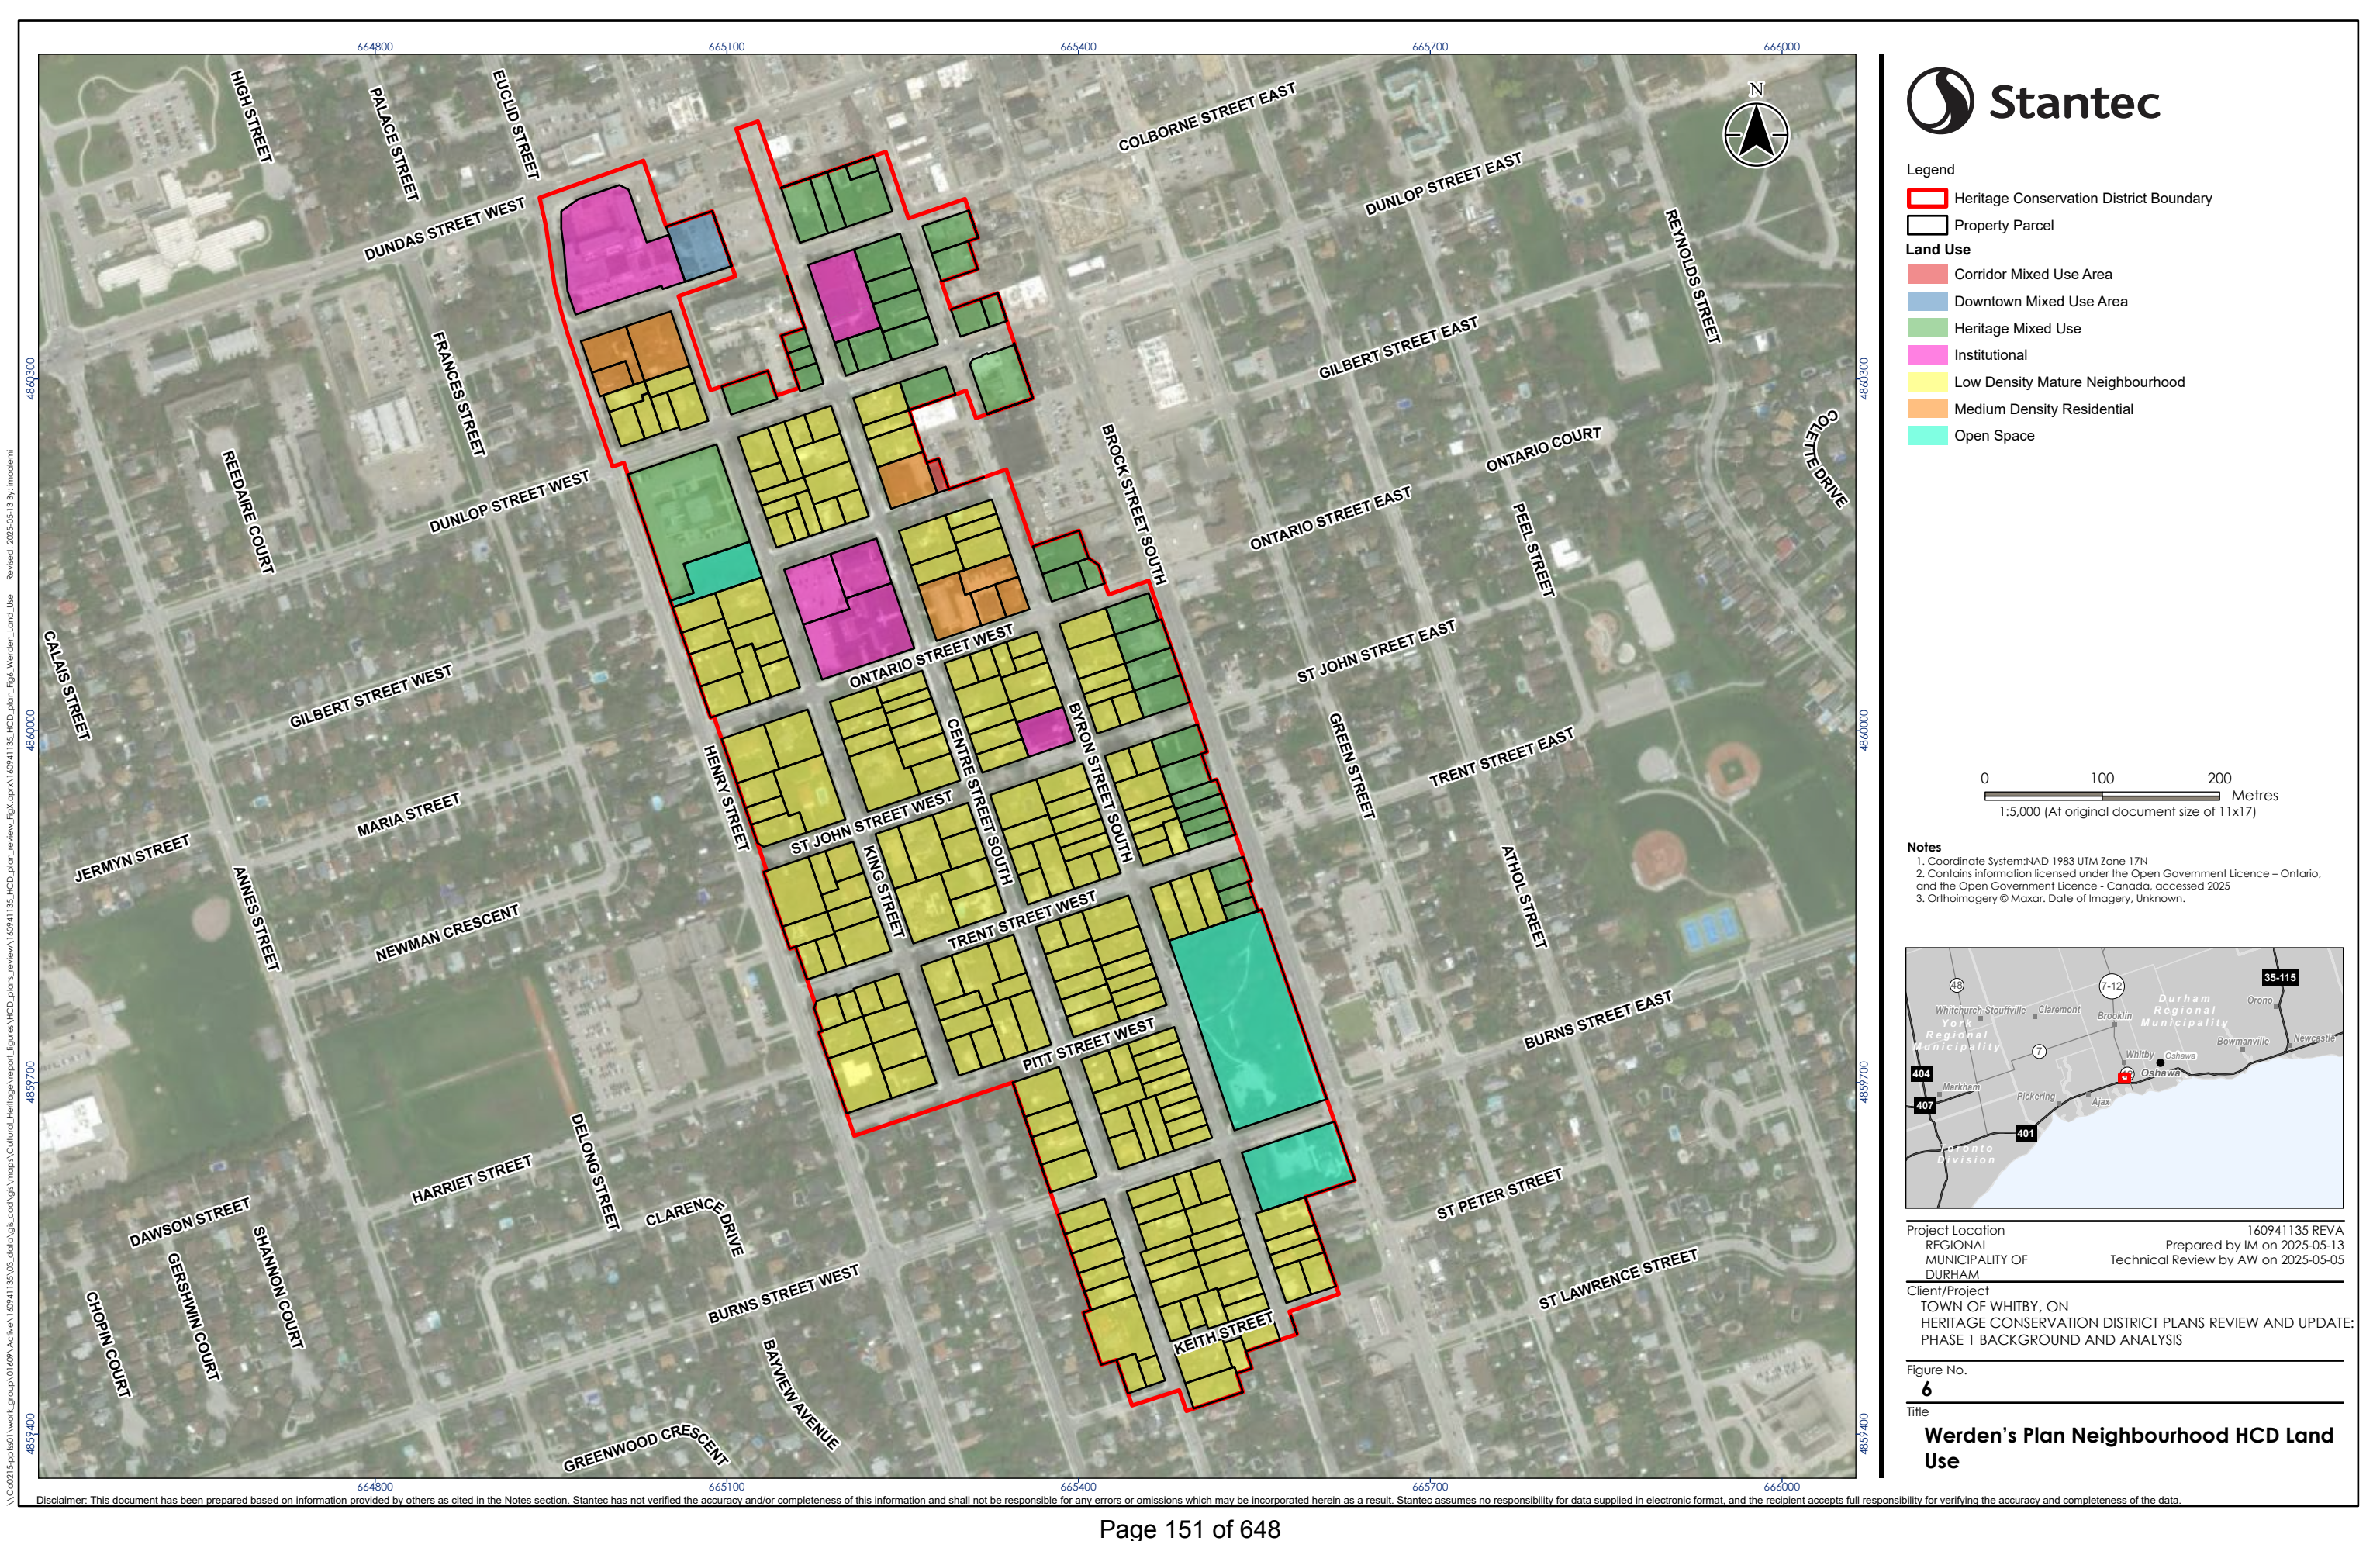

Institutional land use in the Werden's HCD is subject to OP policies for Institutional use, which encourage facilities that support the health, education, religious and cultural needs of the community. In the HCD, institutional land uses are limited to two storeys in height.

The Werden's HCD also includes lands designated as Existing Park, Open Space, specifically Urban Square. The specific policies for Urban Square land use encourage areas designed with edges that are defined by buildings or other structures where not bound by roads and are accessible and visible to the public. Urban square should contain hard landscaping and natural elements, and provide passive recreation uses, programmed activities and a display of public art. Adjacent commercial uses should provide access to and from the Urban Square, wherever possible.

3.10 Zoning By-Laws

The Town is currently undertaking a comprehensive review of the *Town of Whitby Zoning By-laws*. Brooklin HCD lands are governed under Zoning By-law 1784, that includes land use in the former Township of Whitby, and the Werden's HCD lands are governed under Zoning By-law 2585, that includes land use in Downtown Whitby. Both zoning by-laws were consolidated in December 2021.

The Brooklin HCD contains the following zones, according to the Restricted Area Zoning By-Law 1784, as amended:

- Residential Types 1, 2 – Village of Brooklin (R1-VB, R2-VB)
- Brooklin Secondary Plan Residential (R1-BP, R3-BP)
- Residential (R2A*, R2B*)
- Mixed Use Residential – Village of Brooklin (MUR-VB)
- Commercial 1 – Village of Brooklin (C1-VB)
- Institutional – Village of Brooklin (I-VB)
- Open Space – Village of Brooklin (OS-VB)
- Greenbelt (G)
- Brooklin Secondary Plan Development (D)
- Additionally, the R2A*, G, R2-VB, R1-VB, MUR-VB, and C1-VB have multiple exceptions throughout the HCD.

(Town of Whitby 2021a)

In general, the heights range from 7 metres to 10.5 metres. Exceptions 7 and 8 in the C1-VB zone allow for a maximum height of 12.5 metres or 3 storeys. In terms of lot coverage, most zones permit a maximum of 30-40%. However, the C1-VB zone permits 90% lot coverage, and a 0-m rear yard and interior side yard setback. For residential buildings in the C1-VB zones, building separation distances have been provided for buildings with a height greater than three storeys, where an additional metre of separation per storey is required where the wall contains a window or a living/habitable room (Town of Whitby 2021a).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

The Werden's HCD contains the following zones, according to the Restricted Area Zoning By-Law 2585, as amended:

- Residential Types 1, 2, 3, 4, 6 – Downtown Zone (R1-DT, R2-DT, R3-DT, R4-DT, R6-DT)
- Residential Type 3 (R3)
- Central Commercial 3 – Downtown Zone (C3-DT)
- Commercial Residential – Downtown Zone (CR-DT)
- Institutional 1, 2 – Downtown Zone (I1-DT, I2-DT)
- Open Space 1 – Downtown Zone (OS1-DT).
- Additionally, the R2-DT, R4-DT, C3-DT, R6-DT, CR-DT, and I1-DT zones have multiple exceptions throughout the HCD.

(Town of Whitby 2021b)

In general, the building heights range from two to six storeys. The R6-DT, C3-DT, and CR-DT zones allow for six storeys, while requiring front and exterior side step backs at specific levels of the building (3 storeys, 4–5 storeys, and the 6th storey). In terms of lot coverage, most zones permit a maximum of 35 to 40%. However, the C3-DT and CR-DT zones permit 100% lot coverage, a 0 metre interior side setback, and a 0 metre exterior side setback for the first three floors (Town of Whitby 2021b).

The Werden's HCD, under policies for New Construction (for All Property Classes), Section 4.2.6, includes lot specification for density that contradict with the Zoning By-Law:

- d. A density on the lot of 0.22 building-to-lot ratio – the average density on a single-detached house lot in the neighbourhood – will be preferred.

(GBCA 2017: 46)

3.11 Municipal Policies

3.11.1 Parking

Parking in the Town is regulated by Traffic By-law 8059-24 (Town of Whitby 2024b). Parking policies are currently being reviewed and updated as part of the Town's comprehensive zoning by-law review. The updated parking policies will be reflected in the updated HCD Plans. Within the Brooklin HCD there is street parking and public and private parking lots. The Brooklin HCD Plan recommended the development of parking policies by the Town through a parking study (this is being done under the zoning by-law review), with preference given to policies that insert parking within the urban fabric in ways that are sympathetic to the HCD's heritage character, such as on-street parking, small off-street parking lots, and parking structures (BRAY Heritage *et al.* 2007). Under Section 8.2 *Guidelines for Streetscapes*, the Brooklin HCD has the following parking policy:

- Develop off street parking in areas that do not interfere with the character of the District, cause the removal of valued structure or landscapes within the District, or create discontinuity in the streetscape

(BRAY Heritage *et al.* 2007)

The BCSP also has policies on parking within the Brooklin HCD under Section 11.5.25:

- The municipality may consider cash-in-lieu of parking where it can be demonstrated that the full parking requirement cannot be provided on site or in an alternate location...Within the Heritage Commercial designation, cash-in-lieu of parking will be encouraged for non-residential development in consideration of the limited opportunities for on-site parking and the intent to retain the heritage character of the designation (11.5.28.1).
- The municipality shall prepare a short and long-term parking strategy for Downtown Brooklin to accommodate the need for an increased number of parking spaces as commercial development occurs (11.5.28.2).
- The municipality shall work with property owners to encourage more efficient use of present private parking areas for existing commercial development and

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

optimize the opportunity for new infill development and cohesive commercial main street development (11.5.28.3).

(Town of Whitby 2020: 32)

The Werden's HCD has street parking, private parking lots, and public parking lots. Within private open space, under section 4.3.3.2, the Werden's HCD Plan has a policy for minimizing parking and paving in the front yard, and encourages the creation of new parking bays in side or rear yards (Goldsmith Borgal & Company 2017).

The DWCSPP also has parking policies specific to land use designations, and a specific parking section that has the following policy directions:

- The development and redevelopment of parking lots within Downtown Whitby will be based on the Town Parking Master Plans that are specific to Downtown Whitby (11.3.9.1.1).
- The town shall consider means to reduce parking needs, which may include carpool incentives, cycling infrastructure, transit improvements, micro-transit support service and car share services (11.3.9.1.2).
- Parking is encouraged to be shared between businesses for developments and uses that do not have competing parking needs to reduce overall parking requirements (11.3.9.1.3).
- The Town may consider cash in lieu of non-residential parking where it can be demonstrated that the full parking requirement cannot be provided on-site or in an alternate location...Within the Heritage Mixed Use designation, cash-in-lieu of parking may be encouraged for in order to retain the heritage character (11.3.9.1.4).
- The Town shall work with property owners to encourage more efficient use of present private parking areas for existing commercial uses and optimize the opportunity for new infill development and cohesive commercial main street development (11.3.9.1.5).

(Town of Whitby 2024: 218)

3.11.2 Sign By-Law

Signage within both HCDs is subject to the Town's By-law Number 7379-18: Permanent Sign By-law. A sign permit is required prior to erecting or displaying a sign within the Town. Properties within the HCDs are also subject to a heritage permit (HP) under the review of the Town's heritage planner or Heritage Whitby Advisory Committee (HWAC). The sign by-law has an allowance for projecting signs within commercial areas of Downtown Brooklin and Downtown Whitby. Internally illuminated signs, or flashing, animated or electronic signs are not permitted within Downtown Brooklin and Downtown Whitby, except for certain exemptions (Town of Whitby 2018b).

The existing Brooklin HCD Plan does not have policies for signage but refers to signage being subject to the Town's sign by-law. The existing Werden's HCD Plan does not have policies for signage.

3.11.3 Urban Design

The type of building, its location on a lot, and its coverage is regulated by the zoning by-law as discussed in Section 0, however urban design policies and guidelines can provide direction on character and building design. The implementation of urban design guidelines requires planning tools such as site plan control or a minor variance for their application to be enforced by Town staff. The following Town OP policy under the Urban Design Section is applicable to both HCDs:

- Development and redevelopment in or adjacent to HCDs or designated cultural heritage resources shall be sensitively designed to complement and reflect the form and massing, and surrounding heritage character, including landscape features, through the selection of appropriate architectural features, materials, colours, and lighting, in accordance with the provisions of a HCD Plan...
(6.2.3.11.1)

(Town of Whitby 2024: 114)

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

The *Brooklin Urban Design and Sustainable Development Guidelines* were prepared by SvN Architects + Planners Inc. for the Town in 2018. The design guidelines were developed to provide a framework and inform approvals within the BCSP area for new and infill development, while preserving Brooklin's historic and distinct village-like character and natural setting. The vision statement for the design guidelines follows the same vision as the BCSP. The guidelines are broken into six categories: Sustainability, Safety and Accessibility; Character Area Design; Public Realm Design; Low-Rise Residential Design; Mid and High-Rise Residential Design; and Mixed Use and Non-Residential Design. The design guidelines will be reviewed and cross implemented within the updated Brooklin HCD Plan.

3.11.4 Community Improvement Plan

Community Improvement Plans (CIPs) are a tool under Section 28 of the *Planning Act* that provide a significant opportunity to support and encourage improvements to private properties and enhance the heritage character of the area through financial incentives and municipal leadership initiatives (Government of Ontario 1990b).

The Town of Whitby adopted the Downtown Whitby CIP in 2018 to establish a toolbox of potential incentive programs aimed at catalyzing new development and redevelopment within Downtown Whitby. One of the objectives of this CIP is to “encourage the retention, restoration and protection of the existing cultural heritage resources in a safe and attractive form.” Among the six incentives offered by this CIP, the Façade Improvement Grant and Interior Heritage Building Grant focus on heritage conservation. Both programs provide financial assistance to eligible owners/tenants of non-residential and mixed use buildings within the Community Improvement Plan Area (CIPA) and apply to designated properties within the “Historic Downtown Whitby Priority Area” as well as the broader CIPA. The priority area, bounded by John Street in the north, Ontario Street in the south, Hickory Street in the east and Henry Street in the west, overlaps with commercially zoned parcels within the Werden's Plan Neighbourhood HCD area.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
3 Policy Framework
May 2025

The Façade Improvement Grant Program is intended to partially offset the costs of façade maintenance, restoration, improvements and/or design work. It provides up to 50% of the costs for external improvements, up to a maximum of \$10,000 per municipal street address, storefront or commercial unit, whichever is less, subject to an overall maximum of \$30,000 per property for a building with multiple street addresses, storefronts or commercial units. Additionally, a design grant covering up to 50% of the costs for professional design fees associated with a Façade Improvement, Sign, and/or Interior Heritage Building Grant project, up to a maximum of \$2,000 per municipal street address, storefront or commercial unit for properties within the CIPA, may also be provided in addition to these grants.

The Interior Heritage Building Grant Program is intended to partially offset the costs of eligible interior building improvements, including bringing existing heritage properties to current Building Code requirements, Fire Code requirements, and Accessibility requirements. The grant covers 50% of the costs of internal improvements, up to a maximum of \$10,000 for eligible listed or designated heritage properties. This is limited to properties that are commercially or institutionally zoned, including the residential portion of a mixed use commercially zoned property.

(Town of Whitby 2018a)

4 Existing Conditions of the HCDs

4.1 Introduction

An important part of the HCD Plan review and update process is to determine the existing conditions of each HCD so that the Town can measure how the HCDs have performed since their designations in 2007 and 2017 and whether their HCD Plan objectives are being met. To identify the existing conditions of the HCDs, the Project Team collected inventory data during the field program using ArcGIS Collector.

The Brooklin HCD contains 164 property parcels with 185 address points that include residential, commercial, institutional, or mixed use buildings, or open space, park, vacant, or cemetery lands. The analysis contained within this report uses the 185 address points as its basis to more accurately reflect instances where one property parcel contains multiple individual structures for which data were collected.

The Werden's HCD contains 256 property parcels with 256 address points that include residential, commercial, civic, institutional, park/space, and places of worship.

It should be noted that property parcels and municipal addresses are subject to change over time. The addresses used in this report reflect current data provided by the Town.

The following analysis of built form within the HCD Plans is based on the inventory forms from the HCD studies and data collected during the site visits conducted in April 2025. The inventory forms for the Brooklin HCD Study and the Werden's HCD Study were reviewed and inputted from into ESRI ArcGIS. Data was confirmed and updated in the field. Each updated inventory form contains municipal address, current use, primary building or cladding material, architectural style or influence, presence of mature vegetation or landscape features, and integrity of heritage features. In assessing heritage integrity, definitions are as follows:

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

- **High:** The structure clearly displays historical features, such as cladding, windows, doors, porches, trim, or architectural details that demonstrate a historical architectural style or have been replaced or modified in a manner that is sympathetic to the historical architecture.
- **Medium:** Some elements of the building have been modified, replaced, or obscured but the historical form, building type, or understanding of architectural style or influence is still apparent.
- **Low:** Few, if any, heritage features are apparent, and changes have been unsympathetic to the historical architecture, form, or type.
- **Not Applicable (N/A):** The property does not contain a structure of potential heritage value, the structure has been heavily modified, or the structure is of recent construction.

Data related to built form was collected for 185 properties in the Brooklin HCD Plan, and 256 properties in the Werden's HCD. This information was used to better understand the existing conditions of each HCD and to identify the heritage integrity of each structure. The construction period for each property was based on the existing HCD studies and a review of available mapping and fire insurance plans. Within the discussion below, the term "not applicable" is used to reference properties which do not contain a structure, usually a park, open space, or parking lot.

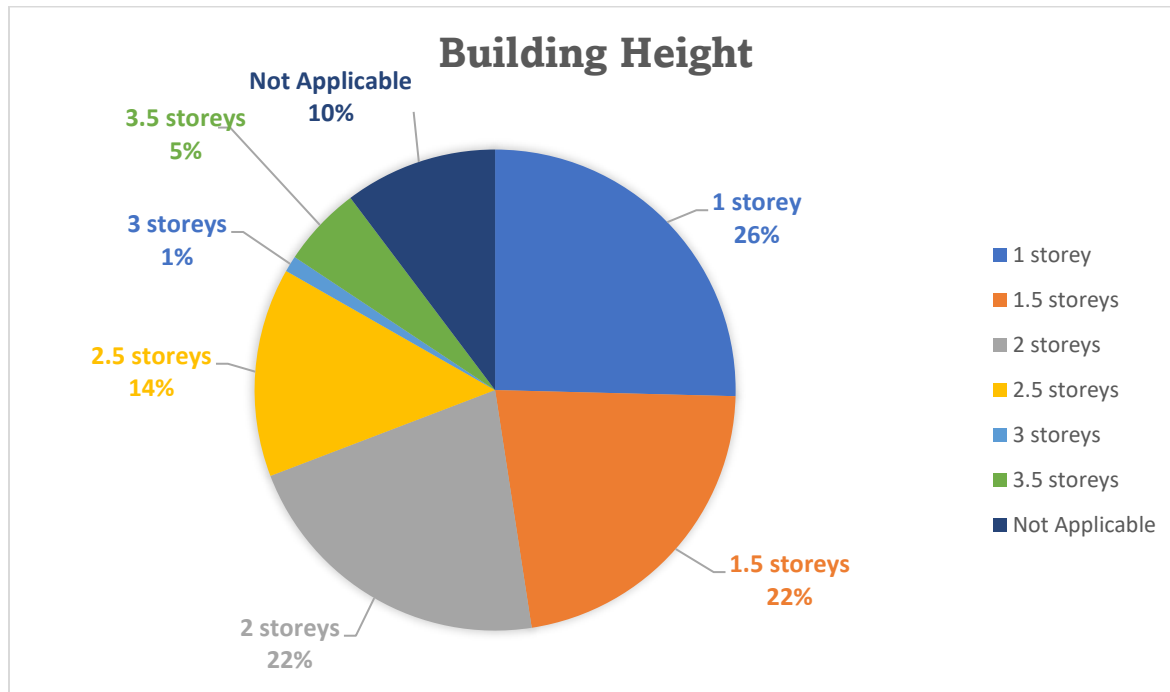

4.2 Brooklin HCD Built Form

4.2.1 Height

The building heights in the Brooklin HCD consist of mostly low-rise structures between one storey and two and one half storeys in height. The HCD contains a total of 185 properties, the majority of which are between one storey and two storeys in height. This data is visually presented in Chart 1.

Chart 1 Building Height in Brooklin HCD

4.2.2 Construction Periods

Construction dates were recorded for buildings in the Brooklin HCD by reviewing the existing inventory, historical mapping, and aerial photography. Dates provided in the original inventory have not been altered unless a discrepancy was identified. To facilitate the analysis of construction periods, seven key date ranges in the HCD's development were identified based on an understanding of the development of the HCD and available mapping:

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

- 1840-1871
- 1872-1903
- 1904-1929
- 1930-1944
- 1945-1968
- 1969-1993
- 1994-Present

The Brooklin HCD contains a mixture of construction dates that are influenced by new development and infill post-1994 with development pressures and urban expansion on the Village of Brooklin. Within the Brooklin HCD, most structures were built during two time periods. The first period of construction was between 1872 and 1929. A second wave of construction has been underway since 1994. This data is visually presented in Chart 2.

Chart 2 Construction Periods in the Brooklin HCD

4.2.3 Architectural Styles and Influences

The Brooklin HCD contains a diverse collection of mid-19th century to contemporary structures with a wide range of architectural styles and influences. This is due to its periods of development, including the first period of construction between 1872 and

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

1929, and the second wave of construction since 1994. The largest percentage of structures within the HCD are Vernacular (31%), followed by 21st Century (13%), Contemporary Replica (12%). The predominance of vernacular architecture is common to many historic communities in Ontario, where construction and design was often influenced by locally available materials. The following listing is of the architectural styles and influences found within the HCD:

- Regency (Photo 1)
- Gothic Revival (Photo 2)
- Georgian (Photo 3)
- Colonial Revival (Photo 4)
- Italianate (Photo 5)
- Queen Anne (Photo 6)
- Edwardian (Photo 7)
- Craftsman/Arts and Crafts (Photo 8)
- Vernacular (Photo 9)
- Mid- to late 20th century styles include:
 - Contemporary replicas of historical styles (Photo 10)
 - Ranch (Photo 11)
 - Modernist (Photo 12)
 - Other 20th Century Modern (Photo 13)
 - 21st Century (Photo 14)

A breakdown of the architectural styles and influences present within the Brooklin HCD is provided in Chart 3 below where a style noted above applies to 3 or more properties.

Vernacular structures are the most common structures within the Brooklin HCD at 38% of the building stock. Vernacular architecture is characterized as making use of local materials and forms (Humphreys and Sykes 1974). Within the Brooklin HCD, vernacular architectural trends are illustrated in a wide variety of structures, ranging from mid- to late 19th century brick houses to mid-20th century bungalows and one and one half storey residences. Vernacular trends are also illustrated in the Brooklin HCD through the blending of architectural styles or modifications over time that have resulted in some

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

residences no longer having one distinct architectural style. The prevalence of vernacular architecture from the mid- to late 19th century through the mid-20th century reflects the development of Whitby and contributes to the historic sense of place still observable within the Brooklin HCD.

In addition to vernacular structures, 20th century modern structures and contemporary replicas of historical styles also account for larger portions of the building stock at 16% and 11%, respectively.

4.2.4 Cladding Materials

Cladding materials in the Brooklin HCD are dominated by red brick and vinyl/aluminum cladding. Among the 185 HCD properties, 49 (27%) buildings are clad or built in red brick, and 40 (22%) buildings are clad in vinyl/aluminum siding. Brick was predominantly used on historic buildings and remained a commonly used cladding material into the mid-20th century. The use of vinyl/aluminum siding is often the result of overcladding on historic buildings where there may be frame or brick beneath that has been covered for maintenance or aesthetic reasons. Siding also became a common building material beginning in the mid to late 20th century, sometimes in combination with other materials. The following listing is the building cladding types found within the HCD:

- Board and batten
- Buff brick
- Concrete block
- Late 20th to 21st century mixed materials
- Mid-century mixed materials
- Other brick
- Painted brick
- Stone
- Stucco
- Red brick
- Vinyl/aluminum siding

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Chart 4 Building Cladding in the Brooklin HCD

4.2.5 Preliminary Evaluation of HCD Properties

As discussed in Section 3.4.1, revisions to the OHA and O. Reg. 9/06 require 25% of the properties within a proposed HCD meet two or more of the prescribed criteria. While Brooklin is already an existing HCD, this requirement provides a useful framework for determining if the HCD still meets the 25% to be considered an HCD under the current OHA legislation. The evaluation of each property considers how the property relates to the Statement of CHVI and attributes of the HCD (e.g. is it representative of an architectural style found within the HCD, maintain or support the character of the HCD, or have visual, physical, or historical links to other properties in the HCD). Within the Brooklin HCD, 79 properties (43%) out of 185 meet two or more criteria of O. Reg. 9/06.

4.3 Werden’s Plan Neighbourhood HCD Built From

4.3.1 Height

The buildings in the Werden’s HCD consist predominantly of low-rise structures between one storey and two storeys in height. The HCD contains a total of 256 properties, the majority of which are between one and two storeys in height. This data is visually presented in Chart 5.

Chart 5 Building Height in Werden’s HCD

4.3.2 Construction Periods

Construction dates were recorded for buildings in the Werden’s HCD by reviewing the existing inventory, historical mapping, and aerial photography. Dates provided in the original inventory have not been altered unless a discrepancy was identified. To facilitate the analysis of construction periods, seven key date ranges in the HCD’s

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

development were identified based on an understanding of the development of the HCD and available mapping:

- Pre 1854
- 1855-1881
- 1882-1910
- 1911-1945
- 1946-1971
- 1972-2004
- 2005-Present

Among the properties located within the Werden's HCD, most were built between 1885 and 1971. This data is visually presented in Chart 6.

Chart 6 Construction Periods in Werden's HCD

4.3.3 Architectural Styles and Influences in Werden's Plan Neighbourhood HCD

The Werden's HCD contains a wide range of architectural styles and influences, both historic and contemporary. This is reflective of the HCD's periods of construction, with

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

56% constructed between the mid-19th century and 1945, and 30% constructed between 1946 and 1971. The largest percentage of structures within the HCD are Vernacular (23%), followed by Minimal Traditional (10%), and Ranch or Split Level (10%). Within the Werden's HCD's collection of mid-19th century to contemporary structures, the following styles or influences are present:

- Georgian (Photo 15)
- Neoclassical (Photo 16)
- Regency (Photo 17)
- Gothic Revival (Photo 18)
- Colonial Revival (Photo 19)
- Italianate (Photo 20)
- Edwardian (Photo 21)
- Craftsman/Arts and Crafts (Photo 22)
- Vernacular (Photo 23)

Mid- to late 20th century styles include:

- Contemporary replicas of historical styles (Photo 24)
- Minimal Traditional (Photo 25)
- Ranch/Split Level (Photo 26)
- Other 20th Century Modern (Photo 27)
- 21st Century (Photo 28)

A breakdown of the architectural styles and influences present within the Werden's HCD is provided in Chart 7 below.

Vernacular structures are the most common structures within the Werden's HCD at 23% of the building stock. Vernacular architecture is characterized as making use of local materials and forms (Humphreys and Sykes 1974). Within the Werden's HCD, vernacular architectural trends are illustrated in a wide variety of structures, ranging from early to mid-19th century frame houses to mid-20th century bungalows and one and one half storey residences. Vernacular trends are also illustrated in the Werden's HCD

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

through the blending of architectural styles or modifications over time that have resulted in some residences no longer having one distinct architectural style. The prevalence of vernacular architecture from the mid- to late 19th century through the mid-20th century reflects the development of Whitby and contributes to the historic sense of place still observable within the Werden's HCD.

In addition to vernacular structures, the minimal traditional style and Edwardian style also account for larger portions of the building stock at 10% and 8%, respectively. Together, vernacular, minimal traditional and Edwardian styles, account for just under half of the 256 structures within the Werden's HCD. The remaining building stock is split into small groups that include multiple different architectural styles or influences.

4.3.4 Cladding Materials

Cladding in the Werden's HCD is dominated by brick. The HCD contains a total of 256 properties. Among these properties, 101 (39%) contain red brick cladding or construction, 1 (0.3%) contains a buff brick cladding or construction, 40 (16%) contain other coloured brick exteriors, and 8 (3%) contain a painted brick exterior. Brick was a major building material in southern Ontario due to the widespread availability of clay deposits. In general, clay that yielded red brick was more widely available east of the Niagara Escarpment (McIlwraith 1997: 89-90). This is reflected in the HCD by the large number of red brick buildings and the existence of only a single buff brick building. The following listing of building cladding types are found within the HCD:

- 20th to 21st Century Mixed Materials
- Other Brick
- Painted Brick
- Red brick
- Stucco
- Vinyl/aluminum siding
- Wood siding

This data is visually presented in Chart 8.

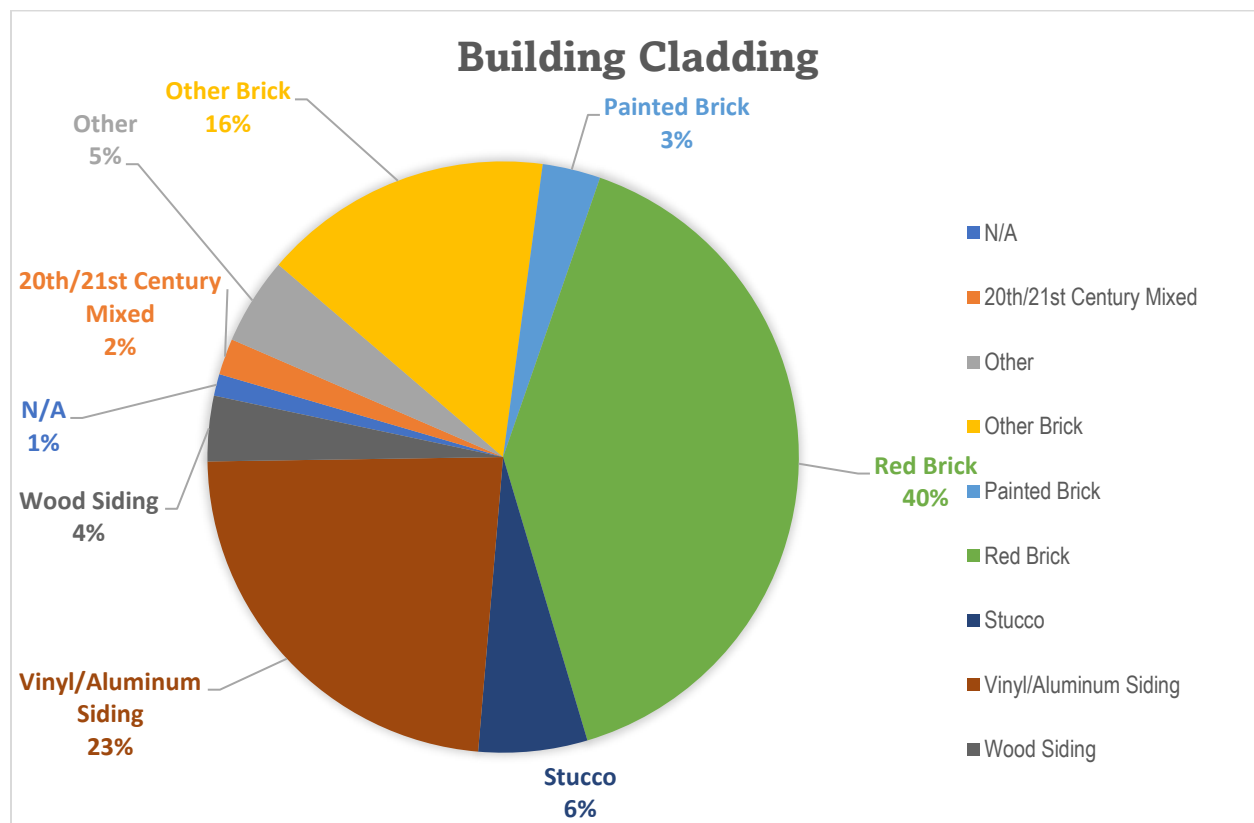

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Chart 8 Building Cladding

4.3.5 Preliminary Evaluation of HCD Properties

As discussed in Section 3.4.1, revisions to the OHA and O. Reg. 9/06 require 25% of the properties within a proposed HCD meet two or more of the prescribed criteria. While Werden's is already an existing HCD, this requirement provides a useful framework for determining if the HCD still meets the 25% to be considered an HCD under the current OHA legislation. The evaluation of each property considers how the property relates to the statement of CHVI and attributes of the HCD (e.g. is it representative of an architectural style found within the HCD, maintain or support the character of the HCD, or have visual, physical, or historical links to other properties in the HCD). Within the Werden's HCD, 176 out of 256 (69%) meet two or more criteria of O. Reg. 9/06.

4.4 Landscaping, Streetscaping and Vegetation

4.4.1 Approaches and Gateways

4.4.1.1 Introduction

Approaches and gateways help identify whether an HCD, or parts of it, have a distinguishable visual character. Approaches to or from a place can be characterized as either primary gateways or secondary gateways. Primary gateways are those which are emphasized by detectable approaches or other physical or visual signals that indicate the space or place is somehow different from its surroundings. This might include physical markers like notable buildings or structures, natural features, or changes in topography that highlight a sense of arrival.

Secondary gateways are entries into an area that are not clearly defined or readily discernible from the surrounding context. They may exist solely “on paper”, where one side of a street is located within an HCD and another is not, despite having a similar appearance. Secondary gateways do not have strongly detectable approaches or other key features that signal the entrance or arrival to an HCD.

4.4.1.2 Brooklin HCD

The primary gateway of the Brooklin HCD is the north boundary of the intersection of Baldwin Street, Colston Avenue, and George Street. The existing Brooklin HCD Plan identifies this primary gateway as the “North Gateway” and notes “This entry to Baldwin Street (the North Gateway) is an important aspect of the District...” (BRAY Heritage *et al.* 2007: 74). Detectable elements of this gateway include the especially large property parcel at 90 Colston Avenue with its mature trees and the gentle slope in topography down towards Lynde Creek and the bridge spanning the watercourse (Photo 29 and Photo 30). This primary gateway is further delineated from its surroundings by a series of ornamental posts topped with a stylized letter “B” and banners (Photo 31).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

The remainder of the approaches and gateways within the Brooklin HCD are considered secondary gateways. Along Winchester Road East (Photo 32), Cassels Road East (Photo 33), Vipond Road, and Way Street (Photo 34) there are no distinct visual or physical signs that differentiate the entrance into the HCD from its surroundings. A sign affixed to a red brick base which reads “Historic Downtown Brooklin” is located at the south entrance to the HCD along Baldwin Street at its intersection with Winchester Road (Photo 35). However, this sign is not especially notable to passing motorists and pedestrians and the character of this area is defined by its contemporary commercial uses (Photo 36). The existing HCD Plan considers the intersection of Baldwin Street and Winchester Road the “southern gateway” to the HCD and notes that streetscape enhancements are warranted here to “differentiate the District from the large scale commercial area to the south” (BRAY Heritage *et al.* 2007: 118).

Photo 36 **Secondary gateway at Winchester Road and Baldwin Street, looking north**

4.4.1.3 Werden's HCD

The Werden's Plan Neighbourhood HCD is closely integrated into the broader downtown Whitby area. Neither the HCD Study nor HCD Plan contain a discussion of gateways into the Werden's HCD. The primary gateway into the HCD may be considered the southeast corner of the intersection of Dundas Street West and Henry Street (Photo 37). This is the location of Celebration Square and the Whitby Public Library. The hardscaping, public art, and scale of the library are visually distinct when compared to the surrounding area (Photo 38).

The secondary gateways into the Werden's HCD consist primarily of the intersections of the HCD's local roads (Colborne Street West, Dunlop Street West, Ontario Street West, St. John Street West, and Trent Street) with the collector roads Henry Street and Brock Street South (Photo 39 and Photo 40).

4.4.2 Vegetation and Landscaping (Softscape)

4.4.2.1 Brooklin HCD

The Brooklin HCD contains a variety of tree species, including large areas of naturalized vegetation in the parks and open spaces near Lynde Creek (Photo 41). The back yards of many properties contain trees. While these trees are setback from the public realm, they contribute to the overall tree canopy of the HCD. The HCD also contains many examples of street trees (trees located on municipal property) with varying ages and

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

health conditions. Areas in the Brooklin HCD with high concentrations of street trees include the southwest corner of the intersection of Baldwin Street and Colston Avenue, in Grass Park, along Durham Street, Princess Street, and Cassels Road East (Photo 42). Many examples of street trees were noted within the Brooklin HCD, including the following types:

- Sugar maple (Photo 43)
- Honey locust
- Linden
- Norway maple
- Black walnut (Photo 44)
- Sycamore
- Colorado blue spruce
- Apple
- Hackberry
- Elm
- White pine
- Red oak
- Columnar English oak
- Austrian pine
- Hemlock
- Gingko
- Freeman maple

Based on the results of the field program, there is a lack of newly planted trees within the HCD. Planting trees now in preparation for future removals will offset canopy loss and develop a new urban canopy.

May 2025

4.4.2.2 Werden's HCD

The Werden's HCD contains little to no naturalized areas of landscape and nearly all street trees are on residential properties or located within the District's public parks and civic buildings (Photo 45 to Photo 47). The back yards of many properties contain trees. While these trees are set back from the public realm, they contribute to the overall tree canopy and vegetation of the HCD. Many examples of mature trees were noted within the Werden's HCD, including the following types:

- Sugar maple
- Honey locust
- Linden
- Norway maple
- Black walnut
- Sycamore
- Colorado blue spruce
- Apple
- Hackberry
- Elm
- White pine
- Red oak
- Columnar English oak
- Austrian pine
- Hemlock
- Larch
- Ivory silk lilac
- Red maple
- Silver maple (Photo 48)

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Based on the results of the field program, there is a lack of newly planted trees within the HCD. Only one newly planted tree was found, located on west side of Centre Street South of Pitt Street West.

4.4.3 Hardscape, Street Furniture, and Signage

4.4.3.1 Introduction

Hardscape elements in the HCDs include paving surfaces on public and private properties, fencing, and street furniture. Together these elements can help to tie the landscape together, linking people and places with one another. They are not only integral to transportation and movement, but also the conduits through which much of public life passes and can play a fundamental role in the vitality of communities.

4.4.3.2 Brooklin HCD

Sidewalks and Boulevards: The Brooklin HCD contains a variety of sidewalk and boulevard configurations including areas with no curbs or sidewalks (Photo 49) and areas with concrete sidewalks on one or both sides of the street (Photo 50). Boulevards within residential parts of the HCD are comprised mostly of lawn with a mix of small to mature street trees (Photo 51). Boulevards along arterial roadways are typically narrow and have been paved with interlock pavers or asphalt (Photo 52).

Photo 49 No sidewalks on part of Way Street, looking south

4 Existing Conditions of the HCDs

May 2025

Photo 51 Boulevard with lawn and trees on Price Street, looking south

Photo 52 Boulevard with interlock pavers on Baldwin Street, looking south

Municipal Lighting: Municipal streetlighting within the HCD is predominantly provided by LED luminaires affixed to utility poles by metal masts (Photo 53). There also examples of freestanding streetlighting, primarily in the predominantly commercial parts of the District along Baldwin Street, Campbell Street, Grass Park, and Roebuck Street. These are contemporary light fixtures with lantern style LED luminaires (Photo 54). Near the north boundary of the District on Carnwith Drive there are also examples of utilitarian freestanding octagonal streetlights with LED luminaires (Photo 55).

May 2025

Photo 53 Streetlight affixed to utility pole on Way Street, looking west

Photo 54 Freestanding streetlight with lantern style luminaire on Campbell Street

Photo 55 Freestanding octagonal pole on Carnwith Drive, looking east

Street Furniture: Aside from trash receptacles decorated with the town's seal (Photo 56) along commercial parts of Baldwin Street, Vipond Road, and Campbell Street, most street furniture is located in a small parkette at the southwest corner of Campbell Street and Baldwin Street, within Grass Park, and along Roebuck Street. Street furniture in the parkette includes metal benches, bike racks, and a freestanding clock with a Roman numeral clockface and "Village of Brooklin" affixed atop the clockface (Photo 57). Street furniture within Grass Park includes benches constructed of wood and metal (Photo 58)

May 2025

and a metal water fountain designed to accommodate people and pets. Roebuck Street is lined with the previously discussed trash receptacles, metal benches, and metal bike racks that are uniform in appearance (Photo 59). Parts of Baldwin Street contain street furniture consisting of ornamental posts topped with stylized letter Bs and banners; some utility poles within the HCD also contain banners (Photo 60 and Photo 61).

Photo 60 Ornamental post with banner, representative photo

Photo 61 Utility pole with banner, representative photo

Street Signage: Municipal street signage within the Brooklin HCD is comprised of a mix of signage. Many intersections contain street signs designed to evoke the “acorn” style signage popular in the mid-20th century. These signs contain acorn style finials with a green background and white lettering. They state “Village of Brooklin, Est. 1847” as well as the street name in a sans-serif capitalized typeface (Photo 62). Other intersections, most commonly along the District’s boundaries, contain utilitarian rectangular street signs with a blue background and white lettering with a sans-serif capitalized typeface (Photo 63).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 62 Acorn style street sign, representative photo

Photo 63 Utilitarian street sign, representative photo

Building Signage: Building signage within the Brooklin HCD consists mostly of rectangular signs located above storefronts, including a mix of externally lit and backlit or unlit signs. Signage does not adhere to a typical style nor does it appear to be tailored to bring a sense of visual coherence to the HCD (Photo 64 and Photo 65).

4 Existing Conditions of the HCDs

May 2025

4.4.3.3 Werden's Plan Neighbourhood HCD

Sidewalks and Boulevards: The streets encompassing the Werden's HCD contain concrete sidewalks on at least one side of each street. Not all streets within the HCD contain boulevards (Photo 66). In many cases, boulevards within the HCD are very narrow and are paved with interlock pavers or asphalt (Photo 67). Wider boulevards contain lawns. Due the narrow width of the boulevards within the HCD, the boulevards generally do not contain street trees (Photo 67 and Photo 68). However, Ontario Street West between King Street and Centre Street South contains a wider boulevard paved with interlock pavers and lined with street trees on its north side (Photo 68 and Photo 69). The roots of these trees are protected by metal guards stamped with the town's seal (Photo 70 and Photo 71).

May 2025

Photo 68 Representative example of a boulevard with a lawn on Byron Street, looking north

Photo 69 Boulevard on Ontario Street West, looking west

Photo 70 Tree root guard, representative photo

Photo 71 Town seal details

Municipal Lighting: Municipal streetlighting within the District is predominantly provided by LED luminaires affixed to utility poles by metal masts (Photo 72). There are also examples of freestanding streetlighting. This includes utilitarian octagonal poles with LED luminaires (Photo 73). The District also contains two examples of contemporary freestanding decorative streetlighting. This includes light fixtures with lantern style LED luminaires (Photo 74) and light fixtures with a distinctively modern design that complement the adjacent public library (Photo 75).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

May 2025

Photo 72 LED streetlighting affixed to utility poles, representative photo

Photo 73 Representative freestanding octagonal streetlight

Photo 74 Representative freestanding streetlight with lantern luminaire

Photo 75 Modern freestanding streetlighting adjacent to the library

Street Furniture: In general, there are limited examples of street furniture within the Werden's HCD. Much of the District's street furniture is located within or adjacent to the Whitby Public Library on Dundas Street and within the library's courtyard. This includes a glass and metal bus shelter, large circular planters, tables with metal umbrellas, benches and Muskoka chairs (Photo 76 and Photo 77).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 76 Bus shelter on Dundas Street, looking east

Photo 77 Library courtyard, looking south

Street Signage: Municipal street signage within the Werden's HCD is comprised of a mix of signage. Many intersections contain ornamented street signs designed to evoke the “acorn” style signage popular in the mid-20th century. These signs contain acorn style finials with a green background and white lettering. They state “Downtown Whitby Inc. 1855” as well as the street name in a sans-serif capitalized typeface (Photo 78). Other intersections, most commonly along the District’s boundaries, contain utilitarian rectangular street signs with a blue background and white lettering with a sans-serif capitalized typeface (Photo 79).

Photo 79 Representative utilitarian street sign

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Building Signage: Building signage within the Werden's HCD is not prevalent due to the predominantly residential character of the District. Signage present within the District is comprised mostly of freestanding signs located within a property's frontage or small signs affixed to a building (Photo 80 and Photo 81). Signage does not adhere to a typical style, nor does it appear to be tailored to bring a sense of visual coherence to the HCD.

Photo 80 **Representative freestanding sign, looking east**

Photo 81 **Representative freestanding sign and sign affixed to a building, looking west**

4.4.4 Public Art, Commemoration, and Interpretation

4.4.4.1 Brooklin HCD

The Brooklin HCD contains various commemorative and interpretive elements. This includes interpretive plaques commemorating former land uses and interpretive panels explaining the history of Brooklin and its properties (Photo 82). Many of these interpretive panels were prepared by the Brooklin Downtown Business Association (Photo 83).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 83 Downtown Business Association interpretive panel in Grass Park

4.4.4.2 Werden's Plan Neighbourhood HCD

The Werden's HCD contains various commemorative, interpretive, and public art elements. Two of these elements are located at the Whitby Public Library. This includes a statue honouring Sir William Stephenson, a Canadian military intelligence officer during the Second World War (Photo 84) and a commemorative walk built by the Whitby Rotary entitled "Wilkinson Way", dedicated to Wilfrid J. Wilkinson, the first Canadian president of Rotary International (Photo 85) Other elements include a model of the former Almonds United Church at St. Marks United Church (Photo 86), two examples of public art carved from tree trunks (Photo 87), two murals affixed to a wall at Rotary Centennial Park (Photo 88), and utility boxes that have been decorated with murals (Photo 89). Interpretation specific to the HCD includes interpretive panels located within the public park at 390 King Street South (Photo 90).

4.4.5 Parks and Open Spaces

4.4.5.1 Brooklin HCD

Brooklin Kinsmen Park and Other Open Spaces along Lynde Creek: These areas are comprised mostly of riparian vegetation, deciduous trees, and coniferous trees in various stages of ecological succession. Numerous informal footpaths in Brooklin Kinsmen Park and Brooklin Kinsmen Open Space cross the area, connecting to the street network at Way Street and the parking lot at 8 Vipond Road (Photo 91). The

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

character of Way Street is heavily influenced by the surrounding open areas and contains a distinctly more rural character when compared to other streets within the District. East of Baldwin Street, the Cassels Road Open Space is narrower and more closely hugs the alignment of Lynde Creek. Overall, these open spaces contain strong contextual links to Lynde Creek. The influence of Lynde Creek is also evident to passing motorists and pedestrians on Cassels Road East and Baldwin Street as each street contains a concrete bridge that spans the creek. While the creek may not be directly visible to passing motorists, the surrounding dense naturalized vegetation stands in contrast with the suburban character of the surrounding areas (Photo 92).

Photo 91 **Footpath along Lynde Creek, looking west**

Photo 92 **Vegetation surrounding bridge on Baldwin Street, looking south**

Grass Park: Grass Park serves as the community of Brooklin's primary outdoor gathering space. It is a wedge-shaped park bounded by Baldwin Street North, Roebuck Street, and Cassels Road. During events, Roebuck Street is often closed to vehicle traffic and used as event space. Grass Park is mostly softscaped with lawn, garden beds, and a variety of small, intermediate, and mature trees (Photo 93). The park contains a pathway paved with interlock pavers that leads to a gazebo (Photo 94).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 93 **Grass Park, looking north**

Photo 94 **Grass Park gazebo, looking south**

Other Spaces: Other open spaces within the Brooklin HCD include a small parkette on private property at 50 Baldwin Street and the Brooklin Pioneer Cemetery at 21 Albert Street. The parkette at 50 Baldwin Street contains benches, bike racks, and a freestanding clock (Photo 95). The Brooklin Pioneer Cemetery is a fenced-off area of naturalized vegetation that contains a closed burial ground. While the grave markers were moved, up to 100 people may remain interred (Photo 96) (Town of Whitby 2013).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 95 **Parkette, looking west**

Photo 96 **Pioneer cemetery, looking south**

4.4.5.2 **Werden's HCD**

Rotary Centennial Park: Rotary Centennial Park is the primary park space within the District. It is a rectangular shaped parcel bounded by Trent Street West, Brock Street South, Burns Street East, and Byron Street South. The park is primarily softscaped and contains a large lawn, garden beds, and various small, intermediate, and mature deciduous and coniferous trees (Photo 97). The south end of the park contains a playground and two small buildings, and the north end contains a gazebo. Hardscaping in the park is comprised of concrete paved paths lined with benches and streetlighting with lantern style luminaires, and an area of concrete paving near the playground (Photo 98).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 97 **Lawn, trees, and garden bed, looking north**

Photo 98 **Concrete path, looking south**

King Street Park: The King Street Park is comprised of a former road allowance. The park is relatively linear and contains an asphalt path, benches, areas of meadow and lawn, and an interpretive panel about the history of the Werden's HCD (Photo 99 and Photo 100).

Photo 99 **King Street Park, looking east**

4 Existing Conditions of the HCDs

May 2025

4.5 Views and Vistas

4.5.1 Brooklin HCD

The existing Brooklin HCD Plan broadly identified views within the HCD based on general streetscapes within the District, views of Lynde Creek, and views of trees and landscaped yards between buildings. Within the Brooklin HCD, views of Lynde Creek are the most readily discernible view. Along Baldwin Street and Way Street, this view is supported by a general slope in elevation towards the creek, mature vegetation, and the bridge spanning the creek (Photo 101). Along Cassels Street East, the view of Lynde Creek is less pronounced but still notable (Photo 102). While the creek may not be visible to passing motorists, the surrounding vegetation and the bridge railings supports the viewscape. Pedestrians using both bridges have more prominent views of Lynde Creek. Aside from these previously identified views, the Brooklin HCD also contains notable views of the Brooklin United Church and former Brooklin Mill when looking west down Casels Road East from the Lynde Creek Bridge (Photo 103).

Photo 101 View of Lynde Creek from Way Street, looking west

4 Existing Conditions of the HCDs

May 2025

Photo 103 **View of mill and church,
looking west**

4.5.2 **Werden's Plan Neighbourhood HCD**

The existing Werden's HCD identified several views within the District. These views are mostly related to the District's landmarks. The most prominent view identified in the District are views of the All-Saints' Anglican Church (outside of the District) from Centre Street South and the Whitby Public Library. Generally, the spire of this church is prominently visible from Centre Street South and forms a readily discernible visual axis (Photo 104). The HCD Plan also identified views to the Centennial Building and the St. Arsenije Sremac Serbian Orthodox Church. Generally, these views are less readily discernible due to vegetation. More broadly, the HCD Plan also identified the District's street trees as framing views along the HCD's streetscapes Goldsmith Borgal & Company 2017: 26; 29) (Photo 105).

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Photo 104 Representative photo of visual axis between Centre Street South and the church spire, looking north

Photo 105 Street trees framing views along King Street, looking south

4.6 Transportation Infrastructure

4.6.1 Brooklin HCD

As discussed in Section 3.5 the Brooklin HCD contains two provincial highways: Highway 12 (Baldwin Street) and Highway 7 (Winchester Road East) that are main arterial roadways within the HCD. Baldwin Street transverses the HCD on a diagonal, while Highway 7 forms the southern border of the HCD. Baldwin Street is a two-lane asphalt roadway with a centre double yellow line, on street parking, concrete curbs, and sidewalks on both the west and east sides of the roadway. There are streetlights at the intersections of Highway 7 and Campbell Street. It is a heavy traffic roadway, with only the two pedestrian crossing lights.

Winchester Road East is currently being widened and rehabilitated by the Region, between Baldwin Street and Watford Street/Anderson. Between Baldwin Street and Durham Street, Winchester Road East is a four-lane roadway with a centre concrete boulevard, concrete curbs, and a sidewalk on north and south sides. Between Durham

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

Street and Simcoe Street, Winchester Road East merges down into a two-lane roadway.

Cassels Road West and East and Vipond Road are collector roads within the HCD, that are two-lane roadways, with concrete curbs, sidewalks, and some street parking.

Roebuck Street is a small collector roadway that gets closed for special Brooklin community events.

The HCD retains rural village streetscapes along Durham, Pearl, Church, and Way Streets that have an asphalt roadway with no asphalt shoulders or sidewalks. Princess Street and Cassels Road East of Lynde Creek are similar rural village streetscapes except for a sidewalk separated from the road by a grassed and treed boulevard that adds to the walkability of these residential streets.

4.6.2 Werden's HCD

The Werden's HCD contains a mix of roadway types, including arterial, collector, and local. The only arterial roadway partially located within the District is Dundas Street East, which forms part of the northern boundary of the District. Historically, this was part of King's Highway 2, a major provincial roadway that connected Windsor with Cornwall. Presently, this is a four-lane asphalt paved roadway with on-street parking, concrete sidewalks, and curbs (Photo 106). Collector roads within the Werden's HCD include Henry Street and Brock Street South. Both of these roads form parts of the east and west boundaries of the District. Both roads are asphalt paved roads with concrete sidewalks and curbs (Photo 107).

The remainder of the roads within the Werden's HCD are local roads. When the original HCD Plan was completed, many of these roads retained a rural profile with no curbs. Roads noted in the HCD Plan as remaining uncurbed in part or whole included Gilbert Street West, Ontario Street West, Trent Street West, Pitt Street West, King Street, and Centre Street South. Since the adoption of the HCD Plan, many of these streets have been upgraded to contemporary standards, including the installation of new curbs and

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

4 Existing Conditions of the HCDs

May 2025

sidewalks. Road improvements have been completed on King Street, Centre Street South, Gilbert Street West, and Ontario Street West (Photo 108). Both Trent Street West and Pitt Street West remain uncurbed (Photo 109).

5 Evolution of the Heritage Conservation Districts

5.1 Introduction

This section reviews the available HPs and development applications and includes a comparison of the existing conditions to the 2006/2012 HCD study inventories as means of analyzing the amount and types of change that has occurred in each HCD over time. Understanding the evolution of each HCD will help determine if the current policies are effectively meeting the goals and objectives of the each HCD.

5.2 Brooklin HCD

5.2.1 Property Changes

The Brooklin HCD Plan has been in place for more than 17 years. The most dominant changes to the HCD are apparent approaching the HCD from the south at the intersection of Baldwin Street and Winchester Street East. Redevelopment has resulted in removal and replacement of buildings identified in the 2006 inventory with new commercial structures.

There has been several building removals and replacements with new commercial and town house developments between Baldwin Street and Cassels Road. Moving north of Cassels Road along Baldwin Street, most of the commercial properties have been altered since 2006 with painted exteriors or updated cladding, new light fixtures, and new signs. A new development along Baldwin Street involved the removal of six buildings from the 2006 inventory, with construction of new buildings and a rear parking lot. The northwest approach to the HCD at Carnwith Drive West and Way Street has been altered with the removal of a former farmstead, and the replacement with contemporary residences along Carnwith Drive West. The residential properties within the HCD have generally had minimal changes, and where changes have occurred, they are related to building upkeep, such as new roofing, cladding, windows, and doors.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

5 Evolution of the Heritage Conservation Districts

May 2025

A summary of property changes as identified through inventory review, fieldwork, and information supplied by the Town is presented below in Table 5-1.

Sustainability and accessibility	<ul style="list-style-type: none"> • One electric vehicle charging station installed • One new heat pump installed

6 Consultation

6.1 Municipal Consultation

6.1.1 Kick-Off Meeting

The kick-off meeting for the HCD Plan Review and Update was held virtually on January 15, 2025, with the Stantec Project Team and Town planning staff. The following were the main concerns that Town staff have experienced using and enforcing the HCD Plans:

- Some HCD policies conflict or are not in alignment with other Town planning policies
- Property owner concerns with the HP process
- Tree removals
- Demolition process and approvals
- Lot coverage concerns for new development
- Public concerns with owning a property in an HCD

6.1.2 Walking Tour

On February 3, 2025, the Stantec Project Team met with Town staff and completed a walking tour of each HCDs. During each HCD Plan tour, Town staff provided an overview of the background of the HCD, development changes or proposed changes, HPs, and issues/concerns with the HCD.

In the Brooklin HCD, the following observations were discussed between Town staff and Stantec:

- Highway 12 (Baldwin Street): This is a very busy highway through the core of Brooklin, especially on summer weekends. The traffic light at Highway 12 and Campbell Street tends to be backed up during busy times. There is a heavy amount of truck traffic along Highway 12.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

6 Consultation

May 2025

- Infill development and changes that have occurred in the HCD since its establishment.
- Grass Park and Roebuck Street: These are key areas for community events. Roebuck Street is a Town Placemaking Project.
- Signs: There are a variety of signs in the HCD, including temporary and permanent.
- Large lots: There are large residential lots that back onto Lynde Creek.

In the Werden's Plan Neighbourhood HCD, the following observations were discussed between Town staff and Stantec:

- Landmark buildings are prominent in the HCD
- New development has occurred in the HCD since its establishment.
- Trees: There are many mature trees within the HCD. The town has a tree inventory that can be shared with the Stantec Project Team.
- Castle architecture: The HCD contains a couple unique buildings that resemble castles.
- Views north along Centre Street South to the All Saints' Church on Dundas Street West are important.
- Walkable Neighbourhoods: This is a popular neighbourhood for walking, however some of the sidewalks end at intersections.
- Public art used in the HCD.

6.1.3 Heritage Whitby Advisory Committee

Stantec attended the Heritage Whitby Advisory Committee (HWAC) meeting on March 11, 2025. Stantec presented an overview of the Brooklin and Werden's HCD studies and plans to the HWAC and identified the goals for this project to review and update the HCD Plans. The presentation was followed by a discussion period guided by questions. Table 6-1 contains a summary of the discussion.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
6 Consultation
May 2025

Table 6-1 Discussion Questions from the Heritage Whitby Advisory Committee Meeting

Topics of Discussion	Responses/Discussion
1. In what ways could the HCD Plans be more user-friendly to the committee?	<ul style="list-style-type: none"> • A digital form/application that has the guidelines in a checklist format, for both guidance of committee members and property owners • Additional information be readily available for the HWAC to inform the public of the benefits of HCDs and property insurance; this material would be helpful in advance of the proposed Perry's Neighbourhood HCD • Tying the HCD Plan to the zoning by-law (legislative)
2. What do you feel are the Werden's Plan Neighbourhood HCD SWOT?	<ul style="list-style-type: none"> • The need for tighter controls for demolition and new development/infill • Since the inception of the HCD Plan, the HWAC has seen the removal of small footprint residences on large lots being replaced by large footprint residences that alter the character of the streetscape and open spaces • A walkable neighbourhood with beautiful mature trees, large lots, and a concept of openness • A lot of interest from people looking to live in the HCD neighbourhood • More specific detail needed on the character of the neighbourhood in the statement and its heritage attributes
3. What do you feel are the Brooklin HCD SWOT?	<ul style="list-style-type: none"> • The need for more architectural control over new development within or adjacent to the HCD, to allow for complementary infill • The need to keep the openness and airy character of the former rural village • More specific detail needed on the character of the neighbourhood in the statement and its heritage attributes

6.1.4 Technical Advisory Committee

Technical Advisory Committee (TAC) 1 was held at Town Hall on April 10, 2025. TAC members included Town Staff from the Planning and Policy team, Landscape Architecture team, and Urban Design team. The Stantec Project Team gave a PowerPoint presentation to TAC members to provide an overview on HCDs, the Brooklin and Werden's HCDs, and this Project. A discussion followed regarding the following topics in Table 6-2.

Table 6-2 Technical Advisory Committee Discussion Notes

Topics of Discussion	Responses/Discussion
Tree permits	<ul style="list-style-type: none">• There is no Town tree permit for the Brooklin HCD• An Urban Forestry Management Plan is being prepared, and a draft can be shared with the Project Team• The updated HCD Plans should provide guidance on tree removals and compensation• The Town's forestry department does not have a list of replacement tree species, that is something that could be developed in the updated HCD plans
OP/Zoning updates	<ul style="list-style-type: none">• The Town is currently undertaking a review of its OP and zoning by-law• The Werden's HCD tries to regulate land use and lot coverage, that is creating conflicts with planning approvals
Property insurance	<ul style="list-style-type: none">• Recent examples of property owners within an HCD in the Town being denied property insurance

6.2 Public Consultation

6.2.1 Public Information Centre 1

Public Information Centre (PIC) 1 was held on April 10, 2025. The meeting took place at the Town Hall and was presented in an open house format. Display boards were organized into three stations. One station provided general information like what an HCD is, the project background and schedule, and how to get involved in the project. The other two stations were District-specific for the Brooklin HCD and Werden's HCD, providing information about the current objectives for each District, the characteristics that make the areas special, and items for the community to consider when providing comments about what they would like to see in the updated plans. These two stations included large, printed maps of the Districts for reference and discussion. The Stantec Project Team and Town planning staff were located at each station and throughout the room to answer questions and encourage the public to provide feedback. Seventeen members of the public attended the PIC.

The following is a summarized list of topics discussed at the PIC:

- Questions about HP process and when to contact the Town
- Comments about resident's connection to the HCD area (e.g. as property owners, from events, shared memories)
- The need for policies for garden suites and secondary units (accessory dwelling units)
- Concerns over adjacent land uses
- Desire to see development that is compatible with the HCD

6.2.2 Public Survey

A public survey was created to collect community input about the effectiveness of the current HCD Plans for protecting heritage resources, the current heritage permit process, and to identify buildings, features, or landscapes the public feel are important to the Districts. Surveys were available as printed copies at PIC 1 and the same surveys

were available online on the Town’s project website from April 11 to May 2, 2025. A copy of the surveys is included in Appendix A. A total of nine responses were received and the results are summarized below.

6.2.2.1 Brooklin HCD Survey Results

There were two responses to the online version of the survey, and no hard copy responses related to Brooklin HCD. One respondent indicated they were a property owner within the HCD and other indicated that they were both a property owner and a business owner within the HCD. One respondent used the survey to indicate that they would like to speak in person. The other indicated that they felt unsure about the current Plan’s effectiveness and that they felt it creates barriers to change and development. They indicated that the historic buildings on Baldwin Street were one of the HCD’s most important features and said they felt that new construction detracts from the District’s heritage character. They had previous experience with the HP process and described it as frustrating, time-consuming, and resulting in increased costs. They also indicated that necessary repairs and maintenance should be exempt from the permit process or that a streamlined process should be considered for these types of repairs.

6.2.2.2 Werden’s Plan Neighbourhood HCD Survey Results

Two hard copies of the Werden’s HCD survey were received at PIC 1 and five were provided online, for a total of seven responses. The respondents identified themselves as follows:

Table 6-3 Respondents from the Werden’s HCD

Category of Respondent	Number of Respondents
A resident in the HCD	3
A property owner in the HCD	1
A resident in the HCD and a property owner in the HCD	2

Category of Respondent	Number of Respondents
A resident in the Town of Whitby who lives outside of the HCD	1

The respondents’ feelings on the current Plan’s effectiveness and whether it creates barriers to change and development were mixed. They identified several buildings, features, and landscapes within the District they felt were important including the Centennial Building (416 Centre Street South), Lynde House Museum (900 Brock Street South), Serbian Orthodox Church (508 Byron Street South), houses and buildings that are over 100 years old, Rotary Centennial Park, mature trees, green space, lack of street curbs, concentration of historic buildings, variety of historical architectural styles, and the current density/spacing of homes. The respondents identified modern infill, parking on lawns, and curbing the streets as items that do not contribute to the HCD character.

Two respondents had experience with the current heritage permit system and described the process as workable and smooth, noting that the Town was responsive. Multiple respondents offered thoughts related to permit requirements and exemptions. They indicated that changes to front façades, construction of driveways, tree removals, structural changes to residences or buildings that are over 100 years old, and construction of outbuildings like garages should require heritage permits. They also indicated that replacing windows and doors at the back of a structure, replacing siding using materials that are consistent with the HCD, paint colours, and planting additional trees or gardens should be exempt from the heritage permit process.

The respondent who was not a resident in the HCD indicated that they visit the District for walks, to visit businesses, and to use the Centennial Building.

7 Analysis of Heritage Conservation Districts

7.1 Effectiveness of Land Use Planning Policies and Municipal Policies

In general, the existing municipal policy framework supports HCDs through the presence of OP policies, Secondary Plan Policies, CIP incentives, urban design guidelines, and land use designations that reflect the characteristics of the HCDs. Where conflicts exist, they typically occur where HCD Plans predate other planning policies and may need to be updated to reflect the change in municipal direction.

The Zoning By-laws also provide zoning regulations that relate to the specific lot area, lot frontage, lot depth, Floor Space Index, parking, and landscaped open space for each parcel. Based on a preliminary analysis, the zoning in both HCDs is reflective of the existing character of each area, apart from the lot coverage and setbacks in a few zones. The majority of site-specific exceptions in both HCDs appear to minimize significant impacts on the surrounding scale and character.

7.2 Brooklin HCD

7.2.1 Review of Objectives

As outlined in Section 2.1, the Brooklin HCD contains objectives regarding landscape/streetscape, heritage buildings, new development, economic development, and community support. Table 7-1 to Table 7-5 summarize how the objectives of the Brooklin HCD Plan are being met and identifies areas where the objectives have not been satisfied.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Table 7-1 Review of Objectives for Landscape/Streetscape

Objective	Met (Yes/No)	Outcome
To encourage the retention and enhancement of existing tree-lined streetscapes	Yes	The Town has not received HPs for tree removals in the Brooklin HCD since 2020. Tree-lined streetscapes are being maintained.
To retain the existing street pattern without widening existing pavement and road allowances	Yes	The existing street pattern has been maintained within the HCD.
To municipally adopt Highway 12 (Baldwin Street) and substantially reduce heavy traffic on this route	No	Baldwin Street remains under MTO jurisdiction.
To preserve and reinforce existing views along the streets of landscape features such as mature street trees, Lynde Creek and Kinsmen Park, and of landmarks such as the United Church	Yes	Views of landscape features such as mature trees, Lynde Creek, Kinsmen Park, and the United Church have been preserved.
To ensure that municipal improvements to public infrastructure in the District's public realm, such as upgrades to public utilities, roadways and sidewalks, enhance the heritage character of the District	N/A	No significant public utility or transportation upgrades have been completed.
To restore or reinstate, where possible, previously existing landscape and streetscape features of heritage value, such as the street trees in front yard setbacks (Baldwin Street), and	N/A	No known efforts to reinstate previously existing landscape features have been completed.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Outcome
fences on front and side yards (e.g. Baldwin and Cassels)		

Table 7-2 Review of Objectives for Heritage Buildings

Objective	Met (Yes/No)	Discussion
To retain and conserve the heritage buildings identified in the District Study and evaluated as Excellent, Very Good, and Good	Yes and No	This objective is being met with mixed results. While the majority of Excellent, Very Good, and Good buildings have been retained in the HCD, there has been infill in the HCD since 2007 that included the removal of two Very Good properties, one Good to Very Good property, and three Good properties. In doing so, the removal of former single-detached residential properties has altered the development pattern and building footprints, particularly at the intersection of Baldwin Street and Winchester Street East.
To foster continuing use of heritage buildings and all measures available to the municipality to prevent their demolition	Yes and No	Alterations to heritage buildings in the HCD have been reviewed by municipal staff and HWAC through HPs and planning applications. Six buildings identified to be “heritage buildings” have been removed, and an additional 13 non-heritage buildings have also been removed to make way for new development since 2007. Two former residences along Winchester Street East were not demolished but relocated to Durham Street.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
To encourage retention and restoration of original features of heritage buildings, based on thorough archival and pictorial evidence and the assessment provided in the District Study	N/A	Alterations to heritage buildings in the HCD have been reviewed by municipal staff and HWAC through HPs. The HPs reviewed for this SWOT did not explicitly identify if the proposed works were related to retention or restoration of original features based on archival or pictorial evidence.
To encourage property owners to maintain the exteriors of heritage buildings to prevent deterioration as well as damage from fire or the elements.	Yes	Alterations to heritage buildings in the HCD have been reviewed by municipal staff and HWAC through HPs and planning applications. It does not appear that demolitions in the HCD have occurred as a result of fire or lack of maintenance.
To provide additional protection to heritage resources in the District, Council shall consider designating under Part IV of the <i>Ontario Heritage Act</i> individual buildings (including interior elements), structures, and cultural landscapes, as identified in further study	Yes	Five individual properties within the HCD have been designated under Part IV of the OHA since the establishment of the HCD Plan in 2007.
To address the option, but not encourage, the moving structures within the District, as an alternative to demolition, identify recipient sites for such structures within the District that will, once the structure has been relocated, support and enhance District character	Yes	Two former residences along Winchester Street East were relocated to Durham Street. These properties were identified as no heritage value in the 2006 inventory.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Table 7-3 Review of Objectives for New Development

Objective	Met (Yes/No)	Discussion
To encourage “heritage friendly development” that is compatible with the arrangement, scale, architectural styles, and materials that constitute the District’s heritage character	Yes and No	<p>Infill in the HCD has been mixed in this regard. While the new construction has been low-rise and consistent in setback to adjacent properties, the amount of new construction, particularly that which is visible at the south end of the HCD, is beginning to overwhelm the heritage resources of the HCD in some areas.</p> <p>The new commercial development on Winchester Street East implemented “heritage friendly development” through design, materials, and scale; however each property employs a different shade of red brick, design details, and windows.</p> <p>The new commercial and mixed use development to the north along Baldwin Street, between Winchester Street East and Cassels Road West/East, uses “heritage friendly development” that is more compatible in architectural design through gable rooflines, but each structure also has a different colour brick exterior and windows.</p> <p>On Baldwin Street, north of Campbell Street, both the new developments have a consistent setback from the streetscape and have a similar height. While one uses complementary red and buff brick, it reflects Second Empire design influences, which was not one of the historic architectural styles noted in the HCD Plan (Section 6.2). The other development is a contemporary vernacular structure of its own time.</p> <p>The development on Campbell Street has consistent setback from the streetscape and</p>

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
		is compatible in scale to adjacent properties; it is a contemporary structure with Edwardian design influences and utilizes brick cladding.
To provide a mix of land uses that will support and strengthen the existing commercial, residential and community service uses in the downtown core.	Yes	The Town OP and Restricted Area Zoning By-Law 1784 provide for a range of land use designations and zones within the HCD. Since the 2007 HCD Plan, individual zoning exceptions have been made for new mixed use and commercial developments.
To fully plan for the adaptive re-use of existing and the redevelopment of lands within the District, prepare an urban design plan for the District, with terms of reference that ensure harmonization of the urban design plan with policies and guidelines of the Heritage Conservation District Plan.	Yes	The Brooklin Urban Design and Sustainable Development Guidelines were prepared in 2018 by SvN Architects + Planners for the Town. The design guidelines were developed to provide a framework and inform approvals within the BCSP area for new and infill development, while preserving Brooklin's historic and distinct village-like character and natural setting.

Table 7-4 Review of Objectives for Economic Development

Objective	Met (Yes/No)	Discussion
To support revitalization of Brooklin's downtown core as a local service and regional speciality retail and tourism destination in ways that maintain the District's heritage character.	Yes and No	The Town has a Downtown Brooklin webpage on their Town website. The website notes it is home to restaurants, retail shops, spas, and unique local businesses, however none of these are highlighted on the website. Downtown Brooklin does not have a Business Improvement Area, like Downtown Whitby.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Table 7-5 Review of Objectives for Community Support

Objective	Met (Yes/No)	Discussion
To foster appreciation of the heritage character of the District through public consultation, dissemination of information on best conservation practices, and support for community events.	Yes and No	The Town has a Downtown Brooklin webpage on their Town website. The webpage highlights events and festivals, the Brooklin Community Centre and Library, and the HCD. Brooklin has a spring fair, an annual harvest festival and Christmas in the Village. The Town's HCD webpage does not have material available on best conservation practices.

7.2.2 Effectiveness of Policies and Guidelines

Overall, the Brooklin HCD Plan contains detailed policies and guidelines and HCD objectives are generally being met. Alterations to buildings in the commercial core and along residential streets have been minimal related to general upkeep. Two areas where Brooklin HCD objectives are not being met include the removal of heritage properties (Good, Very Good, and Excellent) and new infill that is not always complementary to adjacent heritage buildings.

An issue that was identified is that heritage properties that were identified in an appendix of the HCD Study are not clearly mapped or known to property owners or users of the HCD Plan. The updated HCD Plan would benefit from defined and mapped heritage properties. The HCD Plan Heritage Character Statement is also very short and broad, with a lack of detailed heritage attributes. Having a clearly defined Heritage Character Statement and heritage attributes is needed to articulate the identified cultural heritage value or interest of the HCD, such that decisions for alterations, additions, new development or demolition can be made in accordance with the CHVI.

7 Analysis of Heritage Conservation Districts

May 2025

7.3 Werden's HCD

7.3.1 Review of Objectives

As outlined in Section 2.2, the Werden's HCD contained objectives regarding land use, buildings, the public realm, and open space. Table 7-6 to Table 7-8 summarize how the objectives of the HCD Plan have been met and identify areas where the objectives have not been satisfied.

Table 7-6 Review of Objectives for Land Use

Objective	Met (Yes/No)	Discussion
To align land use designations with the neighbourhood's existing character	Yes	The Town OP includes a range of land use designations within the HCD that respect the existing built form and encourage infill development to complement the historic character. The heights and setbacks for these land uses are aligned with this same intent.
To maintain the low-density residential appearance prevalent across the neighbourhood	Yes	Since the completion of the HCD Plan, the District remains a predominantly low-density residential neighbourhood.
To recognize the place and function of five historic landmarks within the neighbourhood – St. Mark's United Church (Methodist Tabernacle), the former R.A. Sennett School (King Street School), the former Ontario County Registry Office, the Centennial Building (Ontario County Courthouse), and St. Arsenije Sremac Serbian Orthodox Church (St. Andrew's Church of Scotland) – and one contemporary landmark – Whitby Central Library – and to prefer uses having public	Yes	The District's historic landmarks remain <i>in situ</i> and in public use.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
benefit and minimal disruption of building fabric and grounds when new uses may be proposed for them		

Table 7-7 Review of Objectives for Buildings

Objective	Met (Yes/No)	Discussion
To protect the neighbourhood's historic residential streetscapes	Yes	In general, since the completion of the HCD plan, the historic residential streetscape has been conserved.
To maintain the neighbourhood's six landmarks	Yes	The six historic landmarks have been conserved.
To retain houses erected during Whitby's historic period, to retain exemplary houses which were built after the mid-20 th century, and to favour the retention of the neighbourhood's remaining single-detached houses which to some degree complement houses erected during Whitby's historic period	Yes	Only one historic property within the HCD has been approved for demolition. This demolition was approved due to severe fire damage. One complementary property was demolished in 2023.
To consider buildings which are neither from the historic period nor are complementary to be candidates for demolition and replacement	N/A	No uncharacteristic properties have been proposed for demolition.
To encourage building maintenance and repair	Yes	Numerous properties have had maintenance and repair undertaken, mostly related to masonry work such as repointing.
To encourage restoration of lost or hidden features and materials on buildings from	N/A	No known instances of restoration of lost or hidden

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
the historic period where it is based on documentary and as-found evidence about the building or on comparable local examples		features have been undertaken based on a review of HPs.
To avoid damaging wall cladding material and trim, comprising distinctive features, disguising facades with incongruous elements or otherwise diminishing a building's heritage attributes	Yes	No known instances of damages to wall cladding or other distinctive features have been reported.
To maintain the existing mix of single-detached house sizes as additions and new dwellings are accommodated in the neighbourhood	Yes	The HCD remains predominantly comprised of single detached homes. New additions or structures have not diminished this characteristic.
To keep an ample amount of open space in front yards, side yards, and back yards when new dwellings are constructed	Yes	The HCD retains ample amounts of open space comprised of front yards, side yards, and back yards. The one new development property retains a notable amount of open space in its front yard and back yard.
To limit the height of residential additions and new dwellings out of respect for the prevailing height of houses in the neighbourhood	Yes	New additions respect the prevailing height of the HCD. The new development property has a one storey height compatible with the HCD.
To favour gable or hip roof dwellings	Yes	The new development property has a hip roof.
To prefer locating floor space added onto an existing house away from public view	Yes	Additional floor space is generally located setback from public view.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
To acknowledge the prevailing front yard setback in the siting of new dwellings	Yes	The new development property contains a compatible setback.
To locate accessory buildings in side yards or back yards	Yes	New accessory buildings have been located in side or back yards.
To prefer red brick as the wall cladding material for a new dwelling	Yes	The new development property is partially clad in red brick

Table 7-8 Review of Objectives for the Public Realm and Private Open Space

Objective	Met (Yes/No)	Discussion
To discourage transforming District streets that show a rural section of shoulders or ditches into streets with a constructed urban section of curb and gutter	No	Since the completion of the HCD Plan, reconstruction of King Street, Centre Street South, Gilbert Street West, and Ontario Street West has included the construction of new curbs
To undertake a study of existing and proposed road character in advance of any public works projects proposed for the road right-of-way	N/A	No studies are known.
To facilitate the safe crossing of pedestrians from Werden's Plan Neighbourhood across major streets	N/A	Since completion of the HCD Plan, no new pedestrian crossings have been completed.
To support conditions suitable for the preservation of mature street trees	Yes	Trees have been preserved and tree removals within the HCD have generally been

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
		limited to trees in declining or poor condition.
To coordinate the renewal of the street tree canopy, replanting with a variety of indigenous shade trees, and taking into consideration the placement of concrete sidewalks, the burial of hydro wires and the viewing of historic architecture	No	There is a lack of newly planted trees within the District; one newly planted tree was found, located on west side of Centre Street South of Pitt Street West.
To acknowledge, preserve and enhance public open space in Celebration Square, the unopened Gilbert Street West right-of-way and former R.A. Sennett schoolyard, the courthouse block, and Rotary Centennial Park	Yes	Since the adoption of the HCD, improvements have been undertaken at the Gilbert Street Road allowance.
To interpret in Rotary Centennial Park the history of Werden's Plan, the neighbourhood that has developed from it, and the Town's first purchase of property	No	No interpretive material related to the Werden's Plan Neighbourhood was noted in Rotary Centennial Park during the field program.
To maintain the neighbourhood's generous amount of private open space in lawn, trees, shrubs, and herbaceous plants	Yes	The HCD remains a neighbourhood characterized by generously sized lawns with trees, shrubs, and plants.
To minimize front yard parking	Yes and No	No significant new front yard parking has been added to the HCD, but there do not appear to have been measures made to actively reduce or minimize existing front yard parking.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

Objective	Met (Yes/No)	Discussion
To locate a new driveway, the width of a single car, in a property's side yard	Yes	New driveways in the HCD have been located in side yards.
To discourage lot severance	Yes	No lot severances have occurred since adoption of the HCD.
To consider the merits of consolidating lots where buildings are neither from the historic period nor are complementary	N/A	No lot consolidations have been proposed.
To protect significant trees on private property	Yes and No	Tree removals within the HCD have generally been limited to trees in declining or poor condition. Town staff have expressed concern that they do not always have a way to verify the health or condition of private trees for removal and there is no existing tree protection by-law in the Town.

7.3.2 Effectiveness of Policies and Guidelines

Since the implementation of the Werden's HCD in May 2019, only two structures have been proposed for demolition, and little to no major alterations have been undertaken to historic or complementary properties within the HCD. It may be that the presence of the HCD in part deters property owners from making substantial changes (like additions or major restoration/alterations). Conversely, it may be that the presence of the HCD has encouraged minimal change to heritage resources. The HCD is also relatively new compared to the Brooklin HCD and came into effect only eight months before worldwide

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

7 Analysis of Heritage Conservation Districts

May 2025

shutdowns associated with COVID-19, so there is less data to consider and may be external forces impacting that data.

The streetscape and landscape of the Werden's HCD has generally been conserved and the HCD predominantly remains a collection of detached residential properties on tree lined streets. Many streets within the HCD have been upgraded with new curbs and sidewalks contrary to the objectives of the existing plan. However, the goal of conserving the HCD's identified character must also be balanced with evolving design standards and safety considerations regarding the installation of sidewalks and curbs.

8 Strengths, Weaknesses, Opportunities, and Threats

8.1 Introduction

Based on the review and analysis contained in the proceeding sections, a SWOT analysis was conducted for the Brooklin and Werden's HCDs. The SWOT analysis helps to determine the priorities and direction for next steps in the review and update of the HCD plans by identifying what is currently working well, what has not been effective, what the major threats to each HCD are, and how they can be mitigated through updated HCD Plans.

8.2 Brooklin Heritage Conservation District

8.2.1 Strengths

Conservation of Heritage Properties: As examined in Section 5.2.1, property changes, outside of new development, have been minimal including updates to exterior or roof cladding, paint, windows, and doors. Through HPs, alterations have been compatible to the HCD.

Adherence of New Development, Additions, and Alterations: New development has occurred since the creation of BCSP in 2020 and has largely followed the policies and guidelines of the BCSP and HCD Plan. Development is low-rise, retains a similar setback to adjacent properties, buildings mostly follow the orientation of the street, and use dormers.

Limited Alteration of Private Landscape: Private landscape throughout the HCD (consisting of front yards, side yards, and back yards) have largely retained the mature trees, shrubs, and lawns identified in the HCD Plan.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

8.2.2 Weaknesses

Statement of Cultural Heritage Value and Heritage Attributes: The existing Heritage Character Statement for the HCD is very short, and the character defining elements are broad. The updated HCD Plan can include a more detailed description of the historic neighbourhood including a written description of the boundary, Statement of Cultural Heritage Value, and clear list of heritage attributes.

Property Classifications: The 2006 HCD Study inventory identified properties as being of four categories: no heritage value, Good, Very Good, and Excellent. These properties were not clearly mapped within the HCD Study or Plan. Some of the properties identified as no heritage value that have since been demolished or relocated were late 19th to early 20th century residences that could have been considered to have heritage value given their retained original massing, architectural details, and original building materials. The updated HCD Plans will include mapping of property classifications to assist Town staff, HWAC, and property owners when considering property alterations, additions, demolition, or new development proposals. Property classification terminology may be reviewed to create consistencies between the HCDs, where appropriate.

Sympathetic Development and Infill: While the existing HCD Plan has guided new development to be “heritage friendly development” in design and scale, it has not always been complementary to adjacent properties in its selection of building materials, window, and door placement. The updated HCD Plan can include more specific policies and guidelines for new development.

Sustainability and Accessibility: The HCD Plan does not provide information regarding compatible sustainable design and accessibility improvements. The updated HCD Plan can provide information regarding appropriate sustainable components such as solar panels, heat pumps, and electric car infrastructure. The updated HCD Plan can also provide guidance on harmonizing the need for accessible street infrastructure such

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis
8 Strengths, Weaknesses, Opportunities, and Threats
May 2025

as building ramps, sidewalks, curbs, and bike lanes with the objective of conserving the District's street pattern.

Signs: The HCD Plan does not have policies or guidelines for signs within the HCD, which contains many commercial properties. Signage for commercial properties within the HCD is an important aspect of the urban fabric. It has an impact on the atmosphere of the street, and it is very important for the well-being of businesses. The updated HCD Plan can include policies that adhere to the Town's Permanent Sign By-law, as well as specific policies and guidelines for signage in the HCD.

Demolition: The HCD Plan does not have policies or guidelines for demolition. The updated HCD Plan can provide policies and guidelines for demolition based on property classifications.

8.2.3 Opportunities

OHA Amendments: Amendments to the OHA that came into effect in 2023 can be incorporated into the HCD Plan Update process. An updated plan will be prepared in conformity with the OHA with regard to identifying the requirements for implementing new procedures and timelines for reviewing HPs.

HCD Statement of Cultural Heritage Value and Heritage Attributes: An updated HCD Plan can describe the CHVI and heritage attributes for the HCD that Town Staff and Council can use when making decisions regarding changes in the HCD. This can assist to determine whether streetscaping, public works, alterations, additions, demolitions, or new development have a positive or negative impact on the District's attributes.

HCD Plan Education and Application: Through consultation with the community, a request was brought forward for a digital form/application that has the guidelines in a checklist format to guide committee members and property owners. This option can be

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

discussed with Town staff as part of the HCD update. Community members and the Town also requested more readily available material regarding the benefits of HCDs.

Alignment of HCD Plan with Existing Policy Framework: Based on the review of the applicable policy framework, the HCD Plan can be updated to align with existing provincial and municipal planning policies. The updated HCD Plan can be updated to align with the BCSP and the *Brooklin Urban Design and Sustainable Development Guidelines*.

Tree Removal: The existing Brooklin HCD Plan contains policies for tree preservation and planting, but none regarding tree removals. An updated HCD Plan can provide more information and detailed policies regarding tree removal in the public realm and on private property.

Additional Dwelling Units (ADUs): In November 2024, O. Reg. 462/24 came into force that facilitates the construction of garden suites, which are defined as self-contained living accommodations located with a secondary building, typically within a backyard. The existing HCD Plan does not contain policies or guidelines regarding the construction of ADUs. A revised HCD Plan can provide policies and guidelines regarding the construction of garden suites in back yards of properties.

8.2.4 Threats

Development Pressures: As a target for development and growth since 1995, the Brooklin HCD will continue to experience development pressure for residential, commercial, and mixed use buildings.

Transportation Projects: The HCD contains two provincial highways that will continue to need improvements and ongoing maintenance that can affect the remnant character of the streetscape within the HCD.

8.3 Werden's Plan Neighbourhood Heritage Conservation District

8.3.1 Strengths

Conservation of Heritage Properties: Many of the heritage properties in the HCD have seen relatively little change since the establishment of the District. In this regard, their character, as was identified at the time of the original 2017 HCD Plan, has largely been conserved.

Adherence of New Development, Additions, and Alterations: New development or alteration that has occurred since the creation of the HCD and has largely followed the policies and guidelines of the HCD Plan. While only one new structure has been built since the completion of the HCD Plan, this structure is a low-rise residential property that maintains a landscaped front yard. Alterations and additions to properties, such as new driveways or accessory buildings, have followed the policies and guidelines of the HCD Plan.

Limited Alteration of Private Landscape: Private landscape throughout the HCD (consisting of front yards, side yards, and back yards) have largely retained the mature trees, shrubs, and lawns identified in the HCD Plan.

Public Realm: The streetscape and landscape of the public realm has generally been conserved and the HCD continues to contain tree lined streets. Improvements to the public realm have been completed since the adoption of the HCD Plan, including at the King Street Park, which converted a municipal right of way into a public park.

8.3.2 Weaknesses

Statement of Cultural Heritage Value and Heritage Attributes: The current HCD Plan does not strictly conform to the requirements of the OHA, as it does not clearly state heritage attributes of the HCD, but rather refers generally to, "Patterns among residential buildings, views of historic landmarks, character of the public realm and

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

features of private open space” (Goldsmith Borgal & Company 2017: 26). This makes articulating the specific elements that contribute to the CHVI of the Werden’s HCD challenging and open for interpretation. A clear list of attributes could provide the framework from which alterations, additions, and new development can be assessed to determine if they will impact the HCD’s character.

Sustainability and Accessibility: The HCD Plan does not provide information regarding compatible sustainable design and accessibility improvements. An updated HCD Plan can provide information regarding appropriate sustainable components such as solar panels, heat pumps, and electric car infrastructure. An updated HCD Plan can also provide guidance on harmonizing the need for accessible buildings and street infrastructure such as sidewalks, curbs, and bike lanes with the objective of conserving the District’s street pattern.

Property Classifications: The existing inventory identified “historic”, “complementary (exemplary)”, “complementary”, and “uncharacteristic” properties. In general, historic properties are those built before the mid-20th century, while complementary and uncharacteristic properties are those built from the mid-20th century until the present-day. This framework discounts many mid-20th century minimal traditional and ranch styles residences which support the identified CHVI of the Werden’s HCD. Many mid-20th century residences along Byron Street are detached, low density, residential, and clad in red brick, all of which are considered to be defining characteristics of the HCD.

Demolition: The HCD Plan does not have policies or guidelines for demolition. The updated HCD Plan can provide policies and guidelines for demolition based on property classifications.

Lot Coverage Conflicts: The HCD Plan includes a policy for new development that contradicts the Zoning By-law. This policy within the HCD Plan will need to be reviewed and updated to conform with the Zoning By-law updates.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

8.3.3 Opportunities

OHA Amendments: Amendments to the OHA and O. Reg. 9/06 concerning HCDs that came into effect in 2023 can be incorporated into the HCD Plan Update process. An updated Plan will be prepared to conform with the OHA regarding new procedure implementation and timelines related to HPs.

HCD Statement of Cultural Heritage Value and Heritage Attributes: An updated HCD Plan can describe the CHVI and heritage attributes that can be used by Staff and Council when making decisions regarding changes in the Werden's HCD. This can help to determine whether streetscaping, public works, alterations, additions, demolitions, or new development have a positive or negative effect on the HCD's attributes.

Mid-20th Century Properties: Many mid-20th century residences along Byron Street contain are detached, low density, residential, and clad in red brick, all of which are considered to be defining characteristics of the HCD. A review of properties may consider which mid-20th century properties contribute to the HCD's Statement of Cultural Heritage Value or Interest which would assist the Town and property owners when considering property alterations. The updated HCD Plans will include mapping of property classifications to assist Town staff, HWAC, and property owners when considering property alterations, additions, demolition, or new development proposals. Property classification terminology may be reviewed to crate consistencies between the HCDs, where appropriate.

Sympathetic Intensification: Development pressure is expected to increase within and adjacent to the HCD. An updated HCD Plan can provide specific guidelines concerning parts of the Werden's HCD where sympathetic intensification of existing land uses may be appropriate. This will be determined in conjunction with further community and municipal consultation.

Tree Planting and Removal: While the existing HCD Plan encourages the retention and planting of trees, based on the results of the field program, there is a lack of newly

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

planted trees within the HCD. Only one newly planted tree was found, located on west side of Centre Street South of Pitt Street West. An updated HCD Plan can provide guidelines on the appropriate planting of new trees, including a list of preferred species, and provide improved guidelines regarding the retention of existing trees in the public and private realm.

Tree Removal: The existing Werden's HCD Plan contain objectives encouraging the retention of mature trees. An updated HCD Plan can provide more information and detailed policies regarding tree removal in the public realm and on private property.

ADUs: In November 2024, O. Reg. 462/24 came into force that facilitates the construction of garden suites, which are defined as self-contained living accommodations located with a secondary building, typically within a backyard. The existing Werden's HCD Plan contain no policies or guidelines regarding the construction of ADUs. A revised HCD Plan can provide policies and guidelines regarding the construction of garden suites in back yards of properties.

HCD Plan Education and Application: Through community consultation, a request was brought forward for a digital form/application that has the guidelines in a checklist format, for both guidance of committee members and property owners. This option can be discussed with Town staff as part of the HCD update. Community members and the Town also requested more readily available material regarding the benefits of HCDs.

Alignment of HCD Plan with Existing Policy Framework: Based on the review of the applicable policy framework, the HCD Plan can be updated to align with existing provincial and municipal planning policies. There are current conflicts between the HCD Plan policies and guidelines and the Zoning By-law.

8.3.4 Threats

Development Pressures: The Town of Whitby, like much of southern Ontario, has experienced steady growth over the last decade. While it is acknowledged that limited

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

infill or new development has occurred in the HCD since its adoption, overall development trends and preferences can sometimes be at odds with the HCD Plan. For example, the HCD Plan favours the retention of large front, side, and rear yards. Today, many developers and homeowners prefer a residence with a larger driveway or overall footprint which encloses or paves formerly open space and limits the ability to landscape with mature trees and shrubbery. In addition, density targets to intensify neighbourhoods may conflict with the existing HCD Plan's preference for low density structures with generously sized front, side, and rear yards.

8.4 Conclusion

Overall, the policies and guidelines of both HCDs are generally being met. Both HCDs generally conform to the OHA and continue to meet the threshold for designation but could benefit from clear Statements of CHVI and heritage attributes to guide decision-making and managing change.

The Brooklin HCD Plan contains detailed policies and guidelines and the HCD objectives are generally being met. Alterations to buildings on residential streets have been minimal related to general upkeep. Development has occurred in the commercial core, generally of a height and scale appropriate to the HCD, however this has resulted in the removal of some heritage buildings which is discouraged in the HCD Plan.

The streetscape, structures, and landscape of the Werden's HCD has generally been conserved and the HCD predominantly remains a collection of detached residential properties on tree lined streets. Alterations to buildings have been minimal and only one property has been demolished and replaced since the HCD was adopted.

As per the findings of the SWOT analysis completed above, the Brooklin and Werden's HCD Plans should be updated to include:

- Inclusion of language and timelines to comply with changes to the OHA since 2023

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

8 Strengths, Weaknesses, Opportunities, and Threats

May 2025

- Review and clarifications to Statements of Cultural Heritage Value or Interest and identification of heritage attributes for each HCD
- Review and classification of properties that meet two or more criteria of *Ontario Regulation 9/06* for each HCD
- New policies and guidelines regarding new development, sustainability and accessibility, tree removal and planting, ADUs, and demolition
- Alignment of policies and guidelines with existing Town planning documents

9 Preliminary Recommendations

9.1 General Recommendations

9.1.1 Ontario Heritage Act Conformity

The existing Brooklin HCD Plan and Werden's HCD Plan conformed to most of the requirements of the 2005 amendment of the OHA. Subsequent amendments to the OHA that took effect on July 1, 2023, have not altered the requirements for HCD Plans.

However, the OHA amendments have introduced criteria for evaluating CHVI in HCDs using O. Reg. 9/06 (as amended by O. Reg. 569/22). Of this amendment, 25% of properties within a HCD must meet two or more criteria of O. Reg. 9/06. More than 43% of the properties in the Brooklin HCD and 69% of the properties in the Werden's Plan Neighbourhood HCD meet two or more criteria of the OHA. Therefore, the existing Brooklin HCD and Werden's Plan Neighbourhood HCD are considered to meet this threshold and both conform.

Both HCDs could benefit from clearer statements of significance and lists of heritage attributes that reflect the CHVI of the HCDs and serve to guide decision-making and change management in the HCDs.

9.1.2 Policy Framework Alignment

The policies and guidelines of the HCD Plans will need to be updated to align with the Region and Town's existing policy framework, including the current updates to the Town's OP and Zoning By-law. Policies and guidelines will need to adhere to the Region and Town's OP, the CIP, BCSP and DWCSPP, and Zoning By-law. Specifically for Brooklin, the *Brooklin Urban Design and Sustainable Development Guidelines* will need to be cross implemented within the updated Brooklin HCD Plan.

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

9 Preliminary Recommendations

May 2025

9.1.3 Updated Statements of Cultural Heritage Value or Interest and Heritage Attributes

The existing Brooklin HCD Plan and Werden's Plan Neighbourhood HCD Plan both contain heritage character statements and descriptions of heritage attributes that do not clearly define or articulate the heritage value of the HCDs following the criteria of O. Reg. 9/06 as required by 2023 changes to the OHA. The Statements of CHVI and heritage attributes will need to be reviewed and clarified as part of the updated HCD Plans.

For the Brooklin HCD, the clarified statement may include:

- A summary of its historical and contextual associations with Baldwin Street that forms the layout of a mid-19th century plank road from which the village developed
- A summary of the representative architectural styles influenced by Brooklin's periods of development in the late 19th to early 20th century (Gothic Revival, Italianate, Edwardian) and post-Second War (Ranch, Modernist, and 20th Century Modern)
- A summary of unique or distinctive elements, such as decorative brickwork porches

Heritage attributes for the Brooklin HCD may include:

- Low-rise commercial and residential character between one and two- and one-half storeys in height
- Historic and contemporary landmarks: 90 Colston Avenue (Stephen Mede Thomas House), 58 Baldwin Street (Balfour Building), 56 Baldwin Street (Royal Canadian Legion), 6-8 Vipond Road (Brooklin Community Centre and Library), 19 Cassels Road East (Brooklin United Church), and 25 Cassels Road East (Brooklin Mill)
- Grass Park's historical association with the community of Whitby
- Cohesive use of setbacks along Baldwin Street
- The Brooklin Pioneer Cemetery's physical and historical connection to the village

Heritage Conservation District Plans Review and Update: Phase 1 Background and Analysis

9 Preliminary Recommendations

May 2025

For the Werden's HCD, the clarified statement may include:

- A summary of its historical associations with the Werden's Plan and subsequent phases of development
- A summary of the representative architectural styles within the HCD that demonstrate its periods of development, including Regency, Neoclassical, Georgian, Gothic Revival, Edwardian, Colonial Revival, Vernacular, Minimal Traditional, and Ranch styles
- A summary of the streetscape and landscape features that contribute to the CHVI of the HCD

Heritage attributes for the Werden's HCD may include:

- Low rise residential character between one and two- and one-half storeys in height
- Predominant use of brick as a building/cladding material, specifically red and buff brick
- Generous front and side yard setbacks
- Mature trees that provide a tree canopy in both the public and private realm
- Remaining rural village street cross sections
- Landmarks including
 - St. Mark's United Church (Methodist Tabernacle)
 - The former R.A. Sennett School (King Street School),
 - The former Ontario County Registry Office,
 - The Centennial Building (Ontario County Courthouse)
 - St. Arsenije Sremac Serbian Orthodox Church (St. Andrew's Church of Scotland)
 - Whitby Central Library – and to prefer uses having public benefit and minimal disruption of building fabric and grounds when new uses may be proposed for them

9.1.4 Alignment of Property Classifications

It is recommended that both the updated HCD Plans for Brooklin and the Werden's Plan Neighbourhood clearly articulate properties that meet two or more criteria of

O. Reg. 9/06 under the OHA and contribute to the Statement of CHVI. The classification of these properties will be discussed with Town staff as part of the HCD Plans update. The properties that contribute to the HCD statement and character will need to be clearly mapped with an address listing so property owners, Town staff, and Council can readily ascertain a property's status and follow the applicable policies and guidelines of the updated HCD Plans.

9.2 Policies and Guidelines

To create HCD Plans that are more user friendly, adhere to current regional and municipal planning frameworks, and manage change within each HCD, the updated policies and guidelines in each HCD Plan should include:

- Sustainability and accessibility
- Detailed guidance on new development with respective building elements, such as windows, doors, fenestration pattern, building materials
- Detailed guidance for alterations to existing structures on windows, doors, fenestration pattern, building materials
- Signs, including their type and placement
- Tree removals and replacement
- Construction and placement of ADUs
- Demolition

The updated HCD Plans will also need to include guidance on when a HP is not required (exempt) for a property within the HCD.

9.3 Public Education and Implementation

From the Phase 1 consultation, opportunities were developed that could enhance the understanding and implementation of the updated HCD Plans for the Town, property owners, and the public. The updated HCD Plans could include a digital form/application with the policies and guidelines in a checklist format.

Appendix A Public Information Centre 1 Survey

Brooklin Heritage Conservation District Plan – Public Information Centre #1 Comment Sheet

1. Are you (check all that apply):
☐ A business owner in the BHCD ☐ A resident in the BHCD ☐ A property owner in the BHCD ☐ A resident in the Town of Whitby who lives outside of the BHCD
2. Rate your familiarity with the current BHCD Plan (check the most appropriate response):
☐ Very Familiar ☐ Somewhat Familiar ☐ Not Familiar
3. What has been your experience living in or owning property in the BHCD (check the most appropriate response):
☐ Very positive ☐ Somewhat positive ☐ Neither ☐ Somewhat negative ☐ Very negative ☐ Not Applicable
4. Do you feel the BHCD is achieving its overall objective to conserve and enhance the heritage character of Brooklin?
☐ Yes ☐ No ☐ Unsure
5. Do you feel the BHCD is providing adequate protection for heritage buildings?
☐ Yes ☐ No ☐ Unsure
6. Do you feel the BHCD creates barriers to change or development?
☐ Yes ☐ No ☐ Unsure
7. What do you consider to be the most important buildings, features, or landscapes of the BHCD?

8. What types of buildings or features **do not contribute** to BHCD's heritage character?

9. Do you find the current BHCD Plan easy to use and understand?
☐ Yes ☐ No ☐ I'm not familiar with the plan

10. Have you had to obtain a heritage permit for making changes to a property in the BHCD?

☐ Yes ☐ No ☐ Not Applicable

11. If yes, how did you find the process?

12. Are there particular actions you think **should** require a heritage permit?

13. Are there particular actions you think **should be exempt** from requiring a heritage permit?

14. If you are not a business owner, resident, or property owner within the BHCD, why do you visit the district?

15. Do you have any general comments you would like to provide about the BHCD or the BHCD Plan Update?

Please place your completed survey in the comment box. Thank you for your feedback!

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: DEV-13-25: Zoning By-law Amendment to Remove Holding (H) Symbol, West Whitby Holdings Inc., 915 Rossland Road West, File No. Z-06-25

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 24-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

R. Saunders, Commissioner of Planning
and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

J. Taylor, Director of Planning, 905-444-
2908

L. England, Planner I, 905-444-2822

1. Recommendation:

1. That Council approve an Amendment to Zoning By-law 1784 (File No. Z-06-25) for the removal of the Holding (H) Symbol, as outlined in Planning Report PDP 24-25.
2. That a By-law to amend Zoning By-law 1784 be brought forward for Consideration by Council.

2. Highlights:

- A Zoning By-law Amendment application has been submitted by GHD on behalf of West Whitby Holdings Inc., for the land municipally known as 915 Rossland Road West.
- The proposal is to remove the Holding (H) Symbol in order to permit the proposed mixed-use development of 5,811 square metres (62,551 square feet) of commercial space, and 7,218 square metres (90 units) of residential space.
- The proposed development complies with the existing zone provisions save and except for the Holding (H) Symbol provision.

3. Background:

3.1. Site and Area Description

The subject land is located at the southeast corner of the Des Newman Boulevard and Rossland Road West intersection, municipally known as 915 Rossland Road West (refer to Attachment #1). The subject land is approximately 2.87 hectares (7.08 acres) in size and is vacant.

The surrounding land uses include:

- Single detached and townhouse dwellings to the south;
- Vacant lands to the north and west; and,
- Open space & a storm pond to the east (refer to Attachment #2).

3.2. Application and Proposed Development

A Zoning By-law Amendment application (Z-06-25) has been submitted to remove the Holding (H) Symbol in order to permit the mixed-use development of 5,811 square metres of commercial space, and 7,218 square metres (90 units) of residential space (refer to Attachment #3).

A Site Plan application has been submitted and will proceed through the Commissioner of Planning and Development once all agency comments have been received and addressed.

3.3. Documents Submitted in Support

The following documents were submitted in support of the application:

- An Urban Design Plan prepared by GHD Limited, dated May, 2025.
- An Architectural Package prepared by Petroff Partnership Architects, dated February 21, 2025.

The above documents have been distributed to relevant internal departments and external agencies.

3.4. Urban Design Plan

The subject land is zoned Holding – Mixed Use One South (H-MX1S) under Zoning By-law 1784. The By-law states that the Holding (H) Symbol shall not be lifted until such time as an Urban Design Plan has been prepared and approved.

A pre-consultation application was submitted in 2023 for a Zoning By-law Amendment to remove a Holding (H) Symbol. The submitted Plan included a food store, commercial units, an urban square, vehicular access, and a future 6-storey apartment building.

The development will be phased with the first phase including the food store, commercial units, and urban square, while the second phase will include the residential apartment building.

The Urban Design Plan was circulated to Town of Whitby Engineering Services, Urban Design, and Landscape. The plan was also reviewed by the Durham Region Works Department. Through several rounds of review and revisions, the Planning and Development Department arrived at an acceptable plan which promotes modern design practices.

The final plan provides a pedestrian focused, mixed-use site offering higher-order retail amenities, such as a food store and commercial units. The range of retail unit sizes enhances the strength of the commercial proposal.

Landscaping and buffering strategies have been used to screen and visually integrate the parking along Rossland Road West to provide privacy for existing adjacent communities and provide visually appealing frontages along the major roads.

A landscaped urban square next to the retail area has been positioned close to a transit stop as a focal point and gathering area for the neighbourhood.

Landscaped outdoor amenity areas have been provided to the east of the residential building which has been designed to connect to the proposed urban square and the existing multi-use trail along Lynde Creek tributary which connects to the multi-use path along Rossland Road West.

The Urban Design Plan has been approved by the Commissioner of Planning & Development.

4. Discussion:

4.1. Whitby Official Plan

The subject land is designated Mixed Use as per the Town of Whitby Official Plan (refer to Attachment #4).

Lands designated Mixed Use encourages mixed residential and commercial development and redevelopment to ensure an intensive, transit-supportive, and efficient use of land, particularly in Intensification Areas and Intensification Corridors (4.6.1.1).

Mixed Use lands are to provide a transition between Mixed Use Areas and established residential neighbourhoods (4.6.2.3).

The subject land is designated Mixed Use One as per the West Whitby Community Secondary Plan (refer to Attachment #5).

Lands designated Mixed Use One are to provide community commercial uses and higher density uses in a mixed use setting in the Secondary Plan area (11.8.2.1.1.1).

Prior to any development occurring on the lands within the Mixed Use One designation, an Urban Design Plan must be prepared to the satisfaction of the Town (11.8.2.1.10).

4.2. Zoning By-law

The subject land is zoned Holding – Mixed Use One South (H-MX1S) under Zoning By-law 1784, which permits a variety of uses subject to removing the ‘H’ Holding Provision (refer to Attachment #6).

A Zoning By-law Amendment is required to lift the ‘H’ Holding Provision which was applied through Site Specific By-law 7252-17 until such time that an Urban Design Plan has been prepared and accepted by the Town of Whitby.

4.3. Conclusion

The subject land is designated Mixed Use One as per the West Whitby Community Secondary Plan. Mixed Use One lands are intended to support community commercial uses and higher density uses in a mixed use setting.

The proposed development will serve to increase the range of employment opportunities available within the community, as well as future residential units.

All of the commenting departments and external agencies have indicated support for, or no objection to, the proposed development subject to their comments and conditions, as outlined in Section 7.

Based on the detailed review of the applications and consideration of department and agency comments on the Urban Design Plan, it is concluded that the proposed development is in conformity with the Town’s Official Plan. Therefore, it is recommended that Council approve the proposed Zoning By-law Amendment to lift the ‘H’ Holding Provision.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

A statutory public meeting is not required for the removal of an 'H' Holding Provision, as per the *Planning Act*.

7. Input from Departments/Sources:

The following agencies have reviewed and accepted the application.

- Town of Whitby Engineering Services;
- Town of Whitby Planning and Development – Urban Design;
- Town of Whitby Planning and Development – Landscape; and,
- Durham Region Works Department.

Detailed agency and stakeholder comments can be found in Attachment #7.

8. Strategic Priorities:

The proposed development is in accordance with the Community Strategic Plan and supports Strategic Pillar 3 – Whitby's Economy in creating partnerships that maximize opportunities for business and employment growth.

This report is in a fully accessible format, which addresses the Town's strategic priority of accessibility.

Agency and Stakeholder Detailed Comments

Internal Departments

Engineering Services

Engineering Services has no objection to the proposed Zoning By-law Amendment to remove the Holding Provision.

Urban Design & Landscape

Urban Design has completed an Urban Design Review for the UDP and have no further comments. However, we'd like to encourage the applicant to consider incorporating a public art feature into the design of the proposed urban square as part of the site plan review.

External Agencies

Durham Region Works Department

Regional Works have reviewed the latest Urban Design Plan and have no further comments. Regional Works comments related to the Urban Design Plan have been addressed.

Staff Report

whitby.ca/CouncilCalendar

Report Title: Draft Plan of Subdivision & Zoning By-law Amendment Application, Minto Communities Inc. File No. DEV-27-22 (SW-2022-06 and Z-19-22)

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP-25-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

Roger Saunders, Commissioner of
Planning and Development, ext. 4309

Acknowledged by M. Gaskell, Chief Administrative Officer

For additional information, contact:

J. Taylor, Director of Planning, 905-444-
2908

L. Riviere-Doersam, Project Manager,
905-444-2895

1. Recommendation:

1. That Council approve the Draft Plan of Subdivision (File No. SW-2022-06), subject to the comments included in Planning Report PDP 25-25 and the Conditions of Draft Plan Approval included in Attachment #9;
2. That Staff be authorized to prepare a Subdivision Agreement;
3. That Council approve the amendment to Zoning By-law #1784 (File No. Z-19-22) and that a Zoning By-law Amendment be brought forward for consideration by Council at a later date;
4. That Williams and Stewart Associates Ltd. be appointed as the Control Architect for the Draft Plan of Subdivision; and
5. That the Clerk forward a Notice to those parties and agencies who requested to be notified of Council's decision.

2. Highlights:

- Minto Communities Inc. has submitted a Draft Plan of Subdivision Application and a Zoning By-law Amendment Application for a 11.04-hectare (27.28 acre) parcel of land located on the north side of Columbus Road, west of Baldwin Street North.
- The Draft Plan of Subdivision Application proposes to create 307 residential units which would be comprised of 134 low density units and 173 medium density units, four walkway blocks, a future right-of-way block and new public roads.
- The Zoning By-law Amendment Application proposes to change the current zoning from Agricultural (A) Zone to appropriate Zone categories to accommodate the proposed development.
- All commenting departments and external agencies have reviewed the Draft Plan of Subdivision Application and the Zoning By-law Amendment Application and have indicated their support for or no objection to the proposed development subject to their comments and conditions.

3. Background:**3.1. Site and Area Description**

The subject land is located on the north side of Columbus Road, west of Baldwin Street North (refer to Attachment #1). The subject land is approximately 11.04 hectares (27.28 acres) in size.

The surrounding land uses include agricultural to the north, and the TransCanada Pipeline to the north (refer to Attachment #2). The lands to the west (SW-2025-01), east (SW-2020-01) and south (SW-2021-02) of the subject land are subject to development applications to facilitate the development of residential plans of subdivision.

3.2. Applications and Proposed Development

Draft Plan of Subdivision and Zoning By-law Amendment Applications have been submitted by Minto Communities Inc.

The Draft Plan of Subdivision Application proposes to create 307 residential units which would be comprised of 134 low density units and 173 medium density units, five walkway blocks, a future right-of-way block and new public roads.

The Zoning By-law Amendment Application proposes to change the current zoning from Agricultural (A) Zone to appropriate Zone categories to accommodate the proposed development.

3.3. Documents Submitted in Support

The following documents were submitted in support of the applications:

- An Arborist Report, prepared by Beacon Environmental, dated July 17, 2024;
- Entry into the Ontario Public Register of Archaeological Reports, prepared by the Ministry of Tourism, Culture and Sport, dated August 9, 2022;
- A Stage 2 Archaeological Assessment, prepared by Golder Associates Ltd., dated July 19, 2022;
- A Draft Plan of Subdivision, prepared by GHD Ltd., dated April 2025 (Revision #3) (refer to Attachment #3);
- An Environmental Impact Study, prepared by Beacon Environmental, dated August 2022, and revised February 2025;
- A Functional Servicing and Stormwater Management Report, prepared by SCS Consulting Group Ltd., dated August 2022 and revised February 2025;
- A Slope Stability Analysis and Setback Study for Proposed SWM Pond, prepared by B.I.G Consulting Inc., dated July 2024;
- A Preliminary Geotechnical Investigation for Proposed SWM Pond, prepared by B.I.G Consulting Inc., dated July 2024;
- A Geotechnical Investigation Report, prepared by B.I.G Consulting Inc., dated July 2024;
- A Preliminary Hydrogeological Investigation for Proposed SWM Pond, prepared by B.I.G Consulting Inc., dated June 2024;
- A Hydrogeological Investigation, prepared by B.I.G Consulting Inc., dated July 2024;
- A Preliminary Landscape Master Plan (L1) and Landscape Details (L2, L3), prepared by MHBC Planning, dated October 2023, and revised February 2025;
- A Noise Feasibility Study, prepared by Howe Gastmeier Chapnik Limited, dated August 2022 and revised February 2025;
- A Phase One Environmental Site Assessment, prepared by B.I.G Consulting Inc., dated March 2022;

- A Phase Two Environmental Site Assessment, prepared by B.I.G Consulting Inc., dated March 2022;
- A Planning Justification Report, prepared by Gatzios Planning and Development Consultants Inc., dated August 2022;
- A Land Use Planning Brief, prepared by GHD Ltd., dated July 2024 and revised February 2025;
- An Environmental Report Reliance Letter, prepared by B.I.G Consulting Inc., dated December 2022, and revised December 2024;
- A Brooklin Secondary Plan Area, Sub-Area Study, Sub-Area 3C, prepared by SCS Consulting Group Limited, dated October 2022, and revised July 2024;
- A Sustainability Report and Whitby Green Standard Checklist, prepared by GHD Ltd., dated August 2022, and revised July 2024;
- A Transportation Impact Study, prepared by BA Group, dated August 2022;
- A Traffic Study Addendum, prepared by BA Group, dated June 25, 2024 and revised February 2025;
- A Tree Canopy Cover Plan (L1.1), prepared by MHBC Planning, dated October 2023, and revised July 2024;
- An Urban Design Brief, prepared by MHBC Planning, dated August 2022 and revised February 2025;
- A Water Balance Assessment, prepared by R.J. Burnside & Associates Limited, dated July 2022 and revised July 2024; and,
- A Water Well Survey, prepared by B.I.G Consulting Inc., dated May 2023.

The above documents were distributed to relevant internal departments and external agencies for review and comment.

4. Discussion:

4.1. Envision Durham

The subject lands are designated “Community Areas” in the Envision Durham Official Plan. Columbus Road is designated as a “Regional Corridor.” Community Areas are intended to develop as complete communities, providing a range of housing, transportation, and lifestyle

choices, and creating opportunities for residents to live, shop, work and access services and amenities within their community. Regional Corridors are intended for higher-density, mixed use development.

4.2. Whitby Official Plan

The subject lands are designated Low Density Residential, Medium Density Residential, Natural Heritage System and Natural Hazards on Schedule 'J' Brooklin Community Secondary Plan of the Whitby Official Plan (refer to Attachment #4).

The Official Plan states that lands designated Low Density Residential shall include single detached, semi-detached, and duplex dwellings. The maximum building height shall not exceed 3 storeys, with a density range of 25 – 35 units per net hectare.

The Official Plan states that lands designated Medium Density Residential shall provide for residential development at increased densities along arterial and collector roads to support future transit and active transportation, and to function as a transition in density and intensity of uses between Low Density Residential Areas and higher density mixed-use and commercial areas.

Lands designated Medium Density Residential permit street and block townhouses, apartments and other forms of multiple residential dwellings not exceeding 4-storeys in height with a permitted density range of 30 to 65 upnh. The minimum building height is 3-storeys abutting arterial roads outside of mature residential neighbourhoods.

The Natural Heritage System designation is comprised of an interconnected system of key natural heritage and hydrologic features. The extent and boundary of the Natural Heritage System is conceptual and the exact boundary shall be determined through an Environmental Impact Study. The boundary of the Natural Heritage System may be refined with additions and deletions without an amendment to the Whitby Official Plan.

Lands designated as Natural Hazard include areas that are unstable, prone to flooding conditions, poor soils, steep slopes, and erosion hazards.

4.3. Zoning By-law

The subject land is zoned Agricultural (A) Zone within Zoning By-law No. 1784 (refer to Attachment #5). The Agricultural (A) Zone does not permit the proposed uses.

Therefore, a Zoning By-law Amendment is required to permit the proposed development.

4.4. Control Architect

A Control Architect will be required to oversee the design of the subdivision's built form, in accordance with the Urban Design policies of the Official Plan and the Brooklin Architectural Control Guidelines. It is recommended that Williams and Stewart be appointed as the Control Architect for the proposed Draft Plan of Subdivision.

4.5. Fire Break Lots

The proponent must submit a Firebreak Lot Plan for review and approval by the Town of Whitby Fire and Emergency Services Department. The Plan must be provided prior to any construction activity taking place on the site.

4.6. Composite Transportation Component Plan

The Engineering Services Division has provided a Composite Transportation Plan to identify the anticipated locations of traffic infrastructure, including sidewalks, multi-use paths and road right-of-way dimensions (refer to Attachment #6). These elements will be further refined and implemented through the future detailed engineering design process.

5. Financial Considerations:

With each new subdivision development approved by the Municipality, the Town of Whitby assumes assets requiring regular operational maintenance and eventually capital replacement. The following assets will be generated as a result of the subdivision and included in the Town's Asset Management Plan. The Capital replacement and annual operating costs would be included in future budgets. Further details regarding infrastructure costs would also be identified in the Financial Services Asset Management annual report.

Asset	Quantity
Roads	3.9 lane-km
Sidewalks/Multi-use paths	3.5 km
Storm Sewers	1.6 km

6. Communication and Public Engagement:

A Public Meeting was held on November 21, 2022 in accordance with the Town of Whitby Official Plan and the Planning Act. This Public Meeting provided the public, interested parties, and agencies the opportunity to make representation in respect

to the Draft Plan of Subdivision Application and the Zoning By-law Amendment Application. The meeting minutes are included in Attachment #7. There was one member of the public who spoke at the public meeting. The concerns and questions raised at the public meeting include the following:

- Landscaping of the proposed development;
- Concerns about the traffic impact on Camber Court located to the south; and
- The need for a Construction Management Plan to address construction traffic on the residential lands to the south.

A Landscaping Plan has been provided which includes the provision of trees on the Columbus Road West right-of-way.

Camber Court is not a thru-street, however the intersection at Camber Court and proposed "Street 'E'" is proposed to be signalized. This will facilitate traffic turning left or right on Columbus Road West.

A Construction Management Plan will be required for the proposed development as a Condition of Draft Plan Approval.

All individuals who registered as an interested party at the statutory public meeting and any individuals who provided written correspondence to the Town have been provided notice of the June 2, 2025 Committee of the Whole Meeting.

The submissions made by the public have been considered in determining the recommendation for approval of the proposed Draft Plan of Subdivision and Zoning By-law Amendment Application.

7. Input from Departments/Sources:

The following agencies have reviewed the applications and have no objection:

- Bell Canada;
- Canada Post;
- Durham District School Board;
- Durham Catholic District School Board;
- French Public School Board;
- Enbridge Gas Inc.;
- Elexicon; and
- Rogers Communication.

Refer to Attachment #8 for Agency and Stakeholder Detailed Comments.

7.1. Internal Departments:

Community Services – Parks Planning and Development Division

Parks staff have provided supportive comments on the applications subject to Conditions of Draft Plan Approval.

Refer to Attachment #8 for detailed comments and Attachment #9 for Conditions of Draft Plan Approval.

Engineering Services

Comments provided by Engineering Services support approval of the applications, subject to a number of Conditions of Draft Plan Approval and technical comments that can be addressed through the Engineering Submission and Subdivision Agreement process.

As part of their comment letter, Engineering Services have attached a Composite Transportation Component Plan (CTCP) highlighting the anticipated locations of sidewalks and multi-use paths for reference. Engineering Services expects that the components of this plan will be further refined and implemented through the future detailed engineering design processes.

Refer to Attachment #8 for detailed comments and Attachment #9 for Conditions of Draft Plan Approval.

Financial Services

Comments provided by Financial Services staff outline the Town's standard requirements for the payment of development charges and cash-in-lieu of parkland.

Refer to Attachment #8 for detailed comments.

Strategic Initiatives (Sustainability)

Sustainability staff confirm that the Whitby Green Standard Checklist and Sustainability Rationale Report meet the Tier 1 requirements. Staff request more detail be provided as the application progresses into the detailed design phase.

Refer to Attachment #8 for detailed comments.

Whitby Fire and Emergency Services

Fire and Emergency Services staff have provided comments indicating a firebreak layout plan is required and also identified locations in proximity to the

laneway where fire hydrants are requested. The requirement for a firebreak layout has been added as a Condition of Draft Plan Approval and hydrant locations will be reviewed and approved through detailed design.

Refer to Attachment #8 for detailed comments and Attachment #9 for Conditions of Draft Plan Approval.

7.2. External Agencies:

Central Lake Ontario Conservation Authority

Staff from the Central Lake Ontario Conservation Authority (CLOCA) have advised that they have reviewed the submitted reports and plans and that any outstanding comments can be addressed through Conditions of Draft Plan Approval.

Refer to Attachment #8 for detailed comments and Attachment #9 for Conditions of Draft Plan Approval.

Region of Durham

The comments provided by the Region of Durham state that there is no objection to the applications, subject to the Conditions of Draft Plan Approval.

Refer to Attachment #8 for detailed comments and Attachment #9 for Conditions of Draft Plan Approval.

8. Strategic Priorities:

The development review process has provided an opportunity for public and agency input. The development of a residential subdivision contributes to meeting the priorities of the Community Strategic Plan, specifically:

Action Item 1.3.4 under Pillar 1: Whitby's Neighbourhoods by providing a variety of housing options;

Action Item 2.1.5 under Pillar 2: Whitby's Natural & Built Environment by meeting the Tier 1 requirements of the Whitby Green Standard; and,

Action Item 2.2.2 under Pillar 2: Whitby's Natural & Built Environment implementing active transportation facilities including sidewalks, trails, and multi-use paths.

Attachment #7
Public Meeting Minutes
DEV-27-22 (SW-2022-06 and Z-19-22)

November 21, 2022 Public Meeting

PDP 57-22, Planning and Development (Planning Services) Department Report

Re: Draft Plan of Subdivision and Zoning By-law Amendment Applications, Minto Communities Inc., Columbus Road West at Baldwin Street North, File Numbers: DEV-27-22 (SW-2022-06 and Z-19-22)

Carl Geiger, Principal Planner, provided a PowerPoint presentation which included an overview of the applications.

Peter Maleganovski, representing Minto Communities Canada, provided a PowerPoint presentation which included a detailed overview of the applications.

The Chair indicated that comments would now be received by members of the public.

Peter Ronson, representing the Camber Court Owners Association, stated that he was a resident of Camber Court. He noted that the residents like the extensive landscaping proposed as part of the storm water management pond located to the north of Camber Court and the transition from the larger lower density lots to the proposed higher density development. Mr. Ronson requested that the Town ensure that there would be significant landscaping including larger trees around the storm water management pond and throughout the new development beyond the landscape renderings. Mr. Ronson stated that the proposed plan aligns a new street D with Camber Court. He raised concerns about traffic, noting that despite several no-exit signs, vehicles regularly drive on Camber Court creating safety concerns for residents. He further noted that Camber Court does not have any sidewalks which has resulted in close calls with children and vehicles. Mr. Ronson requested that a review of the proposed street alignment take place. He suggested that it would make sense to align the new street D to the main entrance/exit street into the Treasure Hill development on the old Brooklin Concrete site, noting that there was a lot more housing proposed on that site. He requested that traffic calming measures be implemented on Camber Court should street D have to be aligned with Camber Court. Mr. Ronson requested that consideration be given to a construction management plan that would manage all the development in the area to ensure that construction vehicles would not be on residential streets.

There were no further submissions from the public.

Attachment #8

Agency and Stakeholder Detailed Comments

DEV-27-22 (SW-2022-06 and Z-19-22)

Internal Departments

Whitby Engineering Services

The Draft Plan of Subdivision proposes to develop 307 units comprised of 134 detached dwellings, 91 rear lane townhouse units, 82 street townhouse units and roads.

The subject lands are currently zoned Agricultural. The purpose of the Zoning By-Law Amendment application is to change the zoning to appropriate categories to implement the Draft Plan of Subdivision.

The Engineering Services and Development Engineering Section has conducted a preliminary review of the circulated materials outlined below for the draft plan of subdivision and zoning applications:

- Draft Plan of Subdivision, prepared by GHD, dated February 2025
- Functional Servicing and Stormwater Management Report (FSSR), prepared by SCS Consulting Group LTD, dated February 2025
- Environmental Impact Study, prepared by Beacon Environmental Limited, dated February 14, 2025
- Noise Feasibility Study, prepared by HGC, dated February 6, 2025.

We have reviewed the drawings and reports, and they are generally acceptable for a preliminary review. There are revisions, however, that will be required through the detailed design process in order for the proposed subdivision to conform to our Design Criteria and Engineering Standards.

Please provide a copy of these comments to the Subdivider.

A. Conditional Comments

The Engineering Services supports a favourable decision to the applications based on the following comments and conditions. To address the Town's Community Strategic Plan 2023 to 2026 and assist in providing a complete picture of the proposed subdivision's mobility provisions, Engineering Services has attached a Composite Transportation Component Plan (CTCP) as Attachment 1.0 highlighting the anticipated locations of sidewalks, multi-use trails, multi-use paths and dedicated biking facilities for reference.

Engineering Services expects that the components of this plan will be further refined and implemented through the future detailed engineering design processes following

draft approval. Engineering Services requires the following Financial Considerations to be identified within Section 7 of the Council Report:

With each new subdivision development approved by the Municipality, the Town of Whitby assumes assets requiring regular operational maintenance and eventually capital replacement. The following assets will be generated as a result of the subdivision and included in the Town's Asset Management Plan. The Capital replacement and annual operating costs would be included in future budgets. Further details regarding infrastructure costs would also be identified in the Financial Services Asset Management annual report.

Asset	Quantity
Roads	3.9 lane-km
Sidewalks/Multi-use paths	3.5 km
Storm Sewers	1.6 km

1. Engineering Services requires the following Conditions of Draft Approval:

1.1. The Subdivider shall convey the following to the Town:

- a. Block 163 to 167 for walkway blocks;
- b. Block 168 for municipal use block/future public right-of-way (ROW);

1.2. The Subdivider shall implement all changes to the plan for registration resulting from recommendations and findings of the Municipal Class Environmental Assessment Brooklin North Major Roads EA (BNMREA) and the on-going Columbus Road Detailed Design Project including but not limited to the final right-of-way widths, servicing, grading, alignments, and horizontal and vertical designs of Columbus Road West.

1.3. The Subdivider shall be responsible for concrete sidewalk and/or multi-use path installation in the following locations:

- a. 3.0m-wide asphalt multi-use path on the east side of Street E;
- b. 1.8m-wide concrete sidewalk on both sides of all other streets.

Further review and consideration of sidewalk placement is required and will be addressed through detail design/engineering.

1.4. The Subdivider shall be responsible for maintaining the existing Town roads in an acceptable condition throughout the duration of construction and/or until such time as the Town roads are reconstructed. The Subdivider may be required to provide the Town

with securities to ensure roads are maintained to the Town's satisfaction. This is to be reviewed further when information regarding the timing of construction of both the subdivision development and the reconstruction of the Town owned road(s) is known.

1.5. The Subdivider shall revise unit lot lines, if required, to meet Town Standards for Block 155 along the +/- 90° bend within the plan to confirm adequate driveway layout (refer to Standard 411) with or without the eyebrows per Standard 406 and 406.10. Note that the eyebrows are not preferred by the Town and will be accepted only where required. The plan for registration must be revised to accommodate any required changes.

1.6. A plan shall be provided showing all road allowance widths, centreline radii, streetline radii, curb lines (at bends, cul-de-sacs, and intersections with angles less than 90 degrees), tangents, intersection angles/skew, visibility triangles and driveway locations (at bends and intersections) to ensure conformance to street classifications, Transportation Association of Canada (TAC) and Town of Whitby. This should be provided prior to or with the submissions of the detailed engineering drawings.

The Subdivider shall be responsible for implementing any design elements and/or changes to the plan for registration required to address any sightline and/or alignment concerns.

1.7. The Subdivider shall provide a Pavement Marking and Signage plan and shall be responsible for providing both temporary and permanent signage and pavement markings for the development.

1.8. The Subdivider shall provide a composite Traffic Calming Plan for all roads in the plan that includes, but is not limited to, area specific speed limits, speed humps, and raised intersections, for review and acceptance by the Director of Engineering Services.

1.9. Should the Subdivider proceed in advance of the adjacent developer, they shall construct Street E to the full extents and the full cross-section.

1.10. The Subdivider shall not commence the installation of any Town services within this subdivision until such time as the adjacent/downstream Subdivider(s) has constructed the required services to the common property line.

1.11. In the event that Street E is not constructed with the first phase of development, the Subdivider shall construct a temporary full movement vehicular access, designed to Town standards, at an alternate location along Columbus Road West all to the satisfaction of the Director of Engineering Services.

1.12. The Subdivider shall provide a Construction Management Report and Plan(s) to the Town's satisfaction that includes, but is not limited to, a neighborhood communication strategy, construction traffic route, schedule and mud and dust control best management practices. Construction traffic shall be restricted to time windows that do not conflict with the typical peak school drop-off and pick-up times of the nearby school.

1.13. The Following Lots/Blocks shall be placed on hold:

- a. Lots 1 to 25, 131 to 134 - until such time as the Street E is fully constructed;
- b. Lot 106 or Block 144 – until such time as suitable municipal road frontage is constructed and available for use;

1.14. The Subdivider agrees that if at the time of detailed design, should the final traffic calming circle design identify need for additional property requirements, the Subdivider shall adjust property lines accordingly.

1.15. Due to the nature and design of the proposed traffic calming circle, driveway access may be restricted for some of the lots and units within the limits of the splitter islands. Purchase and sale agreements for the affected lots and units shall contain a warning clause to this effect to be registered on title.

1.16. The Subdivider shall implement all recommended noise control measures identified in the Environmental Noise Assessment report and revise the plan as required to accommodate recommended noise control measures prior to registration.

1.17. All non-regulatory fencing and acoustic barriers shall be installed wholly on private property and all operation and maintenance of said fencing shall be the responsibility of the private property owners. Purchase and sale agreements for the affected lots and units with acoustic barriers shall contain a warning clause to this effect to be registered on title.

1.18. The Subdivider shall design and construct all regulatory black vinyl chain link fences to delineate Town blocks, and open spaces from private property in accordance with the relevant engineering standards.

1.19. The Subdivider shall ensure all private properties are protected from flooding limits at low points and points of major system flow convergence along the municipal road system. If required, the plan for registration shall be revised accordingly to provide said flood protection.

1.20. Construction phasing of the development shall be to the satisfaction of the Engineering Services, shall consider adjoining developments, and shall provide for upstream and downstream road and servicing connectivity.

1.21. The Subdivider shall provide a detailed engineering submission in accordance with Sections A2.00 and A3.00 of the Town of Whitby's Engineering Design Criteria. The engineering drawings must be set up as per the Town's CAD layering standards and object data requirements set out in Appendix A of the Design Criteria. The engineering drawings will not be accepted until it is confirmed that the drawing set-up conforms to this requirement.

1.22. The Subdivider shall confirm the details of all existing above and below grade infrastructure relevant to the proposed design. Existing details shall be confirmed in the

field by a method determined by the Subdivider's consulting engineer in consultation with the Town. Acceptable methods include, but are not limited to, topographical surveys, locates, measure downs, sub-surface utility engineering (SUE) investigation Quality Level A (QL-A), also referred to as daylighting, to determine horizontal and vertical location. The Subdivider further acknowledges that any as-built information provided by the Town is for informational purposes only.

1.23. All plan and profile drawings shall indicate the seasonal high water table elevation and the corresponding Minimum Basement Elevation, all to be confirmed by Hydrogeological Consultant and accepted by Central Lake Ontario Conservation (CLOC). The Subdivider shall protect all proposed private dwellings from the seasonal high-water table where applicable.

1.24. The Subdivider shall be responsible for all hydro poles, luminaries and hydro requirements for this proposed subdivision and shall enter into a separate agreement with Elexicon accordingly.

1.25. The Subdivider shall provide the Town with a full electrical design (i.e. primary, secondary and streetlight design) for this development. All aspects of the secondary electrical design and street light design will be peer reviewed by the Town. The Subdivider will be financially responsible for the peer review cost including a 15 percent administrative fee. The street lighting design shall include all right-of-way components including active transportation facilities, shall comply with the latest version of the RP-8 Roadway Lighting Design standard and shall utilize LED technology.

1.26. Any concerns raised through future re-submissions of the geotechnical and hydrogeotechnical reports for the site shall be addressed by the Subdivider to the satisfaction of the Engineering Services. This includes, but is not limited to, long term slope stability, confirmation of design parameters and preliminary layout for LID measures (proposed infiltration trenches), proposed stormwater management pond elevations relative to groundwater levels and the need / thickness of the impervious membrane or synthetic clay lining, foundation construction requirements and recommended measures for Best Management Practices for municipal servicing construction. The plan must reflect changes required in this regard prior to registration.

1.27. The Subdivider shall provide the Town with a deposit for any necessary peer review costs with the amount to be determined at time of first peer review. The Town will administer payments to any Peer Review Consultant(s) and provide milestone billings back to the Subdivider. The Town may request additional deposits for the Peer Review funds if required. At the time of issuance of full engineering approvals, any remaining deposit will be returned to the Developer. This condition will be superseded at such time as the Town has a Peer Review By-law in place.

1.28. The Subdivider shall be responsible to enter into a separate agreement(s) with benefitting parties, to which the Town is not a party, to address cost sharing for external services and / or the oversizing of services if required.

1.29. The Subdivider shall provide a copy of the approved individual lot grading plan (i.e. siting) to each lot purchaser prior to closing.

1.30. The Subdivider shall agree to implement the recommendations of all reports submitted in support of the application.

1.31. The Subdivider shall be responsible for satisfying any additional requirements identified by the Engineering Services not specifically listed above.

All other items related to the subdivision can be addressed through the subdivision agreement process subsequent to Draft Plan Approval.

B. Informational Comments

2. The following items can be addressed through the Engineering Submission and Subdivision Agreement process:

2.1. An initial deposit for the Engineering Review Fee in the amount of \$9,686.50 or 50% of the Engineering Review Fee based the estimated cost of works, whichever is greater, shall be paid to the Town with the first engineering submission.

Any balance owing of the final Engineering Review Fee shall be paid at the earlier of, underground servicing approval or prior to final approval of the engineering drawings by the Town.

2.2. The required Pavement Marking and Signage plan should include “No Parking Fire Route” signage, spaced at no more than 30m apart, in laneways designated as fire access routes by Fire Services. If laneways are not signed as Fire Routes they shall be signed as No Parking, with signage installed at no more than 50m apart.

2.3. Repeat comment: Revise 90° Bend for Public Laneway ‘F’ as per the attached future new Standard 40x.

2.4. A detailed SWM Report is required at the detailed design stage which shall include pond design, pond and related structures drawings, clay liner information, overland flow route calculations, emergency spillway details (100-year uncontrolled flow), storm sewer design sheets.

The detailed SWM Report shall address the FSSR comments under Section 3 of the memo from Water Resources dated September 4, 2024 (Attachment 2.0) together with the following:

a. It is noted that the runoff coefficients specified within the Town’s Design Criteria and Engineering Standards are minimum values to be utilized for sizing of the storm sewer system. Sample calculations shall be provided for all housing types (not just single detached) and shall be demonstrated by the consultant that the use of these minimum values is appropriate for the subject development. If required, the values shall be increased to represent the actual development proposal.

b. Provide geotechnical analysis to confirm any recommendation for clay liner requirement and underground drainage systems to address the risk associated artesian pressure during pond cleanout times where the water is drawn down.

Figure 2.1. Proposed Storm and Sanitary Service Plan (FSSR)

c. The subdivider shall provide clarification regarding the usage of 0% impervious on all storm drainage boundary.

Figure 2.2

d. Provide clarification on the 0% imperviousness shown for the mixed-use and high-density blocks. Confirm if this assumption is appropriate, considering the site plan has not been approved and that the site is expected to control 100-year flows to the 5-year post-development levels, as noted in the storm sewer design sheet. Additionally, verify whether the imperviousness level will impact the pond sizing if on-site controls are implemented.

Figure 2.4

e. The feasibility of the proposed sewer and major overland flow crossings with the TransCanada Pipeline should be confirmed with sufficient details such as existing depths and expected clearances.

f. Remove sump pumps; it can be considered at the detailed design as a last resort unless basements are not proposed in that area.

g. There are proposed storm sewers outside of the subject lands within adjacent lands to the west (i.e., Mykindor Holdings). The Developer is responsible to obtain all permissions, easements or lands required to service the subject development unless an alternative solution is provided and accepted by the Town.

Figure 2.6

h. Show ponding limits on the road low point based on weir calculation at the boulevard high point and on the overland flow route based on Appendix D calculations.

i. Show cross-sectional locations on the detailed grading plan for the overland flow route consistent with Appendix D.

j. Limit major overland flow discharge to around 3.5 m³/s.

k. Show major flow capture points.

l. Ponding calculations should assume 50% blockage of inlets.

Stormwater Management Design along Columbus Road West from Stantec

m. It is unclear if Pond L-32's proposed design captures the entire drainage area that was proposed in Columbus Road's 60% Design as a portion of Columbus Road appears to be included in Catchment 202 (Figure 2.2). Additionally, the future ROW limits and proposed high point (STA 13+540) for Columbus Road are not shown on the Figure making it unclear how the drainage boundary for Catchment 305 (Figure 2.2) was delineated.

n. Minor storm drainage area of 2.35 ha from Columbus Road ROW (from the highpoint at STA. 13+540 to Street E of the Draft Plan). Clarify if this full area is included in the pond design.

o. Confirm that the runoff from the external lots (within the proposed subdivision) that front/back on to Columbus Road (approximately 0.30 ha). are to be included in the pond design.

p. Confirm that runoff from Area Ext-18 (2.25 ha at 93% impervious) which is to have on-site controls (on-site controls need to be confirmed is included in the design.

q. Confirm where the runoff from Area Ext -19 (1.29ha @ 86% impervious) is included as it appears to be included in the pond design.

r. It was assumed that major flows with a drainage area of 1.25 ha from the north half of Columbus Road ROW (from the highpoint at STA. 13+540 to Street E of the Draft Plan) would outlet to Street E as no highpoint is shown to prevent runoff from flowing north. The 1.25 ha area may change when the Columbus Road and Baldwin Street intersection grading has been completed as part of the 90% submission. The FSSR assumes Catchment 305 (Figure 2.2) continues to Lynde Creek and does not enter the pond.

The future detailed design should be consistent with the Columbus Road Design project with respect to the drainage areas tributary to the pond and corresponding intersection grading.

s. Major flows from Area Ext-20 were assumed to outlet onto Columbus Road however due to a draft plan change, this area will be conveyed directly to Pond L-32.

t. As a side note, minor and major flows from Baldwin Street were not included as part of the Columbus Road storm sewer design as it was assumed the road would continue to have roadside ditches and flow south per current conditions. In the FSSMR, both minor and major flows from Baldwin Street are assumed to be conveyed to the pond.

u. The FSSR design assumes Columbus Road has an imperviousness of 59%. Per Columbus Road's 60% Design, the imperviousness should be 79%. Please update.

v. Similar to above, it is unclear how the drainage boundary for Catchment 303 (Figure 2.2) was delineated as the future ROW limits are not shown.

2.5. Lots and blocks serviced by laneways, regardless of housing type, shall have all roof leaders directly connected to the municipal storm sewer unless otherwise approved.

2.6. To address lot level low impact development (LID) recommendations, ensure that lots and areas where roof water leaders are proposed to be disconnected from the storm sewer connection are clearly noted and can accommodate the drainage without creating problems associated with winter ice accumulation. Ensure that storm drainage areas reflect the correct boundary location.

2.7. The consultant is to provide the Town with a dual drainage (minor/major system) storm model for the entire development using Personal Computer Stormwater Management Model (PCSWMM) as part of the detail design and confirmation of HGL elevations.

2.8. The use of Inlet Control Devices (ICDs) is discouraged and shall be limited to roadway sags, as per Town requirements, to the greatest extent possible. The model shall illustrate the implications of conventional ICD placement at CBs, per Town standards and documentation regarding the recommended use of ICDs within the proposed subdivision shall be provided.

2.9. Provide detailed ponding limits at overland flow low points, and any points of overland convergence to ensure that appropriate emergency access can be maintained to the area based on Town of Whitby Design Criteria and that private property has been protected from flooding. Ponding limits are to be shown for 100-year storm events. Low points are to be located at the appropriate block or intersection location.

2.10. For all overland flow outlet points, the following shall be provided: flow channel profile, cross-sections and erosion protection works at all locations i.e. across window street boulevard areas, within specific overland flow blocks, across SWM Pond Blocks and any direct outlets to Open Space areas.

2.11. Provide details and analysis for the routing of overland flow through the stormwater management ponds to ensure stability of the pond under major storm events.

2.12. In advance of any on-site work, provide recommendations for monitoring of the existing creek/tributary during construction (erosion and sediment controls, stormwater management, vegetation protection, stream protection in area of storm outfall(s), dewatering, access, storage and equipment maintenance requirements) and post construction (changes to vegetation or wildlife habitats and species).

2.13. On-road cycling facilities are to be integrated with the Community Services trails network at locations where off-road facilities are provided (e.g. signage, rest stops and/or other enhancements).

2.14. Noise fence/barrier design may need to accommodate surface drainage outlets depending on the lot type and grading design. At the design stage, once detailed

grading information is available, a letter will be required from the noise consultant to confirm that the recommendations of the Noise Report provided for the development remain relevant to the accepted grading.

Any transition in height of the noise barrier is to occur at lot lines so that the noise barrier height across individual lots is consistent.

2.15. The Town will not grant exemptions to half-load restrictions to facilitate construction of the proposed development. The Subdivider shall schedule construction activities in accordance with typical timing of load restrictions for the surrounding road network.

2.16. Per the recommendation within the FSSR report, topsoil thickness for landscaped areas within the development is to be increased to 300 mm.

2.17. The Subdivider shall provide the Town with a cash contribution in accordance with the by-lawed rate in force at the time of payment, for each newly installed streetlight for the relamping and cleaning of streetlights, representing typical maintenance costs prior to assumption.

2.18. The Subdivider shall provide the Town with a cash contribution in accordance with the by-lawed rate in force at the time of payment towards the installation of vertical control benchmarks.

Whitby Planning and Development

The Planning and Development Department has reviewed the submission materials and are satisfied, subject to addressing revisions and requirement outlined by other commenting agencies.

Whitby Landscaping

Landscaping conditions are as follows:

- The Subdivider shall provide a Tree Preservation Plan in coordination with an Erosion and Silt Control (ESC) fencing. The Tree protection fencing is to be inspected and approved by the Town in advance of any on-site grading works.
- The Subdivider shall ensure all municipal trees proposed for removal are appraised by an ISA Certified Arborist. The appraisal will be reviewed by the Town Forestry staff and will inform any requirements for compensation for the loss of these trees, including cash contribution to the town's tree Reserve Fund.
- The Subdivider shall, in advance of any tree clearing, provide the Town with evidence of permission for proposed removals offsite and on neighboring properties.
- The Subdivider shall provide the Town with a detailed Compensation Planting Plan/ NHS Restoration and Enhancement Plan through a revised EIS. Once

approved, a cost estimate is to be provided so the town can secure these works through a Landscape LC. This LC must be provided in advance of the removal of any woodlots.

- The Subdivider shall agree to install all approved planting and restoration plans identified within the Natural Heritage Restoration and Enhancement Plan to the satisfaction of the Town of Whitby and CLOCA, within the shouldering growing season of any approved removals or impacts. All planted areas will be protected with appropriate fencing to avoid any disturbance to this area during subsequent construction.
- The Subdivider shall ensure the success and management of the Restoration Plan is monitored for a 3-year period by the Landscape Consultant. Annual inspections with and reporting to both the Town and CLOCA is required during this period.
- The Subdivider shall convey protected and undevelopable lands to the Town where, in public ownership, the lands will be protected in perpetuity. This includes the Greenbelt lands on the Mykinder property where compensation planting is proposed to occur. The Town requires the Subdivider to co-ordinate the submission of a 40R plan for these associated lands. Should the Subdivider and Mykinder not agree to convey the lands to the Town, cash-in-lieu shall be provided.
- The Subdivider shall ensure that hazardous trees along the edges of the limit of development are identified in advance and wherever adjacent to proposed development; on-site review with staff from the Town's Forestry staff (Operations) and landscape inspection (Planning) is required prior to anticipated removals and throughout the development process.
- The Subdivider shall ensure all adjacent boulevards are urbanized, top-soiled, fine-graded, sodded and provided with buffer tree planting.
- The Subdivider shall ensure all black vinyl chainlink fences are designed and constructed in accordance with the relevant Engineering Standards to delineate Town blocks and Open Spaces from private property.

Whitby Fire and Emergency Services

1. Clarify if there is access to Street E from Columbus Rd
2. Indicate location of fire hydrants on site plan.
3. Fire hydrants shall be installed at each end of "Public Lane F".
4. Submit a site plan indicating designated fire breaks for review and approval prior to construction

Whitby Strategic Initiatives

- No further information will be required at this time, and Strategic Initiatives can confirm that the Whitby Green Standard requirements for this Application have now been satisfied.

Whitby Parks Planning

The Parks Division of the Community Services Department has reviewed the third submission dated February 18, 2025. It is Parks Staff's understanding that the proposed development consists of:

- Zoning By-law Amendment and Draft Plan of Subdivision Applications to facilitate:
 - the development of 174 townhouses and 134 detached houses

Parks Comments:

Parks Planning has no further comments.

Conditions of Draft Plan Approval Conditions

The following conditions shall be incorporated into the Draft Plan agreement:

1. The Subdivider shall satisfy their obligations related to parkland dedication as required through a future North Brooklin Master Parks Agreement or other arrangement to the satisfaction of the Town. Parkland dedication will be calculated at a rate in accordance with the Town's Parkland Dedication By-Law and the Planning Act.
2. The Subdivider agrees to install a 1.2 metre black vinyl standard park fence where any open space and park blocks abut residential lots.

Whitby Financial Services – Development Charges

The following pertains to Town of Whitby Development Charges only, based on current Provincial legislation and Town of Whitby by-laws (subject to change). Additional information can be found at <https://www.whitby.ca/en/work/development-charges.aspx>. This development will also be subject to Region of Durham development charges and DDSB/DCDSB education development charges, please reach out to them directly with any questions.

Development Charges

- Will be owing for both the residential and non-residential development.
- Under Section 26.2 of the Development Charges Act.
 - The base DC rate(s) will be set as of the Zoning By-law Amendment application submission date.
 - Interest will accrue on the base DC rate(s), from the date of site plan application submission until the date of building permit issuance. Per the DC Act, the interest is set at Prime +1% adjusted quarterly.

- The applicant has 18 months from the date of Zoning By-law application approval to obtain a building permit. Otherwise, Section 26.2 no longer applies, and instead the applicable DC rate(s) are the current posted rates in effect as of the building permit issuance date.
- If this development is a condo, development charges are payable prior to the issuance of the 1st building permit. If this development is entirely rental housing development charges shall be payable as per Section 26.1 of the DC Act.
- If this development includes affordable or attainable units (as defined in Section 4.1 of the DC Act), those units are eligible for DC exemptions.
- If this development includes rental housing or institutional development, Section 26.1(3) of the DC Act allows for development charges to be paid in equal annual installments over five years, upon the earlier of occupancy or issuance of an occupancy permit.
- If this development includes four or more rental housing units, Section 26.2 (1.1) of the DC Act allows for additional development charge reductions based on the number of bedrooms per unit.
- If a building is being demolished to make way for this redevelopment, the applicant has 5 years from the date that the demolition permit was issued, to obtain the new building permit to qualify for a redevelopment credit.

Parkland Dedication / Cash-in-Lieu Shall be applicable as per the Planning Act and Town of Whitby By-Law for both the residential and non-residential development.

- If utilizing a CIL, a land appraisal is required at the cost of the developer and will remain current for a maximum period of one (1) year.
- If CIL has previously been applied, a reduction in the amount owing will be applied.
- If CIL has not previously been applied, only the incremental residential units are used for the calculation of the CIL value.

External Agencies

Region of Durham

Proposed Revised Draft Plan of Subdivision

The proposed draft plan of subdivision has been revised to address agency comments. The proposed revised draft plan of subdivision would permit the development of a total of 307 residential units that consists of 134 single-detached dwellings, 173 townhouse units, 5 walkway blocks, a right-of-way block, and roads. The proposed changes have resulted in a decrease of one townhouse unit from the 174 units originally proposed.

Bill 23 Proclamation of the Region of Durham

Please be advised that effective January 1, 2025, the Region became an upper-tier municipality without planning responsibilities. As such, the comments pertaining to conformity and consistency with the Region of Durham Official Plan and provincial plans

and policies and those comments relating to the Region's delegated provincial plan review responsibilities now fall under the purview of the area municipalities.

The Region will continue to review Provincial Plan Review responsibilities for applications where we previously commented on prior to proclamation of the Region and required additional supporting information to be satisfied.

Provincial Plan Review

The Region's earlier comments and comments in our letter dated April 1, 2025 as they relates to Provincial Plan Review remain applicable to the proposed development. The applicant will be required to satisfy noise and archaeology requirements as conditions of draft approval of the subdivision application.

Regional Servicing

Municipal Water Supply

The subject lands are located within the proposed Zone 4 pressure district and can be serviced through the extension of a 300mm diameter Zone 4 watermain east of Baldwin Street.

The servicing for this development will need to be coordinated with the adjacent development at MyKinder Holdings and Jass Gill of Nihal and Lachhman Inc. (7030 Baldwin Street North) and including the lands west of Cedarbrook Trail.

All lots in Zone 4 with static pressure over 550 kPa (80 psi) will require individual private pressure reducing valves.

Sanitary Sewer Servicing

Sanitary servicing is available to service the proposed development from the existing 525 mm sanitary sewer on Camber Court and extend northerly along public Street 'E'. The servicing for this development will need to be coordinated with the adjacent development at MyKinder Holdings.

Conclusion

The proposed infill residential subdivision supports a mix of housing opportunities in Durham Region and would complement with the planned housing form proposed on the south side of the Columbus Road West corridor within this neighbourhood.

The Region is generally supportive of the proposed revised subdivision development. The Region's servicing comments can be addressed through detailed future engineering design submissions for the proposed development.

Based on the foregoing, the Region has no objection to draft approval of the subdivision application. The attached conditions of draft approval must be complied with prior to clearance by the Region for registration of this plan.

It is requested that the Owner provide a land use table prepared by an Ontario Land Surveyor to the satisfaction of the Region of Durham. The land use table should provide lot area calculations for the proposed land use(s) allocated within the draft plan of subdivision.

Conditions of Draft Approval of the Plan of Subdivision

1. The Subdivider shall prepare the final plan on the basis of the approved draft plan of subdivision, prepared GHD Ltd., dated April 8, 2025, identified as Project No.: 12630859, which shows 134 single-detached dwellings, 173 townhouse units, 5 walkway blocks, a right-of-way block, and roads.
2. The Subdivider shall name the road allowance included in this draft plan to the satisfaction of the Region of Durham and the Town of Whitby.
3. The Subdivider shall submit plans showing the proposed phasing to the Region of Durham and the Town of Whitby for review and approval if this subdivision is to be developed by more than one registration.
4. The Subdivider shall grant to the Region, any easements required to provide Regional services for this development. The easements shall be in locations and of such widths as determined by the Region of Durham.
5. The Subdivider shall agree in the Town of Whitby's Subdivision Agreement to implement the recommendations of the "Noise Feasibility Study," prepared by HGC Noise Vibration Acoustics, dated February 6, 2025, which specifies noise attenuation measures for the development. The measures shall be included in the subdivision agreement and must also contain a full and complete reference to the noise report (i.e. author, title, date and any revisions/addenda) and shall include any required warning clauses identified in the study.
6. The Subdivider shall carry out an archaeological assessment of the subject lands and mitigation and/or salvage excavation of any significant heritage resources to the satisfaction of the Ministry of Citizenship and Multiculturalism. No grading or other soil disturbance shall take place on the subject land prior to a letter of clearance from the Ministry of Citizenship and Multiculturalism.
7. The Subdivider shall provide for the extension of such sanitary sewer and water supply facilities which are external to, as well as within, the limits of this plan that are required to service this plan. In addition, the Owner shall provide for the extension of sanitary sewer and water supply facilities within the limits of the plan which are required to service other developments external to this subdivision. Such sanitary sewer and water supply facilities are to be designed and constructed according to the standards and requirements of the Region of Durham. All arrangements, financial

and otherwise, for said extensions are to be made to the satisfaction of the Region of Durham, and are to be completed prior to final approval of this plan.

8. Prior to entering into a subdivision agreement, the Region of Durham shall be satisfied that adequate water pollution control plant and water supply plant capacities are available to the proposed subdivision.
9. The Subdivider shall satisfy all requirements, financial and otherwise, of the Region of Durham. This shall include, among other matters, the execution of a subdivision agreement between the Owner and the Region concerning the provision and installation of sanitary sewers, water supply, roads and other regional services.

Central Lake Ontario Conservation Authority

Thank you for circulating Central Lake Ontario Conservation Authority (CLOCA) on the above noted zoning by-law amendment and draft plan of subdivision applications. CLOCA staff have reviewed the circulated documents for consistency with the natural hazard policies of the Provincial Policy Statement (PPS) as well as for conformity with Ontario Regulation 41/24 of the Conservation Authorities Act.

The subject property is located within the Lynde Creek Watershed. The subject property does not appear to have any wetlands or natural hazards within or adjacent (within 30m) to these lands. As such, this property is not regulated through Ontario Regulation 41/24 of the Conservation Authorities Act and a permit from CLOCA would not be required for this development.

CLOCA staff have reviewed the submitted reports, plans and drawings and have appended comments that will be addressed through Conditions of Draft Plan Approval. Further comments may be provided through detailed design.

Zoning By-law Amendment (Z-19-22)

CLOCA staff have no objection to any approval of the proposed Zoning By-law Amendment.

Draft Plan of Subdivision (SW-2022-06)

CLOCA staff recommend that any approval of the proposed plan of subdivision be subject to the following draft plan conditions on behalf of Central Lake Ontario Conservation Authority:

1. That prior to any on-site grading or construction or final approval of the plan, the Subdivider shall submit to, and obtain approval from the Town of Whitby and the Conservation Authority for reports describing the following:
 - a) The intended means of conveying stormwater flow from the site based on stormwater techniques which are appropriate and in accordance with provincial guidelines as well as in conformity with the recommendations found within the

Lynde Creek Master Drainage Plan and Brooklin Secondary Plan Sub-Area Study 3C.

- b) The intended means to maintain appropriate water balance for the subject lands and to the adjacent hydrologic features as part of this development. This includes agreeing to an appropriate pre-development infiltration condition and providing effective post development infiltration techniques to match this target.
 - c) The intended means to design, install, access, maintain and monitor any proposed Low Impact Development (LID) measures as part of this development.
 - d) The intended means whereby erosion and sedimentation and their effects will be minimized on the site during and after construction, in accordance with provincial guidelines. The report must outline all actions to be taken to prevent an increase in the concentration of suspended solids in any water because of on-site, or other related works.
 - e) A natural hazard constraints plan that clearly illustrates that all proposed development (including grading) is outside of these development limits to the satisfaction of Central Lake Ontario Conservation Authority.
2. The Subdivider agrees that Restoration Planting Plans will be provided and approved by the Town and Central Lake Ontario Conservation Authority to restore any disturbed areas and advance the establishment of native species within all former agricultural fields and buffer areas adjacent to natural hazard lands and related features.
 3. That the Subdivider shall agree to install all approved planting and restoration plans identified within the Restoration Planting Plans to the satisfaction of the Town of Whitby and Central Lake Ontario Conservation Authority. All planted areas will be protected with appropriate fencing to avoid any disturbance to this area during subsequent construction.
 4. The Subdivider shall obtain all necessary permits from Central Lake Ontario Conservation Authority required through Ontario Regulation 41/24, or any successor regulations made under the Conservation Authorities Act.
 5. The Subdivider shall satisfy all financial requirements of the Central Lake Ontario Conservation Authority. This shall include Application Processing Fees and Technical Review Fees owing as per the approved Authority Fee Schedule.
 6. The subdivision agreement between the Subdivider and the Town of Whitby shall contain, among other matters, the following provisions:
 - a) The Subdivider agrees to carry out the works referred to in Condition 1 and 2 to the satisfaction of the Central Lake Ontario Conservation Authority.

- b) The Subdivider agrees to maintain all stormwater management and erosion and sedimentation control measures operating and in good repair during the construction period, in a manner satisfactory to the Central Lake Ontario Conservation Authority.
- c) The Subdivider agrees to advise the Central Lake Ontario Conservation Authority 48 hours prior to commencement of grading or the initiation of any on-site works.
- d) In order to expedite clearance of Condition 6, a copy of the fully executed subdivision agreement between the area municipality and the owner should be submitted to the Authority.

Detailed Design

In addition to fulfilling the above noted conditions of draft plan approval, all comments within the attached memos and all previous outstanding comments must be addressed to our satisfaction as part of detailed design. Outstanding comments deferred to detailed design can be referenced in the applicant's submitted comments response matrix.

Durham Catholic District School Board

Planning staff at the Durham Catholic District School Board have reviewed the above noted revised planning applications and have no objections to the proposed development.

This development is located within the boundary of St. John Paul II C.S. Located at 160 Cachet Blvd, Brooklin. Whitby.

Durham District School Board

Staff has reviewed the information on the above noted and has the following comments:

1. Approximately 128 elementary pupils and 62 secondary pupils could be generated by the above noted application.
2. Students generated from this development will attend existing neighbourhood schools.

Under the mandate of the Durham District School Board, at this time, staff has no objection.

French Catholic District School Board

The French Catholic District School Board did not respond to the request for comments.

French Public District School Board

The CS Viamonde have no comments or concerns regarding the proposed development.

Elexicon

Further to the referenced File SW-2022-06, Z-19-22, subject to the caveats set out in this letter, Elexicon Energy Inc. has no objection to the proposed Subdivision Application to develop a residential development consisting of total 134 detached dwellings and townhouse units on subject land.

The applicant or its authorized representative shall consult with Elexicon Energy Inc. concerning the availability of supply voltage, service location, metering, costs and any other details. These requirements are separate from and in addition to those of the ESA. Elexicon Energy Inc. will confirm the characteristics of the available electrical supply and will designate the location of the supply point to the applicant. Elexicon Energy Inc. will also identify the costs that the applicant will be responsible for.

In some cases, an expansion of Elexicon's distribution system (as such term is defined in the Distribution System Code issued by the Ontario Energy Board) will be required in order to be able to connect the customer to Elexicon's distribution system. When an expansion is necessary, the Distribution System Code requires that a distributor perform an economic evaluation to determine if the future revenue from the customer(s) will pay for the capital cost and on-going maintenance costs of the expansion project. If a shortfall between the present value of the projected costs and revenues is calculated, the distributor may propose to collect all or a portion of that amount from the customer(s). The evaluation is basically a discounted cash flow calculation that brings all costs and revenues to their net present values. This model, in general, follows the methodology, the set of common elements and related assumptions provided in Appendix B of the Distribution System Code. Elexicon will provide an Offer to Connect once an official request for electric services is received.

The applicant or its authorized representative shall apply for new or upgraded electric services and temporary power service in writing. The applicant is required to provide Elexicon Energy Inc. with sufficient lead-time in order to ensure:

- a) The timely provision of supply to new and upgraded premises; and/or
- b) The availability of adequate capacity for additional loads to be connected in the existing premises

For all future applications and related correspondences kindly forward digital copies to: DevelopmentApplications@elexiconenergy.com

Bell Canada

We have reviewed the circulation regarding the above noted application. The following paragraphs are to be included as a condition of approval:

Bell Canada Condition(s) of Approval

- 1) The Owner acknowledges and agrees to convey any easement(s) as deemed necessary by Bell Canada to service this new development. The Owner further agrees and acknowledges to convey such easements at no cost to Bell Canada.

2) The Owner agrees that should any conflict arise with existing Bell Canada facilities where a current and valid easement exists within the subject area, the Owner shall be responsible for the relocation of any such facilities or easements at their own cost.

Upon receipt of this comment letter, the Owner is to provide Bell Canada with servicing plans/CUP at their earliest convenience to planninganddevelopment@bell.ca to confirm the provision of communication/telecommunication infrastructure needed to service the development.

It shall be noted that it is the responsibility of the Owner to provide entrance/service duct(s) from Bell Canada's existing network infrastructure to service this development. In the event that no such network infrastructure exists, in accordance with the Bell Canada Act, the Owner may be required to pay for the extension of such network infrastructure.

If the Owner elects not to pay for the above noted connection, Bell Canada may decide not to provide service to this development.

Concluding Remarks:

To ensure that we are able to continue to actively participate in the planning process and provide detailed provisioning comments, we note that we would be pleased to receive circulations on all applications received by the Municipality and/or recirculations.

If you believe that these comments have been sent to you in error or have questions regarding Bell's protocols for responding to municipal circulations and enquiries, please contact planninganddevelopment@bell.ca directly.

We note that WSP operates Bell Canada's development tracking system, which includes the intake and processing of municipal circulations. However, all responses to circulations and requests for information, such as requests for clearance, will come directly from Bell Canada, and not from WSP. WSP is not responsible for Bell's responses and for any of the content herein.

Rogers Communications

Rogers Communications Canada Inc. ("Rogers") has reviewed the application for the above Subdivision and has determined that it intends to offer its communications services to residents of the Subdivision. Accordingly, we request that municipal approval for the Subdivision be granted subject to the following conditions:

(1) The Owner shall agree in the Subdivision Agreement to (a) permit all CRTC-licensed telecommunications companies intending to serve the Subdivision (the "Communications Service Providers") to install their facilities within the Subdivision, and (b) provide joint trenches for such purpose.

(2) The Owner shall agree in the Subdivision Agreement to grant, at its own cost, all easements required by the Communications Service Providers to serve the Subdivision, and will cause the registration of all such easements on title to the property.

(3) The Owner shall agree in the Subdivision Agreement to coordinate construction activities with the Communications Service Providers and other utilities, and prepare an overall composite utility plan that shows the locations of all utility infrastructure for the Subdivision, as well as the timing and phasing of installation.

(4) The Owner shall agree in the Subdivision Agreement that, if the Owner requires any existing Rogers facilities to be relocated, the Owner shall be responsible for the relocation of such facilities and provide where applicable, an easement to Rogers to accommodate the relocated facilities.

(5) In addition, we kindly request to, where possible, receive copies of the following documents:

(1) the comments received from any of the Communications Service Providers during circulation;

(2) the proposed conditions of draft approval as prepared by municipal planners prior to their consideration by Council or any of its committees; and

(3) the municipal planners' report recommending draft approval before it goes to Council or any of its committees.

Enbridge Gas Distribution Inc.

Enbridge Gas Inc. does not object to the proposed application(s) however, we reserve the right to amend or remove development conditions.

This response does not constitute a pipe locate, clearance for construction or availability of gas.

The applicant shall contact Enbridge Gas Inc.'s Customer Connections department by emailing AreaPlanning40@Enbridge.com to determine gas availability, service and meter installation details and to ensure all gas piping is installed prior to the commencement of site landscaping (including, but not limited to: tree planting, silva cells, and/or soil trenches) and/or asphalt paving.

If the gas main needs to be relocated as a result of changes in the alignment or grade of the future road allowances or for temporary gas pipe installations pertaining to phased construction, all costs are the responsibility of the applicant.

In the event that easement(s) are required to service this development, and any future adjacent developments, the applicant will provide the easement(s) to Enbridge Gas Inc. at no cost.

Ministry of Transportation

Zoning By-Law Amendment

MTO has no concerns with the ZBA proposal.

Draft Plan of Subdivision

General Site Notes

The subject site is within MTO's Permit Control Area and as such, MTO Site Plan Approval and an MTO Permits will be required prior to any construction activities.

The site does not have frontage onto Highway 12.

Any noise mitigation is the responsibility of the landowner which includes the design and implementation. The Ministry will not be held liable for noise attenuation next to the highway which also includes its maintenance and upkeep.

Conditions of Subdivision

Stormwater Management Plan/Report

That prior to final approval, the owner shall submit to the Ministry of Transportation for their review and approval, a copy of a drainage/storm water management plan /report indicating the intended treatment of the calculated runoff.

Traffic Impact Study

Prior to final approval, the owner must submit to the Ministry of Transportation for their review and approval, a copy of a traffic impact study. MTO requires a Master Traffic Impact Study that complies with the Guidelines set forth in MTO's Guidelines for Traffic Impact Statements. As this area is being intensified, particular adherence to Part 2 – Multiple Development Traffic Impact Studies Information should be followed.

Please have the proponent confirm the reports have been carried out by RAQS approved contractors/consultants. All works within the Provincial right-of-way shall be carried out by RAQS qualified contractors.

Illumination Plan

That prior to final approval, the owner shall submit a Photometric Lighting Plan (in metric LUX units) for MTO review and approval. The plan must illustrate proposed lighting and any light spillage on the Provincial Highway lands & associated service roads ROW.

TransCanada Pipeline

MacNaughton Hermsen Britton Clarkson Planning Limited (MHBC) are the planning consultants for TransCanada PipeLines Limited (TCPL). This letter is in response to a notification and request for comments for the above-noted 3rd Submission for Draft Plan of Subdivision and Zoning By-law Amendment applications for a residential development located on the lands identified as 7260 Baldwin Street North in the Town of Whitby (the "Subject Lands"). TCPL has two (2) high pressure natural gas pipelines contained within a Right-of-Way abutting the Subject Lands.

TCPL's pipelines and related facilities are subject to the jurisdiction of the Canada Energy Regulator (CER) – formerly the National Energy Board (NEB). As such, certain activities must comply with the Canadian Energy Regulator Act ("Act") and associated Regulations. The Act and the Regulations noted can be accessed from the CER's website at www.cer-rec.gc.ca.

Based upon our initial review of the resubmission materials, we are providing the following comments and are requesting that the noted development and regulatory requirements be included as conditions in the Draft Plan approval and Subdivision Agreement between the Municipality and the Proponent. TCPL may submit additional requirements to be included in the Subdivision Agreement.

Draft Conditions:

1. For lots and blocks within 30 metres of the pipeline centreline (the "Prescribed Area"), the conditions, restrictions or covenants specified by TCPL shall be included in a separate agreement between TCPL and the Proponent, and the Proponent shall register such agreement against title to the Subject Lands prior to registration of the subdivision plan by way of application to register conditions, restrictions or covenants, as applicable, pursuant to the Land Titles Act, or any amendments thereto.
2. The Municipality shall circulate TCPL on the future Site Plan Applications for Blocks located within the Prescribed Area.

Subdivision Agreement:

1. No buildings or structures shall be installed anywhere on TCPL's Right-of-Way. Permanent buildings and structures are to be located a minimum of 7 metres from the edge of the right-of-way. Temporary, moveable or accessory structures, that are not affixed to the ground, are to be located a minimum of 3 metres from the edge of the TCPL Right-of-Way.
2. A minimum setback of 7 metres from the nearest portion of a TCPL pipeline Right-of-Way shall also apply to any parking area, loading spaces, stacking spaces, bicycle parking spaces, and any associated drive aisle or driveway.
3. Written consent must be obtained from TCPL prior to undertaking the following activities:
 - a. Constructing or installing a facility across, on, along or under a TCPL pipeline Right-of-Way. A facility may include, but is not limited to: driveways, roads, access ramps, trails, pathways, utilities, berms, fences/fence posts;
 - b. Conducting a ground disturbance (excavation or digging) on TCPL's pipeline Right-of-Way or within 30 metres of the centreline of TCPL's pipe (the "Prescribed Area");
 - c. Driving a vehicle, mobile equipment or machinery across a TCPL pipeline Right-of-Way outside the travelled portion of a highway or public road;
 - d. Using any explosives within 300 metres of TCPL's pipeline Right-of-Way; and

- e. Use of TCPL's Prescribed Area for storage purposes.

How to apply for written consent:

- Determine the location of your work relative to a TCPL Pipeline Right-of-Way. o When planning, and before any work or activities, listed above, can begin, a request for written consent must be submitted to TCPL through its online application form
 - Location of the work is required, along with the proximity to a TCPL Pipeline Right-of-Way
 - This information can be obtained through survey plans, or through a locate request
 - Make a locate request online to the One-Call Centre: ClickBeforeYouDig.com or ontarioonecall.ca
 - The One-Call Centre will notify owners of buried utilities in your area, who will send representatives to mark these facilities with flags, paint or other marks, helping you avoid damaging them. Often written consent for minor activities can be obtained directly from a regional TCPL representative through a locate request.
 - Apply for written consent using TCPL's online application form: writtenconsent.tcenergy.com or call 1-877-872-5177.
 - Application assessment and consent: Once your information has been assessed and potential impacts have been evaluated, TCPL may:
 - Grant consent without any conditions
 - Grant consent that requires certain conditions to be met to assure safety, or
 - Not grant consent
4. During construction of the site, temporary fencing must be erected and maintained along the limits of the right-of-way by the Proponent to prevent unauthorized access by heavy machinery. The fence erected must meet TCPL's specifications concerning type, height and location. The Proponent is responsible for ensuring proper maintenance of the temporary fencing for the duration of construction.
 5. The Proponent shall install permanent fencing along the limits of TCPL's right-of-way. The fence erected must meet TCPL's and the municipality's specifications concerning type, location, and height. The Proponent must obtain written consent from TCPL prior to any fence construction.
 6. Storage of materials and/or equipment on TCPL's right-of-way is not permitted.
 7. Where provisions for future road crossings of TCPL's right-of-way are shown (Street A and E):
 - a. The road end shall be restricted such that no travelled surface is within 7 metres from the edge of the right-of-way.
 - b. All infrastructure related to future road crossings must be set back a minimum of 7 metres from the edge of the right-of-way. This includes grading and all structures including, curbs and gutters, signalization, and street lighting.

- c. Provisions for required conditions shall be put in place to ensure that no unauthorized access to TCPL's right-of-way occurs.
8. Where TCPL consents to any ground disturbances in proximity to any TCPL pipeline, the original depth of cover over the pipelines within the TCPL Pipeline Right-of-Way shall be restored after construction. This depth of cover over the pipelines shall not be compromised due to rutting, erosion or other means.
9. Facilities shall be constructed to ensure that drainage is directed away from the TCPL Pipeline Right-of-Way so that erosion that would adversely affect the depth of cover over the pipelines does not occur. Catchment basins, drainage swales or berms are not permitted within the TCPL Pipeline Right-of-Way. All infrastructure associated with site servicing, grading, and stormwater management (e.g. subdrains, manholes, catchbasins, retention walls, storm ponds, culverts/riprap) shall be setback a minimum of 7 meters from the edge of the TCPL Pipeline Right-of-Way.
10. Should pooling of water or erosion occur on the TCPL Pipeline Right-of-Way as a result of any facility installation or landscaping, the Proponent will be responsible for the remediation to TCPL's satisfaction.
11. Any large-scale excavation adjacent to the right-of-way, which is deeper than the bottom of the pipe, must incorporate an appropriate setback from the TCPL Pipeline Right-of-Way and must maintain a slope of 3:1 away from the edge of the TCPL Pipeline Right-of-Way.
12. Mechanical excavation within 5 metres of the edge of a TCPL pipeline is prohibited. Hand or hydrovac excavation must be utilized within this distance.
13. In no event shall TCPL be held liable to the Proponent respecting any loss of or damage to the Proponent's Facility, which the Proponent may suffer or incur as a result of the operations of TCPL. The Proponent shall be responsible for all costs involved in replacing the Proponent's Facility damaged or removed during TCPL's operations and shall indemnify and save harmless TCPL from all actions, proceedings, claims, demands and costs brought against or incurred by TCPL as a result of the presence of or damage to the Proponent's Facility on the TCPL Pipeline Right-of-Way.
14. All display plans in the lot/home sales office shall identify the TCPL Pipeline Right-of-Way.
15. The Proponent shall include notice of the following in all offers of purchase and sale:
 - a) Notice of the easement agreement registered against the property which may affect development activities on the property;
 - b) Notice of the 30 metre Prescribed Area as regulated by the CER Act;
 - c) The number of high-pressure natural gas pipelines within the easement and the location of the easement in relation to the development;
 - d) The setback for all permanent structures and excavations from the limits of the TCPL Pipeline Right-of-Way; and,
 - e) The local One Call number 1-800-400-2255 and website ClickBeforeYouDig.com or ontarioonecall.ca.

16. If TCPL's pipelines experience contact damage or other damage as a result of construction, stop work immediately and notify TCPL at once. The TCPL Emergency telephone number is: 1-888-983-7222.
17. All associated work, signage or any other engineering protection measures must be completed by TCPL or its qualified contractors at the sole expense of the Proponent. The complete scope of work that may be required is subject to other conditions that may be necessary related to a finalized design that is approved by TCPL. Additionally, prior to TCPL or its contractors conducting any associated work, TCPL and the Proponent must execute a reimbursement agreement, including financial assurances, which provides that the entire cost of conducting this associated work is 100% reimbursable to TCPL.
18. The Proponent shall ensure through all contracts entered into, that all contractors and subcontractors are aware of and observe the foregoing terms and conditions.

While we understand that the extension of Street 'E' crossing the TCPL Pipeline Right-of-Way does not form part of this application, we would also like to advise the Proponent of the following requirements at such time that this crossing is pursued.

1. The following provides design guidance for crossings:

General Requirements:

- The crossing shall occur as close as possible to 90 degrees.
- The crossing shall not occur at a bend in a TCPL pipeline.
- TCPL may require the installation of permanent protective measures depending on site-specific conditions and engineering analyses.

General Conditions for Crossings of TCPL Pipelines by Highways, Private Roads and Railways:

- A highway or private road shall be constructed so that the travelled surface is no less than 1.5 metres above the top of the pipeline.
- The bottom of the ditches adjacent to roads should not be less than 1.4 metres above the top of the pipeline.
- Minimum cover for railway crossings (below base of rail) is 3.05 m for uncased pipe.

General Conditions for Crossings of TCPL Pipelines by Utilities:

- TCPL shall retain the upper position in the crossing area.
- Minimum separation between buried facilities shall be 300mm (600mm during installation) for open cut excavations and 1000mm for horizontal directional drill installation methods.
- The utility depth shall be maintained for the entire width of the right-of-way.
- The utility shall have no bends within the pipeline right-of-way.
- The utility shall have no joints, splices or other connections within the TCPL pipeline right-of-way.

- Pipeline crossings should not be placed within 7 metres of a TCPL pipeline bend.
- 2. For road crossings, TCPL is required by the CER to prepare a detailed engineering assessment of all roads expected during the construction and operation of the crossing, and, if required, provide designs for appropriate mitigation. The cost of this engineering assessment, analysis and design work, the costs of any required mitigation or pipe modification required will be 100% the responsibility of the Proponent. It is recommended that the Proponent consult with TCPL as soon as possible by contacting MHBC at TCEnergy@mhbcplan.com.

Canada Post

Canada Post has no objections for the proposed development.

Service type and location.

1. Canada Post will provide mail delivery service to this development through Community Mailboxes.
2. Single Detached Dwelling, Semi Detached Units, Townhouses dwellings: Will be serviced through Community Mailbox. The location of these sites is determined between my department (Canada Post Delivery Planning) and the Developers appointed Architect and/or Engineering firm. Given an anticipated 292 units in the subdivision, we have estimated 7 Mailbox Sites are required.
3. Please see attached linked for delivery standards:
http://www.canadapost.ca/cpo/mr/assets/pdf/business/standardsmanual_en.pdf

Municipal requirements

1. Please update our office if the project description changes so that we may determine the impact (if any).
2. Should this subdivision application be approved, please provide notification of the new civic addresses as soon as possible.

Developer timeline, obligations and installation

1. Please provide Canada Post with the excavation date for the first foundation/first phase as well as the date development work is scheduled to begin.
2. If applicable, please ensure that any street facing installs have a depressed curb or curb cut. Contact Canada Post Corporation – Delivery Planning for further details.
3. If applicable please ensure that any condominiums apartments with more than 100 units, incorporates a mailroom with rear loading lock box assemblies (mailboxes).

4. Finally, please provide the expected first occupancy date and ensure the future site is accessible to Canada Post 24 hours a day.
5. It is recommended that the owners contact Canada Post as completion draws near so as to finalize the location and compartment they will be assigned to.

Attachment #9
Conditions of Draft Plan Approval
DEV-27-22 (SW-2022-06)

1. The Subdivider shall prepare the final plan and shall include a land use table on the basis of the approved draft plan of subdivision, prepared by GHD, identified as project number 12630859, dated April 8, 2025, which illustrates 134 single-detached units, 173 townhouse units, 5 walkway blocks, a future right-of-way block, and roads.
2. The Subdivider shall name road allowances included in this draft plan to the satisfaction of the Region of Durham and the Town of Whitby.
3. The Subdivider shall submit plans showing the proposed phasing to the Region of Durham and the Town of Whitby for review and approval, if this subdivision is to be developed by more than one registration.
4. The Subdivider shall grant to the Region, any easements required to provide Regional services for this development. The easements shall be in locations and of such widths as determined by the Region.
5. The Subdivider shall provide for the extension of such sanitary sewer and water supply facilities which are external to, as well as within, the limits of this plan that are required to service this plan. In addition, the Subdivider shall provide for the extension of sanitary sewer and water supply facilities within the limits of the plan which are required to service other developments external to this subdivision. Such sanitary sewer and water supply facilities are to be designed and constructed according to the standards and requirements of the Region of Durham. All arrangements, financial and otherwise, for said extensions are to be made to the satisfaction of the Region of Durham, and are to be completed prior to final approval of this plan.
6. Prior to entering into a Subdivision Agreement, the Region of Durham shall be satisfied that adequate water pollution control plant and water supply plant capacities are available to the proposed subdivision.
7. The Subdivider shall satisfy all requirements, financial and otherwise, of the Region of Durham. This shall include among other matters, the execution of a Subdivision Agreement between the Subdivider and the Region concerning the provision and installation of sanitary sewers, water supply, roads and other Regional services.

8. The Subdivider shall agree in the Town of Whitby's Subdivision Agreement to implement the recommendations of the "Noise Feasibility Study," prepared by HGC Noise Vibration Acoustics, dated February 6, 2025, which specifies noise attenuation measures for the development. The measures shall be included in the subdivision agreement and must also contain a full and complete reference to the noise report (i.e. author, title, date and any revisions/addenda) and shall include any required warning clauses identified in the study.
9. The Subdivider shall carry out an archaeological assessment of the subject lands and mitigation and/or salvage excavation of any significant heritage resources to the satisfaction of the Ministry of Citizenship and Multiculturalism. No grading or other soil disturbance shall take place on the subject land prior to a letter of clearance from the Ministry of Citizenship and Multiculturalism.
10. That prior to any on-site grading or construction or final approval of the plan, the Subdivider shall submit to, and obtain approval from the Town of Whitby and the Conservation Authority for reports describing the following:
 - a. The intended means of conveying stormwater flow from the site based on stormwater techniques which are appropriate and in accordance with provincial guidelines as well as in conformity with the recommendations found within the Lynde Creek Master Drainage Plan and Brooklin Secondary Plan Sub-Area Study 3C.
 - b. The intended means to maintain appropriate water balance for the subject lands and to the adjacent hydrologic features as part of this development. This includes agreeing to an appropriate pre-development infiltration condition and providing effective post development infiltration techniques to match this target.
 - c. The intended means to design, install, access, maintain and monitor any proposed Low Impact Development (LID) measures as part of this development.
 - d. The intended means whereby erosion and sedimentation and their effects will be minimized on the site during and after construction, in accordance with provincial guidelines. The report must outline all actions to be taken to prevent an increase in the concentration of suspended solids in any water because of on-site, or other related works.
 - e. A natural hazard constraints plan that clearly illustrates that all proposed development (including grading) is outside of these development limits to the satisfaction of Central Lake Ontario Conservation Authority.

11. The Subdivider agrees that Restoration Planting Plans will be provided and approved by the Town and Central Lake Ontario Conservation Authority to restore any disturbed areas and advance the establishment of native species within all former agricultural fields and buffer areas adjacent to natural hazard lands and related features.
12. That the Subdivider shall agree to install all approved planting and restoration plans identified within the Restoration Planting Plans to the satisfaction of the Town of Whitby and Central Lake Ontario Conservation Authority. All planted areas will be protected with appropriate fencing to avoid any disturbance to this area during subsequent construction.
13. The Subdivider shall obtain all necessary permits from Central Lake Ontario Conservation Authority required through Ontario Regulation 41/24, or any successor regulations made under the Conservation Authorities Act.
14. The Subdivider shall satisfy all financial requirements of the Central Lake Ontario Conservation Authority. This shall include Application Processing Fees and Technical Review Fees owing as per the approved Authority Fee Schedule.
15. The subdivision agreement between the Subdivider and the Town of Whitby shall contain, among other matters, the following provisions:
 - a. The Subdivider agrees to carry out the works referred to in Condition 10 and 11 to the satisfaction of the Central Lake Ontario Conservation Authority.
 - b. The Subdivider agrees to maintain all stormwater management and erosion and sedimentation control measures operating and in good repair during the construction period, in a manner satisfactory to the Central Lake Ontario Conservation Authority.
 - c. The Subdivider agrees to advise the Central Lake Ontario Conservation Authority 48 hours prior to commencement of grading or the initiation of any on-site works.
 - d. In order to expedite clearance of Condition 15, a copy of the fully executed subdivision agreement between the area municipality and the owner should be submitted to the Conservation Authority.
16. That prior to final approval, the Subdivider shall submit to the Ministry of Transportation for their review and approval, a copy of a drainage/storm water management plan /report indicating the intended treatment of the calculated runoff.

17. Prior to final approval, the owner must submit to the Ministry of Transportation for their review and approval, a copy of a traffic impact study. MTO requires a Master Traffic Impact Study that complies with the Guidelines set forth in MTO's Guidelines for Traffic Impact Statements. As this area is being intensified, particular adherence to Part 2 – Multiple Development Traffic Impact Studies Information should be followed. Please have the proponent confirm the reports have been carried out by RAQS approved contractors/consultants. All works within the Provincial right-of-way shall be carried out by RAQS qualified contractors.
18. Prior to final approval, the Subdivider must submit to the Ministry of Transportation for their review and approval, a copy of the Photometric Lighting Plan (in metric LUX units) for MTO review and approval. The plan must illustrate proposed lighting and any light spillage on the Provincial Highway lands & associated service roads ROW.
19. For lots and blocks within 30 metres of the pipeline centreline (the "Prescribed Area"), the conditions, restrictions or covenants specified by Trans Canada Pipeline (TCPL) shall be included in a separate agreement between TCPL and the Proponent, and the Proponent shall register such agreement against title to the Subject Lands prior to registration of the subdivision plan by way of application to register conditions, restrictions or covenants, as applicable, pursuant to the Land Titles Act, or any amendments thereto.
20. The Town of Whitby shall circulate TCPL on the future Site Plan Applications for Blocks located within the Prescribed Area.
21. The Subdivider shall convey the following to the Town:
 - a. Block 163 to 167 for walkway blocks;
 - b. Block 168 for municipal use block/future public right-of-way (ROW).
22. The Subdivider shall implement all changes to the plan for registration resulting from recommendations and findings of the Municipal Class Environmental Assessment Brooklin North Major Roads EA (BNMREA) and the on-going Columbus Road Detailed Design Project including but not limited to the final right-of-way widths, servicing, grading, alignments, and horizontal and vertical designs of Columbus Road West.
23. The Subdivider shall be responsible for concrete sidewalk and/or multi-use path installation in the following locations:
 - a. 3.0m-wide asphalt multi-use path on the east side of Street E;

- b. 1.8m-wide concrete sidewalk on both sides of all other streets.

Further review and consideration of sidewalk placement is required and will be addressed through detail design/engineering.

24. The Subdivider shall be responsible for maintaining the existing Town roads in an acceptable condition throughout the duration of construction and/or until such time as the Town roads are reconstructed. The Subdivider may be required to provide the Town with securities to ensure roads are maintained to the Town's satisfaction. This is to be reviewed further when information regarding the timing of construction of both the subdivision development and the reconstruction of the Town owned road(s) is known.
25. The Subdivider shall revise unit lot lines, if required, to meet Town Standards for Block 155 along the +/- 90° bend within the plan to confirm adequate driveway layout (refer to Standard 411) with or without the eyebrows per Standard 406 and 406.10. Note that the eyebrows are not preferred by the Town and will be accepted only where required. The plan for registration must be revised to accommodate any required changes.
26. A plan shall be provided showing all road allowance widths, centreline radii, streetline radii, curb lines (at bends, cul-de-sacs, and intersections with angles less than 90 degrees), tangents, intersection angles/skew, visibility triangles and driveway locations (at bends and intersections) to ensure conformance to street classifications, Transportation Association of Canada (TAC) and Town of Whitby. This should be provided prior to or with the submissions of the detailed engineering drawings.

The Subdivider shall be responsible for implementing any design elements and/or changes to the plan for registration required to address any sightline and/or alignment concerns.
27. The Subdivider shall provide a Pavement Marking and Signage plan and shall be responsible for providing both temporary and permanent signage and pavement markings for the development.
28. The Subdivider shall provide a composite Traffic Calming Plan for all roads in the plan that includes, but is not limited to, area specific speed limits, speed humps, and raised intersections, for review and acceptance by the Director of Engineering Services.
29. Should the Subdivider proceed in advance of the adjacent developer, they shall construct Street E to the full extents and the full cross-section.

30. The Subdivider shall not commence the installation of any Town services within this subdivision until such time as the adjacent/downstream Subdivider(s) has constructed the required services to the common property line.
31. In the event that Street E is not constructed with the first phase of development, the Subdivider shall construct a temporary full movement vehicular access, designed to Town standards, at an alternate location along Columbus Road West all to the satisfaction of the Director of Engineering Services.
32. The Subdivider shall provide a Construction Management Report and Plan(s) to the Town's satisfaction that includes, but is not limited to, a neighborhood communication strategy, construction traffic route, schedule and mud and dust control best management practices. Construction traffic shall be restricted to time windows that do not conflict with the typical peak school drop-off and pick-up times of the nearby school.
33. The Following Lots/Blocks shall be placed on hold:
 - a) Lots 1 to 25, 131 to 134 - until such time as the Street E is fully constructed;
 - b) Lot 106 and Block 144 – until such time as suitable municipal road frontage is constructed and available for use;
34. The Subdivider agrees that if at the time of detailed design, should the final traffic calming circle design identify need for additional property requirements, the Subdivider shall adjust property lines accordingly.
35. Due to the nature and design of the proposed traffic calming circle, driveway access may be restricted for some of the lots and units within the limits of the splitter islands. Purchase and sale agreements for the affected lots and units shall contain a warning clause to this effect to be registered on title.
36. The Subdivider shall implement all recommended noise control measures identified in the Environmental Noise Assessment report and revise the plan as required to accommodate recommended noise control measures prior to registration.
37. All non-regulatory fencing and acoustic barriers shall be installed wholly on private property and all operation and maintenance of said fencing shall be the responsibility of the private property owners. Purchase and sale agreements for the affected lots and units with acoustic barriers shall contain a warning clause to this effect to be registered on title.

38. The Subdivider shall design and construct all regulatory black vinyl chain link fences to delineate Town blocks, and open spaces from private property in accordance with the relevant engineering standards.
39. The Subdivider shall ensure all private properties are protected from flooding limits at low points and points of major system flow convergence along the municipal road system. If required, the plan for registration shall be revised accordingly to provide said flood protection.
40. Construction phasing of the development shall be to the satisfaction of the Engineering Services, shall consider adjoining developments, and shall provide for upstream and downstream road and servicing connectivity.
41. The Subdivider shall provide a detailed engineering submission in accordance with Sections A2.00 and A3.00 of the Town of Whitby's Engineering Design Criteria. The engineering drawings must be set up as per the Town's CAD layering standards and object data requirements set out in Appendix A of the Design Criteria. The engineering drawings will not be accepted until it is confirmed that the drawing set-up conforms to this requirement.
42. The Subdivider shall confirm the details of all existing above and below grade infrastructure relevant to the proposed design. Existing details shall be confirmed in the field by a method determined by the Subdivider's consulting engineer in consultation with the Town. Acceptable methods include, but are not limited to, topographical surveys, locates, measure downs, sub-surface utility engineering (SUE) investigation Quality Level A (QL-A), also referred to as daylighting, to determine horizontal and vertical location. The Subdivider further acknowledges that any as-built information provided by the Town is for informational purposes only.
43. All plan and profile drawings shall indicate the seasonal high water table elevation and the corresponding Minimum Basement Elevation, all to be confirmed by Hydrogeological Consultant and accepted by Central Lake Ontario Conservation Authority (CLOCA). The Subdivider shall protect all proposed private dwellings from the seasonal high-water table where applicable.
44. The Subdivider shall be responsible for all hydro poles, luminaries and hydro requirements for this proposed subdivision and shall enter into a separate agreement with Elexicon accordingly.
45. The Subdivider shall provide the Town with a full electrical design (i.e. primary, secondary and streetlight design) for this development. All aspects of the secondary electrical design and street light design will be peer reviewed by the

Town. The Subdivider will be financially responsible for the peer review cost including a 15 percent administrative fee. The street lighting design shall include all right-of-way components including active transportation facilities, shall comply with the latest version of the RP-8 Roadway Lighting Design standard and shall utilize LED technology.

46. Any concerns raised through future re-submissions of the geotechnical and hydrogeotechnical reports for the site shall be addressed by the Subdivider to the satisfaction of the Engineering Services. This includes, but is not limited to, long term slope stability, confirmation of design parameters and preliminary layout for LID measures (proposed infiltration trenches), proposed stormwater management pond elevations relative to groundwater levels and the need / thickness of the impervious membrane or synthetic clay lining, foundation construction requirements and recommended measures for Best Management Practices for municipal servicing construction. The plan must reflect changes required in this regard prior to registration.
47. The Subdivider shall provide the Town with a deposit for any necessary peer review costs with the amount to be determined at time of first peer review. The Town will administer payments to any Peer Review Consultant(s) and provide milestone billings back to the Subdivider. The Town may request additional deposits for the Peer Review funds if required. At the time of issuance of full engineering approvals, any remaining deposit will be returned to the Subdivider. This condition will be superseded at such time as the Town has a Peer Review By-law in place.
48. The Subdivider shall be responsible to enter into a separate agreement(s) with benefitting parties, to which the Town is not a party, to address cost sharing for external services and / or the oversizing of services if required.
49. The Subdivider shall provide a copy of the approved individual lot grading plan (i.e. siting) to each lot purchaser prior to closing.
50. The Subdivider shall agree to implement the recommendations of all reports submitted in support of the application.
51. The Subdivider shall be responsible for satisfying any additional requirements identified by the Engineering Services not specifically listed above.
52. The Subdivider shall satisfy their obligations related to parkland dedication as required through a future North Brooklin Master Parks Agreement or other arrangement to the satisfaction of the Town. Parkland dedication will be

calculated at a rate in accordance with the Town's Parkland Dedication By-Law and the Planning Act.

53. The Subdivider agrees to install a 1.2 metre black vinyl standard park fence where any open space and park blocks abut residential lots.
54. The Subdivider shall provide a Tree Preservation Plan in coordination with an Erosion and Silt Control (ESC) fencing. The Tree protection fencing is to be inspected and approved by the Town in advance of any on-site grading works.
55. The Subdivider shall ensure all municipal trees proposed for removal are appraised by an ISA Certified Arborist. The appraisal will be reviewed by the Town Forestry staff and will inform any requirements for compensation for the loss of these trees, including cash contribution to the town's tree Reserve Fund.
56. The Subdivider shall, in advance of any tree clearing, provide the Town with evidence of permission for proposed removals offsite and on neighbouring properties.
57. The Subdivider shall provide the Town with a detailed Compensation Planting Plan/NHS Restoration and Enhancement Plan through a revised EIS. Once approved, a cost estimate is to be provided so the Town can secure these works through a Landscape Letter of Credit (LC). This LC must be provided in advance of the removal of any woodlots.
58. The Subdivider shall agree to install all approved planting and restoration plans identified within the Natural Heritage Restoration and Enhancement Plan to the satisfaction of the Town of Whitby and CLOCA, within the shouldering growing season of any approved removals or impacts. All planted areas will be protected with appropriate fencing to avoid any disturbance to this area during subsequent construction.
59. The Subdivider shall ensure the success and management of the Restoration Plan is monitored for a 3-year period by the Landscape Consultant. Annual inspections with and reporting to both the Town and CLOCA is required during this period.
60. The Subdivider shall convey protected and undevelopable lands to the Town where, in public ownership, the lands will be protected in perpetuity, as part of registering the subdivision. This includes the Greenbelt lands on the Mykinder property where compensation planting is proposed to occur. The Town requires the Subdivider to co-ordinate the submission of a 40R plan for these associated

lands. Should the Subdivider and Mykinder not agree to convey the lands to the Town, cash-in-lieu shall be provided.

61. The Subdivider shall ensure all adjacent boulevards are urbanized, top-soiled, fine-graded, sodded and provided with buffer tree planting.
62. The Subdivider shall ensure all black vinyl chainlink fences are designed and constructed in accordance with the relevant Engineering Standards to delineate Town blocks and Open spaces from private property.
63. The Subdivider shall consult with Canada Post to determine suitable permanent locations for Community Mail Boxes. The Subdivider will indicate these locations on the appropriate servicing plans.
64. That the Subdivider enter into a Subdivision Agreement for the subdivision, and a future Site Plan Agreement for each block with the Municipality and be responsible for the fees associated with the preparation and registration of the Agreement, including any review required by Legal Services.
65. The required noise mitigation measures and warning clauses shall be included in the Subdivision Agreement and future Site Plan Agreements.
66. The Subdivider shall provide a tree preservation plan and install protective fencing in advance of any on-site grading works.
67. Through the Plan of Subdivision Agreement, the Subdivider shall complete the Whitby Green Standard performance measures as part of the construction of the approved development as detailed in Sustainability Rationale Report submitted by the proponent.
68. That the new home construction be designed to meet the Energy Star standards or equivalent.
69. The Subdivider shall prepare and implement the following reports and plans in accordance with the applicable guidelines to the satisfaction of the agencies noted:

Report	Town	Region	CLOCA
Functional Servicing and Stormwater Management Report	Yes	Yes	Yes
Geotechnical Investigation	Yes	Yes	Yes
Hydrogeological Study	Yes	Yes	Yes
Noise Impact Study	Yes	Yes	-
Phase One Environmental Site Assessment	Yes	Yes	-
Sustainability Report	Yes	-	-

Transportation Impact Study	Yes	Yes	-
-----------------------------	-----	-----	---

70. The Subdivider shall satisfy all requirements, financial and otherwise, of the Town of Whitby, including among other matters, the execution of a subdivision agreement between the Subdivider and the Town of Whitby concerning the provision and installation of services, drainage and other local services.
71. That the Subdivider covenants and agrees to enter into the cost sharing agreement amongst the benefitting landowners in accordance with Section 11.4.31.5 e) as set out in the Town of Whitby Official Plan and that the Town will clear Condition No. 71 upon receipt of a letter of clearance from the "Trustee" representing the North Brooklin Cost Sharing Agreement.
72. Prior to final approval of this plan for registration, the Town of Whitby shall be advised in writing by:
 - a) The Regional Municipality of Durham, how Conditions 1 to 9 have been satisfied.
 - b) The Central Lake Ontario Conservation Authority, how Conditions 10 to 15 have been satisfied.
 - c) The Ministry of Transportation (MTO), how Conditions 16 to 18 have been satisfied.
 - d) The Trans Canada Pipeline (TCPL), how Condition 19 and 20 have been satisfied.

Note

Please be advised that the approval of this draft plan will lapse three (3) years after the date the plan is draft approved. The approval may be extended pursuant to Section 51(33) of the Planning Act, but no extension can be granted once the approval has lapsed.

If final approval is not given to this plan within three (3) years of the draft approval date, and no extensions have been granted, draft approval will lapse under 51 (32) of the Planning Act, RSO, 1990, as amended. If the owner wishes to request an extension to the draft approval, a written request and explanation must be received by the Commissioner of Planning and Development 120 days prior to the lapsing date. A processing fee in effect at the time of request, shall apply.

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: DEV-31-24: Official Plan Amendment Application, Draft Plan of Subdivision Application, and Zoning By-law Amendment Application, Anatolia Investments Corp., 975 Conlin Road, 961 Conlin Road, 4605 and 4625 Garrard Road, File No: DEV-31-24 (OPA-2024-W/10, SW-2024-04, Z-15-24)

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 26-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

R. Saunders, Commissioner of Planning
and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

John Taylor, Director of Planning
Services – 905-444-2908

Kerstin Afante, Planner II – x. 2836

1. Recommendation:

1. That Council approve Official Plan Amendment Number 145 to the Whitby Official Plan (File: OPA-2024-W/10), as shown on Attachment #9, and that a By-law to adopt Official Plan Amendment Number 145 be brought forward for consideration by Council;
2. That Council approve the Draft Plan of Subdivision (File: SW-2024-04), subject to the comments included in Planning Report PDP 26-25 and the conditions of draft plan approval included in Attachment #13;
3. That Staff be authorized to prepare a Subdivision Agreement;
4. That Council approve an amendment to Zoning By-law 1784 (File: Z-15-24), and that a By-law to amend Zoning By-law 1784 be brought forward for consideration by Council; and,

5. That the Clerk forward a Notice to those parties and agencies who requested to be notified of Council's decision.

2. Highlights:

- The Biglieri Group on behalf of Anatolia Investments Corp. has submitted Official Plan Amendment, Zoning By-law Amendment and Draft Plan of Subdivision applications to the Town of Whitby for the lands municipally known as 961 Conlin Road, 975 Conlin Road, 4605 Garrard Road and 4625 Garrard Road.
- The Official Plan Amendment application proposes to delete the future Type C Arterial Road (east of Thickson Road North) in Schedule D – Transportation and Schedule L – Taunton North Community Secondary Plan.
- The Official Plan Amendment application also proposes to delete the future Type C Arterial Road (east of Thickson Road North) in Map 3b – Regional Network in Envision Durham.
- The Draft Plan of Subdivision application proposes to create various blocks consisting of two (2) employment blocks, two (2) open space blocks, and three (3) road widening blocks.
- The Zoning By-law Amendment Application proposes to change the current zone category from an Agricultural Zone (A) to appropriate zone categories to permit the proposed development of industrial warehouses.
- The applicant has also submitted a Site Plan Application which will be processed through the Commissioner of Planning and Development. The Site Plan materials will provide more detail on the proposed site layout including grading and servicing, lighting, landscaping and details of the building design. All the commenting departments and external agencies have indicated support for, or no objection to, the proposed development subject to their comments and conditions being addressed.

3. Background:

3.1. Site and Area Description

The subject lands are located at the southeast corner of Conlin Road and Garrard Road, municipally known as 961 Conlin Road, 975 Conlin Road, 4605 Garrard Road, and 4625 Garrard Road (refer to Attachment #1). The Subject Site has a site area of 43.2 hectares (106.75 acres).

The surrounding land uses include:

- An Amazon distribution centre to the north;

- A new industrial warehouse and the Region of Durham recycling and waste facility to the west, and surrounds existing residential uses at 4785 and 4725 Garrard Road;
- A self-storage facility, open space, and future industrial uses within the City of Oshawa to the east; and
- Commercial uses along Taunton Road to the south.

The property at 4625 Garrard Road (which also includes the lands municipally known as 4635 and 4655 Garrard Road) is currently vacant. The property at 961 Conlin Road has one single detached dwelling. The properties at 975 Conlin Road and 4605 Garrard Road are currently being used for agricultural purposes (refer to Attachment #2).

3.2. Applications and Proposed Development

An Official Plan Amendment application has been submitted to delete the future Type C Arterial Road (east of Thickson Road North) on Schedule D – Transportation, and Schedule L – Taunton North Community Secondary Plan of the Town of Whitby Official Plan, and on Envision Durham Map 3b – Regional Network.

A Draft Plan of Subdivision application has been submitted to create various blocks consisting of two (2) employment blocks, two (2) open space blocks, and three (3) road widening blocks (refer to Attachment #3).

A Zoning By-law Amendment Application has been submitted to change the current zone category from Agricultural (A) to appropriate zone categories to permit the proposed development of industrial warehouses.

3.3. Documents Submitted in Support

The applications were submitted with the following supporting documents:

- Draft Plan of Subdivision, prepared by The Biglieri Group Ltd., dated April 25, 2025 (Refer to Attachment #3);
- Planning Addendum Letter (including Weston Consulting Planning Justification Report as an Appendix), prepared by The Biglieri Group Ltd., dated September 27, 2024;
- Draft Official Plan Amendment, prepared by The Biglieri Group Ltd., dated March 21, 2025;
- Draft Zoning By-law Amendment, prepared by The Biglieri Group Ltd., dated April 21, 2025;

- Sustainability Rationale Report, prepared by The Biglieri Group Ltd., dated September 27, 2024;
- Whitby Green Standard – for DPS and SPA, prepared by The Biglieri Group Ltd., dated September 27, 2024;
- Architectural Drawing Package prepared by Powers Brown Architecture, dated September 18, 2024;
- Updated Conceptual Site Plan prepared by Powers Brown Architecture, dated March 17, 2025 (Refer to Attachment #4);
- Civil Drawing Package, prepared by WSP, dated September 6, 2024;
- Functional Servicing Report, prepared by WSP, dated September 6, 2024;
- Stormwater Management Report, prepared by WSP, dated September 6, 2024;
- Hydrogeological Assessment and Water Balance Study, prepared by WSP, dated June 3, 2024;
- Geotechnical Investigation Report, prepared by WSP, dated April 22, 2024;
- Environmental Impact Study, prepared by Beacon Environmental, dated March 2023;
- EIS Addendum Letter, prepared by Dillon Consulting Limited, dated May 2, 2025;
- Arborist Reports and Tree Preservation Plans, prepared by Dillon Consulting Limited, dated 2023/2024;
- Landscape Package, prepared by Dillon Consulting Limited, dated September 20, 2024;
- Storm Pond Drawings Package, prepared by Dillon Consulting Limited, dated September 20, 2024;
- Wetland Drawings Package, prepared by Dillon Consulting Limited, dated September 20, 2024;
- Compensation Area Drawings Package, prepared by Dillon Consulting Limited, dated September 20, 2024;
- Traffic Impact Study (TIS), and Addendum prepared by TYLin, dated April 2023 and September 25, 2024; which concluded that the future

arterial road is not necessary for the study network to operate and would play a significant role in providing an overall improvement to traffic operations within the study area;

- Pavement Marking and Signage Plan, prepared by TYLin, dated September 2024;
- Vehicle Maneuvering Drawings, prepared by TYLin, dated September 2024;
- Garrard Road Southbound Left-Turn Lane Design, prepared by TYLin, dated September 2024;
- Proposed Arterial Deletion Memo, prepared by TYLin, dated September 25, 2024;
- Lighting and Photometrics Plan, prepared by Design Works Engineering, dated September 11, 2024;
- Electrical Brief, prepared by Design Works Engineering, dated February 18, 2024;
- Mechanical Brief, prepared by Design Works Engineering, dated February 18, 2024;
- Energy Performance Study, prepared by Design Works Engineering, dated September 12, 2024;
- Construction Vibration Zone of Influence Study & Monitoring Plan, prepared by Aeroustics, dated September 12, 2023;
- Noise Impact Study, prepared by Aeroustics, dated September 24, 2024;
- Electrical Site Plan, prepared by Lapas Engineering, dated September 23, 2024;
- Stage 1 & 2 Archaeological Assessment, prepared by The Archaeologists Inc., dated July 17, 2022;
- Letter to Oshawa Executive Airport, prepared by Anatolia Investments Inc., dated September 24, 2024;
- Urban Design Brief, prepared by Weston Consulting, dated April 2023;
- Aeronautical Impact Assessment, prepared by WSP, dated June 13, 2023;
- Water Well Survey Summary, and Sampling Results, prepared by WSP, dated February 27, 2023;

- Plan of Survey and Topography, prepared by WSP, dated August 13, 2024;
- Phase 1 ESA, prepared by WSP, dated August 1, 2022;
- Phase 2 ESA, prepared by WSP, dated October 2022;
- ESA Reliance Letter, prepared by WSP, dated July 7, 2023; and
- Comment Response Matrix, prepared by The Biglieri Group Ltd., dated April 25, 2025.

The above documents have been circulated to the relevant internal departments and external agencies for review and comment.

4. Discussion:

4.1. Envision Durham

Pursuant to Bill 23, as of January 1, 2025, the Region of Durham is defined by the Province as an "upper-tier municipality without planning responsibilities". As such, the Town of Whitby has assumed approval authority for all Planning Act decisions, except as prescribed by the Ministry of Municipal Affairs and Housing (Ontario Regulation 525/97). Envision Durham, the former Regional Official Plan (ROP), has now become part of the Town of Whitby's Official Plan until such time that the Town has completed its Official Plan Review, currently underway. The Town has assumed responsibility for Envision Durham as it pertains to the area within its jurisdiction.

The subject lands are designated as Employment Areas and Major Open Space Areas on Map 1 - Regional Structure of Envision Durham. Employment Areas are intended for manufacturing, warehousing, storage, assembly and processing. Employment Areas are typically situated along or near major transportation corridors with separation and buffering from adjacent Community Areas. Major Open Space Areas are intended for environmental protection and conservation, while allowing for a range of agricultural uses and recreational uses, where appropriate. Envision Durham Map 3b – Road Network identifies a future Type C Arterial Road on the subject lands that would allow for a connection from Thickson Road North in Whitby to Stevenson Road North in Oshawa (refer to Attachment #5).

An Amendment to Envision Durham, as it relates to the Town of Whitby, is required to delete the future Type C Arterial Road.

4.2. Oshawa Official Plan Amendment 208

The proposed deletion of the arterial road in Whitby would be consistent with recent planning decision in the City of Oshawa. Oshawa adopted Official Plan Amendment 208 (OPA 208) in May 2022, which includes the removal of

the corresponding future Type C arterial road from the City of Oshawa Official Plan and was forwarded to the Region of Durham for approval (prior to removal of Regional Planning authority). At that time, the Region had requested that additional information regarding potential impacts of the road deletion on the road network, be provided and addressed through the ongoing Stevenson Road Environmental Assessment.

4.3. Stevenson Road Environmental Assessment

The Stevenson Road Environmental Assessment (EA) determined that the proposed arterial road would provide only minor relief to adjacent corridors and negligible travel time improvements, while posing potentially significant environmental impacts. It concluded that an arterial road connection between Stevenson Road North in Oshawa and Thickson Road in Whitby is not required from a transportation network or capacity perspective.

The conclusions of the EA reinforce that there is no functional need for a future road connection through this corridor, supporting the request to delete the subject road segment in Oshawa, as well as in Whitby.

4.4. Whitby Official Plan

The subject lands are designated as General Industrial on Schedule A – Land Use (refer to Attachment #6) and Schedule L – Taunton North Community Secondary Plan (refer to Attachment #7). Lands designated as General Industrial permit the manufacturing, processing, assembly, servicing, storing of goods and raw materials, warehousing, and uses for similar and related purposes such as utility yards and functions, and transportation terminals (4.7.3.1.1).

Small portions of the property near the eastern and southern limits are designated Natural Hazards and Natural Heritage System on Schedule C – Environment Management and Environmental Protection/Conservation Land on Schedule L – Taunton North Community Secondary Plan. Development is generally prohibited within the Natural Heritage System (Section 5.3.7.4) or Natural Hazards (Section 5.3.10.4). The boundaries of a Natural Hazard designation are to be determined through an Environmental Impact Study, in consultation with the Conservation Authority.

Schedule D – Transportation of the Whitby Official Plan, as well as Schedule L – Taunton North Community Secondary Plan, identify a future east-west Type C arterial road on the subject lands, south of Conlin Road, north of Taunton Road East, which would connect Thickson Road in Whitby to Stevenson Road in Oshawa (refer to Attachment #8).

An amendment to the Town of Whitby Official Plan is required to delete the future Type C Arterial Road (refer to Attachment #9). It is recommended that the application for Official Plan Amendment to delete the proposed Type 'C' Arterial Road be approved.

The applicant's detailed Transportation Impact Study, prepared by TYLin and reviewed by both the Town and Region, demonstrates that the future arterial road is not needed from a transportation or capacity perspective. The proposed industrial and warehousing development can be adequately served by the existing and planned road network, including Conlin Road, Taunton Road, and nearby Highway 407 access.

The proposed amendment is consistent with the Provincial Planning Statement, 2024, which promotes efficient development patterns and the use of existing infrastructure to support employment growth. It also supports the Town of Whitby's Official Plan objectives by enabling warehousing development within the General Industrial designation without introducing unnecessary new infrastructure. As such, removal of the proposed Type 'C' Arterial Road is both justified and appropriate.

4.5. Zoning By-law 1784

The subject land is currently zoned Agricultural (A) under Zoning By-law 1784 (Refer to Attachment #10). The A Zone would not permit the proposed industrial warehouse development. An Amendment to the Zoning By-law to change the existing Agricultural Zoning to an appropriate zone category is required to permit the proposed development.

4.6. Other Matters

The property municipally known as 949 Conlin Road is a land-locked parcel owned by a third party, which currently relies on access via an existing driveway located on the subject lands. This driveway provides access to Garrard Road. The applicant is required to ensure continued access to 949 Conlin Road by providing a registered easement over the existing driveway in favour of the owners of 949 Conlin Road. Any such easement will require land division approval and must be designed to the satisfaction of the Town.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

A Public Meeting was held on December 9, 2024, in accordance with the Town of Whitby Official Plan and the Planning Act. This meeting provided the public, as well as interested persons and agencies, with the opportunity to make representation regarding the Official Plan Amendment, Zoning By-law Amendment, and Draft Plan of Subdivision applications. An excerpt of the meeting minutes is included in Attachment #11.

Residents and stakeholders provided comments and raised concerns regarding such matters as:

- compatibility with surrounding land uses and impact on agricultural resources;
- long-term community benefits;
- environmental considerations;

- impact on well-water;
- construction period noise and dust; and
- potential soil contamination.

In consideration of the comments received, staff note the following:

- Although the subject land is zoned Agricultural currently, the subject land and surrounding lands have been designated in the Official Plan and intended for Industrial uses for decades. The proposed industrial development conforms to the Official Plan.
- The extent of environmental features/functions were determined through an EIS, and the limit of development will be detailed in the Zoning, including appropriate zone category(s) regarding environmental features/functions.
- The applicant has submitted Phase 1/Phase 2 Environmental Site Assessment which indicated the soil and groundwater quality meets the applicable MECP Table 1 SCS, as of the certification date, and that no additional environmental investigations are recommended.
- Two (2) stormwater management ponds will be constructed, and potential water table impacts will be monitored.
- A Construction Management Plan will be required as part of the Site Plan approval process and would include mitigative measures regarding noise, dust pollution, and privacy for adjacent properties during the construction period.

In particular, an adjacent property owner had requested several modifications, including:

- increased building setbacks;
- relocation of the snow storage area;
- privacy and trespassing measures;
- retaining wall to prevent soil erosion; and,
- a new public road through the subject property to connect their lands, in the City of Oshawa, to Garrard Road.

Staff note that building setbacks, snow storage, grading, erosion, stormwater management, and mitigation strategies will be considered through the Site Plan approval process.

As it relates to the request for a new public road, the applicant has indicated that they do not wish to construct a public road through the subject lands to connect to the private property in Oshawa, as the Traffic Impact Study and the Stevenson Road Environmental Assessment have concluded that there is no need for the east-west Arterial Road from a transportation network or capacity perspective to support the proposed development, nor a need for a [public] local road that would cross municipal boundaries to connect private properties.

Staff note that the applicant's TIS, as well as Oshawa EA materials have indicated that the proposed deletion of the future Type C Arterial Road within the Town of Whitby is acceptable and would align with Oshawa's adopted Official Plan Amendment (OPA 208) to likewise remove the future road symbol.

All individuals who registered as an interested party at the statutory public meeting and any individual who provided written correspondence to the Town have been provided notice of the June 2, 2025, Committee of the Whole Meeting.

7. Input from Departments/Sources:

The following agencies have reviewed the applications and have no objection:

- Bell Canada;
- Elexicon Energy;
- Trans Northern Pipelines; and,
- Rogers Communications.

Refer to Attachment #12 for additional detailed comments.

Internal Departments:

Community Services – Parks Planning and Development Division

Parks staff have no objections to the applications subject to the Conditions of Draft Approval. Parks Staff have provided Conditions of Draft Approval (refer to Attachment #13) which include a requirement for cash-in-lieu of parkland and a requirement that open space blocks 3 & 4 be conveyed to the Town of Whitby

Engineering Services

Whitby Engineering has no objections to the Official Plan and Zoning By-law Amendment applications. Whitby Engineering has no objections to the proposed Draft Plan of Subdivision subject to the Conditions of Draft Approval.

Financial Services

Comments provided by Financial Services staff outline the requirements for the payment of development charges and cash-in-lieu of parkland.

Fire and Emergency Services

Comments provided by Whitby Fire and Emergency Services confirm no objection to the applications, subject to clarification of Ontario Building Code (OBC) requirements, identification of principal entrances, compliance with fire access and water supply regulations, the potential requirement for an Integrated Testing Coordinator. These matters will be addressed through Site Plan approval process.

Landscape

Landscape staff have no objections to the applications, subject to the Conditions of Draft Approval. Requirements include revisions to landscape and compensation plans, coordination with tree protection measures, and compliance

with restoration and enhancement commitments. The subdivider must provide financial securities, ensure proper implementation and monitoring of compensation plans, and obtain necessary permissions for tree removals.

Strategic Initiatives

Strategic Initiatives staff have no objections to the proposal, recognizing its economic benefits and alignment with Whitby's strategic goals. The proponent is encouraged to engage with the Town's Concierge Program. Sustainability staff request an updated Whitby Green Standard Checklist to confirm compliance with Tier 1 requirements.

Refer to Attachment #12 for additional detailed comments and Attachment #13 for Conditions of Draft Plan Approval.

External Agencies:**Central Lake Ontario Conservation Authority (CLOCA)**

CLOCA has no objections to the Official Plan and Zoning By-law Amendment applications. However, prior to the approval of the Site Plan and Draft Plan of Subdivision applications, CLOCA requires that detailed technical comments be fully addressed to their satisfaction. These comments relate to stormwater management, hydrogeology, and regulated features on the site, including wetlands.

City of Oshawa

The City of Oshawa has no objection to the proposed Official Plan Amendment, Zoning By-law Amendment, and Draft Plan of Subdivision applications.

Oshawa Airport

Oshawa Airport has no objections to the applications, subject to Conditions of Draft Approval. Comments provided by Oshawa Airport outline their requirements related to noise warning clauses, wildlife attractants, and a wildlife risk assessment for the stormwater management pond. The noise warning clauses and mitigation measures identified in the Noise Study will be registered on title through the future Site Plan Agreement.

Region of Durham

Durham Region has no objection to the proposed Official Plan Amendment, Zoning By-law Amendment, or Draft Plan of Subdivision applications. Regional staff met with Town staff on May 7, 2025, to discuss transportation concerns related to the proposed deletion of the planned east-west midblock Future Type 'C' Arterial Road east of Thicksen Road. The Region confirmed that its previous transportation comments were advisory in nature and not conditions of draft approval, and it is satisfied that the Town of Whitby has adequately planned for the associated impacts.

Regional servicing and transit comments from February 2025 remain applicable

and will be addressed through future engineering submissions and the Site Plan approval process. A revised Functional Servicing Report is still required, and the applicant must provide a land use table prepared by an Ontario Land Surveyor to the satisfaction of the Region. Conditions of Draft Approval provided by the Region must be met prior to final clearance.

Refer to Attachment #12 for additional detailed comments and Attachment #13 for Conditions of Draft Plan Approval.

8. Strategic Priorities:

The development review process has provided opportunity for public and agency input. The recommendations contained in this report align with the objectives of the Corporate Strategic Plan.

The proposed development supports Strategic Pillar 3 – Whitby's Economy to ensure Whitby is clearly seen by all stakeholders to be business and investment friendly by being supportive and providing effective customer service through the development approval process.

This report is in a fully accessible format, which addresses the Town's strategic priority of accessibility.

Attachment #9

Draft Proposed Amendment #145 to the Town of Whitby Official Plan

- Purpose:** The purpose of this Amendment to the Town of Whitby Official Plan is to delete the future/proposed Type C Arterial Road (which would connect Thickson Road North in Whitby to Stevenson Road North in Oshawa) from Schedule 'D' – Transportation, Schedule 'L' – Taunton North Secondary Plan, and Map 3B – Regional Network – Envision Durham.
- Location:** The lands subject to the application for Official Plan Amendment are municipally known as 961 Conlin Road, 975 Conlin Road, 4605 Garrard Road, and 4625 Garrard Road in the Town of Whitby. The lands subject to the Amendment are generally located, east of Thickson Road North, south of Conlin Road, and north of Taunton Road East.
- Basis:** The Amendment is based on an application to amend the Town of Whitby Official Plan (File: DEV-31-24, OPA-2024-W/10, SW-2024-04, Z-15-24), as submitted by Anatolia Investments Corp, which seeks to remove the future Type C Arterial Road to permit the proposed development of a warehouse and industrial buildings with associated offices, having a total building gross floor area of up to 105,478 square metres and a building height up to 14 metres (46 ft).
- The Amendment is consistent with the policies of the Provincial Planning Statement, 2024, in that there would be no negative impact to the existing transportation network as a result of the development of an industrial warehousing and goods movement use.
- The Amendment meets the overall goals and intent of the Town of Whitby Official Plan in that the applicant has demonstrated that the future Type C Arterial Road is not required from a transportation network or capacity perspective to accommodate the proposed warehousing use.
- Development of the subject lands would be subject to inclusion of appropriate provisions in the implementing Zoning By-law and Site Plan Control By-law.

Actual Amendment: The Town of Whitby Official Plan is hereby amended as follows:

- 1) By amending Schedule 'D' – Transportation, by deleting the future, east-west, Type C Arterial Road east of Thickson Road North and south of Conlin Road, as indicated on the attached Exhibit 'A'; and
- 2) By amending Schedule 'L' – Taunton North Community Secondary Plan, by deleting the Proposed Arterial Road, as indicated on the attached Exhibit 'B'.

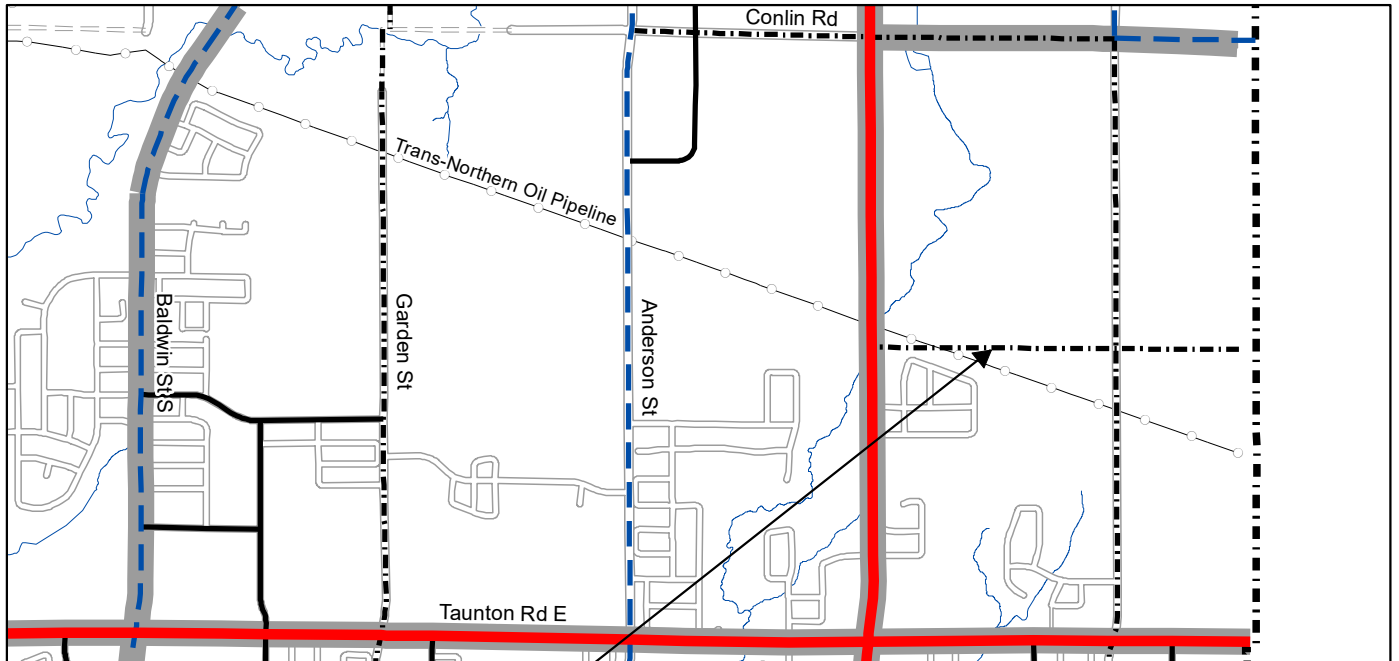

Envision Durham, as it relates to the Town of Whitby, is hereby amended as follows:

- 1) By amending Map 3B – Road Network, as it relates to the Town of Whitby, by deleting the Future Type C Arterial Road within the Town of Whitby, as indicated on the attached Exhibit 'C'.

Implementation: The provisions set forth in the Town of Whitby Official Plan, as amended, regarding the implementation of the Plan shall apply in regard to this amendment.

Interpretation: The provisions set forth in the Town of Whitby Official Plan, as amended, regarding the interpretation of the Plan shall apply in regard to this amendment.

Attachment #11
Excerpt from Public Meeting Minutes from
December 9, 2024

Public Meetings Minutes

December 9, 2024, 7:00 p.m.
Council Chambers
Whitby Town Hall

Present:

Councillor Mulcahy, Chair of Planning and Development
J. Taylor, Director, Planning
K. Douglas, Sr. Legislative Specialist
H. Ellis, Council and Committee Coordinator (Recording Secretary)

Public Meetings - 7:00 p.m.

K. Douglas, Sr. Legislative Specialist, advised that the Public Meetings are being held in a hybrid meeting format with members of the public attending both in person and virtually. Ms. Douglas stated that Members of Council would receive a written record of all submissions upon publication of the minutes of the Public Meetings. Ms. Douglas provided an overview of the format of the public meetings. She advised that members of the public who wish to be notified of the next report related to any of the public meetings or who wish to be placed on an Interested Parties List for a matter should email the Town's Planning and Development Department at planning@whitby.ca or call 905.430.4306.

4. PDP 61-24, Planning and Development (Planning Services) Department Report
Re: Official Plan Amendment Application, Draft Plan of Subdivision Application, and Zoning By-law Amendment Application, Anatolia Investments Corp., 975 Conlin Road and 4605 and 4625 Garrard Road, File Number: DEV-31-24 (OPA-2024-W/10, SW-2024-04, Z-15-24)
Kerstin Afante, Planner II, Policy, provided a PowerPoint presentation which included an overview of the applications.
Mallory Nievas, representing Anatolia Investments Corp., provided a PowerPoint presentation which included a detailed overview of the applications.

The Chair indicated that comments would now be received by members of the public.

Daniel MacPherson, Resident, raised concerns regarding impacts to the quality of life for residents. He raised additional concerns regarding the compatibility of the proposed development with the surrounding land uses, long-term benefits of the community, the environment, and agricultural resources.

Mike Domovitch, representing 1654697 Ontario Inc., stated that 1654697 Ontario Inc. intends to develop the abutting parcel of land located at 1800 Thornton Road North, Oshawa. Mr. Domovitch provided several recommendations for amending the proposed development including:

- increasing the setback of Building 3 and the eastern parking area from the lot line;
- an alternate location for the snow storage area due to potential salt contamination to 1800 Thornton Road North;
- including trespassing and privacy protection measures between the proposed development and 1800 Thornton Road North;
- building a retaining wall between the proposed development and 1800 Thornton Road North to preserve existing elevations and prevent soil erosion;
- an environmental site assessment to investigate potential soil contamination at the south end of the subject lands;
- removing the arterial road near the south end of the subject lands;
- converting the private road between Building 1, 2, and 3 to a public road and widening the east end to 20 metres; and,
- increasing the number of parking spaces for the proposed development.

Mallory Nievas answered questions regarding:

- the timeline for construction;
- reviewing the construction management plan and mitigating the impacts on neighbouring properties;
- details about the designated land use within the Region and Town's Official Plan;
- details about the building setbacks from the east property line, the stormwater management plan, removal of the arterial road, and no plan to convert the private road into a public road;
- investigating the grading of the site and providing mitigation strategies to prevent soil erosion; and,
- information about the number of parking spaces in the proposed development.

Anto Bozic, representing the cultural club located at 4785 Garrard Road, raised concerns regarding his well water due to potential disturbances to the water table resulting from the proposed development. Mr. Bozic sought information regarding access to water and compensation should the well run dry. He requested that noise and dust pollution be addressed during the construction of the proposed development. Mr. Bozic raised concerns

regarding potential soil and water contamination from the salt stands on the proposed development. He sought information about proposed privacy measures for 4785 Garrard Road.

Mallory Nievas answered questions regarding:

- seeking additional information about potential impacts on the water table;
- proposed privacy and noise mitigation features for abutting properties; and,
- details about stormwater management including two stormwater ponds.

Staff answered questions regarding the removal of the private road through the subject lands and jurisdiction of the arterial road.

There were no further submissions from the public.

The meeting adjourned at 9:00 p.m.

Attachment #12

Agency and Stakeholder Detailed Comments

PDP 26-25

Internal Departments

Town of Whitby Engineering Department

Official Plan Amendment Application

Subject to the acceptance of the deletion by the Region of Durham, Transportation and Engineering Services has no objection to the proposed Official Plan Amendment.

Zoning By-law Amendment

Engineering Services has no objection to the proposed Zoning By-law Amendment.

Draft Plan of Subdivision

Engineering Services does not object to the proposed Draft Plan of Subdivision subject to the comments and Proposed Conditions of Draft Approval, as outlined further on Attachment #13.

Site Plan Application and Agreement Requirements

Engineering Services has provided additional comments to be addressed to their satisfaction prior to final acceptance of the Site Plan.

General Comments

1. The Consulting Engineer or Qualified Professional shall confirm the details of all existing above and below grade infrastructure relevant to the proposed design. Existing details shall be confirmed in the field by a method determined by the Consulting Engineer in consultation with the Town. Acceptable methods include, but are not limited to: topographical surveys, locates, measure downs, sub- surface utility engineering (SUE) investigation Quality Level A (QL-A) also referred to as daylighting to determine the horizontal and vertical location.

The Consulting Engineer or Qualified Professional agrees that any as-built information provided by the Town is for informational purposes only. Items to be confirmed in the field by the consulting engineer shall include, but not be limited to:

- Sewer slopes, inverts, depths, and diameter.
 - Utility depths and location
 - Location of catchbasin leads
 - Watermain and fire hydrant, depth, and locations
 - Hydro pole guy wires
2. Remove Town of Whitby logo on the Engineering Drawing Set title block.

3. Ensure that details for all OPSD and Town Standard references are included in the drawing package.
4. Fix overlapping and cut off texts.
5. Correctly identify all easements on all applicable plans. Easements shall be labelled on all engineering drawings. There currently is no “existing right-of-way” on this property.
6. Include the North and South Pond cross section drawings, found within the Stormwater Management Report, in the Engineering Drawing Set.

Grading Plan

7. It is recommended that the spot elevation font be made smaller to make the drawing more legible.
8. Identify and/or include in the legend what “BO” stands for (i.e. BO.155.96).
9. Show and label the following:
 - Line work for swales,
 - Swale inverts,
 - Internal walkways/sidewalks to be labelled or hatched.
10. Except for enhanced swales, the minimum swale slope is 2% as per Town Standards. Review and revise accordingly.
11. The minimum paved area slope is 0.5% as per Town Standards. Review and revise accordingly.
12. Any proposed retaining wall of more than 0.6m in height shall include a guard rail and be designed and approved by a Structural Engineer. Please refer to the Town of Whitby Design Criteria and Engineering Standards – Section ‘E2.00 Retaining Walls’. Provide elevations, wall details, and cross sections for all retaining walls.

Note that the retaining wall design shall adhere to the following:

- The retaining wall, including footing, shall be built completely within private property. Please add a note in the drawing stating that the retaining wall including its footing will be built completely within private property.
- Demonstrate how the drainage from the retaining wall will be dealt with. If drainage is directed onto the adjacent property, a letter of consent from the neighbouring property owner will be required stating acceptance of the additional drainage to their property.
- As identified in the stormwater management comments, the retaining wall is lower than the wetland within the proposed Open Space Block. The retaining wall design shall specify how the hydrostatic

pressures and other considerations will be addressed.

13. All external drainage that is currently draining onto the subject property under existing conditions shall be accounted for.
14. Minimum and maximum slopes of roadside ditches and embankments shall be as per Town of Whitby Design Criteria and Engineering Standard. Refer to Section C3.06 Ditch Criteria for roadside ditch design. Review and revise accordingly.
15. Clearly identify the curb termination location on driveway entrances and use the appropriate OPSD. OPSD details shall be included in the Engineering Drawing Set.
16. Include grades/spot elevations on the stormwater management ponds.

Servicing Plan

17. Service connections and work proposed within the Town's right-of-way shall be restored as per Town of Whitby Standard Drawing 404.50.
18. Provide the entire stormwater management system Operation and Maintenance Manuals.
19. Provide orifice plate details.
20. Confirm and note who is responsible for installing the proposed 300mm watermain along Garrard Road.

Erosion and Sediment Control Plan

21. A separate Erosion and Sediment Control Plan is required for various stages of construction – pre-grading, servicing, and post-servicing.
22. Provide site contact information (note 20 – Erosion and Siltation Control Plan General Notes).
23. Show proposed stockpile location, if any. Note, the maximum stockpile height is 5.0m.
24. Identify how the infiltration galleries are going to be protected during the duration of the construction works.
25. Mud Mat shall be as per the Town's Engineering Standard Drawing. See attached. Note, this standard may be subject to further revision by Engineering Services.

Southbound Left Turn Lane Preliminary Design

26. Through lane width to be increased to 3.5m, consistent with Town of Whitby Standards and lane widths to the north of the development.
27. Left turn lane width to be increased to 3.25m, consistent with Regional and Industry standards.

Stormwater Management Report

28. A revised Stormwater Management Report is required. See attached Storm Water Management Report (SWMR) comments from the Town's Water Resources Engineer.

Please include the following with your next submission:

- An itemized response matrix stating how the above comments have been addressed.

Town of Whitby Planning Services - Landscape

Subdivision Application (DEV-31-24, SW-2024-04):

The drawings in this package will reflect the Conditions of the Draft Plan Approval and will illustrate street tree planting within the public right of way and all works to be implemented on Town lands and lands to be conveyed to the Town, such as the Enhancement Plantings and Wetlands.

Cost Estimate:

These drawings should be accompanied by a cost estimate for all proposed landscape works with the Subdivision. Required landscape works are secured for at 100% of their estimated value.

Plans are required to be submitted directly to the landscape architect in the Planning Department for circulation, review, and approval.

General Comments:

Please provide a Cover Sheet, illustrating Viewports and Match Lines referencing all relevant drawings.

Storm Ponds Drawings(L1-L5)

Please refer to Markups provided.

Landscape Package (L6-L19):

Please refer to Markups provided.

TPZ and hoarding to be shown correctly.

Future R.O.W and features to be conceptually illustrated. Cash in lieu may be required for future Street Trees. To be included on the Cost Estimate.

Compensation Area Drawings (LC1-4, and LCD1):

The title block should read "Enhancement Planting" to match proposed approach by EIS. The EIS suggests an Enhancement Planting area at the Northeast corner of the site. This area has not been included in the drawings. Please refer to markups provided on LC-1.

Wetland Drawings (W1-W7):

Please refer to Markups provided.

Tree Inventory, Arborist Report & TPP:

1. Revise the TPP to eliminate unnecessary Tree Protection fencing proposed along Garrard Rd. Please refer to the Markup provided.
2. Coordinate and illustrate the full extent of the TPP with ESC fencing in all areas which are to be disturbed. This is particularly important on the east and south edge to protect the neighbouring trees and existing Natural Heritage Systems. Prior to any site alterations, all Tree Protection hoarding must be installed. Planning Department's Landscape Staff must be notified to inspect and confirm these installations.
3. As mentioned on the Addendum Memo, an appraisal is required for the 8 Municipal trees to be removed. This is to be generated by an ISA certified Arborist, reviewed and confirmed by Town's Forestry Department Arborists, in advance of any removals occurring on site.

Town of Whitby Landscaping has requested certain conditions, which have been incorporated into Proposed Conditions of Draft Approval, as outlined further on Attachment #13.

Town of Whitby Fire and Emergency Services

1. Clarify OBC Matrix 3.07 and 3.10 regarding number of streets building required to face vs design criteria.
2. Identify building Principal Entrances on site plan.
3. Indicate the distance from the proposed fire hydrants on site plan to the proposed fire department connections. Distances shall be in compliance with OBC 3.2.5.5.
4. The fire access route shall be provided in accordance with OBC 3.2.5.6.
5. A Water supply shall be provided to all three buildings as per OBC 3.2.5.7.
6. Please note an Integrated Testing Coordinator may be required to provide an integrating testing plan and date of integrated system testing as per CAN/ULC S1001 for all buildings containing more than one fire and life safety system within it that are integrated with each other.

Town of Whitby Development Finance

The following pertains to Town of Whitby Development Charges only, based on current Provincial legislation and Town of Whitby by-laws (subject to change).

This development will also be subject to Region of Durham development charges and DDSB/DCDSB education development charges.

Development Charges

- Will be owing for both residential and non-residential development.
- Under Section 26.2 of the Development Charges Act.
 - The base DC rate(s) will be set as of the Site Plan application **submission** date.
 - Interest will accrue on the base DC rate(s), from the date of site plan application submission until the date of building permit issuance. Per the DC Act, the interest is set at Prime +1% adjusted quarterly.
 - The applicant has 18 months from the date of Site Plan application **approval** to obtain a building permit. Otherwise, Section 26.2 no longer applies, and instead the applicable DC rate(s) are the current posted rates in effect as of the building permit issuance date.
- If a building is being demolished to make way for this redevelopment, the applicant has 5 years from the date that the demolition permit was issued, to obtain the new building permit to qualify for a redevelopment credit.

Parkland Dedication / Cash-in-Lieu

Shall be applicable as per the Planning Act and Town of Whitby By-Law for both residential and non-residential development.

- If utilizing a CIL, a land appraisal is required at the cost of the developer and will remain current for a maximum period of one (1) year.
- If CIL has previously been applied, a reduction in the amount owing will be applied.
- If CIL has not previously been applied, only the incremental residential units are used for the calculation of the CIL value.

Town of Whitby Strategic Initiatives

Economic Development Comments

Economic Development Staff continue to be fully supportive of this development proposal. The proposed industrial development is closely aligned to the Whitby Economic Development Strategic Plan and offers an excellent opportunity for Whitby to attract high-value employment generating uses to the North Whitby (Brooklin) Employment Area.

The Town of Whitby has launched a Concierge Program for qualifying non-residential development proposals that offer a significant economic opportunity for the community. Based on the proposal submission, this project may qualify for the Concierge Program. We encourage the proponent to reach out to the Economic Development Department to discuss further.

Staff actively work with businesses (new and existing) that are looking for this type of industrial space in the Town of Whitby. Staff are eager to work with the proponent to market the proposed space to businesses that align with our key economic sectors.

Sustainability Comments

Sustainability Staff acknowledge and appreciate the sustainability considerations outlined in both the Whitby Green Standard (WGS) Checklists that highlights the Applicant's intention to comply with Tier 1. We are happy to see a few Tier 2 criteria being considered.

Sustainability Staff will require an updated WGS Checklist based on the comments below to demonstrate that the requirements of Tier 1 have been satisfied:

Draft Plan of Subdivision

Plans and numbers are provided in the table in Section 3.1 of the Sustainability Rationale Report. However, a lot of these are missing from the Whitby Green Standard checklist in the Excel document. Please add the appropriate documentation to the plans and number column, where applicable.

SW1.1 – In Table 1 of the Sustainability Rationale Report, it appears the description of this Tier 1 criterion was not accurately reflected in this document.

Please ensure the description matches what's provided in the Draft Plan of Subdivision Checklist. Further comments were provided by Strategic Initiatives which shall be addressed prior to final acceptance of the Site Plan.

Town of Whitby Building Division

Unless other written direction is provided by the Town of Whitby to the Applicant or their Agents, it is the responsibility of the Applicant to ensure the comments provided by the Building Division are addressed prior to the submission of the building permit application.

Town of Whitby – Community Services – Parks Planning and Culture Division

Official Plan

The Town of Whitby Official Plan, as amended, does not identify the need for a park in

the location of the proposed development. As such, and as noted through the Town pre-consultation process, the Parks department will be seeking Cash-in-Lieu of parkland conveyance, discussed below.

Cash in Lieu of Parkland

The Town will be seeking Cash-in-lieu of Parkland in accordance with the Planning Act, as part of the subdivision agreement.

Open Space

All open space blocks (3 & 4) are to be dedicated to the Town as Open Space blocks and be free and clear of any encumbrances.

Parks Planning has requested certain conditions, which have been incorporated into Proposed Conditions of Draft Approval, as outlined further on Attachment #13.

External Agencies

Central Lake Ontario Conservation Authority (CLOCA)

CLOCA staff have reviewed this application for consistency with the natural hazard policies of the Provincial Policy Statement and for conformity with Ontario Regulation 41/24 of the Conservation Authorities Act. Based on our review of the circulated materials we offer the following comments on the applications submitted:

Official Plan Amendment and Zoning By-law Amendment

CLOCA Staff have no further comments at this time related to these applications.

Draft Plan of Subdivision

CLOCA staff recommend that any approval of the proposed plan of subdivision be subject to the draft plan conditions on behalf of Central Lake Ontario Conservation Authority (refer to Attachment #13).

Region of Durham (Planning and Works)

The planned future east-west Type 'C' Arterial Road connecting Thickson Road to Thornton Road as designated in the Whitby OP is also designated as a future east-west Type 'C' Arterial Road on Map 3b - Road Network in the recently approved Regional Official Plan (Envision Durham).

The Town of Whitby intends to amend Envision Durham to delete the future east-west Type 'C' Arterial Road as part of the OPA process. If Council approves the deletion of the arterial road, the OPA would need to address:

1. Amendments to Whitby OP Schedule 'D'- Transportation and Schedule 'P'- Taunton North Community Secondary Plan; and
2. Amendments to Envision Durham Map 3b-Regional Network.

Bill 23 Proclamation of the Region of Durham

Please be advised that effective January 1, 2025, the Region became an upper-tier municipality without planning responsibilities. As such, the comments pertaining to conformity and consistency with the Region of Durham Official Plan and provincial plans and policies and those comments relating to the Region's delegated provincial plan review responsibilities now fall under the purview of the area municipalities.

Regional Servicing

Sanitary servicing capacity is allocated at the time of signing a servicing agreement and is available on a first come first served basis. In accordance with the Region's Sewer Use By-Law, we will not permit foundation drains to connect to the sanitary sewer system.

The applicant must notify the Region of changes in the proposed intended manufacturing or processing uses.

The Region will require the applicant to provide information associated with the anticipated water consumption and the anticipated sanitary sewage to be discharged to the sanitary sewer system to determine if there is adequate capacity within the downstream sanitary sewer system or if any upgrades will be required.

Functional Servicing Report

The Region has reviewed the Functional Servicing Report, (FSR) prepared by WSP Canada Inc., dated September 6, 2024, submitted to support the proposed development. We offer comments on the FRS and servicing Mark-ups in Attachments 1 A through F to this letter.

Appendix C Sanitary Design Sheet

Due to downstream sanitary sewer constraints, the existing sanitary sewer was designed with a design flow rate of 0.92 l/s/ha gross area, for all of the contributing lands on the west and east side of Garrard Road. All sanitary sewers north of existing sanitary manhole M24-0012, should be designed using the Region's standard flow rate of 2.08 l/s/ha gross area. Regardless of the flow rate being used, no section of proposed sanitary sewer shall be greater than 300mm dia. The sanitary drainage area to be used in calculations shall be the size of the Block not the size of the buildings. Block 1 has a gross area of 6.89 ha and Block 2 has gross area of 20.29 ha.

Garrard Road 300 mm Watermain Extension and 200 mm Sanitary Sewer – Plan and Profile Drawings

- Update the drawings with hydrants spaced 75 metres, for a maximum hose length of 37.5 metres measured along the lengths of the watermain. Update the watermain data chart accordingly.
- Correct the direction of the proposed sanitary sewer inverts.
- Confirm sizes for the proposed sanitary sewer based on the criteria noted above.
- The proposed inverts for the proposed internal sanitary sewer to Buildings 1 and 2 shown on Figure 5 look to be incorrect and should be rechecked.

Drawing Number PP-1 STA 0+00 to 0+290

- Maintain a minimum watermain depth of 1.80 m to avoid the use of the proposed 45-degree vertical bends. Provide a minimum of 0.25m vertical clearance as the proposed watermain crosses over the proposed sanitary sewer.
- The proposed watermain location looks to conflict with the existing hydro poles.

Drawing Number PP-2 STA 0+260 to 0+570

- Riser connections as per S-100.020 are required for the residential properties of 4785, 4755 and 4725 Garrard Road.
- A safety platform is required in all maintenance holes greater than 5.0 metres in depth. Label the RIM elevation and size of the proposed sanitary maintenance holes MH-4 and MH-5.

Drawing Number PP-3 STA 0+440 to 0+707

- Lower the proposed sanitary sewer from SAN MH -6 to existing MHM24-0012 to meet the Region Standard minimum depth of 2.15 metres.
- Refer to the attached as-built drawing, label the RIM elevation and show the existing safety grate. A drop structure as per Region Standard S-100.080 into MH-M24-0012 will be required.
- Revise the drawing to reflect the existing downstream 300 mm dia. sanitary sewer as per the following existing inverts: W Inv.146.63, S Inv. 146.53.
- The pipe inverts are labelled south and east and they should be south and north.
- Refer to As-built drawings and report the sewer inverts pipe size, grade bedding information of the existing 300 mm dia. sanitary sewer @ 0.50%.
- A safety platform shall be required in all maintenance holes greater than 5.0 metres in depth. Label the RIM elevation and size of the proposed sanitary maintenance holes MH-5.
- Label the existing 200 PVC sanitary service extension and report the west invert at MH-M24-0012.

Site Servicing Plans

- The 300 mm watermain shown on drawings SS-1 and SS-2 along Garrard Road is not existing. This watermain should be part of this development.
- Label the proposed mechanical rooms and refer to the applicable Region's standard.
- The Region's comments are based on known information at this time and are subject to change. Additional comments will be provided upon subsequent submissions.

Transportation

The Region has reviewed the proposed applications from a transportation perspective.

The proposed Town of Whitby Official Plan Amendment to delete the east-west midblock Type 'C' Arterial Road from Thickson Road to the Whitby/Oshawa boundary was reviewed and assessed through the City of Oshawa's Stevenson Road North, from Taunton Road to Conlin Road, Class Environmental Assessment Study.

As part of the study, a Midblock Arterial Needs and Justification Assessment Report (September 2024) and Future Transportation Conditions Report (August 2024), were prepared by the City of Oshawa's consultant team (Gannett Fleming and TraffMobility) to review the east- west Type 'C' Arterial Road from Thickson Road to Stevenson Road. A Technical Advisory Committee (TAC) comprised of Regional, Town of Whitby, and City of Oshawa staff was formed as part of the Class EA, in part to review these studies as they progressed.

Transit

1. Durham Region Transit (DRT) is currently working with the Town of Whitby on stop locations at Conlin Road and Garrard Road. Ensure the following existing/ proposed transit stops are protected at locations:

- a. Conlin Road eastbound at Garrard Road, east of Garrard Road.
 - b. Garrard Road northbound at Conlin Road, south of Conlin Road.
2. Ensure there is sufficient levelled space between Conlin Road and the proposed North pond to accommodate a bus stop. See the attached Drawing S-12 for detailed stop requirements
3. Sidewalks should be built along the south side of Conlin Road and the east side of Garrard Road to ensure pedestrian access to area transit stops.
4. Please ensure that all protected bus stop locations are indicated on future site plan submissions for clarity and accessibility.
5. TIS Section 3.2.2 - DRT Routes 920 and 409 now serve the Conlin Road and Garrard Road intersection. Please update the TIS accordingly.

Conclusion

The proposed amendment would permit the deletion of the planned east- west midblock Future Type 'C' Arterial Road, south of Conlin Road in the Town of Whitby Official Plan to facilitate the development of an industrial draft plan of subdivision for the purposes of and warehousing manufacturing uses. The Region is supportive of development which will facilitate the use of vacant employment lands for economic growth and employment opportunities.

The Region's detailed review of the proposed development has identified some concerns and as such, we will require the applicant to submit a revised Functional Servicing Report and address all the Region's servicing Mark-ups as set out in Attachment 1 A through F.

We have also identified that a reciprocal Regional Official Plan Amendment application is required to delete the future east-west midblock Type 'C' Arterial Road from Map 3b-Road Network in the Regional Official Plan. Post Bill 23, the Town of Whitby is responsible for processing such amendments and will now be the approval authority for making a decision on the related ROPA application.

Additional information regarding the Official Plan Amendment application was provided to the Region of Durham and they provided the following revised comments:

Further to the Region of Durham's preliminary comments dated February 19, 2025, Regional and Town staff met on May 7, 2025, to discuss the Region's transportation comments with regards to the proposed deletion of the planned east-west midblock Future Type 'C' Arterial Road from Thickson Road to Whitby/Oshawa boundary.

The purpose of the above noted meeting was to clarify the timing of future transportation infrastructure projects. As such, we offer updated transportation comments for the proposed development applications. The Region's previous

comments, provided for the subdivision proposal with respect to Regional servicing and Transit remain applicable to the development.

As previously noted, the Region has been working in collaboration with the City of Oshawa in the review of the proposed deletion of the east-west midblock Type 'C' Arterial Road from Thickson Road to Stevenson Road. The Region is satisfied that the impacts stemming from the deletion of the midblock arterial road will be addressed by the Town of Whitby within their jurisdiction. As such, the Region can confirm that our previous comments were advisory in nature and were not intended to be conditions associated with the draft approval of the subject subdivision.

Conclusion

The Region is in support of the proposed industrial draft plan of subdivision which will facilitate the use of vacant employment lands for economic growth and promote new employment opportunities.

The Region has provided this update comment to clarify its broader transportation infrastructure requirements and to confirm we are satisfied that the Town of Whitby has adequately planned for the future requirements associated with the deletion of the Future Type 'C' Arterial Road. Moving forward, the Region will continue to provide detailed transportation comments for future submissions related to the proposed amendment to delete the planned east-west midblock Future Type 'C' Arterial Road from the respective official plans.

Also, with respect to the Region's previous comment letter, we had indicated that a revised Functional Servicing Report would need to be provided, and all the Region's servicing Mark-Ups must be addressed. We can confirm that the Region's servicing concerns remain applicable to the proposed subdivision development and can be addressed as part of the review of the related future engineering submissions and through the approval of the Site Plan application.

Based on the foregoing, the Region has no objection to draft approval of the subdivision application. The conditions of draft approval must be complied with prior to clearance by the Region for registration of this plan (refer to Attachment #13).

Oshawa Executive Airport

1. Due to the site's proximity to the airport, a warning clause related to noise must be included in the tenant/ owner documentation and development agreement. City planning has the wording they have developed and used in the past.
2. The proponent shall ensure the new structure and associated refuge does not become a wildlife attractant due to its location in proximity to the airport.
3. Given that a storm water management pond is proposed, the applicant shall retain a wildlife expert to complete a wildlife risk assessment to ensure the risk of wildlife strikes is mitigated due to the proximity of the airport. Furthermore, the wildlife biologist must update the airport's wildlife risk assessment to include the addition of a pond.

City of Oshawa (Planning and Engineering Services)

Elexicon Energy

Further to the referenced File # DEV-31-24 (OPA-2024-W/10 SW-2024-04 Z-15-24), subject to the caveats set out in this letter, Elexicon Energy Inc. has no objection to the proposed applications.

The applicant or its authorized representative shall consult with Elexicon Energy Inc. concerning the availability of supply voltage, service location, metering, costs and any other details. These requirements are separate from and in addition to those of the ESA. Elexicon Energy Inc. will confirm the characteristics of the available electrical supply and will designate the location of the supply point to the applicant. Elexicon Energy Inc. will also identify the costs that the applicant will be responsible for.

In some cases, an expansion of Elexicon's distribution system (as such term is defined in the Distribution System Code issued by the Ontario Energy Board) will be required to be able to connect the customer to Elexicon's distribution system. When an expansion is necessary, the Distribution System Code requires that a distributor perform an economic evaluation to determine if the future revenue from the customer(s) will pay for the capital cost and on-going maintenance costs of the expansion project. If a shortfall between the present value of the projected costs and revenues is calculated, the distributor may propose to collect all or a portion of that amount from the customer(s). The evaluation is basically a discounted cash flow calculation that brings all costs and revenues to their net present values. This model, in general, follows the methodology, the set of common elements and related assumptions provided in Appendix B of the

Distribution System Code. Elexicon will provide an Offer to Connect once an official request for electric services is received.

The applicant or its authorized representative shall apply for new or upgraded electric services and temporary power service in writing. The applicant is required to provide Elexicon Energy Inc. with sufficient lead-time in order to ensure:

- a) The timely provision of supply to new and upgraded premises; and/or
- b) The availability of adequate capacity for additional loads to be connected in the existing premises

Attachment #13

Conditions of Draft Plan of Subdivision Approval

1. The Subdivider shall prepare the final plan on the basis of the approved draft plan of subdivision, prepared by The Biglieri Group Ltd., identified as Project No.: 23046, dated September 19, 2024, which shows 2 employment blocks, 2 open space blocks, 3 road widening blocks, and a block for a private access road.
2. The Subdivider shall submit plans showing the proposed phasing to the Region of Durham for review and approval, if this subdivision is to be developed by more than one registration.
3. The Subdivider shall grant to the Region of Durham, any easements required to provide Regional services for this development. The easements shall be in locations and of such widths as determined by the Region.
4. The Subdivider shall provide for the extension of such sanitary sewer and water supply facilities which are external to, as well as within, the limits of this plan that are required to service this plan. In addition, the Subdivider shall provide for the extension of sanitary sewer and water supply facilities within the limits of the plan which are required to service other developments external to this subdivision. Such sanitary sewer and water supply facilities are to be designed and constructed according to the standards and requirements of the Region of Durham. All arrangements, financial and otherwise, for said extensions are to be made to the satisfaction of the Region of Durham and are to be completed prior to final approval of this plan.
5. Prior to entering into a Regional Subdivision Agreement, the Region of Durham shall be satisfied that adequate water pollution control plant and water supply plant capacities are available to the proposed subdivision.
6. The Subdivider shall satisfy all requirements, financial and otherwise, of the Region of Durham. This shall include among other matters, the execution of a Subdivision Agreement between the Subdivider and the Region concerning the provision and installation of sanitary sewers, water supply, roads and other Regional services.
7. That prior to any on-site grading or construction or final approval of the plan, the Subdivider shall submit to, and obtain approval from the Town of Whitby and the Conservation Authority for reports describing the following:
 - a. The intended means of conveying stormwater flow from the site based on stormwater techniques which are appropriate and in accordance with provincial guidelines.
 - b. The intended means to maintain appropriate water balance for the subject lands and to the adjacent hydrologic features as part of this development. This includes agreeing to an appropriate predevelopment infiltration condition and providing effective post development infiltration techniques to match this target.

and providing effective post development infiltration techniques to match this target.

- c. The intended means to design, install, access, maintain and monitor any proposed Low Impact Development (LID) measures as part of this development.
 - d. The intended means whereby erosion and sedimentation and their effects will be minimized on the site during and after construction, in accordance with provincial guidelines. The report must outline all actions to be taken to prevent an increase in the concentration of suspended solids in any water because of on-site, or other related works.
8. The Subdivider agrees that Compensation Planting Plans and Wetland Plans will be provided and approved by the Town and Central Lake Ontario Conservation Authority for the proposed wetland removals.
9. That the Subdivider shall agree to install all approved planting and restoration plans identified within the Compensation Planting Plans and Wetland Plans to the satisfaction of the Town of Whitby and Central Lake Ontario Conservation Authority. All planted areas will be protected with appropriate fencing to avoid any disturbance to this area during subsequent construction.
10. The Subdivider shall obtain all necessary permits from Central Lake Ontario Conservation Authority required through Ontario Regulation 41/24, or any successor regulations made under the Conservation Authorities Act.
11. The Subdivider shall satisfy all financial requirements of the Central Lake Ontario Conservation Authority. This shall include Application Processing Fees and Technical Review Fees owing as per the approved Authority Fee Schedule.
12. The subdivision agreement between the Subdivider and the Town of Whitby shall contain, among other matters, the following provisions:
 - a. The Subdivider agrees to carry out the works referred to in Condition 7, 8 and 9 to the satisfaction of the Central Lake Ontario Conservation Authority.
 - b. The Subdivider agrees to maintain all stormwater management and erosion and sedimentation control measures operating and in good repair during the construction period, in a manner satisfactory to the Central Lake Ontario Conservation Authority.
 - c. The Subdivider agrees to advise the Central Lake Ontario Conservation Authority 48 hours prior to commencement of grading or the initiation of any on-site works.

- d. To expedite clearance of Condition 12, a copy of the fully executed subdivision agreement between the area municipality and the owner should be submitted to the Authority.
- 13. Prior to final acceptance of the Draft Plan of Subdivision, the Functional Servicing and Stormwater Management Report must be updated to the satisfaction of Engineering Services.
- 14. The Subdivider acknowledges that the Wetland Compensation boundaries may change due to the Stormwater Management comments. These comments shall be addressed prior to Draft Plan approval.
- 15. The Subdivider shall convey the following to the Town:
 - a. Blocks 3 and 4 for open space conveyance.
 - b. Blocks 5, 6, and 7 for road widening conveyance along Conlin Road West and Garrard Road.
- 16. The Subdivider shall be responsible for bus transit stop installation and associated pedestrian facility connections along the frontage of the subject property at the intersection of Conlin Road and Garrard Road. The Subdivider shall coordinate with the Durham Region Transit for the exact location of the bus transit stops.
- 17. The Subdivider shall be responsible for maintaining the existing Town roads in an acceptable condition throughout the duration of construction and/or until such time as the Town roads are reconstructed. The Subdivider may be required to provide the Town with securities to ensure roads are maintained to the Town's satisfaction. This is to be reviewed further when information regarding the timing of construction of both the subdivision development and the reconstruction of the Town owned road(s) is known.
- 18. The Subdivider shall provide Cash-in-lieu of Parkland based on a rate of 2% of the development site area for commercial/industrial uses.
- 19. The Subdivider shall provide a certified land appraisal to the Town prior to executing the subdivision agreement, in order to calculate the cash-in-lieu of parkland to be paid. The land appraisal and land value will be considered valid for up to one year. If the land appraisal is older than one year, then an updated appraisal or adjustment to the land value may be requested at the discretion of the Town.
- 20. The Subdivider agrees to convey open space blocks 3 & 4 to the Town in a physical condition to the satisfaction of the Parks Planning and Development Department, upon registration of the plan of subdivision.
- 21. The Subdivider shall ensure that a Letter of Credit is provided for all the Compensation Plans including the Wetlands and Enhancement Plantings.

22. The Subdivider shall ensure prior to any site alteration, that the Restoration and Enhancement Plan is approved by the Town and Central Lake Ontario Conservation Authority.
23. The Subdivider shall provide a Tree Preservation Plan in coordination with Erosion and Silt Control fencing. Fencing is to be inspected and approved by the Town of Whitby & CLOCA in advance of any on-site grading works.
24. The Subdivider shall, in advance of any tree clearing, provide the Town with evidence of permission for proposed removals offsite and on neighbouring properties.
25. The Subdivider shall, in advance of any tree clearing, provide the Town with an appraisal for the municipal trees to be removed. Town Forestry Staff to review and confirm the appraisal.
26. The Subdivider agrees that as soon as grading works are complete and prior to registration of the subdivision, the approved Compensation Plans will be implemented and stabilized to the satisfaction of Town of Whitby & CLOCA. Given that access may be restricted once construction of the buildings begins, it is recommended that implementation occur prior to construction commencing and access to these areas be restricted.
27. The Subdivider shall ensure the success and management of the Restoration Plan is monitored for a 3-year period by the Landscape Consultant. Annual inspections with and reporting to both the Town and CLOCA is required during this period.
28. The Subdivider shall ensure that any hazardous trees along the edges of the limit of development are identified in advance and wherever adjacent to proposed development; on-site review with staff from the Town's Forestry staff (Operations) and landscape inspection (Planning) is required prior to anticipated removals and throughout the development process.
29. The Subdivider shall convey protected and undevelopable lands to the Town where, in public ownership, the lands will be protected in perpetuity. This includes all areas where proposed NHS restoration is to occur (Block 3 & 4 on the Draft Plan).
30. The Subdivider shall ensure all adjacent boulevards are urbanized, topsoiled, fine-graded, sodded and provided with buffer tree planting. Should the Road Widening process not allow timely and coordinated planting of Street Trees, Cash in lieu could be contributed to the Town for future planting.
31. All black vinyl chain link fences to delineate Town blocks, and open spaces from private property shall be designed and constructed in accordance with the relevant engineering standards.
32. The Subdivider shall implement all recommended noise control measures identified in the Environmental Noise Assessment report and revise the plan as required to

accommodate recommended noise control measures prior to registration.

33. All non-regulatory fencing and acoustic barriers shall be installed wholly on private property and all operation and maintenance of said fencing shall be the responsibility of the private property owners.
34. That the Subdivider enter into a Subdivision Agreement for the subdivision, and a future Site Plan Agreement for each block with the Municipality and be responsible for the fees associated with the preparation and registration of the Agreement, including any review required by Legal Services.
35. The required noise mitigation measures and warning clauses shall be included in the Subdivision Agreement and future Site Plan Agreements.
36. The Subdivider shall provide a tree preservation plan and install protective fencing in advance of any on-site grading works.
37. Through the Plan of Subdivision Agreement, the Subdivider shall complete the Whitby Green Standard performance measures as part of the construction of the approved development as detailed in Sustainability Rationale Report submitted by the proponent.
38. The Subdivider shall prepare and implement the following reports and plans in accordance with the applicable guidelines to the satisfaction of the agencies noted:

Report	Town	Region	CLOCA
Functional Servicing and Stormwater Management Report	Yes	Yes	Yes
Geotechnical Investigation	Yes	Yes	Yes
Hydrogeological Study	Yes	Yes	Yes
Noise Impact Study	Yes	Yes	-
Phase One Environmental Site Assessment	Yes	Yes	-
Archaeological Assessment	Yes	Yes	-
Sustainability Report	Yes	-	-

Transportation Impact Study	Yes	Yes	-
-----------------------------	-----	-----	---

39. A vehicular easement will be required to provide access to 949 Conlin Road. This easement will require land division approval and be designed to the Town's satisfaction.

40. The Subdivider shall satisfy all requirements, financial and otherwise, of the Town of Whitby, including among other matters, the execution of a subdivision agreement between the Subdivider and the Town of Whitby concerning the provision and installation of services, drainage and other local services

41. Prior to final approval of this plan for registration, the Town of Whitby shall be advised in writing by:

- a. The Regional Municipality of Durham, how conditions 1-6 have been satisfied.
- b. The Central Lake Ontario Conservation Authority, how conditions 7-12 have been satisfied.

Note

Please be advised that the approval of this draft plan will lapse three (3) years after the date the plan is draft approved. The approval may be extended pursuant to Section 51(33) of the Planning Act, but no extension can be granted once the approval has lapsed.

If final approval is not given to this plan within three (3) years of the draft approval date, and no extensions have been granted, draft approval will lapse under 51 (32) of the Planning Act, RSO, 1990, as amended. If the owner wishes to request an extension to the draft approval, a written request and explanation must be received by the Commissioner of Planning and Development 120 days prior to the lapsing date. A processing fee in effect at the time of request, shall apply.

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: Sign By-law Variance to Permanent Sign By-law for 1655 Stellar Drive (Menkes Champlain Inc.) – SB-01-25

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 27-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

R. Saunders, Commissioner of Planning
and Development

Acknowledged by M. Gaskell, Chief Administrative Officer

For additional information, contact:

J. Takeuchi, Planner I, x.2807

1. Recommendation:

1. That Council approve the request for a variance to the Town of Whitby Permanent Sign By-law #7379-18 for the Menkes Whitby Business Park, located at 1655 Stellar Drive.

2. Highlights:

- The Planning and Development Department is in receipt of a Sign By-law Variance application to amend the Town's Permanent Sign By-law #7379-18 for the Menkes Whitby Business Park, located at 1655 Stellar Drive; and
- The variance application is required to permit one additional pylon sign that exceeds the maximum sign area and sign height permitted by the By-law.

3. Background:

The subject land is located on the south side of Stellar Drive and east of Champlain Avenue, municipally known as 1655 Stellar Drive (refer to Attachments #1 and #2).

The subject land is zoned Prestige Industrial (M1A-2) within Zoning By-law 1784, as amended, which permits a warehouse building.

A Site Plan (SP-08-24) for the development of a warehouse building was approved in January 2025.

4. Discussion:

The proponent is proposing to install an additional pylon sign on the southwest corner of the site (refer to Attachment #3).

On the basis of the industrial zoning, the Permanent Sign By-law permits one (1) ground sign or one (1) pylon sign per street frontage having:

- a) a maximum sign area of 15.0 square metres;
- b) in the case of a pylon sign, a maximum sign height of 7.5 metres;
- c) a minimum setback from a street line of 1.0 metres;
- d) a minimum set back from a vehicular entrance of 3.0 metres for a ground sign or pylon sign having a display surface equal to or greater than 3.0 metres above the ground; and,
- e) a minimum set back from a vehicular entrance of 5.0 metres for a pylon sign having a display surface less than 3.0 metres above the ground.

The proposed pylon sign would have a sign area of 38.9 square metres and a height of 11 metres (refer to Attachment #4 and #5).

As per Section 1.3 of the Permanent Sign By-law, the “sign, pylon” means a sign advertising the use or occupancy of the premises on the same property on which the sign is located, supported by one (1) or more poles, or other support structure.

The Permanent Sign By-law permits one ground or one pylon sign per street frontage, subject to meeting the relevant provisions of the By-law. The subject land has two frontages; therefore, two signs are permitted. A third sign will require a variance.

The proposed variance is required to permit one additional pylon sign that exceeds the maximum sign area and height permitted by the By-law. The pylon sign would comply with the other relevant provisions of the By-law. As a result of environmental constraints on the subject property, the sign is required to be located further away from Champlain Avenue which necessitates a larger sign and area to be legible from the public road.

Therefore, it is recommended that Council approve the request for a variance to the Town of Whitby Permanent Sign By-law #7379-18 for Menkes Champlain Inc., located at 1655 Stellar Drive.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

Not applicable.

7. Input from Departments/Sources:

Not applicable.

8. Strategic Priorities:

Consideration of this application addresses Pillar 3 of the Community Strategic Plan – Whitby's Economy. Responding to the request of an additional pylon sign, will address Objective 3.2 that the Town will attract and retain business.

9. Attachments:

Report Title: DEV-34-24: Zoning By-law Amendment Application, MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc., 5515 Garrard Road, File No. Z-16-24.

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP 28-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

R. Saunders, Commissioner of Planning
and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

J. Taylor, Director of Planning Services,
905-444-2908

M. Guinto, Planner I, 905-444-1936

1. Recommendation:

1. That Council approve an amendment to Zoning By-law No. 1784 (Z-16-24), subject to the comments included in Report PDP 28-25 and,
2. That a By-law to amend Zoning By-law #1784 be brought forward for consideration by Council at a future date.

2. Highlights:

- A Zoning By-law Amendment Application has been submitted by MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc for the land municipally known as 5515 Garrard Road.
- The Zoning By-law Amendment Application proposes to change the current zoning from Agricultural (A) Zone to an appropriate industrial zone category to permit the proposed development of two industrial warehouse buildings with a total gross floor area of 48,742 square metres (524,671 square feet).

3. Background:**3.1. Site and Area Description**

The subject land is located on the east side of Garrard Road, south of Highway 407. The subject land is municipally known as 5515 Garrard Road (refer to Attachment #1). The subject land is approximately 16.55 hectares (40.89 acres) in size. Approximately 11.27 hectares (27.84 acres) is proposed to be developed. The subject land currently contains a 2-storey single-detached dwelling, an outbuilding, and a barn, which are proposed to be removed. The lands to the north, east, and west are vacant, while the lands to the south contain two residential uses fronting Garrard Road. (refer to Attachment #2).

3.2. Application and Proposed Development

A Zoning By-law Amendment Application has been submitted by MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc to accommodate the development of two industrial buildings (refer to Attachment #3).

The Zoning By-law Amendment Application proposes to change the current zoning from Agricultural (A) Zone within Zoning By-law No. 1784, to an appropriate industrial zone category to accommodate the proposed industrial uses.

A future Site Plan Application will be required prior to development.

3.3. Documents Submitted in Support

The following documents were submitted in support of the proposed development:

- A Boundary and Topographic Survey, prepared by Speight, Van Nostrant & Gibson Limited, dated October 2023.
- A proposed Site Plan prepared by Ware Malcomb, dated October 2024 (refer to Attachment #3).
- A set of Architectural Plans prepared by Ware Malcomb, dated October 2024.
- An Arborist Report, prepared by MHBC Planning Limited, dated October 2024.
- A set of Landscape Plans including a Landscape Cost Estimate prepared by MHB Landscape, dated October 2024.
- A set of Building Elevations prepared by Ware Malcomb, dated October 2024 (refer to Attachment #4).

- A set of Archaeological Reports (Stages 1, 2, and 3), prepared by Lincoln Environmental Consulting, dated September 2024.
- A Functional Servicing & Stormwater Management Report including Civil Engineering Drawings, prepared by Crozier & Associates Inc., dated October 2024.
- A Construction Management Report, prepared by Leeswood Construction.
- A Compatibility Mitigation Study, Air Quality Report, prepared by SLR Consulting Ltd., dated October 2024.
- A Documentation & Salvage Report, prepared by MHBC Planning Limited, dated October 2024.
- An Environmental Impact Study, prepared by GHD, dated October 2024.
- A Hydrogeology Assessment, prepared by Pinchin, dated October 2024.
- An Initial Noise Impact Assessment prepared by SLR Consulting Ltd., dated October 2024.
- A Planning Justification Report, prepared by MHBC Planning Limited, dated November 2024.
- A Phase 1 Environmental Site Assessment Report, prepared by Pinchin, dated June 2023.
- A Photometric Site Plan & Exterior Lighting Specifications set, prepared by Inviro Engineered Systems, dated October 2024.
- A Transportation Impact Study prepared by Crozier & Associates Inc., dated October 2024

The above documents were distributed to relevant internal departments and external agencies for review and comment.

4. Discussion:

4.1. Whitby Official Plan

The subject land is designated “Prestige Industrial”, “General Industrial”, and “Natural Heritage System” on Schedule ‘J’ – Brooklin Community Secondary Plan (refer to Attachment #5).

Prestige Industrial

Prestige Industrial areas generally include light industrial uses within enclosed buildings, professional, corporate, and industrial oriented office buildings, major office uses within Business Parks, data processing centres, commercial or technical schools, postsecondary education facilities, research and development facilities, and incidental sales outlets within industrial buildings, provided such floor space is identified in the Zoning By-law and is compatible with adjacent land uses (4.7.3.2.2).

Warehousing and wholesale distribution uses may be permitted on lands designated as Prestige Industrial, with the exception of Business Parks, subject to the following criteria:

- a) located in proximity to Highway 401, 407 or 412;
- b) separated from residential areas;
- c) does not create additional traffic through residential areas; and
- d) wholly enclosed in buildings with no outdoor storage.

General Industrial

Lands designated as General Industrial are to be used for the manufacturing, processing, assembly, servicing, storing of goods and raw materials, warehousing, and uses for similar and related purposes such as utility yards and functions, and transportation terminals (4.7.3.1.1).

The proposed Industrial uses conform to the policies of the Official Plan related to the Prestige and General Industrial designations.

Natural Heritage System

The Natural Heritage System is comprised of an interconnected system of key natural heritage and hydrologic features (5.3.7.1). The extent and exact location of the component natural heritage and hydrologic features of the Natural Heritage System are to be determined through appropriate environmental studies and in consultation with the local conservation authority (5.3.7.3).

The boundary of the Natural Heritage System may be refined with additions and deletions without an amendment to the Plan (11.4.25.3).

4.2. Zoning By-law

The subject land is currently zoned Agricultural (A) Zone within Zoning Bylaw 1784 (refer to Attachment #7). The Agricultural (A) Zone does not permit the proposed use. Therefore, a Zoning By-law Amendment is required to permit the proposed development.

As the subject land is located within the Brooklin Secondary Plan Area, the site-specific By-law for the subject property will be premised upon applicable zoning provisions outlined within the Brooklin Community Secondary Plan Area By-law (# 7959-23).

4.3. Conclusion

Considering the nature of the proposed Zoning By-law Amendment, it is concluded that the site can adequately accommodate the development of two industrial buildings. Therefore, it is recommended that Council approve an amendment to Zoning By-law No. 1784 to permit two industrial buildings on the subject land.

All of the commenting departments and external agencies have indicated support for, or no objection to, the proposed application subject to their comments and conditions, as outlined in Section 7.

5. Financial Considerations:

Not applicable

6. Communication and Public Engagement:

A Statutory Public Meeting was held on February 10th, 2025, in accordance with the Town of Whitby Official Plan and the Planning Act. This meeting provided the public, interested persons, and agencies the opportunity to make representation in respect of the Zoning By-law Amendment Application. The meeting minutes are included in Attachment #7. There were no public comments or submissions made at the Public Meeting. All individuals who registered as an interested party at the statutory public meeting and any individual who provided written correspondence to the Town have been provided notice of the June 2nd, 2025, Committee of the Whole Meeting.

The proponent is a participating member and is in good standing of the Conlin Employment Landowner's Group. As part of the site plan approval process, the proponent will be required to provide a clearance letter from the Conlin Employment Landowner's Group prior to the issuance of a building permit.

7. Input from Departments/Sources:

The following agencies have reviewed the application and have no objection:

- Elexicon Energy Inc.; and,
- Enbridge.

Refer to Attachment #8 for full detailed comments.

Internal Departments**Whitby Planning and Development Department**

EXP was retained to complete a peer review of the proponent's Noise Study as the Town does not have the expertise in-house to complete the review.

The comments provided by EXP state that there is no objection the application, subject to verification of the noise calculations. Refer to Attachment #8 for full detailed comments.

Whitby Fire and Emergency Services

The comments provided by Whitby Fire and Emergency Services request minor revisions that can be addressed through the future Site Plan application. Refer to Attachment #8 for full detailed comments.

Whitby Engineering Services

The comments provided by Whitby Engineering Services state there is no objection to the proposed application. Certain comments that were provided were informational and can be addressed through the future Site Plan application process. Refer to Attachment #8 for full detailed comments.

Whitby Financial Services

The comments provided by Whitby Financial Services state that there is no objection to the application, subject to submitting development charges and cash-in-lieu of parkland. Refer to Attachment #8 for full detailed comments.

External Agencies**Region of Durham Community Growth and Economic Development Department**

The comments provided by the Region of Durham Community Growth and Economic Development Department state that there is no objection to the application, subject to the servicing and transportation comments being addressed through the future Site Plan application process. Refer to Attachment #8 for full detailed comments.

Central Lake Ontario Conservation Authority (CLOCA)

The comments provided by the Central Lake Ontario Conservation Authority (CLOCA) state that there is no objection to the application, subject to comments from their Environmental Engineering and Natural Heritage divisions being addressed through the future Site Plan Application process. Refer to Attachment #8 for full detailed comments.

8. Strategic Priorities:

The zoning application will permit the development of two industrial buildings subject to full services. The recommendations contained in this report align with Pillar 3 of the Community Strategic Plan to create jobs and drive local economic growth.

This report is in a fully accessible format, which addresses the Town's strategic priority of accessibility.

Public Meeting Minutes

DEV-34-24 (Z-16-24) – 5515 Garrard Road

PDP 11-25, Planning and Development (Planning Services) Department Report

Re: Zoning By-law Amendment Application, MHBC Planning Limited on behalf of 5515 Garrard Real Estate Inc., 5515 Garrard Road, File Number: DEV-34-24 (Z-16-24)

Madrid Guinto, Planner I, Development, provided a PowerPoint presentation which included an overview of the application.

David McKay, representing 5515 Garrard Real Estate Inc., provided a Powerpoint presentation which included a detailed overview of the application.

The Chair indicated that comments would now be received by members of the public.

There were no submissions from the public.

A written letter from a resident in the Town of Whitby was received, in which the resident urges Council to reject the zoning change, emphasizing the importance of preserving agricultural land for food security, climate stability, and its role as a carbon sink, etc.

CLOCA has reviewed the application and has confirmed that the proposal can proceed with the proposed zoning by-law amendment.

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-34-24 (Z-16-24) – 5515 Garrard Road

Internal Departments

Engineering Services

Engineering Services – Development Division

Please find below Engineering Services' comments on the 1st Submission of the proposed Zoning By-law Amendment for the above noted property. Engineering Services has conducted a preliminary review of the circulated materials outlined below for the purpose of the Zoning By-law Amendment application:

- Phase 1 ESA, dated June 16, 2023, by Pinchin Limited.
- Phase 1 ESA (North Parcel), dated June 27, 2022, by GHD
- Transportation Impact Study, dated October 2024, by Crozier Consulting Engineers.
- Hydrogeological Assessment, dated October 30, 2024, by Pinchin Ltd.
- Plan of Survey, dated October 12, 2023, by Speight, Van Nostrand & Gibson Limited.
- Land Transfer Documents, dated December 29, 2022 & November 19, 2022
- Architectural Drawing Set, dated October 23, 2024, by Ware Malcomb
- Functional Servicing & Stormwater Management Report, dated October 2024, by Crozier Consulting Engineers
- Construction Management Report, undated, unsigned
- Comment Matrix, dated November, by Garrard Investments Inc.
- Planning Justification Report, dated November 1, 2024, by MHBC Planning Limited.

Zoning By-law Amendment

The Subject Land is currently zoned as "Agricultural (A)" under Zoning By-law 1784. The zoning amendment proposes to rezone from Agricultural (A) to Restricted Industrial Zone (M1-X), with site specific provisions to permit a warehouse distribution facility with accessory office. A warehouse distribution facility is not currently permitted under the existing Agricultural (A) Zone within the Town of Whitby Zoning By-law 1784. Therefore, a ZBA Application is required to rezone the Subject Lands from Agricultural to an appropriate Industrial zone.

The Subject Lands are located on the east side of Garrard Road and south of Highway 407/Hydro One corridor and are municipally addressed as 5515 Garrard Road, in the Town of Whitby. The lands are approximately 16.55 hectares (40.90 acres) in size and contain approximately 348 metres of frontage along Garrard Road. The lands are currently occupied by a single detached dwelling, a barn, and an outbuilding. Engineering Services does not object to the proposed Zoning By-law Amendment application.

Informational Comments

It is Engineering Services' understanding that a Site Plan application will be required upon approval of the Zoning By-law Amendment application. Detailed review comments will be provided at the Site Plan application stage.

Financial Services

PARKLAND DEDICATION / CASH-IN-LIEU

In accordance with the Planning Act and the Town of Whitby By-law, parkland dedication or cash-in-lieu (“**CIL**”) of is applicable to the non-residential development.

If utilizing a CIL, a land appraisal is required at the cost of the developer and will remain current for a maximum period of one (1) year.

DEVELOPMENT CHARGES

The following pertains to Town of Whitby Development Charges (“**DCs**”) only, based on current Provincial legislation and Town of Whitby by-laws (subject to change). Additional information can be found at <https://www.whitby.ca/en/work/development-charges.aspx>

This development will also be subject to Region of Durham DCs and DDSB/DCDSB education development charges, please contact those agencies directly with any questions pertaining to their policies, rates and charges.

DCs will be applicable to the non-residential development and must be paid prior to building permit issuance, unless all conditions of a provision from the Development Charges Act (“**DCA**”) permitting alternative payment timing are met.

Calculation of Development Charges

- The ‘relevant’ application is considered the application for approval in a site plan control area. If there is no site plan control application, the relevant application is the application for an amendment to a by-law. In cases where there are multiple applications, the date of the later application is deemed the relevant application.
- Under Section 26.2 of the DCA, the rate(s) in effect on the date the relevant application is submitted, will be used to determine the applicable development charges. If there is no relevant application, the charges are based on the prevailing rates at the time of building permit issuance.
- If the first building permit is issued more than 18 months after the relevant application was approved, the charges are based on the prevailing rates at the time of permit issuance.
- Interest at Prime +1%, adjusted quarterly, will accrue on the development charges payable from the application date of the relevant application until the date development charges are paid.

Redevelopment Credit

If a building is being demolished to make way for this redevelopment, the applicant has five (5) years from the date that the demolition permit was issued, to obtain a building permit to qualify for a redevelopment credit. The credit will be equivalent to the applicable non-residential Gross Floor Area (GFA) being demolished, the number of residential units by type being demolished, or any combination of non-residential GFA and residential units, that would incur applicable development charges if constructed. For example, the demolition of a gas station canopy would not qualify for a credit, as the development of a gas station canopy does not attract any applicable development charges.

Whitby Fire and Emergency Services

Any comments will be provided at the site plan application stage.

External Agencies

Central Lake Ontario Conservation Authority

Thank you for circulating Central Lake Ontario Conservation Authority (CLOCA) on the above noted first submission. CLOCA staff have reviewed this submission for consistency with the natural hazard policies of the Provincial Planning Statement (PPS) and conformity with Ontario Regulation 41/24 of the Conservation Authorities Act. Other relevant watershed management guidelines and policies will also be included in our review, including those within the Town of Whitby and Region of Durham Official Plans.

The subject lands are partially within the Pringle Creek Watershed and partially within the Oshawa Creek Watershed. The eastern half of this property is regulated through Ontario Regulation 41/24 of the Conservation Authorities Act due to its proximity to a provincially significant wetland.

Based on our review of the circulated materials, we offer the following comments related to the Zoning By-law Amendment application. These comments must be addressed prior to their acceptance:

Zoning By-law Amendment Application

1. CLOCA staff find the submitted Zoning By-law schedule acceptable and have no further comments on the schedule. Please address comments related to the comments appended to this letter.

Environmental Engineering

2. A memo from our Environmental Engineering division related to their review of the submitted Functional Servicing and Stormwater Management Report (Crozier, Oct 2024). Comments found within this memo must be addressed to our satisfaction as part of future Site Plan application.
3. A memo from our Environmental Engineering division related to their review of the submitted Hydrogeological Assessment (Pinchin, Oct 2024). Comments found within this memo must be addressed to our satisfaction as part of future Site Plan application.

Environmental Impact Study

4. A memo from CLOCA technical staff related to their review of the submitted Environmental Impact Study (GHD, 2024) and Landscape Plan (MHBC Planning, 2024). Please address comments found within this memo to our satisfaction as part of future Site Plan application.

CLOCA Plan Review Fees

Appropriate plan review fees should be submitted to CLOCA for our review of any circulated Planning Act applications. Fees should be submitted in accordance with the CLOCA Fee Schedule in effect at the time of the application.

The following plan review fees must be submitted prior to approval of the submitted Planning Act applications:

Zoning By-law Amendment Application (base fee): \$2,185

Region of Durham – Regional Works / Community Growth & Economic Development

The Region of Durham has completed its review of the above-noted proposed application and offers the following comments with regards to Regional servicing, transportation, and transit.

The subject site is located on the east side of Garrard Road and south of Highway 407. The subject site is approximately 17 hectares and is currently occupied by dwelling and outbuildings. The purpose of the proposed Zoning By-law amendment is to rezone the subject site to permit the development of 2 industrial warehouse buildings with a total gross floor area of 48,742m².

A future site plan application will be required for the proposed development.

Bill 23 Proclamation of the Region of Durham

Please be advised effective January 1, 2025, the Region is an Upper tier municipality without planning responsibilities. As such, the comments pertaining to conformity and consistency with the Region of Durham Official Plan and provincial plans and policies and those comments relating to the Region's delegated provincial plan review responsibilities will fall under the purview of the area municipalities.

Regional Servicing

The applicant shall extend the existing sanitary sewers and watermain to the subject site. This work should be coordinated with other developments and Regional capital projects. As these projects move forward, their phasing and staging shall be coordinated to minimize their impact on Thickson Road, Garrard Road, and the MidBlock Arterial Road. These infrastructure projects include the 600 mm dia. feedermain constructed within the Garrard Road right-of-way (R.O.W) as well as the construction of all local services, sanitary sewers, and service connections. The applicants proposed sanitary and water infrastructure projects should also be coordinated with the proposed external road and intersection designs.

Water Supply

Servicing the proposed development is dependent upon the installation of new Zone 3 water pumps at the existing Garrard Road Pumping Station and the extension of the 600 mm dia. feedermain plugged south of the subject site. The servicing of this site will require the northerly extension of this feedermain. Its design and installation will need to be coordinated with all other construction along the Garrard Road R.O.W. in this area. The alignment of local watermain required to service the developable parcels needs to be coordinated with the latest concept plans for the surrounding development parcels.

Sanitary Servicing

There are no sanitary sewers along the frontage of the subject site. Servicing will require the extension of the existing 600 mm dia. Trunk Sanitary Sewer (TSS) from the Thickson Road and Glengowan Street intersection. This TSS will be extended northly to the Mid Block Arterial Road and continue easterly to Garrard Road. A local sanitary sewer shall be extended along Garrard Road to the Mid-Block Arterial Road. Sanitary servicing capacity is allocated at the time of signing a servicing agreement and is available on a first come first served basis. In accordance with the Region of Durham Sewer Use By-Law, we will not permit foundation drains to connect to the sanitary sewer system.

Functional Servicing & Stormwater Management Report

The Functional Servicing & Stormwater Management Report prepared by C.F. Crozier & Associates Inc., dated October 2024 refer to the subject site as one parcel. Include a note that the Region will only permit one sanitary service, one domestic water connection and one fire line.

- Since the subject site is to be developed as a single parcel, the Region will permit one sanitary service, one domestic water connection and one fire line. Please confirm if a 50mm dia. domestic water service is sufficient to service both Building 1 and 2. The applicant shall refer to its mechanical engineer to confirm the size of the domestic water service required.
- The applicant will be required to extend this infrastructure within the Garrard Road R.O.W. to service this proposed development. Plan and profile drawings of the required infrastructure will be required as part of the future engineering/ site plan application stage.

Transportation

Transportation Impact Study

We have reviewed the Transportation Impact Study, (TIS) prepared by C.F. Crozier & Associates Inc., dated October 2024 and offer the following comments:

- It is recommended that Section 12.4 Education/Promotion and Incentives (pg. 50) of the TIS be updated to specify that these materials will be provided by the responsibility of the applicant.
- It is recommended that Section 12.5 Carpool Priority Parking (pg. 50) of the TIS be updated to specify where carpool parking will be located and that these should be located near building entrances to help encourage employees to use sustainable transportation options.

The above comments can be addressed at the time of the review of the future related Site Plan Application.

Transit

We have reviewed the application from a transit perspective

1. Please note that the closest scheduled service route is located approximately 1 kilometre from the subject site.
2. Due to the area road network with dead-end roads, it is unlikely that scheduled service can be extended to the subject site at this time.

Conclusion

The Region's review of the proposed application has identified servicing and transportation concerns. The Region's comments can be addressed as part of the review of the future related Site Plan application.

EXP – Peer Review of Applicant’s Noise Study

1 – Introduction

EXP has been retained to conduct a peer review of the Compatibility/Mitigation Study – Noise (Study) prepared by SLR Consulting (Canada) Ltd. and dated November 13, 2024. The Study is associated with a Zoning By-law Amendment (ZBA) application for a proposed warehouse distribution facility.

The purpose of this peer review is to examine and critique the engineering methodology used to reach the conclusion included in the Study. Independent verification of various calculations and analysis used in the report is beyond the scope of this work. Our comments of the peer review are presented below.

2 – Peer Review Comments

The Study has been reviewed for method, completeness and accuracy of the findings in the Study. Our comments are outlined as follows:

1.1 Applicable Environmental Noise Guidelines

1. EXP agrees with the application of NPC-300 and the general sound level limits for non-impulsive sources and impulsive sources. However, we do not agree that the noise receptors are considered to be in Class 1 Area. It is our opinion that the noise receptors are in Class 2 Area. The difference in exclusionary sound level limit between Class 1 Area and Class 2 Area is the outdoor point of reception in evening.
2. The specific sound level limits calculated based on traffic volume data are listed in Table 7 and are discussed in Section 2.3 below. EXP recommend comparing the calculated ambient sound levels with Class 2 Area exclusionary sound level limits.

1.2 Points of Reception

1. The addresses of POR2 and POR3 are the same in Table 5. The address of of POR3 should be 5305 Garrard Road.

1.3 Ambient Sound Levels and Applicable Guideline Limits

1. EXP generally agree with the traffic volume data in Table 6.
2. The applicable sound level limits are listed in Table 7, which indicates that most of the noise receptors have higher ambient sound levels than the exclusionary limits. However, EXP does not agree with the calculated ambient sound levels. We used STAMSON v5.04 and Cadna/A to verify the ambient sound level at selected critical noise receptors and obtained lower ambient sound levels. Note that Conlin Road, Thickson Road and Highway 407 are more than 500 m from the points of reception and separated with absorptive ground.

1.4 Stationary Source Assessment

1. The sound power level of tractor trailer coupling/uncoupling in the Sound Power Levels Table in Appendix C, based on SLR measurements from another site, is 120.1 dBA. EXP finds the sound power level reasonable. However, the impulsive sound power level in

- the Line Sources Table in Appendix C is 105 dBA. No explanation or rationale is provided for the 15 dB reduction. Please provide explanation for the 15 dB reduction for the sound power level of impulsive noise.
2. Impulsive noise has been modeled as a line source along the façades of the buildings. However, impulsive noise may occur at the joint between the warehouse and the trailer as well as inside the trailers. It is EXP's opinion that modeling impulsive noise as an area source can better represent the characteristic of loading/unloading noise.
 3. The sound level at POR1 would be higher without the 15 dB reduction and require additional noise control measures. In addition, the sound levels at some of the points of reception may exceed the sound level limits.

3 – Conclusion

EXP agrees with the methodology and approach in the Compatibility/Mitigation Study – Noise prepared by SLR in general. However, verification is required for ambient sound level calculations and impulsive noise calculations. Changes to the results will affect the noise control recommendations.

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: **DEV-35-24: Zoning By-law Amendment Application, Whitby Curling Club, 815 Brock Street North**

Report to: **Committee of the Whole**

Date of meeting: June 2, 2025

Report Number: **PDP 29-25**

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

R. Saunders, Commissioner of Planning
and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

J. Taylor, Director of Planning Services,
905-444-2908

N. Kohek, Planner II, 905-444-2902

1. Recommendation:

1. That Council approve an amendment to Zoning By-law # 2585 (File No. Z-17-24) as set out in Planning Report PDP 29-25; and,
2. That a By-law to amend Zoning By-law # 2585 be brought forward for consideration by Council.

2. Highlights:

- The Whitby Curling Club has submitted a Zoning By-law Amendment Application for land municipally known as 815 Brock Street North.
- The Zoning By-law Amendment Application proposes to change a part of the current zoning on the property to an appropriate residential zone to permit the proposed development of five (5) single detached dwellings.
- Future Land Division applications will be required to create the proposed lots.

- All commenting departments and external agencies have indicated support for, or no objection to, the proposed development subject to their comments and conditions being addressed.

3. Background:

3.1. Site and Area Description

The subject land is located on the eastern portion of 815 Brock Street North. The existing parcel is on the east side Brock Street North, approximately 200 m south of Manning Road and Starr Avenue, with road frontage on Bradley Drive (refer to attachment #1). The subject property is 0.81 hectares (2 ac) in size and is used as a recreational centre (curling club). The area of the subject land proposed to be rezoned is used for overflow parking and storage for the curling club.

The surrounding land uses include:

- single detached dwellings to the north and east;
- open space (Bradley Park) to the south; and,
- commercial and residential uses to the west (refer to attachment #2).

3.2. Application and Proposed Development

A Zoning By-law Amendment Application has been submitted by the Whitby Curling Club, to change a portion of the existing zone category of the subject lands from Open Space (OS) in By-law 2585, to an appropriate residential zone to facilitate the development of five (5) single detached dwellings, three (3) storeys in height, fronting onto Bradley Drive (refer to attachments #3&4).

Future land division applications will be required in order to create the proposed lots.

3.3. Documents Submitted in Support

The documents submitted in support of the application include the following:

- A Site Plan, prepared by Cassidy & Co., dated June 2024 – revised April 17, 2025 (refer to Attachment #3).
- Preliminary Model Drawings, prepared by Cassidy & Co., dated October 2024.
- A Planning Justification Report, prepared by LANDx Developments Ltd., dated October 2024.
- A second submission Cover Letter, prepared by LANDx Developments Ltd., dated April 21, 2025.

- A Topographic Survey, prepared by J.D. Barnes Ltd., dated June 24, 2024.
- A Stormwater Management and Functional Services Report, prepared by D.G. Biddle & Associates, dated September 2024 – revised February 2025.
- A Civil Engineering Drawing Package, prepared by D.G. Biddle & Associates, dated September 2024 – revised April 2025.
- An Environmental Noise Assessment, prepared by YCA Engineering Ltd., dated October 2024.
- A Phase One Environmental Site Assessment, prepared by Cambium Inc., dated June 2024.
- A Phase Two Environmental Site Assessment, prepared by Cambium Inc., dated October 2024.
- A Record of Site Condition, dated March 14, 2025.
- A Tree Preservation and Landscaping Plan Package, prepared by Henry Kortekaas and Associates Inc., dated July 2024, revised April 2025.

The above documents were distributed to relevant internal departments and external agencies for review and comment.

4. Discussion:

4.1. Envision Durham

The subject land is designated as a “Community Area” and a “Regional Corridor” in the Envision Durham Official Plan. The permitted uses within Community Areas include a variety of housing types, sizes, and tenures.

The existing Curling facility is adjacent the Regional Corridor (Brock Steet), the area of land to be rezoned is not along the “Regional Corridor”.

4.2. Whitby Official Plan

The subject land is designated as a “Residential Area” (refer to attachment #5) in the Town of Whitby Official Plan. Residential Areas are intended to be predominantly used for residential purposes.

Where the proposal is not in a secondary plan, proposal for new residential development or redevelopment shall consider the policies, including locational criteria, identified in Sections 4.4.3.4 to 4.4.3.6 (4.4.3.2). Low Density Residential areas shall generally be located in the interior of residential neighbourhoods on local or collector roads (4.4.3.4.1.a.). Bradley Drive is a collector road under Schedule ‘D’ of the Official Plan.

The proposed development includes 5 residential lots on a 0.21 hectare area of land. As such, the proposed development is within the maximum density of 35 units per net hectare required by the OP for low density residential uses.

The subject land is not within the 'Mature Neighbourhoods' boundary.

The proposal is intended to serve as a transition from the adjacent mature neighbourhood to the intensification corridor. Relatively large setbacks have been maintained between the existing residential uses and the proposed residential dwellings. Lot sizes and frontages are comparable to the existing surrounding neighbourhood, and the proposed dwellings can be accommodated with comparable interior side yard and front yard setbacks. The proposal will involve maintaining several existing mature trees on the south and north lot lines of the subject land.

4.3. Zoning By-law

The subject land is presently zoned OS – Open Space by Zoning By-law 2585 (refer to attachment #6). The OS Zone does not permit residential uses.

A Zoning By-law Amendment is required to rezone the subject land to a residential Zone category to implement the proposed single detached dwellings.

4.4. Conclusion

The proposed application would provide additional residential uses on lands designated as a Community Area and conforms with the Envision Durham Official Plan.

The proposed application would provide additional single detached dwellings in an area designated as low density residential. The area of the proposal is not in a mature neighbourhood but is adjacent to the Mature Neighbourhood boundary. Staff worked with the applicant on comments and concerns regarding the massing and height of the proposed dwellings in the context of the surrounding neighbourhood. Additional rationale was provided by the applicant, noting large setbacks to existing residential uses, the preservation of existing trees, and the vision of the proposal as a "transition area" between the mature neighbourhood and the intensification corridor. It should also be noted that a public walkway is located between the proposed development and the existing residential uses to the north. Based on the additional justification provided, the proposed application conforms with the intent of the Official Plan.

All of the commenting departments and external agencies have indicated support for, or no objection to, the proposed development subject to their comments and conditions being addressed, as outlined in Section 6.

Based on the detailed review of the application and consideration of public and agency comments and requirements, it is concluded that the proposed development is consistent with the Provincial Planning Statement and is in conformity with the Envision Durham Official Plan and the Town's Official Plan. Therefore, it is recommended that Council approve the proposed Zoning By-law Amendment.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

A Public Meeting was held on February 9, 2025, in accordance with the Town of Whitby Official Plan and the Planning Act. This Public Meeting provided the public, interested persons, and agencies the opportunity to make representation in respect of the Zoning By-law Amendment Application.

The meeting minutes are included in Attachment #7.

There were no oral submissions from the public; however, one written correspondence submission was received expressing skepticism over the need for the proposed development.

7. Input from Departments/Sources:

The following agencies have reviewed the application and have no objection:

- Whitby Fire and Emergency Services; and,
- Durham District School Board.

Refer to Attachment #8 for Agency and Stakeholder Detailed Comments.

7.1. Internal Departments

Engineering Services

Engineering Services had no concerns with the zoning by-law amendment application, and further provided a list of required plans, reports, and materials to be provided as part of future land division applications.

Financial Services

Financial Services provided standard requirements with respect to development charges and cash in lieu of parkland.

7.2. External Departments

CPKC Railway

CPKC Railway provided a warning clause due to proximity to their nearby railway.

Region of Durham

The Region of Durham commented primarily on regional servicing and transportation, noting that there are site servicing concerns that will need to be addressed as part of the future land division applications.

8. Strategic Priorities:

This report is in a fully accessible format, which addresses the Town's strategic priority of accessibility.

The proposed residential development would support Community Strategic Plan Action Item 1.5.4, under Strategic Pillar #1: Whitby's Neighbourhoods, with respect to providing a diversity of housing options.

Public Meeting Minutes
File DEV-35-24 (Z-17-24)

Minutes of Public Meeting Monday February 10, 2025

Nikolas Kohek, Planner II, provided a PowerPoint presentation which included an overview of the application.

Brendan Graham, representing Whitby Curling Club, provided a PowerPoint presentation which included a detailed overview of the application.

The Chair indicated that comments would now be received by members of the public.

There were no submissions from the public.

One written submission was received from a member of the public expressing skepticism of the need for the proposed development.

PDP 29-25

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-35-24 (Z-17-24)

Whitby Engineering Services

It is Engineering Services' understanding that Land Division and Building Permit applications will be required upon approval of the Zoning By-law Amendment application. Detailed review comments will be provided at the Land Division and Building Permit application stages.

The following items are informational and can be addressed through the future Land Division and Building Permit application process:

1. Provide a Topographic Survey.
2. Submit a Draft R-Plan for review and approval as part of the Land Division application.
3. Site Grading/Servicing Plans will be required for review and approval including any erosion and sediment controls as required. Please refer to Section D5.00 of the Town's Design Criteria and Engineering Standards for more information.
4. Drainage shall be contained within the property and shall not impact adjacent neighbours. Detailed grading including cross-sections along the south property boundary will be required to insure no negative impact on adjacent lands.
5. Provide an acceptable Stormwater Management Brief for Engineering Services review and approval. The Brief shall demonstrate the feasibility of the proposal, calculate the additional flows from the increased lot coverage, and show how the additional flows will be accommodated. In-situ percolation test results are to be included within the brief or separate geotechnical report, supporting any infiltration measures.
6. A Construction Management Report shall be provided for review and acceptance. See attached guidelines for more information.
7. The Consulting Engineer or Qualified Professional shall confirm the details of all existing above and below-grade infrastructure relevant to the proposed design. Existing details shall be confirmed in the field by a method determined by the Consulting Engineer in consultation with the Town. Acceptable methods include, but are not limited to, topographical surveys, locates, measure downs, sub-surface utility engineering (SUE) investigation Quality Level A (QL-A) also referred to as daylighting to determine the horizontal and vertical location. The Consulting Engineer or Qualified Professional agrees that any as-built information provided by the Town is for informational purposes only. Items to be confirmed in the field by the consulting engineer shall include, but not be limited to:

PDP 29-25

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-35-24 (Z-17-24)

- a. Sewer slopes, inverts, depths, and diameter
 - b. Utility depths and location
 - c. Location of catchbasin leads
 - d. Watermain and fire hydrant, depth, and locations
 - e. Hydro pole guy wires
8. Rename “Proposed Site Triangle Road Widening” to “Storm Sewer Easement”.
9. Confirm the storm easement triangle to be of adequate size based on the comment above.
10. Sump pump discharge is to be to grade via splash pad. Provide a detail on the servicing plan.
11. Relocate the proposed rear yard swale currently shown through the proposed lots onto the curling club property to ensure external drainage does not adversely affect future properties.
12. Revise the rear yard swale noted at 1.5% to be at 2.0% minimum in accordance with Town Standards.
13. Revise the proposed driveway configuration for Lot 2 to allow for minimum 1.0m separation between the edge of driveway and the existing double catchbasin.

Whitby Financial Services

Parkland Dedication/Cash in Lieu

In accordance with the Planning Act and the Town of Whitby By-law, parkland dedication or cash-in-lieu (“CIL”) of is applicable to the residential development.

If utilizing a CIL, a land appraisal is required at the cost of the developer and will remain current for a maximum period of one (1) year.

Development Charges

The following pertains to Town of Whitby Development Charges (“DCs”) only, based on current Provincial legislation and Town of Whitby by-laws (subject to change). Additional information can be found at <https://www.whitby.ca/en/work/development-charges.aspx>

This development will also be subject to Region of Durham DCs and DDSB/DCDSB education development charges, please contact those agencies directly with any questions pertaining to their policies, rates and charges.

Attachment #8

Agency & Stakeholder Detailed Comments

File DEV-35-24 (Z-17-24)

PDP 29-25

DCs will be applicable to the residential development and must be paid prior to building permit issuance, unless all conditions of a provision from the Development Charges Act (“DCA”) permitting alternative payment timing are met.

Calculation of Development Charges

The ‘relevant’ application is considered the application for approval in a site plan control area. If there is no site plan control application, the relevant application is the application for an amendment to a by-law. In cases where there are multiple applications, the date of the later application is deemed the relevant application.

- Under Section 26.2 of the DCA, the rate(s) in effect on the date the relevant application is submitted, will be used to determine the applicable development charges. If there is no relevant application, the charges are based on the prevailing rates at the time of building permit issuance.
- If the first building permit is issued more than 18 months after the relevant application was approved, the charges are based on the prevailing rates at the time of permit issuance.
- Interest at Prime +1%, adjusted quarterly, will accrue on the development charges payable from the application date of the relevant application until the date development charges are paid.

Affordable, Attainable and Non-Profit Housing

- If this development includes affordable, attainable or non-profit housing units (as defined in Sections 4.1 and 4.2 of the Development Charges Act (“DCA”), those units are eligible for DC exemptions.

Whitby Fire and Emergency Services

Whitby Fire and Emergency Services confirmed that they had no comment on the application.

Whitby Planning Services

Official Plan Review

The Official Plan requires that new development be compatible with the scale of the existing built form, and that new development is compatible with existing surrounding well-established neighbourhoods.

Zoning By-law Review

Private Garage Dimensions

PDP 29-25

Attachment #8

Agency & Stakeholder Detailed Comments

File DEV-35-24 (Z-17-24)

Private garages serving two cars are required to be a minimum width of 5.5 m and a minimum depth of 6.2 m, measured from foundation wall to foundation wall. Please be aware that both preliminary models provided do not meet minimum private garage dimensions.

Additional Dwelling Unit Option

Ensure that the additional dwelling unit option shows access through a common entrance or separate entrance. An additional dwelling unit accessed through the principal dwelling unit will not comply with the zoning by-law. An additional dwelling unit is not permitted to be accessed through the private garage.

Common Wall

The draft by-law submitted includes a table note for common wall. Please be aware that regulations for common wall will not be carried forward in the zoning by-law amendment, as the proposal is for single detached dwellings only.

Delegated Responsibilities

Please be aware that the Town of Whitby has taken over provincially delegated responsibilities from the Region of Durham as of January 1, 2025.

Soil and Groundwater Assessment

A Phase 1 Environmental Site Assessment (ESA) was completed by Cambium Inc. A Phase 2 Environmental Site Assessment (ESA) was recommended due to a change in use to a more sensitive use and due to nearby potentially contaminating activities. The Phase 2 Environmental Site Assessment (ESA) was completed by Cambium Inc, and involved an investigation of contaminants of potential concerns from the identified potentially contaminating activities through groundwater monitoring wells. The Phase 2 ESA found that concentrations of all contaminants of potential concern analyzed were found to meet site condition standards, and a record of site condition was recommended to be filed.

Completion of the “*Reliance letter*” and “*Certificate of Insurance*” will be required by the environmental consultant to extend reliance to the Town of Whitby for the environmental work.

Noise

An Environmental Noise Assessment was completed by YCA Engineering Inc. The Environmental Noise Assessment investigated stationary noise sources and traffic noise sources from Brock Street North and the CPKC Railway. Mechanical equipment used by the Whitby Curling Club in proximity to the proposed dwellings was found to be a stationary noise source requiring mitigation. Mandatory air conditioning units and upgraded windows and exterior walls will be required, as recommended in the

PDP 29-25

Attachment #8 Agency & Stakeholder Detailed Comments File DEV-35-24 (Z-17-24)

Environmental Noise Assessment. Recommended warning clauses will be implemented by the Town of Whitby as a development agreement condition, and they shall be included in any Offers of Purchase and Sale or Lease.

The Noise Study recommended a 3.8 m tall acoustic fence to enclose the mechanical equipment used by the Whitby Curling Club outside of the subject land. The noise mitigation fence is to be installed in accordance with the Environmental Noise Assessment recommendations as part of the development agreement.

Development Standards

No issues were identified on this submission in relation to other development standards. Development standards will be further assessed when more information on the proposal is available and assessed under a forthcoming development agreement.

Other

- Four (4) Land Division applications will be required, to create five (5) lots containing the proposed single detached dwellings. A draft reference plan will be required for the applications.
- A development agreement is required to secure the approvals and any financials.
- In house architectural control review and approval of the sitings and models will be subject to a review fee.

Durham District School Board

Staff reviewed the submitted application and had no objection under the mandate of DDSB.

CPKC Railway

Please note that CPKC's Belleville Subdivision is classified as a principal mainline track.

Thank you for the recent notice respecting the captioned development proposal in the vicinity of CPKC. The safety and welfare of residents can be adversely affected by rail operations and CPKC is not in favour of residential uses that are not compatible with rail operations. CPKC freight trains operate 24/7 and schedules/volumes are subject to change. CPKC's approach to development in the vicinity of rail operations is encapsulated by the recommended guidelines developed through collaboration between the Railway Association of Canada and the Federation of Canadian Municipalities. The 2013 Proximity Guidelines can be found at the following website address:
<https://www.proximityinitiative.ca/>.

In addition, all construction, continued maintenance, access, ingress and egress must be done without entering railroad right of way. This includes but is not limited to

PDP 29-25

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-35-24 (Z-17-24)

maintenance of any equipment, lawn care, snow plowing and emergency exits via windows or doors.

CPKC recommends that the below condition be inserted in all property and tenancy agreements and offers of purchase and sale for all dwelling units in the proposed building(s):

“CPKC and/or its assigns or successors in interest has or have a railway right-of-way and/or yard located adjacent to the subject land hereof with operations conducted 24 hours a day, 7 days a week, including the shunting of trains and the idling of locomotives. There may be alterations to, or expansions of, the railway facilities and/or operations in the future, which alterations or expansions may affect the living environment of the residents in the vicinity. Notwithstanding the inclusion of any noise and/or vibration attenuating measures in the design of the development and individual dwellings, CPKC will not be responsible for complaints or claims arising from the use of its facilities and/or its operations on, over, or under the aforesaid right-of-way and/or yard.”

Should the captioned development proposal receive approval, CPKC respectfully requests that the recommended guidelines be followed.

Region of Durham

The Region has completed its review of the above-noted application and offers the following comments with regards to the Regional servicing, transportation, and transit.

The subject lands are approximately 0.80 hectares and are currently occupied by the Whitby Curling Club. The eastern portion of the lands fronting onto Bradley Drive, which is proposed for development is approximately 0.53 hectares. Subject to the approval of this Zoning By-law Amendment, the applicant is proposing to sever the eastern portion of the subject property to create five (5) residential lots to facilitate the development of five single-detached dwellings with the option for Accessory Apartments. The existing function of the Whitby Curling Club will not change.

The proposed Zoning By-law amendment is required to change the existing zoning for the eastern portion of the subject property to permit single-detached dwellings. Accessory apartments are permitted with single-detached dwellings.

Bill 23 Proclamation

Please be advised effective January 1, 2025, the Region is an Upper-tier municipality without planning responsibilities. As such, the comments pertaining to conformity and consistency with the Region of Durham Official Plan and provincial plans and policies

PDP 29-25

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-35-24 (Z-17-24)

and those comments relating to the Region's delegated provincial plan review responsibilities will fall under the purview of the area municipalities.

The Town of Whitby should be satisfied that the applicant has addressed the applicable matters of Provincial interests including site contamination and noise for the proposed development, and the proposed development is consistent with the Provincial Planning Statement, 2024.

Regional Servicing

Our Water and Sewer-Use-By-Law permit only one set of connections for each parcel of land. The proposed 5 lots are to be severed prior to the installation of the new connections and to obtain connection permits.

Water Supply

The subject property is located within the Zone 1 water pressure district of the water supply system for Whitby. The estimated static water pressure exceeds the maximum allowance of 550 kPa (80 psi); therefore, private pressure reducing valves will be required. Water servicing for the proposed development is available from the existing 300 mm DI watermain on Bradley Drive.

Sanitary Sewer Servicing

The Region does not expect that the increased sanitary drainage from the proposed development would negatively impact the capacity of the downstream sanitary sewers. Sanitary sewer servicing for the proposed development is available for the existing 400 mm AC sanitary sewer on Bradley Drive.

Please note that water and sanitary sewer capacity will not be allocated until a Development Agreement has been executed.

Site Servicing Plan (SS-1)

We have reviewed the Site Servicing Plan (SS-1) and offer the following comments.

1. Please include the Underside Footing Foundation (USF), Finished Floor Elevation (FFE) and sanitary lateral invert elevations to ensure the sanitary connections elevations are acceptable.
2. Please include the size and pipe material for the proposed water connections, and the grade, size, and pipe material for the proposed sanitary sewer connections.
3. Reference all proposed water and sanitary sewer connections to the Region's standards.

PDP 29-25

Attachment #8
Agency & Stakeholder Detailed Comments
File DEV-35-24 (Z-17-24)

4. Provide a Plan and Profile drawing along Bradley Drive to include the existing watermain, storm and sanitary sewers, as well as the proposed sanitary sewer laterals at the locations that cross the storm sewer.
5. Confirm the sanitary sewer connection location for the existing building and show it on this drawing.

Other comments

1. A Regional Agreement may be required for the installations of the water and sanitary sewer connections.
2. Frontage charges may be applicable and will be determined later. The Region's servicing comments can be addressed as part of the review of the related future planning/engineering applications.

Transportation and Transit

The Region has reviewed the proposed application from a transportation and transit perspective and have no comments.

Conclusion

In our review of the proposed zoning by-law amendment, we have identified servicing issues that need to be resolved. The Region's comments can be addressed through the review of the related future planning/engineering applications.

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: Housing Monitoring Report

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: PDP-30-25

Department(s) Responsible:

Planning and Development Department
(Planning Services)

Submitted by:

Roger Saunders, Commissioner of
Planning and Development

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

John Taylor, Director of Planning
Services, 905-444-2908

Lauren Sauve - Project Manager, Policy
& Heritage Planning, x2864

Danielle Coore – Planner 1, Policy &
Heritage Planning x1946

1. Recommendation:

1. That Report PDP- 30-25 be received for information.
2. That the Clerk forward a copy of Planning and Development Report PDP 30-25 to the Region of Durham, Community Growth and Economic Development.

2. Highlights:

- An estimated 19,013 units were within Registered Unbuilt Plans, and Approved Plans of Subdivision and Site Plans, as of year end 2024. Based on a 10-year historical average of 898 building permits per year, this translates to an approximate 21-year supply, including over 10-years of supply for ground-related units – well above the three-year minimum requirement in the Provincial Planning Statement, 2024.
- Eleven Plans of Subdivision were Approved by Council in 2024, accounting for 10,923 units. This is over three times the next highest volume of Council

Approved units over the last ten years (3,178 in 2015). 83% of units Council Approved in 2024 were apartments (Note: the majority of those apartment units were within Nordeagle's proposed development).

- An estimated 8,008 units were Under Review as of year-end 2024, including 4,827 units in Plans of Subdivisions and 3,181 in Site Plans.
- Since 2019, there has been a significant increase in the number of permits issued for Additional Dwelling Units (ADUs). In 2024, 288 permits were issued, which accounted for almost half (46%) of all new dwelling units.
- The overall rental vacancy rate increased to 3.6% in 2024, up from 1.7% in 2023. This marks the first time the vacancy rate has been above 3.0% - a figure identified by the Canadian Mortgage and Housing Corporation as being indicative of a healthy rental market.
- As of year end, 2024, approximately 4,400 households in Durham Region were living in assisted housing units, with an additional 10,785 households on the waiting list.

3. Background:

Planning staff monitor and report on housing activity pursuant to Official Plan policies regarding housing supply, residential growth, and intensification.

The Housing Monitoring Report focuses on the following topics:

- Housing Supply:
 - Existing population and households;
 - New housing supply in Plans of Subdivision and Site Plans; and,
 - Housing mix in Plans of Subdivision and Site Plans.
- Residential Development Approvals:
 - Registered Plans of Subdivision;
 - Council Approved Plans of Subdivision;
 - Plans of Subdivision Under Review;
 - Commissioner Approved and Under Review Site Plans; and,
 - Building Permit Trends.
- Affordable and Special Needs Housing:
 - Housing Affordability;
 - Rental Housing;
 - Assisted Housing; and,
 - Seniors Housing.

The housing monitoring report provides summarized data and statistics, as well as limited time-series data and statistics over a ten-year period, where possible.

4. Discussion:

The Housing Monitoring Report (refer to Attachment #1) provides a comprehensive review of housing activity in the Town of Whitby between January 1, 2024 and December 31, 2024, and 10 years of historical data.

Attachment #2 provides a spatial overview of residential Plans of Subdivision and Site Plan applications throughout the Town and their status as of December 31, 2024.

The following is a summary of the Town's 2024 housing activity:

- Whitby had an estimated population of 155,000 and 49,795 households as of December 2024, as reported by the Region of Durham in their Monitoring of Growth Trends report.
- As of year-end 2024, there was an estimated total of 27,020 dwelling units in the development pipeline, which includes units in both Site Plans and Plans of Subdivision that are Under Review, Council Approved, and Registered but unbuilt. This includes 21,485 units within active Plans of Subdivision and 5,535 units within active Site Plans.
- A subset of the above, an estimated 19,013 units were within Registered unbuilt or Approved Plans of Subdivision or Site Plans. Based on a 10-year historical average of 898 annual building permits, this translates to an approximate 21-year supply, including over 10-years of supply for ground-related units (singles, semis, links, towns).
- Three new plans of subdivision and eight new Site Plan applications, proposing a total of 1,821 and 2,228 dwelling units respectively, were submitted to the Town in 2024. As of year-end 2024, there were nine Plans of Subdivision and nine Site Plans under review from 2024 and previous years, comprising 4,827 and 3,181 dwelling units, respectively.
- 630 new dwelling units were created by building permits issued in 2024, comprising 26% Single detached/Semi Detached/Linked Dwelling units (SSLs), 28% Townhouse units, and 46% Additional Dwelling Units (ADUs). This is similar to 2023 (671 units), however well below the 10-year historical average of 1,018 units per year. New greenfield subdivisions in Brooklin are expected to generate increased building permit activity in the coming years, as full municipal water and wastewater, and electrical infrastructure becomes available.
- In 2024, 288 permits were issued for ADUs, which accounted for 46% of all new dwelling units, in part due to the Town's incentives through the Housing Accelerator Fund (HAF). With recent changes to the Planning Act and subsequent Whitby Council resolution permitting up to three ADUs on a residential lot, it is anticipated that the volume and proportion of ADUs will continue to be higher than historical averages.
- While the long-term trend illustrates increasing prices since the mid 2010s, there has been a slight decline / stabilization since peak house prices were reached in 2021. According to the Toronto Region Real Estate Board (TRREB), the benchmark price of a single-detached home in Whitby was \$1,084,300 in December 2024, a decrease of 1% from \$1,100,400 in December 2023.

- The overall rental vacancy rate increased to 3.6% in 2024, up from 1.7% in 2023. This marks the first time the vacancy rate has been above the 3.0% target set by the Canadian Mortgage and Housing Corporation which is said to indicate a healthy rental market.
- As of December 31, 2024, approximately 4,400 households in Durham Region were living in assisted housing units with an additional 10,785 households on the waiting list. Applications for assisted housing have continued to increase Region-wide since 2011, including a 21% increase since 2023, with seniors' households forming an increasing portion of the waiting list.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

Copies of the Housing Monitoring Report can be made available for viewing by the public at the Planning and Development Department and on the Town's website.

7. Input from Departments/Sources:

Durham Region Housing Services Department provided information related to affordable and assisted housing for the preparation of the report.

8. Strategic Priorities:

This report aligns with Council's goals of enhancing transparency and accessibility of Town Hall by: providing housing, development application, and construction data in a concise, legible format; supporting the importance affordability and healthy, balanced communities by detailing the information and metrics regarding home affordability and core housing need in Whitby; and continually improving customer service and service delivery by modernizing internal data collection and analysis methods.

This report aligns with the Strategic Priorities of the Corporate Strategic Plan by incorporating new technologies and processes into ongoing data monitoring and analysis, and by providing development data for use by internal and external customers.

All documents for this report have been reviewed to ensure they are accessible to all readers.

1.0 Introduction

The Town of Whitby regularly monitors residential development activity as required by Council-adopted Official Plan policy. This monitoring report provides a comprehensive review of housing activity in the Town of Whitby between January 1 and December 31, 2024, together with select time-series data.

All data and figures were gathered from permits and/or applications within the Town of Whitby Planning and Development Department, unless otherwise indicated. All figures are reported as of December 31, 2024, unless otherwise indicated.

Disclaimer:

While the Town of Whitby Planning and Development Department endeavours to be as accurate as possible, this report is based on information available at the time of its writing. The Town of Whitby assumes no responsibility for any errors or omissions and is not liable for any damages of any kind resulting from the use of, or reliance on, the information contained in this document. The Town of Whitby does not make any representations or warranty, express or implied, concerning the accuracy, quality, likely results or reliability of the use of the information contained in this document.

2.0 Key Findings

The following is a summary of the Town's 2024 housing activity and historical (ten-year) trends analysis:

- Whitby had an estimated population of 157,450 and 50,795 households in 2024, according to the Durham Region Monitoring of Growth Trends 2024 report.
- As of 2024, there were approximately 27,020 dwelling units in the development pipeline, which includes units in both Site Plans and Plans of Subdivision that are Under Review, Council Approved, and Registered but unbuilt.
- An estimated 19,013 units were within Registered unbuilt or Approved Plans of Subdivision or Site Plans as of year end 2024. Based on a 10-year historical average of 898 building permits per year, this translates to an approximate 21-year supply, including over 10-years of supply for ground-related units – well above the three-year minimum requirement in the Provincial Planning Statement, 2024.
- Eleven Plans of Subdivision were Approved by Council in 2024, accounting for 10,923 units. This is over three times the next highest volume of Council Approved units in the last ten years (3,178 in 2015). 83% of units Council Approved in 2024 were apartments, primarily in the Nordeagle development.
- Two Plans of Subdivisions were Registered in 2024 for a total of 520 units.
- Four Site Plans were Commissioner Approved in 2024, accounting for 261 units.
- Three new Plans of Subdivision and eight new Site Plan applications were submitted to the Town in 2024. As of year end 2024, there were nine Plans of Subdivision and nine Site Plans Under Review from 2024 and previous years, comprising 4,827 and 3,181 dwelling units, respectively.
- 630 dwelling units were created by building permits issued in 2024. While similar to the previous year (671 building permits issued), this is well below the 10-year historical average of 1,018 units per year. New greenfield subdivisions in Brooklin are expected to generate increased building permit activity in the coming years.
- Since 2019, there has been a significant increase in the number of permits issued for additional dwelling units (ADUs). In 2024, 288 permits were issued for ADUs, which accounted for almost half (46%) of all new residential units.
- While the long-term trend illustrates increasing prices since the mid 2010s, there has been a slight decline / stabilization since peak house prices were reached in 2021. According to the Toronto Region Real Estate Board (TRREB), the benchmark price of a single-detached home in Whitby was \$1,084,300 in December 2024, a decrease of 1% from \$1,100,400 in December 2023.
- The overall rental vacancy rate increased to 3.6% in 2024, up from 1.7% in 2023. This marks the first time the vacancy rate has been above 3.0% - a figure identified by the Canadian Mortgage and Housing Corporation as being indicative of a healthy rental market. According to CMHC, purpose-built rental supply in the

Greater Toronto Area has increased at its fastest pace since the early 1990s, particularly in suburban municipalities.

- As of December 31, 2024, approximately 4,400 households in Durham Region were living in assisted housing units with an additional 10,785 households on the Region's waiting list. Applications for assisted housing have continued to increase Region-wide since 2011, including a 21% increase since 2023.

3.0 Housing Supply

3.1 Existing Households

The Town's existing population and households are estimated using the latest Census (2021) and estimate of population and unit growth in the Region of Durham's Growth Monitoring reports.

Table 1 below illustrates Census of Canada existing population and households (occupied private dwellings) by structure type figures for the Town of Whitby.

Table 1: Census Population and Households (by Type of Dwelling)

Year		SSLs /	Towns	Apts	Acc Apts	Total	Population
2011	Households	30,585	4,855	4,800	725	41,000	122,000
	% of Total	74%	12%	12%	2%	100%	
2016	Households	31,670	5,530	5,475	835	43,520	128,400
	% of Total	73%	13%	12%	2%	100%	
2021	Households	33,700	6,135	5,735	870	46,460	138,500
	% of Total	73%	13%	12%	2%	100%	

Source: Statistics Canada Census Tables and Focus on Geography Series.
Totals may not add due to rounding in reported data.

Statistics Canada reported a total of 46,460 households and a population of 138,500 in Whitby as of May 2021. Broken down by structure type, the Town's 2021 occupied households consisted of 73% single-detached, semi-detached, and linked dwellings (SSLs), 13% townhouses (Towns), 13% apartments (Apts), and 2% accessory apartments (within SSLs). The total number of households grew by 6.8% between 2016 and 2021.

Durham Region Planning prepares [Monitoring of Growth Trends](#) reports, which include population and household estimates and short-term forecasts for each area municipality within the Region of Durham, as well as short-term forecasts. The Region of Durham forecast a population of 157,450 and 50,420 households for the Town of Whitby as of December 2024.

3.2 Unbuilt Housing Supply

The Town's Official Plan encourages the provision of a range of housing types and requires monitoring of whether the housing objectives in the Official Plan are being achieved.

Further, in accordance with the Provincial Planning Statement, 2024, the Town is required to maintain at all times:

- land with servicing capacity sufficient to provide at least a three-year supply of residential units available through lands suitably zoned, including units in draft approved or registered plans; and
- the ability to accommodate residential growth for a minimum of 15 years through lands which are designated and available for residential development.

In Whitby, the majority of new housing is provided through Plans of Subdivision and Site Plans. Additional new housing units outside of Plans of Subdivision and Site Plans, such as additional dwelling units (ADUs) are discussed separately in this Report.

The supply of Registered Unbuilt and Approved units as of December 31, 2024, is indicated in **Table 2** and **Figure 1** below. These comprise units within:

- Plans of Subdivision which have been approved by Council in 2024 or earlier, but have not been registered as of December 31, 2024
- Plans of Subdivision that have been registered but not built (building permits have not been issued) as of December 31, 2024
- Site Plans which have been Approved by the Commissioner of Planning but for which building permits have not been issued as of December 31, 2024

It should be noted that in the past, Site Plans were not accounted for in the housing development pipeline, nor were they included in estimated years of supply. While they were discussed more generally and major projects highlighted, this is the first year comprehensive Site Plan data is being reported.

Table 2: Registered Unbuilt and Approved Units by Structure Type

	SSLs	Towns	Apartments	Total
Plans of Subdivision	3,344	2,856	10,459	16,659
Site Plans	8	850	1,496	2,354
Total	3,352	3,706	11,955	19,013
% Distribution	18%	19%	63%	100%

Figure 1: Registered and Approved Units by Structure Type

As of December 31, 2024, there was a total of 19,013 dwelling units within Plans of Subdivision or Site Plans that are either Registered unbuilt or Approved. Based on a 10-year historical average of 898 building permits issued per year, the development pipeline translates to an overall supply of approximately 21 years of all new residential unit types, as shown in **Table 3**. This is well above the minimum three-year supply as prescribed in the 2024 Provincial Planning Statement and the Town of Whitby Official Plan. With respect to low and medium-density structure types (singles, semis, towns), the Town has an estimated 10-year supply in the development pipeline.

Table 3: Years' Supply

	SSLs	Towns	Apts	Total
2024 Registered Unbuilt and Draft Approved Units	3,352 (18%)	3,706 (19%)	11,955 (63%)	19,013 (100%)
10-year Average Annual Permits¹	389 (43%)	313 (35%)	196 (22%)	898 (100%)
Approximate Residential Supply (years)	9	12	61	21

1. Permits for ADUs have not been included in the calculation of supply since they are additional units generally built in existing dwellings after development, and therefore not generally contemplated in Plans of Subdivision or Site Plans. **Section 6.6 & 6.7** discuss information ADUs.

As noted above, the calculation of years' supply reflects units within Council Approved and Registered unbuilt Plans of Subdivision and Commissioner Approved Site Plans. Additional residential supply is available within plans that are Under Review, through intensification and infill with approved zoning, as well as on lands designated for residential development but with no applications yet (e.g. Brooklin).

As of year-end 2024, there are approximately 8,008 units Under Review to complete what can be considered the Town's Development Pipeline. Applied against the average annual building permits issued, this translates to an additional 9 years of residential supply. Units in Plans of Subdivision and Site Plans that are still Under Review are discussed in Sections 6.3 and 6.4 of this report. It is important to note that units Under Review are subject to change.

The total number of units in the "development pipeline" fluctuates from year to year as new Plans of Subdivision are received by the Town, as units Under Review are approved by Council, as draft approved Plans of Subdivision are registered, and as registered plans are built out

4.0 Housing Supply in Plans of Subdivision

As illustrated in **Table 4**, as of 2024 there were approximately 21,485 units in active Plans of Subdivision, comprising 4,827 units Under Review, 14,601 units in Council approved subdivisions that weren't yet registered, and 2,058 units in registered subdivisions that weren't yet built. The mix of units in the development pipeline was approximately 26% SSLs, 22% Towns, and 52% Apts.

Table 4: Supply of Units in Plans of Subdivision by Unit Type as of December 31, 2024

Status	SSLs	Towns	Apts	Total
Under Review	2,264 (47%)	1,898 (39%)	665 (14%)	4,827 (100%)
Council Approved	3,056 (21%)	2,619 (18%)	8,926 (61%)	14,601 (100%)
Registered Unbuilt	288 (14%)	237 (12%)	1,533 (74%)	2,058 (100%)
2024 Total Unbuilt Supply	5,608 (26%)	4,754 (22%)	11,124 (52%)	21,485 (100%)

The significant supply of units can be attributed to two main factors:

- A high volume of ground-related (singles, semis, towns) in the Brooklin Secondary Plan Area which are either Under Review or Draft Approved, as well as Registered units in West Whitby that continue to build out.
- A large number of apartment units are attributed to the Draft Approval of Nordeagle (7,034 units) and Tribute (1,639) developments in 2024 as well as smaller scale high density residential blocks in larger mixed subdivisions which have been Council approved but not registered or remain Under Review.

It is important to note that a number of these apartment blocks, even once registered, will require subsequent approvals through the Site Plan process before building permits can be issued. The timeline for these developments is therefore uncertain and many will build out over the course of several years.

Figure 2 shows the supply of dwelling units in Plans of Subdivision by status and structure type.

Figure 2: Unbuilt Supply in Plans of Subdivision, 2024

5.0 Housing Supply in Site Plans

Different than Plans of Subdivisions, Provincial Legislation delegates the approval of Site Plans to Commissioners of Planning. It should also be noted that the Planning Act was recently amended to exempt developments comprised of less than 10 units, from Site Plan Control. The Town's Site Plan Control By-law generally exempts low density development (SSL's) from Site Plan approval.

Site Plans are often required to deliver medium or high-density blocks in Plans of Subdivision as well as developments in the form of intensification and infill within existing lots.

As illustrated in **Table 5**, as of year end 2024 there were 5,535 units in active Site Plans, comprising 3,181 units Under Review, 2,254 units in Commissioner Approved Site Plans that weren't yet registered, and 100 units in registered Site Plans (executed Site Plan Agreements) that weren't yet built.

Table 5: Supply of Units in Site Plans by Unit Type as of December 31, 2024

Status	SSLs	Towns	Apts	Total
Under Review	32 (1%)	674 (20%)	2,475 (79%)	3,181 (100%)
Commissioner Approved	8 (1%)	750 (33%)	1,496 (66%)	2,254 (100%)
Registered Unbuilt	0 (0%)	100 (100%)	0 (0%)	100 (100%)
2024 Total Unbuilt Supply	40 (1%)	1,524 (27%)	3,971 (72%)	5,535 (100%)

As shown in **Figure 3**, the majority of units within Site Plan applications are in the form of medium to high density, including 72% apartments.

Figure 3: Unbuilt Supply in Site Plans, 2024

The higher supply of apartments is largely attributable to Site Plans submitted for Phases of previously approved subdivisions. Examples include Brookfield's Dockside development (SW-2008-01), Tribute's Charles Street development (SW-2024-01), and the Nordeagle Development (SW-2018-01).

Site Plan applications for approved medium and high-density residential blocks in larger mixed subdivisions are also contributing a significant volume of townhouse units. Examples include blocks in subdivisions at the southwest corner of Baldwin and Columbus (SW-2021-02) in Brooklin.

Finally, infill applications in Downtown Whitby and other existing built-up areas are contributing primarily townhouse and apartment units.

Section 6.4 contains more detailed information on Site Plans.

6.0 Residential Development Approvals

6.1 Registered Plans of Subdivision

Table 6 shows the dwelling units within Plans of Subdivision that were Registered in 2024. A total of 520 units were within Plans of Subdivision registered in 2024, comprising 21% SSLs, 20% Towns, and 59% Apts.

Table 6: Registered Plans of Subdivision, 2024

Developer	Subdivision File	Registered Plan #	SSLs	Towns	Apts	Total
Whitby Taunton Holdings	SW-2014-04; Ph 2A	40M-2766	108		190	298
Brookfield Residential Garden	SW-2021-09	40M-2777	0	102	120	222
Total			108 (21%)	102 (20%)	310 (59%)	520 (100%)

Table 7 illustrates the annual housing mix for all plans registered between 2015 and 2024. A total of 8,866 units were registered in the last ten years, comprising 43% SSLs, 36% Towns, and 21% Apts. This overall housing mix is illustrated in **Figure 4**. The higher number of registrations in 2019, 2020, and 2023, are attributed to subdivisions in West Whitby, which are currently being built or recently occupied.

Table 7: Units Registered Annually through Plans of Subdivisions (2015-2024)

Registration Year	SSLs	Towns	Apts	Total
2015	90	26	0	116
2016	154	581	300	1,035

Total (% Mix)		784 (7%)	1,104 (10%)	9,035 (83%)	10,923 (100%)

Note – where applicants provided a range in the draft plan, the average has been reflected.

Eleven Plans of Subdivision were approved by Council in 2024 with a total of 10,923 units, comprising 784 SSLs, 1,104 Towns, and 9,035 Apts.

Table 9 shows the dwelling units within all Plans of Subdivisions approved by Council between 2015-2024.

Table 9: Units in Council Approved Plans of Subdivisions (2015-2024)

Year	SSLs	Towns	Apts	Total
2015	1,952	1,037	189	3,178
2016	291	283	75	649
2017	583	299	378	1,260
2018	317	105	89	511
2019	0	215	1,141	1,356
2020	299	113	98	510
2021	1,093	833	0	1,926
2022	737	1,758	126	2,621
2023	565	576	0	1,141
2024	784	1,104	9,035	10,923
10-year Total	6,621	6,323	11,131	24,075
10-year Average	662	632	1,131	2,408
10-year Housing Mix	28%	26%	46%	100%

Over the ten-year period between 2015 and 2024, Council approved Plans of Subdivision containing a total of 24,075 new units, comprising approximately 28% SSLs, 26% Towns, and 46% Apts. This overall housing mix is illustrated in **Figure 5**.

The high number of both overall and apartment units approved in 2024 is largely attributed to the Nordeagle application at Victoria and Jim Flaherty Drive expected to deliver over 7,000 new apartment units over the coming years.

The highest number of SSLs and Townhouse units approved in 2015 represents the approvals of Plans of Subdivision within West Whitby.

The continuation of a high number of SSLs and Towns Council Approved in 2024 represents approvals in the expanded Brooklin Community Secondary Plan, including 1,115 units being approved near Anderson Street and Conlin Road (SW-2021-04 and SW-2021-06). It is expected that the number of approved units will continue to increase in the coming years as subdivisions are approved for Brooklin's designated greenfield areas.

Figure 5: Housing Mix in Council Approved Plans of Subdivisions, 2024 and 10-Year Average Total

As mentioned above, the higher proportion of apartments than normal in 2024 is primarily attributed to the Nordeagle and Tribute developments.

The rate at which units within Council approved Plans of Subdivision are subsequently absorbed in the housing marketplace depends on when those plans are registered, and when the registered plans are actually built.

6.3 Plans of Subdivision Under Review

The Planning and Development Department received three new residential Plans of Subdivision applications in 2024, for a total of 1,821 proposed dwelling units. Two of these Plans of Subdivision have since been Draft Approved (SW-2024-01 and SW-2024-02).

Table 10 shows the dwelling unit type and number of units for each plan of subdivision Under Review as of December 31, 2024. This includes subdivisions submitted prior to 2024, which have not yet been approved as well as SW-2024-03, submitted in 2024 and still Under Review.

Table 10: Units in Plans of Subdivision Under Review (as of December 31, 2024)

Housing Mix %		45%	42%	12%	100%

Note – where applicants provided a range in the draft plan, the average has been reflected.

As shown, there were nine Plans of Subdivision Under Review as of December 31, 2024, comprising a total of 5,006 units. The majority of these units (96%) are proposed within the Brooklin Secondary Plan. The overall housing mix within Plans of Subdivision Under Review is illustrated in **Figure 6**.

Figure 6: Housing Mix in Plans of Subdivision Under Review as of December 2024

6.4 Site Plan Approvals

Dwelling units within Site Plans approved by the Commissioner of Planning in 2024 are shown in **Table 11**.

Table 11: Commissioner Approved Site Plans, 2024

Developer	File	SSLs	Towns	Apts	Total
Madison Brooklin Developments	SP-04-24	0	100	0	100
See Path Group Inc	SP-02-24	0	41	0	41
Inuka Developer. Inc.	SP-11-22	8	0	60	68
Stylux Whitby	SP-15-21	0	52	0	52
Total (% Mix)		8 (3%)	193 (74%)	60 (23%)	261 (100%)

Four Site Plans were approved by the Commissioner of Planning in 2024 with a total of 261 units, comprising 8 SSLs, 193 Towns, and 60 Apts.

As of December 31, 2024, there were nine Site Plans Under Review from 2024 and previous years, comprising 3,181 dwelling units.

6.5 Other Residential Approvals

Not all potential housing production is achieved through the mix of dwelling unit types contained in Plans of Subdivisions and Site Plans. In addition to these units, other application types provide line of sight on additional residential units including official plan amendments and rezoning applications that will require future Site Plan approvals. Applications for land division also provide for a small number of new infill units. Notable residential re-zoning or official plan amendment applications and approvals during 2024 include:

- 110 Victoria St W - Official Plan and Zoning By-Law Amendments for 208 apartment units
- 3125 Garden St – Zoning By-Law Amendment for 250 apartment units

The applications and approvals listed above represent infill intensification and increased height / density outside a plan of subdivision.

This section does not include outstanding applications approved by Council in previous years, or concurrent applications (e.g Site Plans) that have been accounted for in other sections of this report.

6.6 Building Permit Trends

Table 12 below provides comparative data on building permits issued for new residential dwelling units between 2015 and 2024. This data provides an indication of housing production by the number, type, and percentage distribution of dwelling unit types. The total number of residential building permits issued includes all new dwelling units created through permits.

Table 12: Total Dwelling Units Generated by Building Permits, by Unit Type (2015-2024)

Year	SSLs	%	Towns	%	Apts	%	Acc Apts	%	Total Units
2015	199	43%	91	20%	129	28%	43	9%	462
2016	214	32%	272	40%	128	19%	61	9%	675
2017	80	21%	258	69%	0	0%	38	10%	376
2018	441	67%	109	16%	69	10%	44	7%	663
2019	704	57%	481	39%	2	0%	44	4%	1,231
2020	636	46%	417	31%	228	17%	86	6%	1,367
2021	1,070	46%	733	32%	385	16%	137	6%	2,325
2022	261	15%	516	29%	801	45%	198	11%	1,776
2023	116	17%	76	11%	218	33%	261	39%	671
2024	167	26%	175	28%	0	0%	288	46%	630
10-year total	3,888	38%	3,128	31%	1,960	19%	1,200	12%	10,176
10-year average	389		313		196		120		1,018

There has been a total of 10,176 new dwelling units created through building permits in the last 10 years (average 1,018 units per year), comprising 38% SSLs, 31% Towns, 19% Apts, and 12% ADUs. In 2024, there were 630 building permits issued for new dwelling units, comprising 26% SSLs, 28% Towns, 0% Apts, and 46% ADUs.

The large volume in permits issued between 2019 and 2021 reflects the development of newly approved subdivisions in the West Whitby Community Secondary Plan Area, which began construction in 2018.

Building permits in 2023 and 2024 were lower than previous years as a significant portion of West Whitby has built out and approvals are not yet in place for new ground-related product in Brooklin. That said, with recent Registrations in West Whitby in 2023 and subdivision approvals starting in Brooklin over the past few years, it is anticipated that building permit activity will steadily increase over the coming years, provided that the necessary infrastructure (water/wastewater; electricity) is provided in a timely manner.

Figure 7 provides a visual representation of annual residential building permits over the last 10 years.

Figure 7: Annual New Dwelling Units by Unit Type, 2015-2024

Based on the Region of Durham's 2023 Annual Building Permit Activity Review, permits issued for new residential units in all of Durham decreased by 10% to 5,870 units, compared to 6,530 in 2022. At the time of writing this report, the Region had not released its 2024 Annual Building Permit Activity Review.

Of all residential building permits for new dwelling units issued in Durham Region, an estimated 11% were for new dwelling units in Whitby; down from 27% in 2022. As discussed above, the Town has experienced a decrease in the number of building permits issued in 2023 compared to previous years. While the Region also experienced a decline, it was less significant than that of the Town.

6.7 Additional Dwelling Units (ADUs)

The Town of Whitby permits ADUs within ground-related dwelling unit types, subject to the policies of the Official Plan, as implemented through the Zoning By-laws. The Official Plan policies also permit additional dwelling units within additional built forms and separate accessory structures.

Recent changes to the Planning Act and subsequent Whitby Council resolution, Official Plan Amendment and Zoning By-law Amendments, permit up to three ADUs on a residential lot. These changes are intended to support both the Town and the Province in meeting envisioned Provincial Housing targets (i.e. Town's 18,000 unit pledge), getting supply to market more quickly, and addressing housing affordability.

Figure shows the number of new registered ADUs by year for the past 10 years.

Figure 8: Annual Additional Dwelling Units, 2015-2024

In 2024, 288 building permits were issued for ADUs which accounted for close to half (46%) of all new residential building permits issued in the Town. As shown in **Figure 8**, there has been a significant increase in the number of ADU permits since 2021. The proportion of ADUs relative to other structure types has also been well above the average in 2023 and 2024, partially due to higher numbers of ADU permits but also resulting from lower permits overall. It is anticipated that the trend toward higher numbers of ADUs will continue for the foreseeable future as ADUs represent a more affordable housing option.

7.0 Residential Intensification

At its inception in 2006, the Provincial Growth Plan (A Place to Grow: Growth plan for the Greater Golden Horseshoe) identified an intensification target of 40% of all new residential development to occur within the Built Boundary (as defined by the Province) of each Upper Tier Municipality (Region of Durham) annually from 2015 to 2031. Through the previous Regional Official Plan, the Town was assigned an annual intensification target of 45%, 11,963 units, which previous iterations of this report monitored.

Since the intensification target first appeared in the Growth Plan, the Town achieved an average of 45% intensification, however with significant fluctuations on an annual basis.

With the recent removal of the Growth Plan and incorporation of specific policies into the Provincial Planning Statement, the Province has removed the delineated built-boundary as a means of tracking intensification. Instead, the Provincial Planning Statement 2024 continues to require municipalities to set minimum targets for intensification and redevelopment within existing built areas but does not specify a geographic boundary for which intensification is to apply, nor a quantitative minimum.

Through the Town's Official Plan Review and Update (currently underway), appropriate targets for intensification and infill as well as a geography for which it will apply will be considered. Once the Official Plan Review Amendment is approved, the Town will monitor intensification based on new/revised targets and geographic areas.

8.0 Affordable, Special Needs and Rental Housing

8.1 Affordability

The Provincial Planning Statement, 2024 states that planning authorities shall establish and implement minimum targets for the provision of housing which is “affordable”. This is defined as accommodation costs which do not exceed the lesser of 30 percent of gross household income of low- and moderate-income households or is a minimum of 10% below the average purchase price of resale unit in the municipality (ownership housing) or exceed 30% of gross annual household income for low- and moderate-income households (rental housing).

The Town of Whitby Official Plan includes a housing target of at least 25% of all new residential units produced within each area municipality to be affordable to low- and moderate-income households. The Region of Durham also has a comprehensive housing plan titled “At Home in Durham” that sets out goals and actions to improve access to housing, ensure affordability in housing, protect existing housing supply and build capacity in the housing system while encouraging housing diversity.

Detailed household income data is required to evaluate Whitby’s percentage of “affordable” housing generated yearly and is generally only available for Census years. Generally, the Town monitors vacancy rates, rental rates and house prices to generally assess affordability.

Household Income

The 2021 Census indicated that the median gross household income for 2020 was \$123,000 in Whitby and \$107,000 in Durham Region, and that approximately 21% of households in Whitby spent more than 30% of their total income on housing costs.

House Prices

While the long-term trend illustrates increasing prices since the mid 2010s, there has been a slight decline / stabilization since peak house prices were reached in 2021. According to the TRREB, the benchmark price of a single-detached home in Whitby was \$1,084,300 in December 2024, a decrease of 1% from \$1,100,400 in December 2023.

In new developments, the average price of a new single detached home in the Oshawa Census Metropolitan Area (CMA) and its associated municipalities (Whitby, Oshawa, and Clarington) was \$1,287,532 in 2024, an increase of 8% over the average price in 2023 (\$1,187,200) as reported by the Canadian Mortgage and Housing Corporation (CMHC).

Mortgage rates for 1-year terms remained stable at 7.24% over the 2024 calendar year, while the 5-year rate also held steady at 6.49% (TRREB Market Watch)

8.2 Rental Housing

CMHC publishes housing information on their website through the Housing Information Portal and the Housing Market Data tables, for the Oshawa CMA, which includes the

Town of Whitby. The following section relies on data from CMHC's Rental Market Survey tables, which include municipal-level data.

Vacancy Rates

CMHC considers a vacancy rate of 3.0% or higher to be indicative of a healthy rental market. **Table 13** below illustrates the residential vacancy rates by dwelling unit type for private apartments in Whitby for the period between 2015 and 2024 except where data is unavailable.

Table 13: Residential Vacancy Rates by number of bedrooms (2015 - 2024)

Year	Bachelor	1 Bedroom	2 Bedroom	3+ Bedroom	Overall
2015	1.8%	0.8%	1.9%	0.40%	1.4%
2016	-*	0.8%	1.2%	-*	1.1%
2017	0.0%	1.3%	1.3%	1.6	1.3%
2018	0.0%	2.1%	1.1%	1.2	1.4%
2019	0.0%	2.4%	1.0%	0.4	1.4%
2020	-*	1.3%	1.8%	-*	1.8%
2021	0.0%	1.9%	-%	1.1%	1.8%
2022	0.0%	1.5%	1.1%	0.9%	1.2%
2023	**	2.9%	1.5%	0.4%	1.7%
2024	**	**	3.7%	3.1%	3.6%

Source: CMHC Rental Market Survey

Note * - CMHC indicates that data is suppressed to protect confidentiality, or data is not statistically reliable

Figure 9 illustrates the vacancy rates in Whitby from 2015-2024. According to the 2024 Primary Rental Market Statistics — Whitby tables, based on the 2024 CMHC Rental Market Survey, the overall vacancy rate for Whitby in October 2024 was 3.6%, which is higher than the 2023 rate of 1.7%, and marks the first time the vacancy rate was above 3.0% target since before 2015. According to CMHC, purpose-built rental supply in the Greater Toronto Area has increased at its fastest pace since the early 1990s, particularly in suburban municipalities. Growth in supply has outpaced growth in demand which was especially noticeable in Durham Region.

Figure 9: Residential Rental Vacancy Rate in Whitby, by year (2015-2024)

Source: CMHC Rental Housing Market Reports

Rental Costs

Table 14 shows the average monthly rental rates for bachelor, 1-bedroom, 2-bedroom, and 3-bedroom plus rental units in Whitby for the period between 2015 and 2024.

Table 14: Average Monthly Residential Rental Rates (2015 - 2024)

Year	Bachelor	1 Bedroom	2 Bedroom	3+ Bedroom	Average
2015	\$861	\$963	\$1,066	\$1,152	\$1,020
2016	-*	1,019	\$1,103	\$1,222	\$1,052
2017	\$895	\$1,027	\$1,124	\$1,252	\$1,096
2018	\$905	\$1,069	\$1,152	\$1,288	\$1,137
2019	\$1,036	\$1,178	\$1,251	\$1,325	\$1,227
2020	\$1,022	\$1,252	\$1,330	\$1,425	\$1,304
2021	\$890	\$1,272	\$1,390	\$1,471	\$1,356
2022	\$ 1,010	\$1,312	\$1,393	\$1,444	\$1,349
2023	**	\$1,287	\$1,433	\$1,533	\$1,397
2024	\$1,184	\$1,525	\$1,656	\$1,746	\$1,641

Source: Canadian Municipal Housing Corporation

Note – **CMHC indicates that data is suppressed to protect confidentiality, or data is not statistically reliable

In Whitby, the overall average monthly rent for all types of units in 2024 was \$1,641 per month. From 2023 to 2024, the average rental rate increased slightly for all apartment types. The rest of the Oshawa CMA also experienced increases in rent compared to 2024. Average monthly rent in the whole CMA for all unit types was \$1,666 in 2024. Rent in Whitby increased at a higher rate than its CMA, as Oshawa CMA saw a 6% increase and Whitby saw a 17% increase between 2023 and 2024.

Figure 10 below illustrates the increase of average rents between 2015 and 2024.

Figure 10: Average Monthly Residential Rental Rates in Whitby, by Year (2015-2024)

Source: Canadian Municipal Housing Corporation

8.3 Assisted Housing

In Whitby, housing assistance is offered through several programs, through all levels of government and through private providers. The Region of Durham funds and monitors most community housing providers in the region and also operates the Durham Regional Local Housing Corporation (DRLHC), the largest community housing provider in Durham. The most prevalent form of assistance for tenants is through the rent-geared-to-income (RGI) program, where the tenant pays rent relative to what generally amounts to 30% of their income. Other forms of rent assistance include supplements and the Durham Housing Benefit (DHB).

The following section relies on data from Durham Region Housing Services to summarize affordable housing supply and demand within Whitby.

Table 15 shows the supply of different types of Assisted Housing units in Whitby in 2024 compared to the year prior. As shown, there were 1,709 Assisted Housing units in Whitby in 2024, and increase from 2023. Among the 1,709 units, over half of these units receive RGI assistance.

Table 15: Supply of Assisted Housing Units in Whitby

Assisted Housing Type	Number of Units 2023	Number of Units 2024
Regional Community Housing Units	1,307	1,307
Affordable Housing	139	165
Federal Co-ops & Non-Profits (units outside Regional administration)	237	237
Private Landlords	-	-
TOTAL	1,683	1,709

Source: Durham Region Housing Services

-*: Region had agreements with some private landlords to provide RGI. This no longer exists.

There continued to be a number of households on the waiting list for RGI housing in Durham Region in 2024. The 'waitlist' is categorized by location, where applicants resided at time of application, while the 'housed' figures are categorized based on where households were found units. The waitlist for RGI in Durham was 10,785 households in 2024. This is a 21% increase in the number of applicants from 2023 which amounted to 8,920 applicants. Durham Region Housing Services reports that the current region-wide supply of RGI housing was approximately 4,400 units, which has remained largely unchanged since 2006.

This waitlist is only but a part of people in Durham waiting for some form of subsidized or assisted housing. Federal Co-ops and Non-profit housing providers will have their own waitlists.

It should be noted that the number on the waiting list fluctuates, as households find housing, and as new households are added to or removed from the waiting list. It is often advised that applicants find market housing while waiting for assisted housing, due to the length of the waitlist relative to available units.

8.4 Seniors' Housing

Since the early 2000's, there has been an increase in the number of development applications for housing specifically intended for senior citizens. The nature of this type of residential development usually falls somewhere between a fully licensed nursing home or home for the aged, and a seniors' rental apartment building such as Regency Villa or Durham Christian Homes. This is a form of housing that is satisfying a growing market niche.

There appears to be a shift towards development proposals which incorporate a range of unit types and services within the same development, ranging from long-term care to supported living, to fully independent units.

Notable recent developments geared towards seniors include: Wellings of Whitby, at Garden St. and Taunton Rd. E., totalling 336 units, and an application for 263 units at 1 Scadding Ave.

Town of Whitby

Staff Report

whitby.ca/CouncilCalendar

Report Title: CUPE 53 Whitby Naming Rights Sponsorship of Arena 5 at Iroquois Park Sports Centre

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: CAO 10-25

Department(s) Responsible:

Office of the Chief Administrative Officer

Submitted by:

Sarah Klein, Deputy CAO

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Karol Murillo Corrigan, Senior Manager
of Economic Development,
murillocorrigank@whitby.ca

Chris Reed, Acting Advertising and
Sponsorship Sales Manager,
reedc@whitby.ca

1. Recommendation:

1. That Council approve entering into a third one (1) year sponsorship agreement effective until May 1, 2026 with CUPE 53 Whitby for a Naming Rights Sponsorship at Iroquois Park Sports Centre (IPSC), including keeping Arena 5 as “CUPE 53 Whitby Arena 5”, based on the sponsorship package and other terms and conditions identified in Report CAO 10-25.

2. Highlights:

- The Advertising and Sponsorship Division of Economic Development actively solicits the community for sponsorship participation in Town recreational facilities. Top-level sponsorship packages include ‘Naming Rights’ to certain facilities, subject to Council approval.
- The purpose of this report is to seek Council’s approval to continue with the proposed Naming Rights Sponsorship by CUPE 53 for Arena 5 at Iroquois Park Sports Centre (IPSC) for a one (1) year term.

- The sponsorship of Arena 5 at IPSC has been occupied by CUPE 53 Whitby since May 1, 2022.
- Subject to Council's approval, IPSC Arena 5 would remain "CUPE 53 Whitby Arena 5" for the term of the sponsorship. The total revenue that would accrue to the municipality over the term of the sponsorship would be \$15,000 + HST.
- The proposed name, "CUPE 53 Whitby Arena 5", would continue to be used in Town of Whitby publications, promotional materials, rental permits, and the website as appropriate.
- CUPE 53 Whitby is responsible for the production and installation costs associated with any updates to the sponsorship materials. This is standard practice with the Town's sponsorship program. Along with the naming rights, a suite of signage and other marketing benefits form part of the naming rights sponsorship package.

3. Background:

Under the Municipal Property and Facility Naming Policy (Policy MS 250), staff are required to report to Council for approval of corporate naming rights to Town property or property features.

Advertising and Sponsorship, part of the Economic Development Division, Strategic Initiatives, is responsible for sponsorship sales initiatives, which include naming rights (title) to certain Town property features. This program began in 2000 at IPSC and expanded to include the Civic Recreation Complex in 2003, McKinney Centre in 2024, the new Port Whitby Marina (PWM) Clubhouse banquet room and the McKinney Youth Drop-in Centre in 2005, and the new Brooklin Community Centre and Library in 2010.

In February 2009, Council approved the naming of Scotiabank Arena 1 at IPSC, which remained active until 2024. As approved by Council previously, it is anticipated upon a signed agreement that Okanagan Hockey will be moving their naming from Arena 4 to Arena 1 in the next month.

The balance of the arenas at IPSC currently have the following naming rights sponsorships: Whitby Orthodontics Arena 2, Owasco Arena 3, and Booster Juice Arena 6.

4. Discussion:

CUPE 53 Whitby represents over 500 full-time and part-time Town of Whitby employees. Town of Whitby staff represented by CUPE 53 Whitby serve valuable occupations throughout our municipality and specifically within our facilities as clerks, lifeguards, gardeners, labourers, program coordinators, and many other professions, ensuring that the facilities are welcoming, fun, and safe for the community to enjoy. CUPE 53 Whitby annually supports many charitable organizations, mainly focusing on local charities and groups within our community,

including Feed the Need Durham, the Bethesda House, the Denise House, and the Whitby Toy Drives.

The proposed fee for the sponsorship package reflects current market conditions and is in line with the sponsorship range of fees currently available and sold within IPSC. The proposed CUPE 53 Whitby naming rights sponsorship package is the same as the current package, which includes the following components at IPSC:

Arena 5 Corporate Branding:

- Two (2) 7' x 7' full-door graphics wrapped on each set of double arena entrance doors;
- One (1) illuminated logo above each set of entrance doors;
- One (1) 8' x 16' backlit sign in featured position under score clock;
- One (1) 4' x 12' backlit sign behind visitors' bench wall;
- Full graphics wrap on IPSC Zamboni; (McKinney)
- One (1) 30" x 192" double-size, premium placement rink board sign;
- One (1) Center Ice 35' x 20' in-ice logo;
- Two (2) Neutral Zone Logos 15' x 2' in-ice logos; and
- Four (4) 11" x 17" dressing room door signs.

*Note: CUPE has the option to choose as few or as many branded items from this list. Production costs are additional and are covered by the sponsor.

Additional Exposure and Benefits:

- Host one (1) free public community skate (open to the first 250 participants) per year, promoted on the Town's corporate channels;
- Five (5) CUPE Rink board signs. One in each of the remaining rinks at IPSC;
- Two (2) CUPE Rink board signs (if available). One in each of the two hockey rinks at McKinney Centre;
- One (1) complimentary, 20-second digital ad displayed on IPSC lobby TVs;
- CUPE logo and sponsorship recognition on Town of Whitby website; and
- Promotion on the Town's social media platforms. i.e., Promotion of free public skate.

The sponsorship package, as summarized, would be incorporated into the Town's standard Sponsorship Agreement and follow all guidelines and requirements outlined in the Paid Advertising and Sponsorship Policy MS 390.

5. Financial Considerations:

The total revenue over the one (1) year sponsorship term would be \$15,000 + HST. The client is responsible for the cost of the design, production and installation of the sponsorship signage and materials.

Net revenue generated by the Advertising and Sponsorship program directly benefits the public by reducing the net cost of providing municipal services at Town facilities and, therefore, helps to mitigate property tax increases.

6. Communication and Public Engagement:

The Advertising and Sponsorship Division will engage the Communication and Creative Services Division to incorporate appropriate sponsorship opportunities, i.e., free skate, communications, and social calendar.

7. Input from Departments/Sources:

This report has been reviewed by internal departments, including Community Services, Communications and Creative Services, and Finance.

8. Strategic Priorities:

This initiative is consistent with the Town's Community Strategic Plan, specifically Strategic Pillar 4: Whitby's Government. It addresses Objective 4.1 - Address community needs through collaboration and strategic partnerships, specifically Action 4.1.2 - Strengthen existing and build new partnerships. It also addresses Objective 4.4 - Ensure fiscal accountability and responsibly plan for growth, specifically Action 4.4.1 - Deliver services that respond to community needs while balancing the impact to the taxpayers.

This initiative takes sustainability and accessibility standards into account when determining locations of advertising and sponsorship materials.

Town of Whitby Staff Report

whitby.ca/CouncilCalendar

Report Title: 2024 Annual Sustainability and Climate Change Report

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: CAO 14-25

Department(s) Responsible:

Office of the Chief Administrative Officer

Submitted by:

Sarah Klein, Deputy CAO

Acknowledged by M. Gaskell, Chief Administrative Officer

For additional information, contact:

Sarah Shields, Project Manager,
Sustainability and Climate Change

1. Recommendation:

1. That Report CAO 14-25 be received as information; and
2. That the Clerk's office forward a copy of Staff Report CAO 14-25 to the Region of Durham's Sustainability Department.

2. Highlights:

- The 2024 Annual Sustainability Report (Attachment 1) highlights the Town of Whitby's sustainability and climate change actions and successes in 2024.
- This report allows the Town to meet its climate change commitments, including disclosing corporate greenhouse gas (GHG) emissions and Carbon Disclosure Project (CDP) score requirements as a member of the Global Covenant of Mayors and signatories on the C40 Cities Race to Resilience and Race to Zero campaigns.
- Key achievements in 2024 include:
 - The West Lynde neighbourhood was approved as Whitby's first Sustainable Neighbourhood Action Program (SNAP) in partnership with Central Lake Ontario Conservation Authority and Durham Region;

- Whitby community members planted over 800 trees through the LEAF spring and fall community planting events and 38 trees were planted through the Backyard tree planting program;
- Fourteen new EV chargers were installed throughout Whitby including the first level 3 – DC fast charging station; and
- The Town offered an additional incentive of up to \$5,000 through the Federal Housing Accelerator Fund grant for Whitby residents participating in the Durham Greener Homes Program to support home energy retrofits.

3. Background:

The Town of Whitby recognizes that sustainability is a priority, both corporately and within the community. The Town has the following Council-endorsed strategic plans and reporting commitments to guide implementation:

Community Strategic Plan (2023)

The Community Strategic Plan provides a shared vision and objectives for how the Town Council and Staff will work together to deliver on community priorities. Within Whitby's Community Strategic Plan are four strategic pillars with the second strategic pillar focusing on Whitby's Natural and Built Environment. The actions outlined in this report specifically align with the first objective of this pillar: Demonstrate environmental leadership in sustainability and addressing climate change.

Climate Emergency Response Plan

The Whitby Climate Emergency Response Plan is the primary mechanism to respond to a changing climate across the community. Due to the complexity and different approaches necessary to fully understand the response needed to address climate change, the Whitby Climate Change Master Plan has been divided into two phases:

- Phase 1: Resilience
- Phase 2: Mitigation

Phase 1 – Resilience (2022)

Phase 1 involved the development of a Resilience Plan, which was approved by Council in September of 2022. The purpose of the plan is to address the climate changes already experienced in Whitby and expect to experience in the future even with the adoption of GHG emissions mitigation measures. Risk and vulnerability modelling was done by developing two future scenarios for the Town of Whitby:

- An adapted scenario, where measures to reduce the direct and indirect risks of climate change are applied across the community; and
- A business-as-usual scenario, which includes growth and development without a climate adaptation lens.

To support the achievement of the adaptation actions, a detailed five-year community-led implementation plan has been developed.

Phase 2 – Mitigation (2023)

In December 2023, Climate Emergency Response Plan, Phase 2: Mitigation was completed and endorsed by Council. Phase 2 focused on climate mitigation and identified the sources of GHG emissions in Whitby and provided recommendations to reduce GHG emissions. The Mitigation Plan was developed to help prevent climate change from occurring in the future through the elimination of community greenhouse gas (GHG) emissions.

The development of the Mitigation Plan included modelling the size of the climate challenge in Whitby. The Mitigation Plan provides low-carbon pathway and recommendations to meet the Town's community-wide GHG emissions reduction targets. Implementing the Mitigation Plan's low-carbon scenario will result in improved energy efficiency in all sectors (i.e., residential, institutional, commercial, and industrial buildings; transportation; and municipal operations) and will create opportunities for economic growth and community development.

Whitby Green Standard (2020)

The Whitby Green Standard was endorsed by Council in September 2020 and is aimed to develop a more sustainable community and support Whitby's goal to reduce GHG emissions. It applies to all new development in the Town that requires a Site Plan or Draft Plan of Subdivision Application.

Council endorsed that all new Town Facilities are built to achieve Tier 3 of the Whitby Green Standard.

Zero Carbon Whitby (2021)

[Zero Carbon Whitby](#) was endorsed by Council in March 2021; this plan serves as the Town's Corporate Energy Management Plan and Corporate Climate Adaptation Plan.

Zero Carbon Whitby has been developed as a framework for implementing a low carbon decision mechanism across the organization. The Plan derives the amount of emissions that Whitby's corporate operations have to reduce to support global GHG emission reduction targets. Embedded in this framework, the Town of Whitby has identified the following short, medium, and long-term corporate GHG emissions reduction targets (relative to 2019 levels):

1. 20% GHG emissions reduction by 2025
2. 40% GHG emissions reduction by 2030
3. 100% GHG emissions reduction by 2045

These targets were developed to reflect the Town's contribution to limiting the global annual average temperature increase to 1.5°C.

Embedded within Zero Carbon Whitby is a Carbon Reduction Framework, an overarching framework for GHG emissions management, extending over multiple years and all aspects of municipal operations. This framework empowers staff to develop and implement actions from the bottom up to meet GHG reduction targets by aligning capital and operating budgets with GHG reduction targets.

Zero Carbon Costing Study (2022)

As the first step of the implementation of the Zero Carbon Whitby Framework, the Zero Carbon Whitby Costing Study was completed. The Study was one of the main recommendations of the Zero Carbon Whitby Framework. The Zero Carbon Costing Study provides a detailed implementation plan for the Town to remain within its carbon budget and reach zero emissions by 2045. The Zero Carbon Costing Study outlines a schedule and incremental budget for the Zero Carbon Whitby Plan that optimizes the Town's corporate carbon budget with its existing capital budget and asset management plans. It also provides guidance on the establishment of the Zero Carbon Revolving Reserve Fund. Council endorsed the Zero Carbon Whitby Costing Study in September 2022.

The estimated incremental cost of this work between 2022 and 2045 is \$63.7 million. In return, over the same period it estimated there will be \$75.3 million in total savings and avoided costs.

The Study proposes that this incremental cost could be paid for entirely from a Zero Carbon Revolving Reserve Fund, seeded with an initial \$34.8 million in funding and then utilizing cost savings from energy, carbon tax, and select capital projects to fund the balance of the program in later years.

Reporting Commitments

In addition to plans and strategies, the Town of Whitby is also dedicated to climate action through the following commitments:

Global Covenant of Mayors

The Town of Whitby joined the Global Covenant of Mayors (GCoM) in 2019. GCoM is a global network of more than 10,000 cities spanning 139 countries worldwide. These local governments all recognize that ambitious climate initiatives in their communities need to be taken to keep global temperatures from rising more than 1.5°C.

Whitby's participation in the Global Covenant of Mayors commits the community and Town of Whitby to the following milestones:

- Develop GHG emissions inventory;
- Assess climate risks and vulnerabilities;
- Define ambitious climate mitigation, resilience, and energy targets; and,
- Create complete climate action plans.

To meet the requirements of this campaign, Whitby reports all of its climate action through the Carbon Disclosure Project.

Race to Zero and Race to Resilience

[Race to Resilience](#) and [Race to Zero](#) are global campaigns run by the COP26 Presidency and high-level Climate Champions. The purposes of these campaigns are to rally leadership and support from cities, regions, businesses, and investors to help frontline communities build resilience and adapt to the impacts of climate change while

also reducing GHG emissions to stay within the 1.5°C global temperature increase, as outlined in the 2016 Paris Agreement.

In 2021, Whitby Council endorsed joining these campaigns. By joining Race to Resilience and Race to Zero, Whitby joined cities worldwide in committing to be catalysts for change while also demonstrating the commitment to and delivery of the goals of the Paris Agreement and COP26. To meet the requirements of this campaign, Whitby reports all its climate actions through the Carbon Disclosure Project.

Carbon Disclosure Project

The Carbon Disclosure Project (CDP) is a not-for-profit charity that runs a global disclosure system for investors, companies, cities, states, and regions to manage their environmental impacts.

The annual evaluation report is used to gain an overview of environmental performance and how the Town of Whitby's response can be improved in the future. Reporting through CDP meets yearly reporting requirements as a member of the Global Covenant of Mayors, Race to Zero, and Race to Resilience.

4. Discussion:

In 2024 several actions were taken towards achieving the goals and objectives of the Council-endorsed strategic plans discussed above. The following provides a brief summary of the progress made in 2024 on some of the key actions.

Community Strategic Plan

The Community Strategic Plan actions under Objective 2.1; *Demonstrate environmental leadership in sustainability and addressing climate change* that were implemented in 2024 include:

2.1.1 Develop community climate mitigation measures to achieve zero-carbon emissions by 2045

From the Climate Emergency Response Plan – Phase 2: Mitigation, 10 new actions were started in 2024, and six actions were completed.

2.1.2 Explore partnership opportunities to advance alternate energy systems designed to reduce Green House Gas (GHG) emissions of new developments.

The Geothermal Exchange System has been incorporated into the construction of the Whitby Sports Complex to provide heating and cooling for the facility.

2.1.3 Implement actions to increase community resilience to the impacts of climate change

From the Climate Emergency Response Plan – Phase 1: Resilience, 12 actions were started in 2024, and one action was completed.

2.1.6 Promote the use of electric vehicles and lead by example by implementing electric vehicles in the Town's municipal fleet.

14 EV charging stations were installed, including the Town's first Level 3 DC fast-charging stations at the Operations Centre and Iroquois Park Sports Centre.

2.3.4 Implement enhanced street design to improve walkability.

The new enhanced street design standard is in place and has been consistently applied to all new developments.

Climate Emergency Response Plan*Phase 1 – Resilience*

In 2024, 10 of the 106 total actions in the Phase 1 – Resilience Implementation Plan were started. In addition, 11 actions are currently in progress, having been initiated during the first year of implementation in 2023. Two actions were completed in 2023, and six actions were completed in 2024. This reflects a total of 29 actions with progress to date.

The key actions from the Phase 1 – Resilience Plan that were implemented in 2024 are listed below along with a high-level summary of the progress to date.

- 1.1.1 Update the asset management policy and plan to incorporate climate risk and mitigation into asset management, following the province's asset management mandate.

The updated Town's Asset Management Plan includes a Climate Change section with a focus on strategies for climate resilience and mitigation, and Whitby's Zero Carbon Budget.

- 1.5.1 Develop a communications strategy that includes a baseline assessment of knowledge and identifies education needs.

A communications strategy was finalized in 2024 based on the Emergency Preparedness and Climate Change survey that was released in Fall 2023.

- 2.1.2 Utilizing the 'Durham Region Climate Resilience Standard for New Houses', develop education materials and support programs for residents to complete resilience upgrades in their home to protect against basement flooding and extreme heat. Priorities should include actions that can be completed within existing buildings such as:

- Cool roof guidelines
- Landscaping guidelines including maintaining existing trees and adding addition trees and native plant species
- Energy efficiency upgrades including insulation, windows, doors, and high-efficiency heat pumps
- Sealing foundations
- Foundation drainage, sump pump, and downspout drainage and discharge

In 2024, Durham Region, in consultation with Whitby and other Local Area Municipalities, worked to expand the Durham Greener Homes program to include a

resilience (Weather Ready) component, which will offer residents opportunities to assess and improve their homes' ability to withstand extreme weather events.

2.1.4 Evaluate the need and ability to provide additional incentives and funding programs for energy-efficient new buildings and building upgrades.

Through the Housing Accelerator Fund, the Town of Whitby offered to match Region funding, up to an additional \$5,000 top-up, bringing the total incentive to \$10,000 for Whitby residents participating in the Durham Greener Homes program.

2.9.6 Incentivize and encourage the installation of high-efficiency heating and cooling options, such as heat pumps to minimize disruptions stemming from over peaking.

The Town promoted the Durham Greener Homes program, which provides incentives for homeowners to improve energy efficiency through upgrades such as heat pumps.

3.1.1 Assess current canopy cover in the Town, as a whole and separately in more and less developed areas of Whitby, and with an equity lens (e.g. are there at-risk communities with less canopy cover that could lead to increased heat risk?).

Whitby's canopy cover was assessed to help inform the development of the Urban Forestry Management Plan.

3.1.4 Develop an urban forest management strategy with recommendations on the following:

- Meeting the canopy cover target and number of trees planted, focusing on both individual plantings (street trees) and opportunities for creating new urban forests.
- Identifying trees resilient to expected changes in climate and build resilience through diversified plantings throughout the Town.
- Maintaining a town wide inventory and monitoring and tracking tree conditions.
- Introducing improved soil standards for new plantings for trees, as well as other plants.
- Monitoring for and managing climate-related risks to trees such as diseases, pests, invasive species, and heat stress and identifying the introduced species that can be planted to maintain canopy targets, as well as ways to manage habitat loss for birds and animals reliant on current tree species in Whitby.
- Identifying roles for the Town, local organizations, and citizen scientists including considering a collaborative tree monitoring program throughout the community.

The Town is working on developing an Urban Forestry Management Plan. The recommendations mentioned above have been considered during its development.

Phase 2 – Mitigation

In 2024, 12 of the 61 total actions in the Phase 2 – Mitigation Implementation Plan were started, and one action was completed. In addition, eight actions were already in progress prior to the plan's formal approval in 2023, and one action was completed at the time of Council's approval. In total, 22 actions have seen progress to date.

The key actions from the Phase 2 – Mitigation Plan that were implemented in 2024 are listed below along with a high-level summary of the progress to date.

2.1.2 Investigate the development of a residential Property Assessed Clean Energy (PACE) program. Similar programs have been implemented across Canada, including the City of Edmonton's Residential Clean Energy Improvement Program (CEIP), Toronto's Home Energy Loan Program (HELP), and Nova Scotia PACE, which can be used as a guide and precedent for the creation of a Whitby PACE program. Allow building owners to stack PACE loans with the Durham Greener Homes program.

In 2024, Durham Region, in consultation with Whitby and other Local Area Municipalities, developed a PACE/ Local Improvement Charge (LIC) program to support the implementation of the Durham Greener Homes program. In April 2025, Regional Council provided approval to move forward and implement the PACE/LIC program. Whitby will work with Durham Region to promote this program to residents to increase the number of households completing deep energy retrofits.

2.1.3 Investigate additional financing opportunities for residents to make retrofits and potentially stack with the Durham Greener Homes Program.

Through the Housing Accelerator Fund, the Town offered an additional \$5,000 top-up, bringing the total incentive up to \$10,000 for Whitby residents applying to the Durham Greener Homes program.

2.1.5 Educate residents on energy retrofits that can be completed in their homes, and the benefits of energy retrofits and heat pumps. For example, education materials/initiatives could include a video series of community members successfully undertaking home retrofits.

In December 2024, Durham Region and Windfall Ecology Centre hosted a Durham Greener Homes Heat Pump Workshop in Whitby to educate residents about the program and the energy retrofits they can take. There were 42 people in attendance, participating both online and in-person.

2.5.1 Complete construction of three new facilities (the Whitby Sports Complex, the Fire Station Training Tower/Fire Training Complex, and new Animal Services Building). Complete the Operations Centre Phase 2 Expansion to a net-zero standard as identified in the Zero Carbon Whitby: Costing Study to Eliminate Greenhouse Gas Emissions 2022-2045.

The construction of the Whitby Sports Complex, which will be LEED (Leadership in Energy and Environmental Design) Gold and CaGBC Zero Carbon Building Design certified, started in 2023 and continued in 2024.

In 2024, the final design of the Fire Training Tower project was completed. Construction is planned to commence in spring of 2025. As this project is not a building and has no occupancy the Whitby Green Standard does not apply.

The design process for the Operations Centre Phase 2 Expansion started in 2024. An update was provided to Council in October 2024, stating that the expansion will achieve Tier 3 of the Whitby Green Standard and will use CaGBC Zero Carbon Building Design Standard. The contract document phase will be occurring in spring 2025 and tendering is planned to occur in the fall of 2025.

In 2025, the Design Development phase for the Animal Service Building Project will be commencing. The Animal Service Building will be designed to Tier 3 of the Whitby Green Standard and to the CaGBC Zero Carbon Building Design Standard.

Whitby Green Standard

In 2024, Sustainability reviewed 91 unique Tier 1 Whitby Green Standard applications at various stages in the development application process. In addition, the Whitby Sports Complex is the first development in Whitby constructed to achieve Tier 3 of the Whitby Green Standard.

Zero Carbon Whitby

The net total GHG emissions reduction is 509.7 tCO₂e. This accounts for 46% of the Town's short-term 2025 reduction goal of 1,105 tCO₂e of GHG emissions.

To support progress toward the Town's medium-term GHG reduction target, a Deep Energy Feasibility Pathway Study is scheduled for 2025. This study will focus on seven of the Town's highest-emitting facilities. As a result, a more substantial decrease in greenhouse gas emissions is expected in the following years, positioning the Town to make significant strides toward achieving the 2030 goal of a 40% reduction.

2025 Key Projects

In 2025, the Town's Sustainability priorities include the following:

- Developing a Corporate Waste Management Strategy;
- Delivering emergency preparedness workshops;
- Implementing Zero Carbon Whitby projects;
- Completing a Deep Energy Feasibility Pathway Study; and
- Developing an incentive program to support the implementation of the Whitby Green Standard.

5. Financial Considerations:

The Town has identified approximately \$247,550 in the Sustainability capital budget to support sustainability projects in 2025.

In support of Zero Carbon Whitby, a Zero Carbon Revolving Reserve Fund (ZCRRF) was established in September 2022 to facilitate the implementation of zero carbon projects. The ZCRRF provides funding towards zero carbon retrofits, pilot projects and incremental retrofit project costs of zero carbon options. Operational savings from

completed projects, as well as session fees received from use of the Town's Electric Vehicle charging stations, are directed into the fund. The current uncommitted balance in the ZCRRF is approximately \$136,000.

In partnership with the Region on the Durham Greener Homes Retrofit Program, Staff allocated \$250,000 in 2024 from the Housing Accelerator Fund (HAF capital project # 55247606 that is fully grant funded) towards this multi-year rebate partnership with the Region. This program will run until December 2027.

Funds from the HAF are also planned for a Pilot Financial Program to support the Whitby Green Standard to advance sustainable development across the Town.

Town staff strive to seek additional funding support for sustainability initiatives. A detailed list of the funding that the Town was successful in securing is included in Appendix A of the 2024 Sustainability Annual Report (Attachment 1).

6. Communication and Public Engagement:

Public education and engagement are critical to the success of becoming a sustainable community. The following initiatives highlight the public engagement carried out in 2024:

- In support of the West Lynde neighbourhood SNAP, a survey was conducted that asked residents for feedback on what sustainability actions are the most important to them in their neighbourhood.
- To support the development of Version 2 of the Whitby Green Standard, a survey was conducted, and a public meeting was held to understand what sustainable building practices that the community believes are the most important for new developments. In addition, two meetings were held with the development community to obtain their specific input on the standard.

The Town will also continue to offer sustainability initiatives to build awareness and encourage community-wide participation through:

- Education events and seminars;
- Community Greening Program in partnership with LEAF (Local Enhancement and Appreciation of Forest); and,
- Community Anti-Litter Cleanup Online Tool.

7. Input from Departments/Sources:

The Strategic Initiatives Division has prepared this report with support from Operational Services, Finance, Community Services, and the Whitby Public Library.

8. Strategic Priorities:

The initiatives outlined in this report directly align with the priorities of the Community Strategic Plan endorsed by Council in 2023. Specifically, with Objective 2.1: "Demonstrate environmental leadership in sustainability and addressing climate change" of Strategic Pillar 2: Whitby's Natural & Built Environment. As stated in Section 4 several, actions were implemented in 2024 to achieve Objective 2.1.

Sustainability initiatives are developed with considerations for inclusivity and accessibility. All documents for this report have been reviewed to ensure they are accessible to all readers.

The 2024 Sustainability Annual Report describes how the Town is meeting its goals of becoming a healthy and sustainable community while addressing climate change through a mitigation and adaptation lens.

9. Attachments:

Attachment 1 – 2024 Annual Sustainability Report

2024

SUSTAINABILITY ANNUAL REPORT

Summary

The Town of Whitby (Town) is committed to sustainability and environmentally responsible practices at both the community and corporate levels. Many sustainability projects and initiatives were accomplished in 2024. Key highlights include:

- The West Lynde neighbourhood was approved as Whitby's first Sustainable Neighbourhood Action Program (SNAP) in partnership with Central Lake Ontario Conservation Authority and Durham Region;
- In 2024 Whitby community members planted over 800 trees through the LEAF spring and fall community planting events and 38 trees were planted through the Backyard tree planting program;
- Fourteen new EV chargers were installed throughout Whitby in 2024 including the first level 3 – DC fast charging station; and
- In 2024, the Town offered an additional incentive of up to \$5,000 through the Federal Housing Accelerator Fund grant for Whitby residents participating in the Durham Greener Homes Program to support home energy retrofits.

A key Zero Carbon Whitby Project that has been completed in 2025 includes the transition of the Combined Heat and Power (CHP) unit at the Whitby Civic Recreation Centre to backup heating. This will save 454.4 tCO₂e of GHG emissions annually, which is equivalent to taking 98 cars off the road.

Additional actions to support Whitby's sustainability journey will be undertaken in 2025 with some of the priority initiatives including:

- Developing a Corporate Waste Management Strategy;
- Delivering emergency preparedness workshops;
- Implementing Zero Carbon Whitby projects; and
- Developing an incentive program to support the implementation of the Whitby Green Standard.

Introduction

The Town of Whitby recognizes that sustainability is a priority, both corporately and within the community. The Town has the following Council-endorsed strategic plans to guide the implementation of sustainability actions:

Community Strategic Plan (2023)

The Community Strategic Plan provides a shared vision and objectives for how the Town Council and Staff will work together to deliver on community priorities. Within Whitby's Community Strategic Plan are four strategic pillars with the second strategic pillar focusing on Whitby's Natural and Built Environment. The actions outlined in this report specifically align with the first objective of this pillar: Demonstrate environmental leadership in sustainability and addressing climate change.

Climate Emergency Response Plan

The Whitby Climate Emergency Response Plan is the primary mechanism to respond to a changing climate across the community. Due to the complexity and different approaches necessary to fully understand the response needed to address climate change, the Whitby Climate Change Master Plan has been divided into two phases:

- Phase 1: Resilience
- Phase 2: Mitigation

Phase 1 – Resilience (2022)

Phase 1 involved the development of a Resilience Plan, which was approved by Council in September of 2022. The purpose of the plan is to address the climate changes we already experience in Whitby and expect to experience in the future even with the adoption of GHG emissions mitigation measures. Risk and vulnerability modelling was done by developing two future scenarios for the Town of Whitby:

- An **adapted scenario**, where measures to reduce the direct and indirect risks of climate change are applied across the community; and
- A **business-as-usual scenario**, which includes growth and development without a climate adaptation lens.

To support the achievement of the adaptation actions, a detailed five-year community-led implementation plan has been developed.

Phase 2 – Mitigation (2023)

In December 2023, Climate Emergency Response Plan, Phase 2: Mitigation was completed and endorsed by Council. Phase 2 focused on climate mitigation and identified the sources of GHG emissions in Whitby and provided recommendations to reduce GHG emissions. The Mitigation Plan was developed to help prevent climate

change from occurring in the future through the elimination of community greenhouse gas (GHG) emissions.

The development of the Mitigation Plan included modelling the size of the climate challenge in Whitby. The Mitigation Plan provides low-carbon pathway and recommendations to meet the Town's community-wide GHG emissions reduction targets. Implementing the Mitigation Plan's low-carbon scenario will result in improved energy efficiency in all sectors (i.e., residential, institutional, commercial, and industrial buildings; transportation; and municipal operations) and will create opportunities for economic growth and community development.

Whitby Green Standard (2020)

The Whitby Green Standard was endorsed by Council in September 2020 and is aimed to develop a more sustainable community and support Whitby's goal to reduce GHG emissions. It applies to all new development in the Town that requires a Site Plan or Draft Plan of Subdivision Application.

Council endorsed that all new Town Facilities are built to achieve Tier 3 of the Whitby Green Standard.

Zero Carbon Whitby (2021)

Zero Carbon Whitby was endorsed by Council in March 2021; this plan serves as the Town's Corporate Energy Management Plan and Corporate Climate Adaptation Plan.

Zero Carbon Whitby has been developed as a framework for implementing a low carbon decision mechanism across the organization. The Plan derives the amount of emissions that Whitby's corporate operations must reduce to support global GHG emission reduction targets. Embedded in this framework, the Town of Whitby has identified the following short, medium, and long-term corporate GHG emissions reduction targets (relative to 2019 levels):

- 20% GHG emissions reduction by 2025
- 40% GHG emissions reduction by 2030
- 100% GHG emissions reduction by 2045

These targets were developed to reflect the Town's contribution to limiting the global annual average temperature increase to 1.5°C.

Embedded within Zero Carbon Whitby is a Carbon Reduction Framework, an overarching framework for GHG emissions management, extending over multiple years and all aspects of municipal operations. This framework empowers staff to develop and implement actions from the bottom up to meet GHG reduction targets by aligning capital and operating budgets with GHG reduction targets.

Zero Carbon Costing Study (2022)

As the first step of the implementation of the Zero Carbon Whitby Framework, the Zero Carbon Whitby Costing Study was completed. The Study was one of the main

recommendations of the Zero Carbon Whitby Framework. The Zero Carbon Costing Study provides a detailed implementation plan for the Town to remain within its carbon budget and reach zero emissions by 2045. The Zero Carbon Costing Study provides a schedule and incremental budget for the Zero Carbon Whitby Plan that optimizes the Town's corporate carbon budget with its existing capital budget and asset management plans. It also provides guidance on the establishment of the Zero Carbon Revolving Reserve Fund.

The estimated incremental cost of this work between 2022 and 2045 is \$63.7 million. In return, over the same period it estimated there will be \$75.3 million in total savings and avoided costs.

The Study proposes that this incremental cost could be paid for entirely from a Zero Carbon Revolving Reserve Fund, seeded with an initial \$34.8 million in funding and then utilizing cost savings from energy, carbon tax, and select capital projects to fund the balance of the program in later years.

Council endorsed the Zero Carbon Whitby Costing Study in September 2022.

Reporting Framework

The Climate Emergency Response Plan and Zero Carbon Whitby Framework both have stipulated annual reporting requirements. This Annual Report is the mechanism for reporting on the Town's progress towards those plans and on other sustainable actions taken across the organization.

This Annual Report follows the 10 principles of the One Planet Living Planning Framework. This international framework consists of the following ten simple principles, which provide clear goals and guidance to help ensure that the Town advances all aspects of social, environmental, and economic sustainability:

	Health and Happiness	Encouraging active, social, meaningful lives to promote good health and well-being.
	Equity and local economy	Creating safe, equitable places to live and work, which support local prosperity and international fair trade.
	Culture and Community	Nurturing local identity and heritage, empowering communities and promoting a culture of sustainable living.
	Land and Nature	Protecting and restoring land and marine systems for the benefit of people and wildlife.
	Sustainable Water	Using water efficiently, protecting local water resources and reducing flooding and drought.
	Local and Sustainable Food	Promoting sustainable, humane farming and healthy diets, which are high in local, seasonal organic food and vegetable protein.
	Travel and Transport	Reducing the need to travel, encouraging walking, cycling and low-carbon transport.
	Materials and Products	Using materials from sustainable sources and promoting products that help people reduce consumption.
	Zero Waste	Reducing consumption, reusing and recycling to achieve zero waste and zero pollution.
	Zero Carbon Energy	Making buildings and manufacturing energy efficient and supplying all energy with renewables.

Projects listed within the report that include a \$ have or are in the process of being considered for subsidization by an external funding opportunity. For more details, please view **Appendix A**.

2024 Accomplishments

The following section discusses the Town's accomplishments towards the Council-endorsed strategic plans discussed above.

Community Strategic Plan

The Community Strategic Plan actions under Objective 2.1; *Demonstrate environmental leadership in sustainability and addressing climate change* that were completed in 2024 include:

2.1.2 Explore partnership opportunities to advance alternate energy systems designed to reduce Green House Gas (GHG) emissions of new developments.

The Geothermal Exchange System has been incorporated into the construction of the Whitby Sports Complex to provide heating and cooling for the facility. More information on the Whitby Sports Complex can be found in the Health and Happiness section of the Report on page 16.

2.1.6 Promote the use of electric vehicles and lead by example by implementing electric vehicles in the Town's municipal fleet.

14 EV charging stations were installed, including the Town's first Level 3 DC fast-charging stations at the Operations Centre and Iroquois Park Sports Centre. More information on the expansion of the Town's EV Charging network can be found in Travel and Transport section of this Report on Page 32.

2.3.4 Implement enhanced street design to improve walkability.

The new enhanced street design standard is in place and has been consistently applied to all new developments. More information on the enhanced street design standard can be found in Travel and Transport section of this Report on page 32.

Actions 2.1.1 and 2.1.3 of the Community Strategic Plan were also both achieved in 2024 as the associated measures of progress have annual targets that have been met.

The measures of progress for Action 2.1.1 is to implement a minimum of one action annually from the Climate Emergency Response Plan – Phase 2: Mitigation. As further discussed below in 2024, 10 new actions were started in 2024, and six actions were completed.

The measures of progress for Action 2.1.3 is to implement a minimum of three actions annually from the Climate Emergency Response Plan – Phase 1: Resilience. As further discussed below in 2024, 12 actions were started, and one action was completed.

Climate Emergency Response Plan

Phase 1 – Resilience

In 2024, 10 of the 106 total actions in the Phase 1 – Resilience Implementation Plan were started. In addition, 11 actions are currently in progress, having been initiated during the first year of implementation in 2023. Two actions were completed in 2023, and six actions were completed in 2024. This reflects a total of 29 actions with progress to date.

Further information on the 11 actions started and the two actions completed in 2023 can be found in the [2023 Sustainability Annual Report](#).

In 2024, the actions from the Phase 1 – Resilience Plan listed below were implemented. The actions reflect several of the 10 principles of the One Planet Living Planning Framework, as such are discussed throughout the report. The following provides a high-level summary of the progress to date for each action started in 2024, and where further information in this Report can be found on the action.

- 1.1.1 Update the asset management policy and plan to incorporate climate risk and mitigation into asset management, following the province's asset management mandate.

The updated Town's Asset Management Plan includes a Climate Change section with a focus on strategies for climate resilience and mitigation, and Whitby's Zero Carbon Budget. More information on the Asset Management Plan can be found in the Materials and Products section of this Report on page 34.

- 1.5.1 Develop a communications strategy that includes a baseline assessment of knowledge and identifies education needs.

A communications strategy was finalized in 2024 based on the Emergency Preparedness and Climate Change survey that was released in Fall 2023. More information can be found in the Culture and Community section of this Report on page 22.

- 1.5.3 Develop proactive education and information campaigns with partners the public trusts and who can distribute information (libraries, non-profits, businesses, radio stations, etc.).

- 1.5.4 Complete a review of existing emergency communication protocols and identify strengths and weaknesses and assess the need for new communication tools such as an app that alerts residents of climate- and weather-related risks and closures.

1.5.5 Develop a community-level education program on the importance of developing emergency preparedness plans for a variety of climate emergencies.

These actions were considered in the development of the communications strategy for Action 1.5.1 above. More information can be found in the Culture and Community section of this Report on page 22.

2.1.1 Utilizing the 'Durham Region Climate Resilience Standard for New Houses', develop policies and site plan permitting requirements that direct development applicants to address basement flooding and extreme heat protection. Priorities include:

- Sewer backflow prevention policy/requirement
- Site grading, drainage, and low impact development requirements
- Limiting and sealing foundation openings guidelines
- Foundation drainage, sump pump, and downspout drainage and discharge policies and guidelines
- Net-zero run-off guidelines and/or policy
- Design guidelines for passive cooling including siting, shading, glazing, and window operability
- Cool roof guidelines
- Landscaping guidelines including maintaining existing trees and adding addition trees and native plant species
- Energy efficiency components including insulation, windows, doors, and high-efficiency heat pumps (overlaps with Whitby Green Standard)

In 2024, a consult was hired to develop Version 2 of the Whitby Green Standard. A criterion has been included that requires measures related to flood risk reduction and extreme heat. More information can be found in the Zero Carbon Energy section of this Report on page 37.

2.1.2 Utilizing the 'Durham Region Climate Resilience Standard for New Houses', develop education materials and support programs for residents to complete resilience upgrades in their home to protect against basement flooding and extreme heat. Priorities should include actions that can be completed within existing buildings such as:

- Cool roof guidelines
- Landscaping guidelines including maintaining existing trees and adding addition trees and native plant species
- Energy efficiency upgrades including insulation, windows, doors, and high-efficiency heat pumps

- Sealing foundations
- Foundation drainage, sump pump, and downspout drainage and discharge (see more in Action 2.4)

In 2024, Durham Region, in consultation with Whitby and other Local Area Municipalities, worked to expand the Durham Greener Homes program to include a resilience (Weather Ready) component, which will offer residents opportunities to assess and improve their homes' ability to withstand extreme weather events. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.1.3 Include climate resilience measures as part of the mandatory tier of the Whitby Green Standards and note the adaptation benefits for efficiency actions such as landscaping, air tightness, windows and doors, insulation, and efficient heating and cooling systems.

In 2024, a consult was hired to develop Version 2 of the Whitby Green Standard. A climate resilience measures has been included as part of the baseline tier of Version 2 of the standard. More information can be found in the Zero Carbon Energy section of this Report on page 37.

2.1.4 Evaluate the need and ability to provide additional incentives and funding programs for energy-efficient new buildings and building upgrades.

Through the Housing Accelerator Fund, the Town of Whitby offered to match Region funding, up to an additional \$5,000 top-up, bringing the total incentive to \$10,000 for Whitby residents participating in the Durham Greener Homes program. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.3.4 Provide guidelines and incentives for lot-level stormwater management including rain barrels, native species planting, and grass swales.

This action is currently being considered as part of the new resilience component within the Durham Greener Homes program. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.6.2 Utilizing the 'Durham Region Climate Resilience Standard for New Houses', develop site plan permitting requirements that direct development applicants to address basement flooding.

In 2024, a consult was hired to develop Version 2 of the Whitby Green Standard. Version 2 which will direct development applications to mitigate basement flooding

through its increased performance measures. More information can be found in the Zero Carbon Energy section of this Report on page 37.

2.8.1 Complete detailed calibration and cost-analysis studies for flood mitigation measures in neighbourhoods identified as being at risk of flooding and integrate findings into the Town's Asset Management Plan.

A five-year stormwater flow monitoring study was ongoing in 2024, including recommendations for detailed monitoring and calibration of flow rates at several critical areas vulnerable to flooding. The final study is to be completed by the end of 2025. The implementation of this five-year monitoring program is to commence in 2026, subject to approval of budget.

2.9.6 Incentivize and encourage the installation of high-efficiency heating and cooling options, such as heat pumps to minimize disruptions stemming from over peaking.

The Town promoted the Durham Greener Homes program, which provides incentives for homeowners to improve energy efficiency through upgrades such as heat pumps. More information can be found in the Zero Carbon Energy section of this Report on page 38.

3.1.1 Assess current canopy cover in the Town, as a whole and separately in more and less developed areas of Whitby, and with an equity lens (e.g. are there at-risk communities with less canopy cover that could lead to increased heat risk?).

Whitby's canopy cover was assessed to help inform the development of the Urban Forestry Management Plan. More information can be found in the Land and Nature section of this Report on page 26.

3.1.3 Set an urban canopy cover target of at least 40% and an overall natural cover target that includes wetlands and tall grass prairies of 60%.

An urban canopy target will be determined through the development of the Urban Forestry Management Plan. More information can be found in the Land and Nature section of this Report on page 26.

3.1.4 Develop an urban forest management strategy with recommendations on the following:

- Meeting the canopy cover target and number of trees planted, focusing on both individual plantings (street trees) and opportunities for creating new urban forests.
- Identifying trees resilient to expected changes in climate and build resilience through diversified plantings throughout the Town.

- Maintaining a town wide inventory and monitoring and tracking tree conditions.
- Introducing improved soil standards for new plantings for trees, as well as other plants.
- Monitoring for and managing climate-related risks to trees such as diseases, pests, invasive species, and heat stress and identifying the introduced species that can be planted to maintain canopy targets, as well as ways to manage habitat loss for birds and animals reliant on current tree species in Whitby.
- Identifying roles for the Town, local organizations, and citizen scientists including considering a collaborative tree monitoring program throughout the community.

The Town is working on developing an Urban Forestry Management Plan. The recommendations mentioned above have been considered during its development. More information can be found in the Land and Nature section of this Report on page 26.

Phase 2 – Mitigation

In 2024, 12 of the 61 total actions in the Phase 2 – Mitigation Implementation Plan were started, and one action was completed. In addition, eight actions were already in progress prior to the plan's formal approval in 2023, and one action was completed at the time of Council's approval. In total, 21 actions have seen progress to date.

In 2024 the actions from the Phase 2 – Mitigation Plan listed below were implemented. The actions reflect several of the 10 principles of the One Planet Living Planning Framework, as such are discussed throughout the report. The following provides a high-level summary of the progress to date for each action started in 2024, and where further information in this Report can be found on the action.

1.2.3 Track, update, and share annual progress and reporting on CERP Phase 2: Mitigation Plan's implementation. Activities can include tracking the annual progress on each of the Implementation Plan's tracking metrics and GHG inventories in the Annual Sustainability Report, investigating opportunities to update implementation actions, and submitting applications for third-party certification programs (i.e., Carbon Disclosure Project).

The Town of Whitby is tracking the annual progress on each of the Implementation Plan's tracking metrics through this Report. In addition, all actions are being submitted through the Carbon Disclosure Project, a third-party certification program.

1.3.1 The Town's Climate Change Coordinator position will monitor and apply for funding and grant opportunities.

The Climate Change Coordinator along with Senior Manager of Government Relations & Grants actively monitors funding and grant opportunities. A list of grants that the Town was successful in securing in 2024 are included in Appendix A.

2.1.2 Investigate the development of a residential Property Assessed Clean Energy (PACE) program. Similar programs have been implemented across Canada, including the City of Edmonton's Residential Clean Energy Improvement Program (CEIP), Toronto's Home Energy Loan Program (HELP), and Nova Scotia PACE, which can be used as a guide and precedent for the creation of a Whitby PACE program. Allow building owners to stack PACE loans with the Durham Greener Homes program.

In 2024, Durham Region, in consultation with Whitby and other Local Area Municipalities, developed a PACE/ Local Improvement Charge (LIC) program to support the implementation of the Durham Greener Homes program. In April 2025, Regional Council provided approval to move forward and implement the PACE/LIC program. Whitby will work with Durham Region to promote this program to residents to increase the number of households completing deep energy retrofits.

2.1.3 Investigate additional financing opportunities for residents to make retrofits and potentially stack with the Durham Greener Homes Program.

Through the Housing Accelerator Fund, the Town offered an additional \$5,000 top-up, bringing the total incentive up to \$10,000 for Whitby residents applying to the Durham Greener Homes program. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.1.5 Educate residents on energy retrofits that can be completed in their homes, and the benefits of energy retrofits and heat pumps. For example, education materials/initiatives could include a video series of community members successfully undertaking home retrofits.

In December 2024, Durham Region and Windfall Ecology Centre hosted a Durham Greener Homes Heat Pump Workshop in Whitby to educate residents about the program and the energy retrofits they can take. There were 42 people in attendance, participating both online and in-person. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.1.6 Clearly communicate and promote existing programs and incentive stacking opportunities that residents can take advantage of to complete energy retrofits through federal, provincial, regional, utility, and other local government programs.

Throughout 2024, the Town communicated and promoted incentive opportunities such as Durham Greener Homes and the Oil to Heat Pump Affordability Program via social media channels to its residents. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.3.2 Support the Region of Durham in investigating opportunities to expand the Durham Greener Homes and Durham Greener Buildings Program incentives and funding for heat pump and electric water heater retrofits.

Through the Housing Accelerator Fund, the Town of Whitby offered an additional \$5,000 top-up, bringing the total incentive to \$10,000 for Whitby residents for the Durham Greener Homes program. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.3.4 Develop and implement a communications and engagement plan to educate the community about the benefits and feasibility of electric heat pumps and water heaters, and federal, provincial, and regional rebates and grant programs. For example, engagement events and campaigns can include open houses hosted at locations with electric heat pumps and water heaters, speaker-series and educational webinars, and social media campaigns.

Throughout 2024, the Town communicated and promoted incentive opportunities such as Durham Greener Homes program and the Oil to Heat Pump Affordability Program via social media channels to its residents. In addition, Durham Region and Windfall Ecology Centre hosted a Durham Greener Homes Heat Pump Workshop to educate residents about the program and the energy retrofits they can take. More information can be found in the Zero Carbon Energy section of this Report on page 38.

2.4.2 By end of 2024, update the Whitby Green Standard's (WGS) minimum requirements to Tier 2 and develop a Terms of Reference (TOR) outlining specific requirements for each performance criteria.

A consultant was hired in 2024 to update the Whitby Green Standard to Version 2, in which Tier 2 will become the baseline performance measure. Staff are working to finalize the Whitby Green Standard Version 2 documents, including the Terms of Reference. Pending Council approval, it is anticipated that version 2 of the Whitby Green Standard will come into effect in late 2025. More information can be found in the Zero Carbon Energy section of this Report on page 37.

2.4.3 Educate developers, planners, and builders on the WGS and opportunities to achieve higher performance standards.

During the update of the Whitby Green Standard Version 2, developers, planners and builders were engaged to inform the updates and changes happening to the standard and the requirements needed to achieve higher performance standards. More information can be found in the Zero Carbon Energy section of this Report on page 37.

2.5.1 Complete construction of three new facilities (the Whitby Sports Complex, the Fire Station Training Tower/Fire Training Complex, and new Animal & Community Services Building). Complete the Operations Centre Phase 2 Expansion to a net-zero standard as identified in the Zero Carbon Whitby: Costing Study to Eliminate Greenhouse Gas Emissions 2022-2045.

The construction of the Whitby Sports Complex, which will be LEED (Leadership in Energy and Environmental Design) Gold and CaGBC Zero Carbon Building Design certified, started in 2023 and continued in 2024. More information on the Whitby Sports Complex can be found in the Health and Happiness section of this Report on pages 16 and 17.

In 2024 the final design of the Fire Training Tower project was completed. Construction is planned to commence in spring of 2025. As this project is not a building and has no occupancy the Whitby Green Standard does not apply.

The design process for the Operations Centre Phase 2 Expansion started in 2024. An update was provided to Council in October 2024, stating that the expansion will achieve Tier 3 of the Whitby Green Standard and will use CaGBC Zero Carbon Building Design Standard. The contract document phase will be occurring in spring 2025 and tendering is planned to occur in the fall of 2025.

In 2025, the Design Development phase for the Animal & Community Services Building Project will be commencing. The Animal Service Building will be designed to Tier 3 of the Whitby Green Standard and to the CaGBC Zero Carbon Building Design Standard.

4.6.3 Promote active transportation and educate residents on the benefits. Promote new routes, trails, programs and initiatives.

In 2024, the Town of Whitby promoted active transportation and educated residents on the benefits through its social media channels.

Whitby Green Standard

In 2024, Sustainability reviewed 91 unique Tier 1 Whitby Green Standard applications at various stages in the development application process. Further information on the Whitby Green Standard can be found in the Zero Carbon Energy section of this Report

on page 37. In addition, the Whitby Sports Complex is the first development in Whitby to be constructed to achieve Tier 3 of the Whitby Green Standard.

Zero Carbon Whitby

The net total GHG emissions reduction is 509.7 tCO₂e. This accounts for 46% of the Town's short-term 2025 reduction goal of 1,105 tCO₂e of GHG emissions.

To support progress toward the Town's medium-term GHG reduction target, a Deep Energy Feasibility Pathway Study is scheduled for 2025. This study will focus on seven of the Town's highest-emitting facilities. As a result, a more substantial decrease in greenhouse gas emissions is expected in the following years, positioning the Town to make significant strides toward achieving the 2030 goal of a 40% reduction.

Further information on Zero Carbon Whitby can be found in the Zero Carbon Energy section of this Report on pages 39 to 43.

The following is a list of Town wide 2024 accomplishments grouped by the 10 principles of the One Planet Living Planning Framework:

Health and Happiness

Encouraging active, social, meaningful lives to promote good health and well-being.

Park and Playground Redevelopments

To support exercise and play, several park redevelopment projects were in the planning, construction or design stages in 2024, including:

- Baycliffe Park Multi-skills Court Redevelopment – design underway
- College Downs Park Playground Redevelopment – design underway
- Cullen Central Park – Led by CLOCA (Central Lake Ontario Conservation Authority) Lynde Creek concrete dam removal and creek rehabilitation completed in summer 2024 to improve fish habitat through the removal of a physical barrier within the creek.
- D’Hillier Park North Playground Redevelopment – design completed, scheduled for construction in spring 2025
- Jeffrey Park Practice Cricket Pitch – construction completed and open to the public in September 2024
- Glenayr Park Redevelopment – design completed, scheduled for construction in spring 2025
- Grass Park Accessibility Improvements – construction completed and open to the public in May 2024
- Myrtle Station Half Basketball Court Installation – design completed, scheduled for construction in summer 2025
- Powell Park Playground Redevelopment – design completed, scheduled for construction in spring 2025
- Sato Park Playground Redevelopment – design underway
- Vipond Park Playground Redevelopment – design underway

New Parks

The Town oversaw the development of the following new parks:

- Lazy Dolphin Park completed in March 2024
- The design of West Whitby Holdings Park is underway; construction has been scheduled to commence in 2028

Whitby Sports Complex (\$)

In the fall of 2023, the construction on the Whitby Sports Complex officially started to help meet our growing community's immediate and future recreational needs. The new complex will be located on the west side of Baldwin Street South, south of Highway 407, and will include the Town's largest park investment to date. Park facilities include a full-size lit outdoor artificial turf sports field, three (3) lit tennis courts, fourteen (14) lit

pickleball courts, a skateboard park and pump track, three (3) lit multipurpose courts, a playground, open greenspace, plazas, extensive native meadow, and tree plantings.

In terms of sustainability, the Whitby Sports Complex will be one of the first of its kind in Canada to achieve Zero Carbon Building Design & Leadership in Energy and Environmental Design (LEED) Gold Certified. Additionally, the complex will be the first building in Whitby constructed to Tier 3 of the Whitby Green Standard. Constructing the Whitby Sports Complex to achieve LEED Gold and Tier 3 of the Whitby Green Standard supports Action 2.5.1 of CERP Phase 2 – Mitigation and aligns with the Zero Carbon Whitby Plan. In 2023 the Town was awarded \$25,000,000 through the Green and Inclusive Community Buildings Program from to fund sustainable and accessible features included in the design, including the construction of the geothermal system.

The construction of the geothermal system will achieve Action 2.1.2 of the Community Strategic Plan, as the measure of progress for this Action 2.1.2 is “one alternate energy system introduced”.

Further funding was provided by Zero Emission Vehicle Infrastructure Program (ZEVIP) and EV Charge ON Program to offset the cost of the EV charging stations that will be installed as part of the construction of the Whitby Sports Complex.

As of December 2024, the arena and gym structural work and pool foundations have been completed (Figure 1). Mechanical and electrical work is still underway and progressing. One of the larger milestones regarding the geothermal system has been achieved with the vertical piping being installed.

Figure 1. Construction of the Whitby Sports Complex

Parks, Trails and Wayfinding Signage Design Project

The Wayfinding and Signage Study was adopted by Council in 2022. In 2024 the Town has installed seven (7) park signs using the new standard. The Town will continue installing wayfinding signage in parks and along trails in 2025, 2026 and 2027.

Parks and Recreation Master Plan

The Town completed a Parks and Recreation Master Plan to identify actions to support future recreational services and infrastructure. The Plan contains 79 recommendations that will guide decision making related to parks and recreation services in the Town for the next 10 years. This Plan was finalized and approved by Council in October 2024.

It addresses:

- The type and location of future park and recreational opportunities and amenities required to support Whitby's quality of life;
- Service standards, policies, and programs for recreation and parks facilities and services; and
- Required improvements to parks, trails, and open spaces.

The Plan considers sustainability throughout, such as:

- Ensuring the standards established for the design of parks, trails and open spaces support and include climate change mitigation and adaptation measures, such as standards for shade structures and use of permeable paving for hard surface areas;
- Examining current operations and maintenance practices for parks, trails and forestry to identify and implement changes to facilitate reduction of greenhouse gas emissions and improved climate change mitigation and adaptation; and
- Specifying that consideration should be given to designing splash pad amenities such as shade structures and integrating water-saving measures.

Culture and Community

Nurturing local identity and heritage, empowering communities and promoting a culture of sustainable living.

Whitby Sustainability Advisory Committee

The Whitby Sustainability Advisory Committee (WSAC) is a community-based committee of Council, whose role is to promote sustainability, support environmental management, and respond to climate change. In 2024, WSAC achieved various initiatives, including a presentation to staff and Senior Leadership on sustainable procurement, exhibitors at the Official Tree Event in April and Harvest Festival in September, and gave a delegation to Council requesting Council support the Ontario Energy Board's Decision to end the Gas Pipeline Subsidy. Members also attended the Durham Climate Roundtable Fall forum to support the Town in talking to participants and providing information about the committee.

Alveole Beekeepers Presentations (\$)

As a part of the Town's Urban Rooftop Beehive Program sponsored by Elexicon Energy, Alveole Beekeepers delivered a hands-on educational workshop. The workshop was titled *Bee the movement: an introduction to the urban agriculture movement* and was held to celebrate World Bee Day (May 20), the Town partnered with the Whitby Public Library's Rossland Branch, to deliver a program. An Alveole Beekeeper shared their knowledge on rooftop gardening, vertical farming and community building. The participants were invited to ask questions and engage in discussions throughout the presentation.

Figure 2. Participants listening to the Bee the movement presentation presented by Alveole.

Earth Week Themed Programming

Throughout Earth Week (April 21 – April 27, 2024), in partnership with the Whitby Public Library, several activities were available to help residents and family members learn about ways to help our Earth and to get involved, including:

- Earth Day Storytime and Craft
- Garden Club: Read, Know, Grow!

Bird Conservation Presentation

In celebration of Earth Month, on April 16, 2024, the Town partnered with the Whitby Public Library's Rossland Branch, to deliver a program on bird conservation. Kawartha Bird Control provided information on best practices for helping keep wild birds safe and thriving in Whitby's local community and beyond, while also bringing in a live bird of prey, Steve Rogers, the kestrel. 35 participants attended the event.

Durham Climate Roundtable Fall Forum

On October 19, 2024, the Town of Whitby attended the Durham Climate Roundtable Fall Forum at the Regional Municipality of Durham Headquarters as an exhibitor booth. This event brought together leaders, sustainability advocates, and Durham residents to create a resilient, climate-conscious future for Durham Region. At least 50 participants visited the Town's booth. They had the opportunity to talk with staff about sustainability initiatives while also taking home resources such as native seed packets and portable chargers.

The Hive

In the spring of 2024, the Town commissioned tree carver Ryan Locke, to bring his expertise and passion to turn the trunk of a dead century-old black walnut tree in Whitby's historic downtown into a honeycomb with intricately carved bees (Figure 3).

This piece of public art celebrates environmental conservation and recognizes Whitby's designation as an official Bee City in 2022. Further information about Whitby being an official Bee City can be found on Page 25 in the Land and Nature section.

Figure 3. The carved honeycomb bee art in downtown Whitby.

Climate Emergency Response Plan – Phase 1 – Resilience

Sustainable Neighbourhood Action Plan

As identified in Whitby's Climate Emergency Response Plan, Phase 1: Resilience, the Town started developing a Sustainable Neighbourhood Action Plan (SNAP) Program in partnership with the Central Lake Ontario Conservation Authority and Durham Region. This project is a neighbourhood-scale community resilience and engagement program involving the community in identifying and developing an action plan for neighbourhood revitalization to integrate local community interests and sustainability objectives.

In October 2024, Whitby Council endorsed the West Lynde neighbourhood as Whitby's first pilot SNAP project. This community is home to over 7,000 residents living in blocks of single-family, semi-detached houses, townhomes and high-rise buildings. Staff distributed a survey asking residents for feedback on what sustainability actions are important to them. Over 130 residents participated and identified the following priorities, ranked in order of importance:

1. Sustainability improvement to parks, roads, and other public spaces
2. Stormwater management and flood protection
3. Water and energy conservation programs
4. Local food production
5. Health and wellness

Whitby's Community Wide Education Campaign on Climate Risks, Preparedness and Recovery

Identified as Action 1.5 in Whitby's Climate Emergency Response Plan (CERP), Phase 1: Resilience, the Town initiated an education campaign on climate risks, preparedness and recovery in the fall of 2023. As the first step, a community survey was conducted to establish a baseline assessment of Whitby's knowledge and educational needs of climate risks, preparedness, and recovery.

The results of this survey informed the development of a communication strategy (Action 1.5.1), which outlines specific actions such as workshops, webinars, social media campaigns, and the use of available communication channels and partners. It also includes key performance indicators to track the strategy's impact.

The strategy integrates relevant actions from the CERP, specifically Actions 1.5.3, 1.5.4, and 1.5.5, to ensure a coordinated and comprehensive approach to the overall goal of creating a community wide education campaign.

Protecting and restoring land and aquatic systems for the benefit of people and wildlife.

Local Enhancement & Appreciation of Forests (LEAF) Backyard Tree Planting Program

2024 was the start of the fifth year of the Council approved five-year contract for the subsidized Backyard Tree Planting Program to property owners of Whitby. This program is delivered by the not-for-profit organization LEAF and is in partnership with the Region of Durham. From July 2023 to June 2024, 37 trees were planted in Whitby and from July 2024 to December 2024, 20 trees were planted (Table 1). Since July 1, 2020, Whitby has the highest cumulative number of trees planted in Durham Region at 384 compared to other local municipalities.

Table 1. By the numbers - LEAF Backyard Tree Planting Program

Planting Season	Trees Planted	Sequestered CO2 (kg)	Stormwater Mitigation (L)	Air Pollution Removed (kg)	Equivalent Gas Vehicles Taken Off the Road*
July 2023 to June 2024	37	101,784	14,028,475	2,022	23
July 2024 to December 2024	20	46,545	7,694,775	1,155	10

* Based on an average of 4.6 metric tons of carbon dioxide produced per year.

LEAF Community Greening Program

2024 was the second year of implementing the Community Greening Program, which involved partnering with LEAF to deliver the following events:

- LEAF Earth Day Tree and Shrub Planting at Whitby Civic Park on April 20, 2024, through which, 140 participants planted 300 trees and shrubs.
- LEAF Community Stewardship Maintenance event at Rosedale Park on June 22, 2024, through which, 28 bags of unwanted/invasive plants were collected and approximately 100 trees/shrubs were mulched. At this event there were four (4) LEAF volunteers, six (6) community participants and four (4) staff (LEAF and Whitby combined).
- An in-person LEAF Tree Tour at Whitby Civic Park was conducted on April 20, 2024, with a total of 30 participants. The attendees were led on a guided walk through the park where they were given the opportunity to learn more about native tree species, their invaluable benefits, and the ways that they can help the

urban forest thrive. The tour taught about the difference between native, non-native, and invasive species and how to identify them.

- The LEAF Tree and Shrub Planting event at Kelloryn Park on September 28, 2024, during National Forest Week included 140 participants who planted 510 trees and shrubs (Figure 4).

The total 867 trees planted as part of LEAF programs in 2024 will save approximately 3,737 tCO₂e through sequestration and reduced air pollution. This is equivalent to taking 812 cars off the road for one year.

Figure 4. Participants planting trees at Kelloryn Park on September 28, 2024.

National Forest Week and National Tree Day

The Town celebrated National Forest Week (September 22 to 28, 2024) by promoting the LEAF Native Tree and Shrub Planting Event at Kelloryn Park, a Forest Therapy Walk at Heber Down Conservation Area and encouraging residents to plant trees in their backyard through the LEAF's Backyard Tree Planting Program.

The Forest Therapy Walk was held on September 21, 2024, Kristie Virgoe, a Certified Forest Therapy Guide, through the Association of Nature and Forest Therapy Guides, led 24 participants on a guided walk. This event was held in partnership with the Whitby Public Library, Rossland Branch.

Town of Whitby's Official Tree

In the fall of 2023, Whitby residents were invited to cast their vote for one of the four following native tree species: Tamarack, Tulip tree, Kentucky coffee tree, and Honey locust. The trees were selected based on their abundance and significance in Whitby while also taking into consideration species that are not already recognized as official trees nationally, provincially, or near neighboring communities.

On April 20, 2024, Whitby residents were invited to attend the official tree planting event at Town Hall. At this event, the Tulip Tree was announced as Whitby's Official Tree and was planted behind Town Hall (Figure 5).

Figure 5. Planting a Tulip Tree Town's Official Tree.

Free Conservation Lands and Ontario Park Passes

In partnership with CLOCA and Ontario Parks, the Whitby Library lends passes that grant free day-use access to the conservation areas and provincial parks. These loans encourage residents to explore and appreciate our local natural assets and sustainable outdoor activities.

Durham Meadowway

The Meadowway is a regional trail network proposed to link Greater Toronto Area communities between the Don River and Oshawa. The Region of Durham Planning Division (Transportation Planning Section) is coordinating the Durham Meadowway Visioning Study in partnership with the City of Pickering, the Town of Ajax, the Town of Whitby and the City of Oshawa. One of the preliminary guiding principles of the Study is the Natural Environment. The Meadowway will protect sensitive plant and animal habitats and seek opportunities to enhance biodiversity, provide opportunities for visitors to learn about the natural environment and encourage community stewardship. In 2023, the Durham Meadowway Visioning Study involved identifying a preferred route, and developing a concept plan while engaging with the community. The Visioning Study was approved by the Regional Council on June 26, 2024.

Bee City

In 2018, Whitby was designated the 10th Bee City in Canada and the first in Durham Region. The Bee City designation is awarded to municipalities that declare to protect pollinators and their habitat through action and education. In 2024, the Town undertook several measures identified in this report to maintain the Bee City status including

educational seminars, community plantings, and provided native wildflower seed packets.

Pollinator Week

Pollinator Week (June 17 to 23, 2024) is a time to celebrate the vital role of pollinators like bees, birds, bats, and butterflies in our local ecosystem and support global food production. The Town is committed to protecting pollinators and their habitat through action and education as a designated Bee City of Canada. As part of that commitment, the Town planned one stewardship event in partnership with LEAF and one staff event to support the Seeds to Bees program. Further information regarding these initiatives can be found throughout the Land and Nature section.

Tree Cities of the World

Tree Cities of the World is an international effort through the Arbor Day Foundation, the Food and Agriculture Organization of the United Nations, alongside its Canadian partner, Tree Canada, to recognize cities and towns committed to ensuring that urban forests and trees are properly maintained, sustainably managed, and duly celebrated. When the program launched in 2019, Whitby was one of only 59 cities worldwide to receive this designation. Since then, the program has increased to 200 cities Worldwide. Whitby was successful in our 2024 Tree Cities of the World application as we continued to maintain, manage and celebrate our forest and trees through several initiatives that can be found in the Land and Nature section of this report.

Urban Forest Management Plan

In late 2023, the Town started developing its first Urban Forest Management Plan (UFMP), directly responding to Action 3.1.4 in CERP, Phase 1. This comprehensive plan will offer recommendations aimed at enhancing tree health and diversity, increasing tree cover, addressing the challenges posed by climate change, mitigating risks to public safety, and maximizing the benefits of a sustainable, healthy, and secure urban forest. As part of this process, in 2023 the consultants completed an inventory of the Town's trees. While a street tree inventory was previously conducted, a park tree inventory had not been completed. This inventory supports CERP, Phase 1 Action 3.1.1 and 3.1.3, which calls for setting an urban canopy target.

In June 2024, consultants engaged with First Nations, Councillors, Town staff, external organizations, and members of the Whitby community to shape the UFMP's vision, guiding themes, and strategic goals. Public input opportunities included an online survey conducted from June 3 to 24 and a public engagement session held on June 12, 2024. The first draft of the UFMP is currently underway with the UFMP expected to be finalized in early 2026.

Seeds to Bees

The Seed to Bees native plant nursery has been growing this past year. One staff event was planned during pollinator week (June 17 to 23, 2024) to assist the Horticultural Team with the nursery. On June 18, 2024, Town Staff helped repot 1134 native plants. These plants were then planted in the fall at Lynde Creek Park, Chelsea Hill and Guthrie Park. Each of the 22 staff who participated were gifted with a native plant to plant in their own garden.

Mayors' Monarch Pledge

The Town continued their efforts to protect pollinators through participation in the Mayors' Monarch Pledge in 2024. This is a program led by the National Wildlife Federation. Through this initiative, Whitby is committed to creating habitat for the monarch butterfly and pollinators and educating residents about how they can make a difference at home and in their community. To participate, the Town must commit to at least three action items (out of 30) that the community will initiate throughout the year. In 2024 the Town committed to the following actions:

- Launch or maintain a public communication effort to encourage residents to plant monarch gardens in their homes or neighbourhoods.
- Launch, expand, or continue an invasive species removal program to support the re-establishment of native habitats for monarch butterflies and other pollinators.
- Display educational signage at monarch gardens and pollinator habitats.
- Increase the percentage of native plants, shrubs and trees that must be used in city landscaping ordinances and encourage the use of the milkweed, where appropriate.

Using water efficiently, protecting local water resources, reducing flooding and drought.

Harbour Dredging/Flooding Mitigation

The federally owned Whitby Harbour and provincially owned Pringle Creek are contaminated with dioxins and furans at levels above provincial and federal standards. The source of contaminants is not fully known; however, they are believed to have entered the harbour via Pringle Creek in approximately the 1970s. The Department of Fisheries and Oceans Canada (DFO) began remedial dredging in the fall of 2024 based on a Remedial Action Plan (RAP) developed in 2023 and the project is expected to be completed in the first half of 2026. The remediation is intended to reduce potential risks to the health of people, fish and wildlife, that are associated with long term exposure to Whitby Harbour contaminants. An overview of the remediation project can also be found on the DFO website: [Whitby Harbour Remediation Project](#).

Local and Sustainable Food

Promoting sustainable, humane farming and healthy diets which are high in local, seasonal organic food and vegetable protein.

King Street Cooperative Community Garden

The King Street Cooperative Community Garden (KSCCG) celebrated its second season in 2024. This year, KSCCG received a generous grant from the Mayor's Community Development Fund and was awarded a grant from TreeMobile Toronto. The grant from TreeMobile Toronto came in the form of grapevines, raspberries, strawberries, asparagus plants as well as a pear tree and two cherry trees. KSCCG also planted annual vegetables and donated nearly 60 pounds of fresh produce to Feed the Need Durham and to the Muslim Welfare Home in Whitby.

In 2024, KSCCG held an Earth Day cleanup event in April and a Summer Celebration Event in August. Funding received from ParkPeople/Amies des Parcs was used to support the Summer Celebration event which included music by Brian Gordon and face painting by GoFacepaint. Over 50 people attended this.

The season concluded in December with a workshop by Sayeh Beheshti on Winter Sowing Native Plants held at the Whitby Public Library. Extra planting kits were donated to the Whitby Public Library's seed bank program.

The focus for 2025 will be introducing more native plants into the garden to promote biodiversity and pollinator health.

Whitby Civic Community Garden

The Town of Whitby received a community garden application from Mannahelp which is a registered non-profit organization operating in Canada and Nigeria, focused on providing food support to Durham Region residents. Through their Food Program, they assist local families in need by supplying essentials such as breakfast items, healthy snacks, fresh produce, canned protein, and hygiene products. The purpose and goals of the proposed garden include fostering community engagement, promoting sustainability, enabling community access to fresh produce and provide youth with learning opportunities. Mannahelp will oversee all aspects of the community garden, including planning, construction, maintenance, and resource management, ensuring the space remains functional and sustainable. They will also engage the community through volunteer programs, workshops, and events while providing regular updates to stakeholders on the garden's progress and impact. The community garden will be located west of the Whitby Civic Recreation Centre's parking lot and construction will begin in June of 2025.

We Grow Food Cooperative Community Gardens

We Grow Food is a grassroots organization that promotes the importance of growing food and connecting community members to each other through growing and sharing natural, fresh produce in an urban environment. Supported by the Mayor's Community

Development Fund, in May 2024 they planted gardens at Perry Terrace, 220 Perry Street and Dryden Heights, 90 Waller St and 1635 Dundas Street East. The gardens enable community members to cultivate their own food by establishing a shared space where everyone can contribute to enhancing their own food security. We Grow Food also hosted community workshop and a cooking class in 2024.

Whitby Public Library Seed Share

Seed Saving is a growing movement that supports sustainable gardening practices and a healthy lifestyle by preserving genetic diversity and fostering an awareness of nature. The Whitby Public Library Seed Share provides access to locally saved seed and knowledge for anyone interested in growing food, attracting pollinators, saving their own seed and contributing to this public resource. For more information visit www.WhitbyLibrary.ca/seedshare.

Durham Master Gardeners

The Town of Whitby, in partnership with the Durham Masters Gardeners, delivered a webinar series in 2024 featuring the following topics: Edible Flowers on March 6, Garden Myths on March 13, and Seed Saving on April 3.

Brooklin Whitby Garden Club

The Town of Whitby, in partnership with the Brooklin Whitby Garden Club, delivered an in-person speaker series in 2024 featuring the following topics: Rethinking Beauty: Inspiring Gardeners in a Changing World on March 27, 2024 The Language of Gardening on April 24, 2024 and Little Forests – Big Results on May 22, 2024.

Urban Rooftop Beehive (\$)

The Town has an urban beehive (Figure 6) on the rooftop of the Whitby Civic Recreation Centre, sponsored by Elexicon Energy and maintained by Alveole Urban Beekeepers. The Town extracts approximately 10 kilograms of honey from its rooftop beehive each year. The honey is bottled into 100 small jars and gifted to volunteers and handed out as prizes during community events.

Figure 6. Bees on the Town's urban rooftop beehive.

Travel and Transport

Reducing the need to travel, encouraging walking, cycling and low-carbon transport.

Active Transportation Plan

The Town's Active Transportation Plan (ATP) encourages people to use transit, walk and cycle more often and strives to make our community more connected, accessible, and safer for everyone. The Town's ATP identifies the active transportation facilities to support pedestrians, cyclists, etc. The projects in the program are for roadway active transportation facilities, which include on-road bike lanes, sharrows, paved shoulders, and in-boulevard multi-use paths. In 2024, the following projects were completed:

- Installation of Pedestrian Crossovers (PXO) at 10 locations
- Installation of centerline, users' symbols and signage on Multi-Use Paths (MUP)
- Design and construction of Multi-Use Path (approx. 150 m) along Garden Street between Julie Payette Public School driveway and Mary Street.
- Design and construction of a cycle track (approx. 150 m) on Cochrane Street south of Taunton Road West, to transition cyclists between on-road and a MUP.

New Enhanced Street Design

The new enhanced street design standard is in place and has been consistently applied to all new developments. Developers reconstructing major roads are also adhering to the new standard by placing sidewalks on both sides of all new subdivision roads. Additionally, in areas where schools, parks, and high-density residential areas exist, all sidewalks have been made wider to accommodate larger pedestrian volumes. This is also happening for multi-use paths and cycling facilities (on and off road) identified in the Transportation Master Plan. In 2025, the priority will be adding new sidewalks and multi-use paths through new developments without impact on the Town's capital budget.

Electric Vehicle Charging Stations (\$)

In 2024 The Town of Whitby installed 14 new electric vehicle charging stations as part of the Zero Emission Vehicle Infrastructure Program (ZEVIP) administered by Natural Resources Canada. Combined with the existing 10 charging stations, the Town now possesses 24 EV charging stations with 47 ports in total. Among these new installations are Whitby's first level 3 charging stations. These stations offer much faster charging capability than level 2 stations.

Between January 1, 2024, and December 31, 2024, there have been 2,091 charging sessions across the 24 EV chargers. These sessions have resulted in 25.6 tCO₂e GHG savings.

Grant Funding was secured via Elexicon Energy Sponsorship to help offset the cost of operations and maintenance of the stations.

Figure 7. EV Charging Station at a Town of Whitby facility.

Trail Construction, Improvements and Expansion (\$)

In 2024, the Town constructed new trails and made several trail improvements to Whitby's existing active transportation infrastructure projects, including:

- Lynde Creek Trail – construction has started in West Whitby to connect Bonacord Road and Rossland Road.
- Trails of Country Lane in northwest Whitby – trail construction within this new neighbourhood is underway and will be ongoing into 2025. Opening date is to be determined.
- Great Lakes Waterfront trail safety enhancements:
 - A centreline was installed on over 4 km of existing waterfront trail to enhance community safety and encourage trail users to share the trail.
 - Trail safety signs have been designed and are planned to be installed along the waterfront trail in 2025.
- Great Lakes Waterfront Trail – Corbett Creek Waterfront Trail Improvements Project:
 - In September 2024, Whitby began upgrading the eastern section of the Great Lakes Waterfront Trail in the Corbett Creek area. Improvements include an 80-meter pedestrian bridge, a 145-meter boardwalk, and widening over 600 metres of trail from 3 to 4 metres. The enhanced trail, funded in part by a \$2.6 million Federal Active Transportation grant, will reopen in Spring 2025.

Water St. Environmental Assessment (EA)

An EA has been undertaken to assess road re-alignment options, streetscape enhancement and geometric modifications to address parking and drainage issues and to promote active transportation to attract more Whitby residents to enjoy the waterfront. The EA study is anticipated to be completed by the end of 2025.

Materials and Products

Using materials from sustainable sources and promoting products that help people reduce consumption.

World Sustainable Procurement Day

World Sustainable Procurement Day (March 21) is a day to empower and equip Procurement Practitioners with knowledge, best practices, and practical solutions to sustainable procurement challenges. To celebrate this day, Whitby Staff were invited to a one-hour lunch and learn presented by Bob Willard from Sustainability Advantage.

Asset Management Plan

In 2024, the Municipal Asset Management Plan was updated to provide a high-level overview of the condition of Town infrastructure, the levels of services the Town is providing through its infrastructure, risk assessments as a means of prioritizing capital spending, and projected financial needs over the short, medium, and long-terms. As part of the update, a section on climate change including resilience and mitigation was incorporated per Action 1.1.1 in CERP, Phase 1: Resilience. Specifically, the Plan examined challenges and opportunities for climate resilience and mitigation on various assets such as road surfaces, stormwater systems, facilities, and more. It also accounted for Whitby's Zero Carbon Budget recognizing that carbon output reduction is crucial for capital project planning.

Zero Waste

Reducing consumption, reusing and recycling to achieve zero waste and zero pollution.

Provincial Day of Action on Litter

In Ontario, the Provincial Day of Action on Litter is celebrated on the second Tuesday of May. In recognition of this day, in 2024 community members were encouraged to complete a one-time cleanup or to adopt public spaces through the Anti-litter App:

www.whitby.ca/cleanup.

Earth Week Staff Lunch and Learn

On April 24, 2024, Sustainability partnered with the Waste Division to deliver a 30-minute presentation at the Town of Whitby's Operations Facility on the new enhanced green bin program (Figure 8).

Figure 8. Waste Staff delivering a presentation on the new Enhanced Green Bin program in April.

Waste Reduction Story and Craft Time

The Town, in partnership with the Whitby Public Library, hosted a waste-themed story time on October 26, 2024, that focused on the importance of reducing waste, reusing items, and recycling materials. After the story time, children were provided with an opportunity to put their new knowledge to work by taking part in a reuse craft to repurpose waste materials and prevent them from going to landfills.

Repair Café

The Town hosted two pop-up Repair Cafés at the Whitby Central Library. The first occurred on April 27, 2024, during Earth Month with 22 participants in attendance. The

second Repair Café occurred on October 26, 2024, during Waste Reduction Week with 15 participants in attendance. The Repair Café consisted of volunteers who shared their repair knowledge and helped community members fix their household items such as computers, electronics, small appliances, small furniture, clothes, jewellery, books, bikes and more. This event created a platform for knowledge sharing and prevented items from ending up in landfills.

Waste Diversion Drop-off

In partnership with the Rotary Club of Whitby and the Whitby Public Library, on April 27, 2024, and October 26, 2024, members of the community were invited to recycle “hard-to-recycle” items and help reduce their impact on our planet. Items such as Brita filters, printer ink cartridges, disposable razors, and pens, markers and highlighters were collected to be recycled through Terracycle.

Community Cleanups

The Town launched the Anti-Litter App in May of 2021 to support the Provincial Day of Action on Litter. The app allowed residents to pre-register for a one-time community cleanup or make a longer-term commitment to adopt and clean a road, park or trail. From April to November 2024, a total of 60 parks were cleaned up, along with 9 adopted parks. Throughout this period, 2,373 volunteers participated, with volunteer numbers ranging from 2 to 600 per park. Notably, one group contributed to the cleanup of 14 separate parks with a total of 390 volunteers.

Curbside Giveaway Pilot

Following a successful pilot that the Town ran in partnership with the Region of Durham in 2023, the Town ran two Curbside Giveaway/Swap Days in 2024. This initiative invites residents to place unwanted items in good condition – clearly marked FREE – on their curb for anyone to pick up. At the end of the Giveaway Day, residents were instructed to return unclaimed items to their home. These Giveaway Days were on May 4, 2024, and September 14, 2024, and were promoted in the community using large curbside signage and social media. Similar to the previous year, this program received great community feedback about the opportunity for residents to reduce waste and take part in the circular economy.

Curbside Battery Collection Pilot

In the fall of 2024, the Region collected over 9,000 lbs of batteries in the Town through their curbside pilot collection.

Enhanced Green Bin Program

Starting July 1, 2024, the Town’s green bin program was expanded to include additional materials such as pet waste and diapers. These items are now sent to an anaerobic digester, where they contribute to generating electricity and nutrient-rich fertilizers. By diverting more materials through the green bin stream, residents can significantly reduce waste sent to the Durham-York Energy Waste facility and continues to offset energy production resources sustainably.

Zero Carbon Energy

Making buildings and manufacturing energy-efficient and supplying all energy with renewables.

Community Mitigation

Whitby Green Standard

The Whitby Green Standard is an existing framework that allows for a flexible approach for addressing climate change and sustainable design criteria in all new buildings. In 2024, Sustainability reviewed 91 unique Whitby Green Standard applications at various stages in the development application process.

In addition, the Town worked closely with a consultant to update the Whitby Green Standard to Version 2. The purpose of this update is to reflect new policies and plans at, while also aligning with industry best practices in environmental and social sustainability. For example, as part of CERP, Action 2.1.1, the updated Whitby Green Standard includes measures related to flood risk reduction and extreme heat, incorporating components such as green infrastructure and stormwater management to enhance climate resilience in new developments. Additional updates respond to several other key actions in CERP, Phase 1 and 2, including:

- CERP, Phase 1 - Action 2.1.3: Version 2 incorporates climate resilience measures into the baseline performance tier, with co-benefits such as improved landscaping, air tightness, and energy efficiency.
- CERP, Phase 1 - Action 2.6.2: Version 2 will ensure that new development applications address basement flooding risks.
- CERP, Phase 2 - Actions 2.4.2 and 2.4.3: The Whitby Green Standard proposes updating the baseline performance requirements to Tier 2 and developing a Terms of Reference. Additionally, developers, planners and builders were educated on opportunities to achieve higher performance standards, and this work will continue in 2025.

Furthermore, throughout this process, Town staff, the building industry, neighbouring municipalities and other stakeholders were consulted on the updates for their feedback to strengthen the standard. The Whitby Green Standard Version 2 is anticipated to be completed in late 2025.

Durham Greener Homes Residential Retrofit Program (\$)

Since 2022, 472 homes in Whitby have enrolled in the Durham Greener Homes Program. This program aims to stimulate energy retrofits in existing residential buildings, encouraging homeowners to improve energy efficiency through upgrades such as insulation, windows, and heating systems. This supports CERP, Phase 1 Action 2.9.6, by incentivizing and promoting the installation of high efficiency heating and cooling options.

In 2024, the Town offered an additional \$5,000 top-up through the Housing Accelerator Fund, bringing the total incentive up to \$10,000 for Whitby residents aligning with Action 2.1.4 in CERP, Phase 1 and Action 2.1.3 and 2.3.2 in CERP, Phase 2. In 2024, 256 Whitby residents signed up for the program and 28 heat pumps were installed in Whitby through the program.

The Town continued to promote and encourage Whitby residents to participate using its social media channels supporting Action 2.1.6 and 2.3.4 in CERP, Phase 2.

The Regional Municipality of Durham also conducted a Durham Greener Homes Heat Pump Workshop in Whitby on December 2, 2024, with a total of 42 people participating online and in-person. This workshop aligns with Action 2.1.5 and 2.3.4 in CERP, Phase 2.

Furthermore, Durham Region, in collaboration with Windfall Ecology Centre, is working to expand the Durham Greener Homes program to include a resilience-focused component (Weather Ready). This program will support residents in Durham Region assess and improve their homes' ability to withstand extreme weather events. This project aligns directly with Action 2.1.2 and 2.3.4 in CERP, Phase 1.

Race to Resilience and Race to Zero

Race to Resilience and Race to Zero are global campaigns run by the COP26 Presidency and high-level Climate Champions. The purposes of these campaigns are to rally leadership and support from cities, regions, businesses, and investors to help frontline communities build resilience and adapt to the impacts of climate change while also reducing GHG emissions to stay within the 1.5°C global temperature increase as outlined in the 2016 Paris Agreement.

In 2021, Council endorsed joining these campaigns. By joining Race to Resilience and Race to Zero, Whitby joined cities worldwide in committing to be catalysts for change while also demonstrating the commitment to and delivery of the goals of the Paris Agreement and COP26. In 2024, to meet the requirements of this campaign, Whitby reported all its climate actions through the Carbon Disclosure Project.

Oil to Heat Pump Affordability Program

The Oil to Heat Pump Affordability (OHPA) program is administered by Natural Resources Canada and helps homeowners who are currently heating their homes with oil, transition to eligible electric heat pump systems. Eligible homeowners can receive a grant of up to \$10,000. The Town communicated this program to residents online through its available social media channels. Promoting this program to residents helps support Action 2.1.6 and 2.3.4 in CERP, Phase 2.

Corporate Mitigation

Global Covenant of Mayors

The Town joined the Global Covenant of Mayors (GCoM) in 2019. GCoM is a global network of more than 10,000 cities spanning 139 countries worldwide. These local governments all recognize that ambitious climate initiatives need to be taken to keep global temperatures from rising more than 1.5°C. Whitby's participation in the Global Covenant of Mayors commits the community and Town to the following milestones:

- Develop a GHG emissions inventory;
- Assess climate risks and vulnerabilities of the Municipality;
- Define ambitious climate mitigation, resilience and energy targets; and
- Create, prioritize, complete, and monitor climate action plans.

As part of the annual Broader Public Sector (BPS) Reporting, a GHG emissions inventory has been developed and is updated annually. Further information about BPS reporting can be found below under Energy Star Portfolio Manager section on page 43.

For more information about the Global Covenant of Mayors, please visit globalcovenantofmayors.org.

Zero Carbon Whitby

The Zero Carbon Whitby Plan indicates Whitby's 2019 GHG emissions (baseline) were 5,525 tCO₂e. Accordingly, Whitby's short-term GHG reduction goal is 1,105 tCO₂e by 2025.

The implementation of the Zero Carbon Whitby Plan and its associated projects began in 2023, with twelve Zero Carbon projects being carried out. These projects collectively resulted in an estimated GHG savings of 99.1 tCO₂e¹.

Please refer to Table 2 for details on the Zero Carbon Whitby projects scheduled for 2024. One 2024 Zero Carbon Whitby project has been completed, with a projected GHG savings of 2.6 tCO₂e. There are several projects that were scheduled for 2024 that are still in progress that are projected to result in GHG emissions savings of 206.2 tCO₂e once fully implemented. In addition, there are Zero Carbon Whitby projects that were scheduled for 2023 that are anticipated to be completed by the end of 2025 that are projected to result in an additional GHG emissions savings of 19.5 tCO₂e.

In addition to the Zero Carbon Whitby projects below, in 2024, 14 new electric vehicle charging stations were installed throughout the Town. This was a significant project that was prioritized as it was funded through the federal Zero Emission Vehicle Infrastructure Program (ZEVIP) which has a set project completion date that had to be met. Staff's involvement in this project limited their ability to implement additional Zero Carbon Whitby projects included in the 2024 carbon budget. Although this project does not result in initial GHG savings, the use of the chargers will result in future GHG savings at a corporate level and across the community.

¹ In 2023 there were GHG emissions savings as the CHP system at the CRC was offline for most of the year due to the construction at the CRC. The savings from the CHP at the CRC were initially included in the 2023 Annual Sustainability Report. However, the CHP system was permanently transitioned to serve as a back-up power system in March 2025 which resulted in an estimated savings of 454.4 tCO₂e. The reporting of GHG emissions reductions from the CHP has been moved from 2023 to 2025. This adjustment ensures clarity and prevents any double counting of emissions savings associated with the CHP.

Table 2. 2024 Zero Carbon Whitby Projects and Initiatives

Facility	Project	GHG Emission Savings (tCO₂e) *Annualized over a calendar year	Status
Lynde House	Furnace replaced with Heat Pump	(2.6) ²	Complete
Civic Recreation Centre	Site Lighting Conversion and Bollard Lights	(5.9)	Ongoing
Iroquois Park Sports Complex	Cold-Water Flooding System	(152)	Ongoing
McKinney Centre	Cold-Water Flooding System	(25.6)	Ongoing
Brooklin Community Centre and Library	VFDs For Heating Pumps(S)	(0.2)	Cancelled
Lynde House	Design and Construction of New Parking Lot Lighting	(0.5)	Cancelled
Port Whitby Marina	Air Source Heat Pumps - Materials & Installation	(11.1)	Ongoing
Fire Hall #4	Air Source Heat Pump - Materials & Installation	(10.2)	Ongoing
Fire Hall #5 (Headquarters)	Solar PV - Materials/Installation	(1.4)	Deferred
Town Hall	Solar PV - Materials/Installation	(1.5)	Ongoing
Completed Project Total		(2.6)	
Ongoing Project Total		(206.2)	
Cancelled Project Total		(0.7)	
Deferred Project Total		(1.4)	

² This figure varies from the 2024 budget book because the initial model showed savings related to the use of a heat pump to support the domestic hot water tank on site. This building does not have domestic hot water tank, so these savings have been subtracted.

Progress Towards 2025 GHG Emissions Reduction Target

Table 3 compares the yearly GHG emissions savings identified in the Carbon Budget based on the proposed projects and the savings from the projects that have been implemented since 2023.

Table 3. Zero Carbon Whitby – GHG Emissions Savings (tCO₂e) Listed in the Carbon Budget Compared to the Savings from the Implemented Net Zero Projects

	GHG Emissions Savings from Projects Proposed in Carbon Budget (tCO ₂ e)			GHG Emissions Savings from Implemented Projects (tCO ₂ e)		
Year	GHG Emissions Savings from Approved Projects	Fleet Growth Related GHG Emission Increases	Net GHG Emissions	GHG Emissions Savings from Implemented Net Zero Projects	Fleet Growth Related GHG Emission Increases	Net GHG Emissions
2023	(165.3)	14.5	(150.8)	(99.1)	14.5	(84.6)
2024	(213.6)	22.8	(190.8)	(2.6)	22.8	20.2
2025 (CHP Unit Transition at CRC)	(548.8)	9.1	(539.7)	(454.4) ³	9.1	(445.3)
Total	(927.7)	46.4	(881.3)	(556.1)	46.4	(509.7)

In March of 2025, the Combined Heat and Power (CHP) system at the Civic Recreation Centre (CRC) was permanently transitioned to serve as a back-up power system which resulted in an estimated savings of 454.4 tCO₂e (Table 3). The large savings from CHP transition to back-up power has contributed significantly towards the Town's 2025 GHG emissions reduction target.

As shown in Table 3, the total net GHG emissions savings to date is 509.7 tCO₂e. This accounts for 46% of the Town's short-term 2025 reduction goal of 1,105 tCO₂e of GHG emissions (Table 4). If the remainder of the 2023 and 2024 are implemented by the end of

³ 2025 actuals include only one Zero Carbon Whitby project approved in the 2025 Carbon Budget- the transition of the CHP unit to back up at the Civic Recreation Centre that was completed in March of 2025. The savings from the additional Zero Carbon Whitby projects scheduled for 2025 and have not been included as the data will not be available until the end of 2025.

2025 the Town would achieve approximately 75% of our 2025 short-term GHG reduction target.

Table 4. Zero Carbon Whitby – GHG Emissions Reduction Progress Towards Short-Term Target

	GHG Emission Savings (tCO₂e)
2025 Target	1,105
Savings to Date (2023-2025)	(509.7)
Progress to 2025 Target (%)	46%

Pathway Forward to 2030 Target

While the Town will not be meeting the ambitious short-term target of a 20% GHG emissions reduction by 2025, significant upfront investments have been made in analysis and design projects. These efforts are crucial in informing future initiatives and moving the Town toward the 40% GHG emissions reduction target by 2030. For example, a deep energy retrofit design and feasibility analysis of the Iroquois Park Sports Centre is underway and a GHG savings of approximately 639 tCO₂e is projected to be realized in 2027 and beyond, subject to project funding. In addition, a Deep Energy Feasibility Pathway Study is planned to take place in 2025 for seven of our largest GHG emitting facilities. Consequently, a larger decrease in GHG emissions is anticipated in the coming years, aiming to move us closer to our 2030 target of a 40% reduction compared to 2019 levels.

Furthermore, in 2026 the Zero Carbon Whitby Plan will be updated to determine the projects that need to be prioritized and other actions that should be taken to progress towards the target of 40% GHG emissions reduction by 2030. Through this update, the anticipated project costs will be reviewed to ensure the budgets put forth for the projects are realistic so they can be carried out within budget. The update will establish the pathway required to achieve the ultimate goal of net Zero Carbon by 2045.

Measurement and Verification Strategy (M&V)

Measurement and verification strategies are used to confirm the accuracy of the initially projected greenhouse gas emission reductions from completed Zero Carbon Whitby projects. Given the unique characteristics of each project and facility, a variety of strategies are required to conduct this analysis.

Initial energy and GHG savings estimates for Zero Carbon Whitby projects were taken from a series of 2019 Energy Audits conducted by Efficiency Engineering (3rd party consultant) on all municipally owned properties. When possible, individual project savings were verified using submeter or utility bill data to determine energy and GHG savings pre and post project implementation. In facilities where submeter data or a large enough sample size of utility data was not available an alternate approach was taken using RETScreen energy modelling software. By inputting building design specifications, the software can model energy consumption and GHG emissions savings. By isolating the

specific building systems/equipment of the project a base and proposed case can be created to determine energy and GHG savings.

Zero Carbon Revolving Reserve Fund (ZCRRF)

In support of Zero Carbon Whitby, a Zero Carbon Revolving Reserve Fund (ZCRRF) was established in September 2022 to facilitate the implementation of the zero carbon projects. The ZCRRF provides a way to help pay for zero carbon retrofits, pilot projects and to fund incremental retrofit project costs of zero carbon options. Operational savings from 2024 Zero Carbon projects will be directed into the fund to help pay for future projects. The current uncommitted balance in the ZCRRF is approximately \$136,000.

Energy Sub Metering

The submeters installed at Iroquois Park Sports Centre, McKinney Centre and Town Hall continue to provide real-time monitoring of utility consumption at the equipment/system level to give an in-depth overview of energy consumption at each facility. Sub-meters will continue to be installed at all main Town facilities. These submeters will help to track and monitor Zero Carbon Whitby initiatives at these facilities.

Energy Star Portfolio Manager

In 2022, the Town began tracking energy consumption data through Energy Star Portfolio Manager for all major Town facilities. Energy Star accounts were continually updated throughout 2024 to monitor utility consumption and flag anomalies. Energy Star Portfolio Manager is also used to report under Ontario Regulation 25/23 Broader Public Sector. This regulation helps to identify energy and greenhouse gas saving opportunities, establish benchmarks, and measure improvements over time. This platform is an interactive resource management tool that benchmarks the energy use of any building and allows users to:

- Identify underperforming buildings to target for efficiency improvements;
- Identify best practices from efficient buildings;
- Set investment priorities;
- Verify savings and prevent snapback;
- Share and report performance;
- Earn recognition; and,
- Benchmark and track energy and water consumption, waste, and GHG emissions.

Appendix A: Funding Received in 2024

Grant Name	Town of Whitby Project	Grant Value Awarded	Funder Type
Elexicon Energy Sponsorship	Urban Rooftop Beehive Program (Including Alveole Beekeepers Presentation)	\$5,000	Local Distribution Company

Report Title: 2026 Workforce Plan Review

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: CAO 15-25

Department(s) Responsible:

Organizational Effectiveness
Human Resource Services

Submitted by:

Jacqueline Long, Head, Organizational Effectiveness

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Jacqueline Long, longj@whitby.ca

Theresa Bickle, Manager, Organizational Effectiveness, bicklet@whitby.ca

1. Recommendation:

1. That Council receive report CAO 15-25 regarding the 2026 Workforce Plan Review for information.

2. Highlights:

- Typically, the output of the workforce plan review is a recommended list of positions for consideration in the following year's budget. However, **considering other budget pressures faced by the Town for 2026, Staff's recommendation is to not put forth any tax-funded positions for consideration in the 2026 budget.**
- In 2022, staff worked with a third-party consultant to undertake a strategic workforce planning study including benchmarking staff count to comparator municipalities based upon number of staff per 1,000 households. In 2025, staff updated the benchmark data based upon 2023 Financial Information Returns (FIR) for the same group of comparator municipalities.
- The updated benchmark average staff complement was determined to be 12.75 full-time staff per 1,000 households.

- To maintain staffing at the updated benchmark levels, the 2025 review has determined that approximately 18.8 FTE, on average, would need to be added to the Town's staff complement annually between 2026 and 2031.
- For 2025, based upon the benchmark analysis compared to the Town's staff per thousand households, the full-time complement deficit for 2025 has been offset due to the approved increased staffing levels for firefighters and the Whitby Sports Complex.
- The Workforce Plan also develops a preliminary list of position needs on a three-year cycle. For 2026, staff have identified the need to add 23.85 FTE at an estimated value of \$3.3 million, and for 2027, 28.81 FTE at an estimated value of \$3.8 million, and for 2028, 7.5 FTE at an estimated value of \$1.0 million.
- Further to Staff's recommendation to not put forward any tax-funded positions in the 2026 budget, the 23.85 FTE identified for 2026 will be carried forward to the 2027 workforce planning review.

3. Background:

In 2022, staff worked with a third-party consultant to undertake a strategic workforce planning study. The 2022 Workforce Planning Project used sixteen (16) municipalities as the Town's comparator group. The 2022 benchmark average staff complement was determined to be 12.2 full-time staff per 1,000 households compared to the Town's 11.83 full-time staff per 1,000 households.

In 2025, staff updated the benchmark data and forecast staffing needs. The 2025 Review of Workforce Staffing Trends used fifteen (15) municipalities instead of the original sixteen (16), due to one municipality not filing their Financial Information Return (FIR) with the Province of Ontario at the time of analysis. The updated 2025 benchmark average is determined to be 12.75 full-time staff per 1,000 households, up slightly from the 12.2 full-time staff per 1,000 households identified in 2022. With the estimated total households in Whitby in 2031 remaining unchanged at 58,670 and applying the updated benchmark of 12.75, the Town requires an average of 18.8 FTE per year from 2026 to 2031 to respond to growth.

The 2025 refresh of the benchmark data indicates that the Town's staff count per 1,000 households has increased to 12.9 and has offset the previously identified staffing deficit. This is largely due to the approval of resources for the Whitby Sports Complex and increase to firefighter complement. This significant influx of full-time resources may distort existing deficits and give the impression previously identified deficits are no longer a concern. Staff continue to undertake an annual review, led by Organizational Effectiveness, that engages all departments in preliminary planning for staffing and technology needs. In 2025, the list of positions in the budget process were limited to those roles that were aligned to the staffing needs for the Whitby Sports Complex and addition of twenty (20) firefighters, excluding the identified gaps in other departments. The 2025 recommendation included twenty-one (21) positions representing 52.8 FTE for the Whitby Sports Complex and twenty (20) full-time firefighters. Any positions that were not considered are carried forward to future years or deleted.

4. Discussion:

The fourth iteration of the annual Workforce Planning Review began in March 2025 and concluded in May 2025. This review enables management to consider any new inputs that may impact the need for positions, and new or unforeseen considerations. This process includes consultations with all departments to review the 2026 workforce plan submission, identify the changes and carry over positions since the prior year's review, and finalize the identified needs for 2026.

The output of the workforce plan review in 2025 is a recommended list of positions for consideration in the 2026 budget process. For the review, the use of the same objective ranking system used in the past has been applied. This prioritizes the position requests based upon primary drivers and impact if not achieved. The result for 2026 is 28 positions with a total FTE count of 23.85, at an estimated cost of \$3.3M. However recognizing the fiscal pressures on the Town, it was decided to apply greater rigour and include only those positions that are in response to legislative or regulatory changes, are needed to mitigate risk, or are council mandated. This reduced the list to 12 positions with a total FTE count of 10.99 and an estimated cost of \$1.3M.

Despite the rigour applied in ranking the position requests, upon final review by the Senior Leadership Team (SLT), and in consideration of other budget pressures facing the Town, the recommendation by SLT is to not include any tax-funded positions in the 2026 budget. The Workforce Planning Review also forecasts projected staffing needs for 2027 and 2028. When the review is completed for the upcoming years, the modified objective ranking system will continue to be applied. In addition, with the Community Strategic Plan concluding in 2026, it will be necessary to determine the alignment and appropriate weighting be applied if deemed applicable.

5. Financial Considerations:

There are no immediate financial considerations related to this report as staff are recommending that 0.0 FTE tax-funded positions will be included in the preliminary 2026 budget for consideration.

Normally the full list of ranked positions that have gone through the Work Force Plan process of detailed review, analysis, objective scoring, and SLT discussion would be provided to Council in quarter 2 and then a subset of the positions would be included in budget discussions in quarter 4 of each year. However, staff are recommending that none of the tax-funded positions will be considered in for the fiscal 2026 budget due to other budget pressures, including:

- Economic uncertainty due to the trade/tariff war: this is one of the causes for lower development activity and is projected to increase prices of goods and services that the Town purchases (e.g. salt for winter maintenance and service contracts linked to the consumer price index);
- Annualization and phase-in of 2025 staffing: The 20 firefighters and Whitby Sports Complex positions were included in the 2025 budget part way through the year in terms of funding the positions. Accordingly, there is a 2026 annualization or funding phase-in impact of over \$1.5 million; and,

- Lower assessment growth revenues projected due to a slow-down in development activity: economic uncertainty and higher interest rates (compared to the pre-COVID-19 pandemic period) have impacted both consumers and developers resulting in lower development activity (see also item 10.2 of the [Regular Council Meeting Agenda for May 26, 2025](#), memorandum titled *Status of Development Charges Reserve Funds and Impact on 2026 and Future Budgets*). Further, a current lag in electricity infrastructure keeping pace with proposed development has delayed major residential development at the Town.

6. Communication and Public Engagement:

Not applicable.

7. Input from Departments/Sources:

The annual Workforce Planning Review, facilitated by Organizational Effectiveness, includes consultation with all departments to fully understand current and future staff needs.

Strategic Priorities:

The Workforce Plan aligns with the following pillars of the Community Strategic Plan:

- 4.2 Be the organization that people want to join and build their future.
- 4.3 Deliver exceptional customer service and community engagement.
- 4.4 Ensure fiscal responsibility and plan for responsible growth.

Report Title: The IDEA Project, Journey to Inclusivity Status Update 2025

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: CAO-16-25

Department(s) Responsible:

Organizational Effectiveness

Human Resources Services

Submitted by:

Jacqueline Long, Head of Organizational Effectiveness

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Jacqueline Long, longj@whitby.ca

Theresa Bickle, Manager, Organizational Development bicklet@whitby.ca

Amanda Morrow, Sr. IDEA Specialist, morrowa@whitby.ca

1. Recommendation:

That Council receive Report CAO-16-25 The IDEA Project, Journey to Inclusivity Status Update 2025 for information.

2. Highlights:

- The Town embarked on the IDEA Project as an opportunity to understand the current state of diversity and inclusion at the Town of Whitby, both as an employer and a public service organization.
- An outcome of the IDEA Project, Journey to Inclusivity is a commitment from staff to provide Council with an annual status report on actions taken throughout the prior year that advance IDEA at the Town.

- This year's report provides an updated status on the continued implementation of the recommendations outlined in *The IDEA Project, Journey to Inclusivity, Final Report*.
- The Corporate IDEA Specialist continues to address the recommendations from the IDEA Report. This report highlights the ongoing internal efforts and advancements made since the recommendations were presented to Council in 2022.

3. Background:

- *CAO-01-22 The IDEA Project, Whitby's Journey to Inclusivity, Final Report* was presented to Council in January 2022 and recommended forty-one (41) actions, across five (5) priority categories, to be implemented over a five-year period.
- *The IDEA Project, Whitby's Journey to Inclusivity, Final Report* also recommended two (2) new dedicated staff resources to lead and support the recommended IDEA actions.
- Included in the 2022 budget was the creation of a Corporate IDEA Specialist. The intent of this role is to provide support to the Town as employer as it creates structural change across the full range of services as identified in the action items. This may include training, mentoring, research on best practices, and guidance on matters related to IDEA.
- *CAO-01-22 The IDEA Project, Journey to Inclusivity, Final Report* recommended an annual status update report to Council on work undertaken to advance IDEA at the Town.

4. Discussion:

Report *CAO-01-22 The IDEA Report, Journey to Inclusivity, Final Report* included a recommendation to establish two (2) staff resources that would steward and lead the work required to respond to the forty-one (41) recommendations in the report as well as advance and support all IDEA efforts at the Town.

Approved by Council in the 2022 budget was the creation of a Corporate IDEA Specialist, whose role is to support the employer in creating structural changes across the full range of services as recommended. This includes training, mentoring, researching best practices, and providing guidance on IDEA-related matters.

Proposed in the 2022 and 2023 budgets were the creation of a Community Idea Specialist to focus on community facing work associated with diversity, equity, inclusion and anti-racism. In accordance with Council resolution #48-23, passed at the special Council meeting on February 16, 2023, the decision was made to not approve the creation of the Community IDEA

Specialist position and remove this position from the 2023 Operating and Capital budget. Consequently, the associated projects for this position have been suspended until appropriate resource levels are achieved. This includes addressing the externally focused recommendations from the IDEA Project.

Attached is *Appendix A-Annual IDEA Status Update* detailing the status of each action item. In summary, of the forty-one (41) recommendations in the IDEA Report, eleven (11) are internally focused and designated to be led by the Corporate IDEA Specialist, nineteen (19) are externally focused, ten (10) are shared, that is, require the support and leadership of both an internally and externally focused specialist, and one (1) is not applicable.

Status on the internally facing recommendations from the *IDEA Project, Journey to Inclusivity, Final Report* is on-going and is supported by staff across the organization. Work completed to date includes, but is not limited to:

- **Recommendation J2I:2:** 2SLGBTQ+ education session held in March 2025 to help staff understand key terms, concepts, and allyship.
- **Recommendation J2I:2:** IDEA lens being applied to Career Development, Talent Acquisition Strategy, and Recognition Project.
- **Recommendation J2I:5:** Development of the IDEA Equity Assessment Tool (IEIAT). The tool is designed to support the Corporation by embedding the principles of equity and inclusion from design to implementation of corporate policies, procedures, programs, projects, plans, services, and budget decisions. Planned release at the end of June 2025.
- **Recommendation J2I:8:** An internal working group, led by Strategic Initiatives, has been formed to develop Indigenous Consultation guidelines for Town of Whitby staff. In addition, several projects in 2024/2025 have included consultation with Indigenous partners including
 - Urban Forestry Master Plan
 - National Indigenous Peoples Day Culture Pop-up event
 - Downie and Wenjack Fund Legacy Space
- **Recommendation J21:10:** The Town has joined the Durham Region Indigenous Collaborative Circle (DRICC).
- **Recommendation J21:11:** The Town participated in the Durham Region Black History Month celebration and will march in the 2025

PRIDE parade in June. In addition, Creative Communities introduced Cultural Pop-up public events including:

- National Indigenous People's Day Celebration at Whitby Waterfront.
- Bollywood on the Pier
- Greek Summer Night
- Boots and Beats
- Rhythms of Africa

- **Recommendation J2I:13:** Inclusive Recruitment facilitated workshop for HR and hiring managers to launch in June 2025.
- **Recommendation J2I:13:** An Inclusive Futures Program is in development. This is an initiative to increase representation of people with disabilities with disabilities, people receiving Ontario Disability Support Program, and Ontario Works. A report to Council is planned for September 2025.
- **Recommendation J2I:13:** Talent Acquisition Strategy is in development. A cross-functional committee of people leaders was established to provide recommendations and advice from each of the business areas. Anticipated launch: Q4 2025.
- **Recommendation J21:16:** Diversity, Equity and Inclusion training for municipal leaders scheduled for Senior Leadership Team on May 26, 2025.
- **Recommendation J21:18:** The Town procured TELUS Health as a new EAP provider, offering a broader variety and more accessible services for staff.
- **Recommendation J21:21:** In March 2025, Council received *PDP 15-25, Planning and Development (Planning Services) Department Report* recommending that Inclusionary Zoning within the Town's Protected Major Transit Station Area not be implemented at this time and that alternative means of creating affordable housing units be explored.
- **Recommendation J21:28:** Service Whitby launched in Spring 2025 – providing a one-window approach, enhancing accessibility in customer service for residents.
- **Recommendation J21:30:** The Town is participating in a LEAD review facilitated by the Abilities Centre. Recommendations are expected to be released in Summer 2025.
- **Recommendation J21:30:** Accessibility design standards are

applied to all new and renovated spaces. For example, The Whitby Sports Complex is a multi-purpose gathering space for inclusive sport and community programming - a place for residents of all ages and abilities to connect, play and get active. The complex includes IDEA considerations, including:

- Barrier-free design incorporated accessibility guidelines and considerations for inclusion
- Barrier-free spaces throughout, gender-neutral and family-friendly washrooms and changerooms, accessibility ramps and elevators.
- Accessible way-finding

Beyond the recommendations of the *IDEA Report, Journey to Inclusivity*:

In addition to advancing the recommendations outlined in the *IDEA Report, Journey to Inclusivity*, the Corporate IDEA Specialist will:

- Continue to partner with Communications and Creative Services (CCS) to consistently reinforce the value of IDEA through ongoing, comprehensive media campaigns across multiple appropriate channels, ensuring sustained visibility and impact.
- Continue to advance the cultural calendar to include more significant days and events, ensuring broader representation. Improved communication strategies by integrating multimedia content such as videos and infographics. Increased outreach by leveraging internal partnerships and offering educational webinars around these significant days to further develop staff.
- Provide ongoing support and expert advice to existing and future Employee Resource Groups (ERGs). The Town currently supports four ERGs:
 - WOW (Women of Whitby),
 - Qween (Queer Whitby Employees Educational Network [formerly GLOW]),
 - TOWN (Transitions of Whitby Now), and
 - NewBees (recently hired employees), with initiatives to foster cross-collaboration between these ERGs to enhance their effectiveness.
- Lead the Town's Diversity and Inclusion Taskforce. There are approximately seventeen (17) staff from across the organization

participating in this taskforce. They are committed to advancing IDEA at the Town.

- Advance the annual planning, administration, and implementation of the Corporate Diversity and Inclusion training plan. This has included comprehensive research and updates to existing IDEA eLearning modules on the Town's Learning Management System (LMS), as well as the development and introduction of new training programs to address emerging equity and inclusion topics.
- Provide advice to various stakeholders regarding IDEA as it pertains to staff programs.

5. Financial Considerations:

Not applicable

6. Communication and Public Engagement:

Not Applicable

7. Input from Departments/Sources:

Not Applicable

8. Strategic Priorities:

Advancing IDEA at the Town of Whitby directly reinforces/sustains the Corporate Mission: "Together, we deliver services that make a difference in our community," and responds to the Community Strategic Plan's Objectives of increasing opportunities to acknowledge and celebrate the diversity of the community (1.2.1 Enhance Town-led and community-based events and festivals that celebrate diversity) and being the organization that people want to join and build their future (4.2.3 Identify opportunities and take steps to establish a more diverse and inclusive workplace).

Town of Whitby Staff Report

whitby.ca/CouncilCalendar

Report Title: 2026 Council, Committee, and Public Meetings Schedule

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: CLK 07-25

Department(s) Responsible:

Office of the Town Clerk

Submitted by:

C. Harris, Director, Legislative
Services/Town Clerk

Acknowledged by M. Gaskell, Chief Administrative Officer

For additional information, contact:

K. Narraway, Sr. Manager, Legislative
Services/Deputy Clerk

1. Recommendation:

That Council approve the 2026 Council, Committee, and Public Meetings Schedule appended to this Report as Attachment 1.

2. Highlights:

- The proposed 2026 Council, Committee, and Public Meetings schedule continues the four-week meeting cycle originally introduced in 2024, where possible, consisting of two Committee of the Whole Meetings, generally followed by a Public Meeting or Statutory Holiday (no meetings scheduled), followed by a Regular Council meeting. However, due to the 2026 Municipal Election the meeting cycle has been condensed in September and in November/December.
- As the 2026 municipal election is on October 26, 2026, the final Council meeting of the 2022-2026 Term of Council is scheduled for September 28, 2026 and the Inaugural Meeting of the 2026-2030 Term of Council is scheduled for November 16, 2026.
- Dates for consideration of the 2027 budget have not been included on the 2026 Council, Committee, and Public Meetings schedule. It is anticipated that presentation of the 2027 budget by the Mayor will occur between January 1,

2027 and February 1, 2027 in accordance with section 7 of [Ontario Regulation 530/22](#) under the Municipal Act, 2001.

3. Background:

Subsection 8.7 of [Procedure By-law # 8081-24](#) requires Council to adopt a schedule for its meetings to be held in the following year. The Town Clerk is responsible for publishing the meeting schedule on the Town's website.

4. Discussion:

The 2026 Council, Committee, and Public Meetings schedule generally continues the four-week meeting cycle introduced in 2024 for Committee of the Whole, Public Meetings, and Council Meetings. In the four-week cycle, Committee of the Whole Meetings are scheduled on the first and second weeks. In the third week of the cycle, either a Public Meeting is scheduled or there is no meeting. Week four of the cycle is then the Regular Council meeting to consider the recommendations stemming from the week one and week two Committee of the Whole meetings.

Moving to a four-week schedule has provided the following benefits:

- Council is provided with a two-week period to consider discussion, debate, and recommendations from Committee of the Whole Meetings prior to making decisions at Regular Council Meetings.
- Staff are provided with additional time to respond to requests for information at Committee of the Whole Meetings, including preparing memorandums for Council's information and consideration.
- The public is provided with additional time to submit correspondence regarding matters being considered at Council.

No meetings are scheduled during the weeks of Family Day, March Break, the Ontario Good Roads Association annual conference, Easter Monday, Victoria Day, and Thanksgiving. Further no meetings are scheduled in July and August and during the December holiday break. A meeting is scheduled on Monday during the week for the National Day for Truth and Reconciliation due to that public holiday falling on a Wednesday in 2026.

As is past practice, in instances where time-sensitive reports require urgent consideration, reports may be presented directly at Regular Council Meetings or the Mayor may call Special Council Meetings, including meetings during July and August. Further, in accordance with subsection 8.8 of the [Procedure By-law](#), the date, time, and location of regular meetings of Council may subsequently be amended by consent of Mayor, and the Clerk shall note the change on the Town's website and shall give notice of the revised date, time and/or location to all Members and the public in accordance with Section 8.9 and Section 8.10 of the by-law.

2026 Municipal Election Considerations

In consideration of the 2026 municipal election on October 26, 2026, the final Council meeting of the 2022-2026 Council term will be on September 28, 2026.

The Inaugural Meeting of the new term of Council is scheduled for November 16, 2026 in accordance with subsection 6(1) of the Municipal Election Act and section 230 of the Municipal Act.

As the last cycle of Committee of the Whole and Regular Council meetings (September 21, 2026 and September 28, 2026) take place after Nomination Day for the 2026 municipal election which is August 21, 2026, there are restrictions prescribed on Council in accordance with Section 275 of the Municipal Act for these meetings if it can be determined that there is the possibility of less than three-quarters of the Members of the outgoing Council being on the incoming Council. This is referred to as the 'Lame Duck' period.

There are two different scenarios provided for in the Municipal Act when a lame duck situation could be in effect:

1. After nomination day but before voting day, the determination shall be based on the nominations to the new council that have been certified and any acclamations made to the new council; and,
2. After voting day, the determination shall be based on the declaration of the results of the election including declarations of election by acclamation.
(**Note:** This situation will not present itself since there are no Council meetings scheduled after voting day until the inaugural meeting of the 2026-2030 Council.)

For Whitby Council, three-quarters of the outgoing Council is seven of the nine current members.

The acts of Council that are restricted under the Municipal Act during a lame duck period are as follows:

- the appointment or removal from office of any officer of the municipality;
- the hiring or dismissal of any employee of the municipality;
- the disposition of any real or personal property of the municipality which has a value exceeding \$50,000 at the time of disposal; and,
- making any expenditures or incurring any other liability which exceeds \$50,000 (unless the disposition or liability was included in the 2025 budget adopted by Council).

Despite these provisions, Council is not prohibited from delegating authority to another person or body to exercise any authority of a municipality and nothing prevents Council from taking action in the event of an emergency.

Policy G 020, Delegation of Powers and Duties, provides that during the duration of a 'Lame Duck Council' the CAO has the emergency power to make any expenditure or incur any other liability which exceeds \$50,000. Further, if Council were in a lame duck situation, there are no restrictions on receiving reports for information or continuing with regular Town business if such business does not fall within the restricted acts noted above. As Nomination Day approaches, should a lame duck situation occur, the Clerk will provide more detailed information to Council and Staff in this regard.

2027 Budget Dates

Dates for the 2027 budget have not been included on the 2026 Council, Committee, and Public Meetings schedule. It is anticipated that presentation of the 2027 budget by the Mayor will occur between January 1, 2027 and February 1, 2027 in accordance with section 7 of [Ontario Regulation 530/22](#) under the Municipal Act, 2001. Subsequent consideration of the budget by Council will occur after presentation of the budget in accordance with the regulation.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

The 2026 Council, Committee, and Public Meetings schedule will be published on the Town's website. Upcoming meetings are shared with the public through the website calendar and through the Town's social media channels. Additionally, the schedule will be shared with candidates running in the 2026 Municipal Election.

7. Input from Departments/Sources:

The Senior Leadership Team was consulted when developing the 2026 Schedule and the Commissioner of Planning and Development has reviewed the proposed Public Meetings dates.

8. Strategic Priorities:

Publishing the 2026 Council, Committee, and Public Meetings schedule in advance allows Staff to inform and engage the community about upcoming meetings. This supports Strategic Pillar 4 in the Community Strategic Plan: Whitby's Government – Accountable & Responsive.

Town of Whitby Staff Report

whitby.ca/CouncilCalendar

Report Title: Whitby Fire & Emergency Services – 2024 Annual Report

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: FES 02-25

Department(s) Responsible:

Fire and Emergency Services

Submitted by:

Fire Chief Michael Hickey

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Fire Chief Michael Hickey, ext. 4331

1. Recommendation:

That Council receives, for information, and reviews Whitby Fire & Emergency Services (WFES) 2024 annual report.

2. Highlights:

- WFES' annual report focuses on showcasing the dedicated efforts of our staff to protect the lives and property of Whitby's citizens/community, through both reactive (suppression and rescue/emergency medical care, etc.) and proactive (fire prevention, fire inspections, public education etc.) measures.
- Notable sections presented within the annual report include:
 - Message(s) from WFES Leadership Team;
 - Celebrating accomplishments in innovation, education and leadership as well as key staff milestones (promotions, transfers, retirements);
 - Remembering those we have lost;
 - WFES Bob Mowat Leadership Award recipient;
 - WFES Meritorious Service Award recipients;
 - WFES participation within the community;
 - Emergency Response Statistics;
 - Thanks to all Community Partners; and,
 - Testimonials from the public.

3. Background:

As per the *Fire Department Establishing and Regulating By-law (#7263-17)*, the Fire Chief is responsible and required to prepare and present an annual report to members of Council.

4. Discussion:

The annual report provides an opportunity to celebrate and reflect upon the amazing work of the dedicated men and women who serve WFES' throughout its' five (5) divisions: Suppression, Risk Management & Education, Professional Development & Training, Asset Management and Administration & Leadership.

WFES has a long-standing history of providing quality emergency services and educational programs to the community we serve. WFES stands committed to continuous improvement of our emergency response services and skills through collaborative interactions with internal departments and external community partners.

5. Financial Considerations:

Not applicable.

6. Communication and Public Engagement:

The Whitby Fire & Emergency Services 2024 annual report (Attachment 1) will be posted on the Town of Whitby's public website, under the Fire Services page.

There are no further communication or public engagement considerations associated with this report.

7. Input from Departments/Sources:

Aside from regular collaboration with Whitby Fire & Emergency Services' community partners, no further input from other departments and/or sources was required for this report.

8. Strategic Priorities:

The recommendation contained in this report aligns with the following Strategic Pillars and Actions identified in the Town's Community Strategic Plan:

- Whitby's Neighbourhoods – Safe, Healthy, & Inclusive
 - Objective 1.1 – Improve community safety, health, and wellbeing

The attached annual report provides an informative and photographic summary of WFES' continued dedication of improving strategic and tactical skills and/or methods, to ensure efficient emergency responses throughout the community we serve. In addition, the annual report demonstrates the multiple ways WFES' gives back to the community through various fundraisers and/or public events. These engagements provide WFES staff the opportunity to educate and inform residents on important fire and life safety skills.

9. Attachments:

Attachment 1 – Whitby Fire & Emergency Services – 2024 Annual Report

2024

Annual Report

WHITBY FIRE AND EMERGENCY SERVICES

2024 Highlights

Responded to a total of **7,383** emergency calls across 5 Fire Stations

Responded to **4,012** emergency medical calls

Conducted **942** fire prevention inspections, **279** building permit inspections and **138** site plan reviews

Responded to **89** structural fire incidents with dollar loss

Promoted **3** Acting Platoons Chiefs to Platoon Chiefs, **3** Captains to Acting Platoons Chiefs, **4** Acting Captains to Captains and **3** Firefighters to Acting Captains

Visited over **3,080** homes as part of the Ever Alert Public Education Program

Responded to **798** accidents

Presented the Learn not to Burn Public Education program to **684** Grade 2 and **1,028** Grade 7 classes

Completed **40,373** staff training hours

Responded to **1,243** fire and emergency alarm calls

Message from Your WFES Leadership Team

Michael Hickey
Fire Chief

Glenn Green
Deputy Chief

Mike Tucker
Deputy Chief

Mallory George
Manager, Administration

On behalf of the dedicated women and men of Whitby Fire and Emergency Services (WFES), we are pleased to present the Annual Report for 2024.

WFES is a proud organization serving the Town of Whitby and its citizens since 1851. Utilizing innovation, leadership and education we are dedicated to protecting the lives and property of our citizens through the reactive emergency response operations of fire suppression, rescue and emergency medical care and the proactive measures of fire prevention, inspections, code enforcement and life safety education.

WFES is the second-largest fire department in Durham Region, with 144 employees serving a population of over 147,000 citizens and protecting 146 km². The Town of Whitby, which also includes the community of Brooklin, has two (2) traditional downtown cores, high- and low-density residential areas, large commercial and industrial business districts, and significant dedicated parkland and green spaces. In addition to various infrastructure, the Town is also uniquely comprised of multiple major transportation routes of Ontario Provincial highways 401, 407 and 412, four (4) Provincial railways and is home to two (2) large recreational marinas along 13kms of the Lake Ontario shoreline.

WFES is structured into five (5) divisions each staffed by dedicated, highly trained, motivated staff. The Town of Whitby values the commitment and efforts our staff members make on a daily basis to support those in need alongside our partner emergency responders from Durham Region Paramedic Services and the Durham Regional Police Services. Each division within WFES is critical to our collective success. These divisions include:

- Suppression;
- Professional Development and Training;
- Risk Management and Education;
- Asset Management; and,
- Administration and Leadership

WFES has a long standing history of providing quality service and programs to the community. We stand committed to expanding on this tradition in our future endeavors through collaborative community interaction with the Mayor and Council, the CAO and Town Senior Leadership as well as the Whitby Professional Firefighters Association Local 2036 in order to provide enhanced delivery of emergency services.

In closing, as always, we remain “Ever Alert”, positioned to respond to your needs while adhering to our core values of compassion, integrity and excellence.

Yours truly,

WFES Leadership Team

Your Fire Service

Organizational Structure

Whitby Fire at a Glance

The Work We Do

“Through **innovation, education and leadership**, we are dedicated to protecting life and property” - *Whitby Fire and Emergency Services Mission Statement*.

Innovation

Suppression Division

To address emerging safety concerns, WFES proactively put new measures in place to mitigate emergencies involving electric vehicles and other lithium-ion battery equipment such as e-scooters, e-bikes and tools. Examples of these new measures include: Aqueous Vermiculite Dispersion (AVD) potable fire extinguishers, fire blankets and EV emergency plugs.

Lithium ion powered equipment and appliances, when used improperly or involved in a motor vehicle collision, present new and unique life safety concerns as they are very difficult to extinguish once ignited, requiring specialized equipment and training while also addressing the safety concerns for the firefighter when working in close proximity to this electrically charged equipment.

Specifically, Aqueous Vermiculite Dispersion (AVD) is a fire extinguishing agent that is specifically designed to tackle the particular threat posed by lithium battery fires. It is the only agent that contains, cools and extinguishes lithium battery fires, and all first response apparatus have been equipped with an AVD portable extinguisher.

In addition to the AVDs, WFES purchased fire blankets specifically designed to tackle the unique challenges of electric vehicle fires. The fire blankets contain flames, smoke, and toxic fumes in seconds, offering an effective solution for managing fires in electric vehicles. Rescue 35 has been equipped with a car fire blanket for operational use when required.

Rescue 35 has also been equipped with an EV plug and associated equipment. The EV plug prevents unpredictable movement or propulsion by a full or hybrid electric vehicle, enhancing the safety of all WFES personnel operating at an emergency scene.

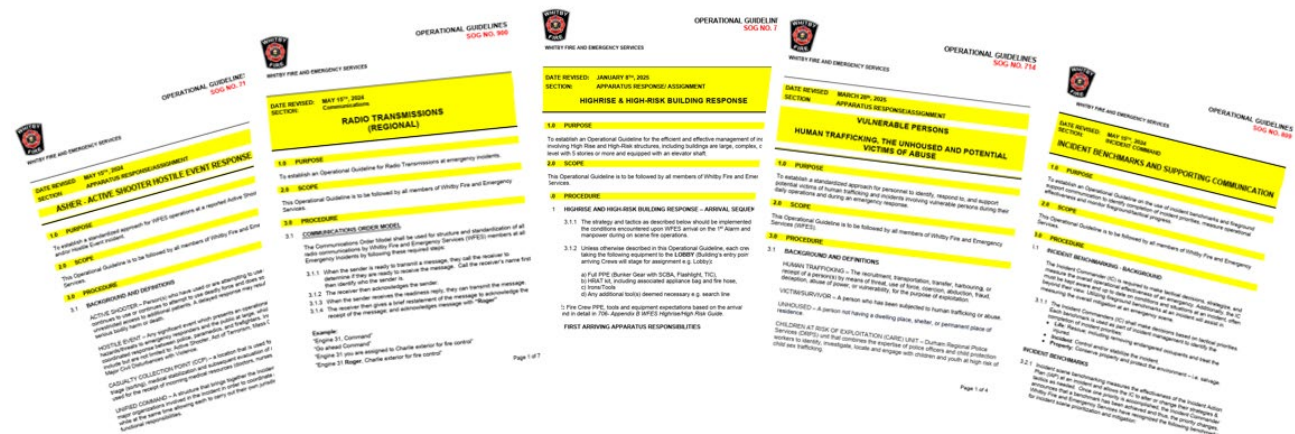

From an emergency medical standpoint, in a trauma related emergency such as a car accident, major bleed or a violent crime, WFES staff are now trained and proficient in the use of tourniquets, self clotting and Israeli bandages. These medical response items greatly aid in mitigating traumatic injuries such as a major bleed.

Another proactive measure put in place by WFES was the expansion of our Tablet Command platform. Through collaboration between our Suppression Division and Risk Management & Education Divisions, WFES was able to expand its use of technology to make hazardous material identification and preplans only a touch screen away via Tablet Command. By completing building familiarizations for new and existing buildings, our firefighters are better equipped to meet the needs of the community through a thorough understanding of the complex building designs and construction.

In addition, led primarily by the efforts of our Standard Operating Guidelines Committee, comprised of representatives from all WFES Divisions, conducted a comprehensive review of all our department's policies, guidelines and procedures. Some newly developed operational guidelines included topics such as Active Shooter Hostile Event Response (ASHER), Highrise/High-Risk, Human Trafficking, Radio Transmission and Incident Benchmarking. In total, over 200 living documents were updated, revised or created to provide staff the guidance for performing within current legislation and industry best practices to reflect today's types of emergencies.

Asset Management

All of WFES is supported daily through the hard work of the Asset Management division. Aside from the daily coordination of equipment repairs, maintenance and supplies, and oversight on consumables, considerable advances were made that will have ongoing positive impacts on the department.

Technology formed the basis for two (2) of these advancements, with the first being the completion of the Radio Frequency Identification (RFID) program. This program allows for supplies of commonly used items by firefighters to be tracked remotely. It will facilitate the restocking of these supplies in a timely manner, ensuring that firefighters have what they need to protect our community.

In partnership with Technology and Information Services (TIS), Whitby Fire and Emergency Services was able to outfit each fire station with its own multi-media training space. These spaces will provide an inclusive environment where staff can train in a virtual format when required and have the most up to date equipment and experience in doing so.

In a final effort to harness the power of technology, the implementation of an equipment maintenance database was initiated called Vector Check It. Through its development to date, this platform has proven to be user friendly, customizable and scalable, all things needed for the fire service. We look forward to the first implementation phase rolling out in 2025.

Education

Professional Development & Training Division (PD&T)

As a Regional Training Centre (RTC) for the Ontario Fire College (OFC), WFES was once again active in facilitating education and training as part of the OFC curriculum. WFES hosted fire services from across the province in delivering the following courses in 2024:

- Courtroom Procedures
- NFPA 1521 Incident Safety Officer Blended
- NFPA 1006 Surface Water Rescue Blended
- NFPA 1006 Auto Extrication Blended
- NFPA 1035 Fire Life Safety Educator II

Throughout the year, WFES hosted fifty-five (55) external students generating revenue for the Town, while simultaneously training thirty-five (35) of our own staff in a cost neutral manner.

WFES also hosted Krystal Snider of Collaborative Community Solutions to educate and train staff about human trafficking. Staff were introduced to provincial and local statistics on human tracking, understanding the scope, trends and the impact of trafficking on communities. Ms. Snider also highlighted the significance of collaboration between firefighters, law enforcement, social services and anti-tracking organizations. The Leadership Team took the valuable insights from Ms. Snider's training to inform the development of an internal operating guidelines for crews.

Throughout 2024, our Professional Development & Training division also had the opportunity to train our firefighters using acquired structures and completed large area search and rescue utilizing a vacant ice pad at the McKinney arena.

These training opportunities provide firefighters valuable hands-on experience to develop new strategies and fine tune existing skills as it relates to strategic and tactical emergency responses.

In 2024 WFES also purchased the SimsUshare software package to further expand learning opportunities for staff and enhance incident command training and emergency mitigation strategies. This fire and emergency simulation software provides a number of innovative benefits including the ability for firefighters to create realistic simulations using personalized photos and videos from the Town they serve, the ability to create custom simulations, add effects like smoke, fire, and explosions, and embed simulations in learning management systems. WFES is excited to continue to utilize this software to provide staff with innovative learning opportunities.

Certification Achievements

WFES wishes to offer a special congratulations to the following staff on their certification achievements in 2024:

- **Fire Service Instructor Level III Certification**
 - Johnson, Tim – Training Officer
- **Hazardous Materials Technician Certification**
 - Johnson, Tim – Training Officer
- **NFPA 1006 Common Passenger Vehicle Technician Certification**
 - Beatty, Ryan – Firefighter
 - Beukeboom, David – Firefighter
 - Prentice, Dan – Firefighter
 - Roy, Josh – Captain
 - Van De Ven, Brad – Firefighter
 - Warham, Christopher - Firefighter
- **Fire Inspector I Certification**
 - Elliott, Chad – Fire Prevention Officer
- **NFPA 1521 Incident Safety Officer Certification**
 - Bragg, Mike – Captain
 - Campbell, Dan – Captain
 - Curry, Christopher – Captain
 - Garnett, Jordan – Captain
 - Latendresse, Jarrett – Firefighter
 - Meringer, Chris – Captain
 - Ronfeld, Jason – Captain
 - Roy, Josh – Captain
 - Villeneuve, Derek – Captain
 - Williamson, Lee – Captain/APC
- **NFPA 1006 Surface Water Ops Technician Certification**
 - Allen, Dave – Firefighter
 - Campbell, Dan – Captain
 - Cannon, Rob – Firefighter
 - Lavelle, Andrea – Firefighter
 - Mackenzie, Derek – Firefighter
 - O'Rourke, Kieran – Firefighter
 - Streeter, Adam - Firefighter
- **Ontario Building Code Qualification Exam in Fire Protection**
 - Morelli, Joe – Fire Prevention Officer

Risk Management & Education Division

Risk Management & Education continued to be a hub of activity and engagement for WFES. The team has worked collaboratively with firefighters to continue with educating the public on fire safety. Some of our most popular programs include fire station tours, fire truck requests and the annual Ever Alert program. Specifically, fire station tours and fire truck requests provide the opportunity for WFES to engage directly with citizens and in turn provides the public with an opportunity to get exposure to life saving equipment and tools while learning important fire safety information about home escape planning, smoke alarms and carbon monoxide detectors.

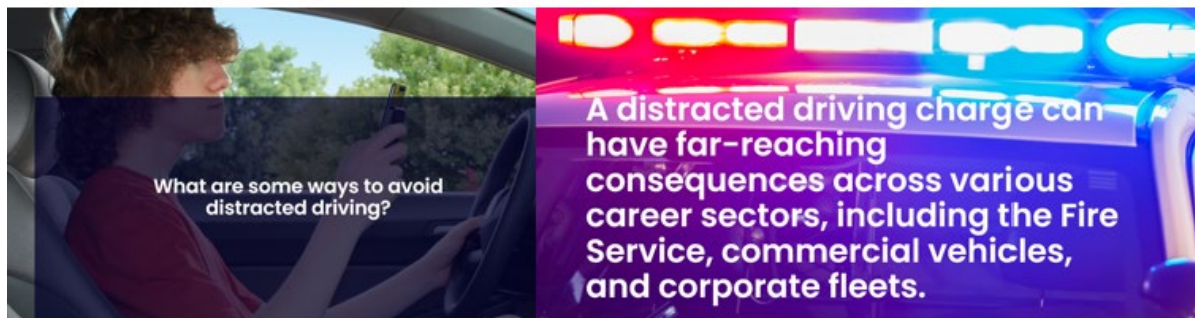

Further to the above engagements with the public, WFES' primary annual public education program is Ever Alert. This door to door campaign allowed the department to visit over 3,000 homes throughout the Town, providing fire safety and emergency preparedness education to residents of all ages. Through these interactions, families are able to learn about the importance of working smoke alarms and carbon monoxide detectors as well as a home escape plan. Each household is provided with an educational pamphlet and encouraged to review the information regularly to ensure everyone in the household is aware of these important life saving tips and devices.

WFES also had the opportunity to partner with local elementary schools to deliver the Learn Not to Burn program to grade 2 and 7 students across the Town. In 2024, WFES presented to over 2,000 elementary students, sharing vital fire safety knowledge while providing a unique opportunity. Under the supervision of the RM&E division, this program is presented with the assistance of WFES' four (4) high school co-op students who in turn gain invaluable experience within the fire services and the role of a fire prevention officer in educating on public safety throughout the community.

The RM&E division also presented safe driving training to local teenagers. This unique training opportunity is provided utilizing computer-based driving simulator to demonstrate the impact of distracted driving, with an emphasis on not texting while operating a vehicle.

In addition to group focused public education opportunities within the community, the Risk Management & Education Division attended and organized presentations at various 55+ events and living facilities. Specifically, WFES attended the Active Living Fair, which resulted in hundreds of visitors to our educational booth. WFES also conducted fire safety presentations, including fire drills, at Durham Housing locations and Lynde Creek Village.

Another key area of focus for this Division is the annual Emergency Preparedness Week. In 2024, WFES marked this week with a series of initiatives, including a video featuring Mayor Roy and Chief Hickey who shared valuable tips to the community for staying prepared. This video was widely promoted via social media and was partnered with other emergency preparedness campaigns throughout the Durham Region.

The Risk Management & Education Division was also happy to have the opportunity to be involved in several Town supported events like Youth Pride Durham Region, Brooklin Spring Fair, Harvest Festival, Santa Clause parade and Food Truck Frenzy. We also supported our community partners by attending the Durham Regional Police Services Community Day BBQ and Youth in Policing events.

Lastly, in 2024 the RM&E division was not only able to meet the Ontario Fire Marshal mandated inspections, but they were also able to provide proactive inspections as well. The proactive focus in 2024 was Industrial Buildings and the downtown core. We are proud to say that the hard work has paid off and the team is moving forward with a 2025 focus on low and high rise residential as well as assembly buildings.

Emergency Management Exercise

Led by Chief Hickey as the Town's Director of Emergency Management, on May 8, 2024, the Town participated in Durham Emergency Management Office's (DEMO) regional wide emergency exercise. This exercise triggered the opening of the Town's Emergency Operations Center (EOC) located at Fire Headquarters and resulted in the Municipal Control Group (MCG) participating in a mock heat emergency. The MCG consists of multiple staff representatives from various departments across the Town, including the Mayor and the CAO, who assumes the role of the EOC Manager. The MCG operates the EOC and provides the coordination and support necessary to respond, to mitigate, and to recover from an emergency situation.

Specifically for the 2024 exercise, DEMO began advising participating Municipalities of a forecasted heat dome emergency that was set to strike in the upcoming weeks. As a result of the extreme heat dome coupled with no precipitation, the Town's EOC had to navigate through multiple emergency situations such as the evacuation of Fairview Lodge, grass fires, multiple calls and social media posts from concerned citizens, opening of cooling centers, failed generators, civil unrest and loss of fibre optic network infrastructure.

The MCG successfully navigated through the mock emergency and Chief Hickey led participants through a debrief and discussion of key learnings from the exercise. Through completion of this mock exercise, coupled with the submission of the Town's mock emergency documentation, Emergency Management Plan and After-Action Report, the Town successfully met the Provincially legislative requirements for emergency management.

Following the mock exercise, WFES hosted the Basic Emergency Management course for multiple MCG participants to attend and gain additional learnings of overall emergency management as well as key responsibilities of their assigned MCG roles.

Furthermore, on September 23, 2024, Chief Hickey developed and instructed emergency management training for all members of Council. During this training session, Chief Hickey educated members of Council on the five (5) pillars of emergency management, the Town's emergency management plan, the Hazard Identification & Risk Assessment (HIRA), the MCG, process for activation and termination of the EOC, dos and don'ts during an emergency, and the Town's plan for future exercises.

Leadership

Through internal promotions, WFES has had the pleasure of welcoming several new incumbents into its' senior officer team within the Suppression Division. These individuals bring a vast variety of skills and experience within their area of focus and strive to lead by example for their respective crews:

Promotion – Platoon Chief

- Burns, Raymond

- Birney, Jason

- Sharkey, John

Promotion – Acting Platoon Chief

- Giroux, Joseph

- Sluman, Craig

- Williamson, Lee

Leadership Continued

Promotion - Captain

▪ Bragg, Michael

▪ Campbell, Dan

▪ Garnett, Jordan

▪ Ronfeld, Jason

Promotion – Acting Captain

▪ Dunham, Nicholas

▪ Eldon, Jonathan

▪ Henry, Tyler

WFES Bob Mowat Leadership Award

Annually, WFES staff are provided with an opportunity to nominate their peers who they feel embody retired Deputy Chief Bob Mowat's legacy of positive energy and commitment to WFES.

Following numerous nominations from his peers, Captain Josh Gostlin was selected as the 2024 recipient of the Bob Mowat Leadership Award.

In reference to Captain Gostlin, the following statements and themes were consistently noted among his peer nominations: humble, professional, selfless, trustworthy, empathetic, strong moral compass and supportive husband and father.

One statement from a new firefighter really resonated with the Selection Panel which noted *"I believe Captain Gostlin sets a great standard and example of a Captain and person, to other staff. As a new firefighter, Captain Gostlin is someone I strive to be like."* As a Leadership Team we could not agree more.

Captain Gostlin has enthusiastically participated in multiple initiatives across the Department, including being a founding Officer on Ladder 35 and Rescue 35 and he was an internal part in building enthusiasm on the deployment of this new service delivery model. In addition, Captain Gostlin is a seasoned member of the Peer Support Team and served over ten (10) years on the Association's negotiations committee.

Congratulations to Captain Gostlin and we wish to thank him for his continued dedicated service to WFES and the community.

Retirements

Ray Richardson – 1st Class Firefighter

After thirty-four (34) years of service to the Town of Whitby, Ray Richardson retired from WFES on May 31, 2024.

Ray started as a volunteer fire fighter with Whitby on December 4, 1989, and became full-time on March 13, 1995. Ray progressed through the classes ending as a respected Senior Firefighter; as well as being a long serving Local 2036 executive member.

WFES thanks Ray for his years of service to our community and congratulates him on his retirement.

John Harrison – Platoon Chief

After thirty-six (36) years of service to the Town of Whitby, Platoon Chief John Harrison retired from WFES on June 30, 2024.

John started as a volunteer Firefighter with Whitby on September 24, 1988. He then became a full-time Dispatcher on February 5, 1990, and transferred to a full-time probationary Firefighter on November 5, 1990. Throughout his career within the Suppression division, John progressed through the classes, achieving the rank of Captain on July 22, 2013, and Platoon Chief on October 1, 2020.

In 2023, PC Harrison was the inaugural recipient of WFES' Bob Mowat Leadership Award and continues to be a role model for all staff.

WFES thanks John for his years of service to our community and congratulations him on his retirement.

2024 Milestone Awards

5 Year Milestone Award

- Anderson, Cameron
- Canfield, Stephanie
- Donnelly, Clare
- Gallant, Dylan
- Johnston, Rebecca
- Patterson, James
- Robson, Brad
- Walnicki, Justin

10 Year Milestone Award

- Campbell, Craig
- Eldon, Jonathan
- Grant, Kevin
- Leufkens, Wesley

15 Year Milestone Award

- Barker, Chris
- Mavor, Kevin
- McLeod, Corey
- Pescador, Adrian

25 Year Milestone Award & 25 Year Provincial Medal

- Burns, Raymond

30 Year Milestone Award & 30 Year Federal and Provincial Medal(s)

- Gilchrist, Todd

35 Year Milestone Award & 35 Year Provincial Bar

- Gaylor, Steve

Whitby Fire & Emergency Services – Meritorious Service Award

In 2024, the Leadership Team had the honor of establishing the Whitby Fire & Emergency Services Meritorious Service Medal.

The creation of the WFES Meritorious Service Medal not only recognizes and provides individual accolades for outstanding service to our community but also provides an opportunity to recognize the collective bravery and professionalism exhibited by staff, while out in the community.

As recommended by Officers, and endorsed by the Senior Officers Group and approved by the Fire Chief, the Medal is presented to any staff member, crew, division or Platoon who has had a significant achievement and/or has demonstrated excellence, courage or exceptional service, in ways that bring special credit to the Department, in an emergency setting.

The WFES Meritorious Service Award, consists of a meritorious service medal and bar, and recipients will have their names forever engraved on the Meritorious Service Award plaque, to be displayed at Station 5, Headquarters.

The Medal dawns a Maltese cross, a long-time symbol synonymous within the fire service. The WFES Meritorious Service Award medal was fashioned after the Maltese cross because of what the Maltese cross represents.

The Maltese cross is an eight-point symbol which originated during the Crusades. When fire was used against the Knights of St. John's, in a battle on the island of Malta, they banded together to fight the flames and rescue the injured. They were later said to be awarded a badge of honor similar to the Maltese cross.

The eight (8) points of the four (4) arms of the Maltese cross, symbolize the eight (8) obligations of the knights of St. John's:

1. To live in truth,
2. To have faith,
3. To repent sins,
4. To give proof of humility,
5. To love justice,
6. To be merciful,
7. To be sincere and whole-hearted; and,
8. To endure persecution

The Maltese cross has forever been used to symbolize the bravery and selflessness of those who fight fire; hence why, it was chosen to represent this significant Award.

On August 20, 2024, multiple units responded to a house fire on Hickory Street North in the Town of Whitby. Upon arrival, the two-storey single family dwelling was marred by heavy flames and smoke, with multiple fires set throughout the home, it became clear that there was a confirmed victim trapped on the second floor.

Throughout the rescue, the Captain of Pump 34 and his two (2) firefighters faced heavy fire, smoke and heat as well as deteriorating conditions during their search and successful rescue of the victim.

The heroic actions taken by the Pump 34 Captain and two (2) firefighters during this incident, highlights their bravery, dedication and commitment to saving lives while facing significant dangers.

These actions embody the true essence of the WFES' Meritorious Service Medal, and it was an honour to award these deserving individuals:

- Captain Chris Curry,
- Firefighter Terry Williams and
- Firefighter Adonis Perez

In addition, WFES will be moving forward with an application to the Province for consideration that these same firefighters be awarded the Ontario Firefighter Medal of Bravery.

Congratulations once again to Captain Curry, Firefighter Williams and Firefighter Perez and thank you for your dedication to our community.

Emergency Response Boundaries

Emergency Response Statistics

Response Summary

WFES responded to 7,383 emergency calls in 2024: representing a **7.6%** increase in call volume year over year.

Response Breakdown

WFES experienced a **12.1%** increase, year over year, in fire and alarm calls and **8.5%** increase, year over year, in medical calls. Furthermore, in 2024 WFES responded to **7.9%** more motor vehicle collisions in comparison to 2023.

Fire and Alarm Response Data

WFES responded to 289 fire incidents in 2024, representing 3.9% of overall call volume and a **3.2%** increase year over year. Fire incidents are defined as fires/explosions structural and non-structural.

The overall fire incidents in 2024 included 49 residential structure fires with dollar loss, which is slight decrease in comparison to the previous year.

In the Community

Bell Let's Talk

WFES is committed to fostering a safe space for everyone to openly discuss their mental health without fear of judgement. Together we can create a world where mental health is treated with the same importance as physical health.

Community Gardens

Throughout the year, Whitby Fire and Emergency Services filled the water tanks at the St. Johns Port Whitby Community Garden and the Whitby Ajax Garden Project. These gardens were developed to allow for individuals and organizations to work together to raise fruit and vegetables for individuals and families in need. Each year, these gardens and its volunteers donate a portion of what they grow to local food banks within the Durham Region.

Fill the Boot Campaign

Annually, Whitby Professional Fire Fighters Association (WPPFFA) with the support of WFES, heads out with thousands of Fire Fighters across Canada to participate in the Fill the Boot campaign to raise funds for Muscular Dystrophy Canada (MDC).

Junior Fire Chief

Each year a stand-out camper from our Junior Fire Camp is selected by counsellors to represent WFES as the Junior Fire Chief. They enjoy many activities and interactions throughout the department and community. Congratulations to Colin Lepre, WFES' 2024 Junior Fire Chief!

Emergency Preparedness Week

Led by the Risk Management & Education division, emergency preparedness week is all about getting out into the community to educate residents on how to keep their family and home safe from fire hazards and to be adequately prepared in the event of an emergency.

Emergency Preparedness Week Continued

WFES had the pleasure of partnering with the Humane Society of Durham Region, and Ripley the dog, to educate on the importance of including pets within your emergency plans!

School Presentations

WFES enjoys the opportunity to engage with youth throughout the community, whether it be at public events, school presentations or station and truck tours.

Medical Emergency Survivor

The crew of B1 Ladder 35 alongside Region of Durham Paramedic Service celebrated an incredible moment with a medical survivor who suffered a cardiac episode and was successfully resuscitated by the firefighters and paramedics that attended that day.

It's always great to celebrate the positive outcomes that we respond to.

Tim Horton's Camp Day

WFES is proud to partner with Tim Horton's and participate in their annual Camp Day to raise proceeds for the Tim Horton Children's Foundation.

McHappy Day

Every year, members of WFES joins forces at McDonald's locations through Whitby, serving food and collecting donations for Ronald McDonald House and Grandview Children's Centre in Durham.

Rededication Ceremony - Cenotaph

On June 2, 2024, WFES attended the rededication ceremony of the 100-year-old Whitby Cenotaph, hosted by the Royal Canadian Legion Branch 112. Lest we forget those who lost their lives in WWI and WWII, and the many men and women who served in all world conflicts and returned home forever changed.

Remembrance Day

WFES Firefighters past and present, alongside our Honour Guard, took part in the Remembrance Day ceremony to honour our men and women in uniform, our veterans and those we have lost. Lest we forget.

The Santa Clause Parade

Once again, Santa stopped by the Town of Whitby to make sure things were ready for his visit on Christmas. As always, he enlisted the help of the Whitby Fire and Emergency Services and Firefighter Elfie to take him around town to bring cheer and holiday spirit to all.

Community Partnerships

Whitby Fire & Emergency Services is thankful for our long-standing community partnerships with DKI-CRCS, Enbridge Gas, the Rotary Club of Whitby and the Rotary Club of Whitby Sunrise. DKI-CRCS has been active donors towards WFES' Ever Alert public education program and without their generosity, the department would not have been able to continue to expand our Ever Alert program offerings and educational materials throughout the community. A sincere thank you to DKI-CRCS for your continued support and generous donation.

Each year, WFES is thrilled to participate in multiple emergency preparedness initiatives with Enbridge Gas. In 2024, Enbridge Gas partnered with WFES for the Safe Community Project Zero, which aimed at reducing fire and carbon monoxide-related deaths. Through this initiative, Enbridge Gas donated over 400 smoke and CO alarms to WFES which crews were able to provide to residents. Enbridge Gas also partnered with multiple local fire departments, including WFES, for the 12 Days of Holiday Safety Campaign! Through this campaign, WFES was able to provide key fire safety educational messaging across the community. A sincere thank you to Enbridge Gas for the continued support and generous donations.

Over the last several years, the Rotary Club of Whitby and the Rotary Club of Whitby Sunrise have been key donors to the WFES' Junior Fire Camp. This Camp holds a significant place in our community, with a history dating back to 1972, marking this year as our 52nd anniversary. It was founded with a clear vision: to educate and inspire young minds about fire safety and emergency response. Over more than five decades, this camp has played a crucial role in shaping the future of our fire service, nurturing countless young individuals, some of whom have gone on to become employees of our department. WFES extends its' deepest gratitude to the sponsors whose unwavering support has sustained this program. A sincere thank you to each Rotary Club for the continued support and generous donations.

WFES is also excited to announce some new community partnerships we were able to foster 2024. In partnership with Durham College, for the exchange of the use of one of our backup fire trucks, Durham College has created the WFES Inclusivity and Excellence Scholarship to be awarded annually to two deserving local high school students from underrepresented demographics within the fire service, who will be entering into a Pre-Service Fire Suppression program or the Fire Prevention Officer program.

WFES are also proud to announce through a partnership with the Sobey's Distribution Warehouse, located in south Whitby, that Sobey's generously donated the funding required to expand our hazardous materials mitigation program through the purchase of an ammonia detector. This piece of equipment will allow WFES to detect the presence of ammonia to determine whether evacuation or other measures are required. Ammonia is present in many of our pools, arenas and industrial facilities across the Municipality.

Given our long-standing and great relationship with the Gerdaul Steel Mill in south Whitby, they have agreed to provide WFES with scrap vehicles required to train on auto extrication to meet the provincially mandated certification for staff. Gerdaul has eliminated a major financial stumbling block as one and a half vehicles are required per firefighter to meet provincial certification. Currently, scrap vehicles for the purposes of firefighter training can cost up to \$1000.00 each.

We wish to acknowledge and thank all our community partnerships who donated to the Department, which in turn allowed us to continue to provide vital services to our community.

In Memory of Those We've Lost

Retired Volunteer Firefighter James (Jim) Hopkins

WFES received the unfortunate news that retired volunteer Firefighter James (Jim) Hopkins passed on February 21, 2024.

Jim Hopkins served as a volunteer firefighter for Whitby Fire & Emergency Services for over twenty-five (25) years.

We wish to extend our sincere condolences to the friends and family of Jim Hopkins and thank him for his years of service to our community.

Retired Captain Alan (Al) Marchand – Line of Duty Death

WFES received the unfortunate news that retired Captain Alan (Al) Marchand passed away on October 4, 2024, after a long battle with a job related cancer.

Al began his career with Whitby Fire & Emergency Services on September 24, 1988, as a volunteer Firefighter. On October 10, 1989, he became a full-time Dispatcher and on March 5, 1990, Al transferred to become a full-time Firefighter with the Town of Whitby.

After twenty-nine (29) years of service, Al Marchand retired as a Captain from Whitby Fire & Emergency Services on July 25, 2017.

We wish to extend our sincere condolences to the friends and family of Captain Marchand and thank him for his years of service to our community.

Molly the Fire Dog

In March 2024, WFES received the unfortunate news that retired Fire Prevention Office Von Zuben's longtime service dog and fire service partner, Molly the fire dog had passed away. Retired FPO Von Zuben and Molly dedicated countless hours to supporting and attending community events to educate citizens of all ages on fire safety.

As a means to pay tribute to Molly and the tremendous effect she had on the community from a public safety

perspective; a mural titled "Molly's Way" was unveiled on the side of the new Brookfield Residential Station No. 3. Condominiums in downtown Whitby.

We wish to extend our sincere condolences to the friends and family of Molly and thank her for her years of service to our community.

2024 - Testimonials from the Public

Williamsburg Public School Kindergarten Students extend their gratitude to Station 5 A1 & B2 Platoons for their fire truck visits on June 10 and June 11.

Good morning Chief Bonin:

Can I also take this opportunity to let you know how wonderful your Fire Prevention staff are. They are professional, respectful, and so helpful in their interactions with businesses. They truly inspire employers to take fire prevention seriously.

Several months ago, Ted Vardjas attended a local business to set up a fire inspection. He was polite, respectful, and positive and it was a great way to be introduced to Whitby Fire. Then Rebecca Johnston performed the inspection. She was nothing short of amazing. She made it such a positive and educational experience. She was approachable if we had questions and gave us great advice for cost effective solutions; I truly felt she was there to help us make our workplace safer. With her expert guidance, we have made some positive changes regarding fire prevention.

As a result, Whitby Fire Service has become a very valuable resource to the local business! Thank you for building such a strong team. They are a credit to the Town of Whitby.

A thank you to Station 5, A1 platoon and thanks so much for setting that up Josh! James was an amazing tour guide! You have at least one recruit for 2038 in my 5 year old! Hot pepper plants were delivered to the firefighters, grown by the company's young gardeners!

I wanted to call and let you know how amazing a job Craig Sluman did two weeks ago. My father passed away at home peacefully and Craig Sluman was on the truck that responded. I wanted you to hear from me how incredible, empathetic, and compassionate he was. He explained everything as it was happening. He and the rest of the crew did an absolutely fantastic job. On behalf of my entire family, thank you so much.

Well done Captain Sluman and B1 Pump 32 Crew

Wow, that was awesome! Thank you so much again for coordinating the fire fighters to come to our event today. The firefighters were amazing and let our members learn about different tools they use, see all over their truck and sit inside. Both the kids and parents loved it - thank you!

- *Durham Down Syndrome Association's Community Support event*

Well done A2 Pump 33 Crew

2024 - Testimonials from the Public Continued

Thank you to the Firefighters that responded to the accident in front of the Brooklin High School on November 13. Their calm and soothing voices kept everything on an even keel and made me know the everything would be alright. I am so grateful to them.
Thank you.

Well done A1 Pump 33 Crew

From the bottom of my heart, my deepest appreciation is inadequate to express the gratitude our gardeners feel for all your support. We are able to impact literally hundreds of lives each summer with our produce, making improvements in our production and contributions to food banks, thru your water security.

We are proudly anticipating our 10th year this year and are reflecting back to how far we've come!!! With the biggest thank you to the heroes that fill our tanks! We could not have done it without your help.

You are the most impressive bunch of humans, and I wanted to touch base and express our appreciation before this season began again.

- *St. John's Port Whitby Community Garden*

I wanted to thank you, B1 – Station 2, on behalf of my Den and Leader Moms for putting together this wonderful experience for us. Our girls as well as we leaders thoroughly enjoyed the demos and learning about safety and your roles. Adrian and the team were very amazing.

- *FNE Explorers*

I am writing to express my deepest gratitude and appreciation for your incredible response to the fire on the night of April 10th. Your swift action and dedication undoubtedly saved lives and prevented what could have been a catastrophic event.

Your team's professionalism and efficiency were evident from the moment you arrived on the scene. Despite the chaos and urgency of the situation, your members remained calm, focused, and worked tirelessly to ensure the safety of everyone involved.

I have spoken with my neighbors, and we all share the same sentiment of immense gratitude towards you and your team. Your bravery and quick response undoubtedly made a significant difference that night.

Please accept this email as a small token of our appreciation for your selfless service to our community. We are forever grateful for your commitment to keeping us safe.

Thank you once again for everything you do.

Well done PC Birney and B2 Platoon

Staff Report

whitby.ca/CouncilCalendar

Report Title: Update on Property Tax Assessment Appeals and Adjustments

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: FS 05-25

Department(s) Responsible:

Financial Services Department

Submitted by:

Fuwing Wong, Commissioner Financial Services & Treasurer

Acknowledged by M. Gaskell, Chief Administrative Officer

For additional information, contact:

**Crystal Doucette, Senior Manager of
Revenue and Taxation ext. 2815**

1. Recommendation:

That Report FS 05-25 be received as information.

2. Highlights:

- The Town of Whitby is required to process adjustments to the assessment values of properties where such adjustments are warranted as a result of one of the following:
 - Assessment Review Board Decision,
 - Minutes of Settlement,
 - Post Roll Amended Notice or one of the other adjustments allowed for under legislation and confirmed by the Town.
- These adjustments are necessary to maintain fair current value assessments for property owners within the Town of Whitby.

- A listing of properties with adjustments processed in 2024 is provided in Schedule A to this report.
- The adjustments result in a recalculation of property taxes and generally a reduction or refund to taxpayers. The Town portion of these adjustments processed in 2024 is \$484,800.59 (net).
- At the end of December 2024, there were seven (7) outstanding property tax appeals for previous years at the Assessment Review Board.

3. Background:

Changes to the property tax class or property assessment can be initiated by the Municipal Property Assessment Corporation (**MPAC**), property owners and/or the municipality using one or more of these methods.

- Under 19.1(5) and (7) of the Assessment Act, if a change is made to the current value other than a change resulting from a general reassessment, the assessment corporation shall make any adjustment required and notify the person whom the land is assessed and the municipality. These are processed as an Advisory Notice of Adjustment (**ANA**).
- Under Section 32.(1) of the Assessment Act, despite the delivery of any notice provided for under this Act, the assessment corporation at any time before the time fixed for the return of the assessment roll may correct any defect, error, omission, or misstatement in any assessment and alter the roll accordingly. These are processed as a Post Roll Amended Notice (**PRAN**).
- Under Section 32.(3) of the Assessment Act, if a property becomes exempt from taxation for a year or for part or all of the preceding year, the assessor shall make any assessment necessary to change the tax liability for the property. These are processed as a Special Amended Notice (**SAN**).
- Under Section 33.(1) of the Assessment Act, if land liable for assessment has been in whole or part omitted from the tax roll for the current year or for all or part of either or both of the last two preceding years the assessment corporation shall make any assessment necessary to correct the omission.
- Under Section 39.1 of The Assessment Act, the owner of a property or a person who has received or would be entitled to receive a notice of assessment under this act may request the assessment corporation to reconsider the assessment including the classification of the property by the dates as specified in the legislation.
- Under Section 40.1 of The Assessment Act, any person, including a municipality or a school board, may appeal in writing to the Assessment Review Board (**ARB**) that,
 - a) the current value of the person's land or another person's land is incorrect;
 - b) the person or another person was wrongly placed on or omitted from the assessment roll;

- c) the person or another person was wrongly placed on or omitted from the roll in respect of school support; these adjustments have net zero affect on property taxes, it is a simple redirection of school support to another board.
- d) the classification of the person's land or another person's land is incorrect;
- e) for land, the portions of which are in different classes of real property, the determination of the share of the value of the land that is attributable to each class is incorrect.

These requests for appeals are resolved through the ARB process which results in resolutions either through Minutes of Settlement between the parties or by an Assessment Review Board Decision. Along with the board chairperson, the parties involved in this process would include the property owners and/or their representatives, the Municipal Property Assessment Corporation and the Town.

Under Section 357 of The Municipal Act, upon application to the Treasurer, the local municipality may cancel, reduce, or refund all or part of the taxes levied in the year if:

- (a) the property or portion of the property is eligible to be reclassified in a different class of property;
- (b) the land has become vacant land or excess land;
- (c) the land has become exempt from taxation;
- (d) a building on the land was razed or damaged by fire, demolition or otherwise;
- d(1) the applicant is unable to pay taxes because of sickness or extreme poverty;
- (e) a mobile unit on the land was removed;
- (f) a person was overcharged due to a gross or manifest error in assessing the property;

Under Section 358 of The Municipal Act, upon application to the Treasurer, the local municipality may cancel, reduce, or refund all or part of the taxes levied on land in one or both of the two years preceding the year in which the application is made for any overcharge caused by a gross or manifest error in the preparation of the assessment roll.

In the situation where the adjustment is a result of either a Section 357 or Section 358 application then MPAC would advise the Town on the impact(s) the change would have on the assessment value(s) and tax class(es) of the property.

Town staff are proactively managing the assessment base, monitoring properties that were assessed too low, or have had a recent "change in use" / additions by reviewing permitting and building permit details. This information is provided to MPAC and result in more accurate values being placed on the assessment roll. This has included regular communication and information flow with MPAC, as well as proactive consultation to help ensure accuracy. In some cases when timing does not allow for any other options, the Town will file assessment appeals with the ARB directly.

4. Discussion:

Staff have delegated authority related to property tax and assessment matters heard by the ARB pursuant to the Uninsured Claims and Legal Matters Policy (Town Policy # CA 240). The delegated authority includes authority to settle/execute documents to settle ARB property tax or assessment matters on behalf of the Town. The policy also requires an annual report to Council outlining the status of outstanding and resolved claims.

Property Tax Appeals and Adjustments Processed in 2024:

Schedule A, attached to this report, lists the properties with tax adjustments that were processed in the 2024 calendar year under Sections 19.1(5) and (7), 32.(1), 32.(3), 33.(1), 39.1, and 40.1 of the Assessment Act, and Sections 357 and 358 of the Municipal Act.

At the end of December 2024, there were seven (7) outstanding appeals at the Assessment Review Board representing 7 Whitby properties. These outstanding appeals (in addition to any new appeals filed in 2025) will continue to be scheduled by the ARB in 2025 and may impact the Town's tax adjustment budget and on-going property tax assessment base.

The number of outstanding appeals continue to decline due mainly from the postponement of province-wide re-assessments. The current value assessments being used for the 2024 and 2025 taxation years continue to be the fully phased in assessment values from the last reassessment in 2016. This has allowed the Assessment Review Board to deal with a previously large backlog of cases/appeals.

Impact of Province-wide Assessments and Outstanding Property Tax Appeals:

Properties in Ontario are normally reassessed by the Municipal Property Assessment Corporation every four years. The last two province-wide Assessment Updates/re-assessments took place in 2016 and 2012, based on January 1, 2016, valuation date and January 1, 2012 valuation date, respectively. Due to the COVID19 pandemic, the province postponed the planned 2020 province-wide Assessment Update, and 2016 assessment values have been/will continue to be used for the taxation years 2021, 2022, 2023, 2024, 2025 and 2026. The March 26, 2024, Ontario Provincial budget deferred the next property tax reassessment indefinitely while the Province conducts a review focusing on fairness, affordability and business competitiveness in order to enhance the transparency and equity of future assessments.

Typically, with each MPAC province-wide reassessment cycle, there is an increased number of new appeals started by property owners and their tax

agents. The Assessment Review Board (ARB) adjudicates assessment appeals on behalf of municipalities in Ontario.

While there is some concern with having MPAC assessment values from 2016 (approximately 9 years old) as the basis of calculating current property taxes, one benefit is that there were fewer new assessment appeals filed in recent years. All of the 7 appeals that remain outstanding relate to the 2016 reassessment cycle and relate to the taxation year 2024.

5. Financial Considerations:

Schedule A is a list of all of the tax adjustments that were processed in 2024. These adjustments are for the taxation years 2019 to 2024, inclusive.

The Town's portion of the Schedule A adjustments is a (net) \$484,800.59 in property tax reductions/refunds, comprised of the following:

\$568,773.91 Town portion of reduction/refunds from write-off adjustments

(\$83,973.32) Incremental taxes - due to tax class changes in development lands

\$484,800.59

Although the Town will continue to manage the assessment base to maintain equity and fairness, the annual write off totals will fluctuate depending on the accuracy of the assessment roll, decisions rendered by the Assessment Review Board, approved Requests for Reconsiderations (RfRs), Post Roll Amended Notices (PRANs), Advisory Notices of Adjustment (ANAs), Special Amended Notices (SANs) and changes to legislation. The annual budget for write-offs is based on estimated annual impacts over several years, as well as the special provision identified above to address the ARB backlog. The adjustments processed in 2024 will not affect the 2025 write off budget of \$750,000.

Variances may occur in both reassessment and non-reassessment years, and significant write offs are offset by other operating budget surpluses where possible. In the event other operating budget surpluses are not available to fund material write offs and refunds in a year, the contingency reserve will be utilized to fund the shortfall. The contingency reserve may also be used to phase in a higher write-off budget, if required, in the future.

6. Communication and Public Engagement:

All affected property owners have been notified of these cancellations, reductions, adjustments, and/or refund of taxes through a personalized letter.

Town of Whitby Staff Report

whitby.ca/CouncilCalendar

Report Title: Annual Insured Claims Report

Report to: Committee of the Whole

Date of meeting: June 2, 2025

Report Number: FS 25-25

Department(s) Responsible:

Financial Services Department

Submitted by:

Fuwing Wong, Commissioner Financial Services and Treasurer

**Acknowledged by M. Gaskell,
Chief Administrative Officer**

For additional information, contact:

Patrick Meyer-Erlach, Risk Management and Insurance Analyst, 905.706.0297

1. Recommendation:

1. That report FS 25-25 regarding Annual Insured Claims be received as information.

2. Highlights:

- In accordance with the Town's Claims Handling Policy and Insurance Reserve Fund policy the purpose of this report is to provide Council with a summary of the insured claims activity for 2024, the status of open claims and the year end balance of the Insurance Reserve Fund.
- This report provides Council with an update on the Durham Municipal Insurance Pool and the Town's insurance and risk management program.
- The Town continues to benefit from being a member of the DMIP by continuing to receive protection against significant rising insurance costs.

3. Background:

The Town is a member of the Durham Municipal Insurance Pool (“**DMIP**”) which consists of seven of the other Area Municipalities and the Region of Durham in an integrated insurance program to achieve greater control over the insurance coverage and costs.

The DMIP administers the insured claims for all members. The Town is responsible for claims within its local deductible of \$10,000 per claim and shares in the pool claims that are beyond the local deductible of pool members and within the pool’s deductible of \$500,000. Claims beyond \$500,000 are insured by Intact Public Entities (IPE). By agreeing to share the claims and expenses of the integrated insurance program, pool members achieve a more stable supply of insurance coverage to meet the unique requirements of the municipal marketplace.

4. Discussion:

Insured Claims

The Town of Whitby receives claims from individuals most generally because of damage to private property or bodily or personal injury. A claim is submitted when the individual who suffered the loss or the injury believes that the loss was a result of some negligence on behalf of the Town or its employees.

The Town carries insurance through the DMIP to protect its employees, volunteers, and officers from such claims in addition to insuring Town-owned property. The types of insured claims include:

- **Motor Vehicle Accident** – includes claims relating to winter road maintenance, pothole claims, road debris
- **Operations Action/Inaction** – includes claims relating to damage to property in the course of performing work e.g., utility cable/wires during construction, projectiles from work equipment, trees falling
- **Falls** – includes claims for trips and falls or slips and falls on municipal property e.g., sidewalks, parking lots, trails, inside facilities and at playgrounds
- **Professional Error** – claims for financial losses due to error, misstatement or omission e.g., negligence in building inspection, zoning, planning, passing by-laws, failing to enforce by-laws
- **Automobile** – includes claims from third parties relating to property/bodily injury and property coverage for Town-owned vehicle damage
- **Property** – claims for damage to Town-owned insured property e.g., facilities

The insurance coverage includes costs incurred in responding to a claim including investigation and defence and any third-party awards/settlements, in instances where it is determined the Town is liable for damages.

Claims with Costs Incurred within Deductible

The Town is responsible for the first \$10,000 on each claim. Currently for claims occurring in the calendar year of 2024, the Town has incurred costs totaling approximately \$100,344 in deductible expenses. As liability claims can carry a long tail, actual costs are not necessarily fully realized in the same year the claims occur, and this number will grow as claims develop to settlement. Oftentimes there is a lengthy delay from the date of the incident until the claim is ultimately settled, and its full cost is realized. To illustrate this delay, in 2024 out of 94 claims closed 58 (62%) of them did not occur in 2024, and one claim closed this year had an incident date in the year 2012, 13 years ago.

In addition to settlement costs, deductible expenses also include external legal and external adjuster fees, investigation charges and other. Any claim that is reported has a cost to the Town whether it is liable or not as every claim must be investigated and/or defended which incurs cost. The Town has budgeted \$180,000 for insurance expenses in 2024 and 2024 expenditures of \$100,344 (outlined above) are within budget.

Open Claims at Year-End 2024

There were 58 open claims at the beginning of 2024 and 39 at the end of 2024. Claim activity during the year is as follows:

- 58 Insurance claims open at the beginning of 2024
- 75 new claims were received as Whitby claims during the year
- (94) claims were closed in 2024
- 39 Insurance claims open at the end of the year

The number of claims received in 2024 was lower than the previous year. In 2023, there were a total of 121 new claims received. This means in 2024 there was a year-to-year decrease of 38% in claims reported. Overall, this is a positive trend as 2023 saw an increase of 31% in claims reported from the prior year. The largest decrease in reported claim types from 2023 were in Automobile – Owned decreasing from 21 reported in 2023 to 4 in 2024 (a decrease of 81%) and Operations Action/Inaction decreasing from 41 reported in 2023 to 23 reported in 2024 (a decrease of 44%). A large decrease in these claims is a positive sign the Town's risk management is trending in the right direction. It is important to continue putting risk management to the forefront by implementing proper procedures and risk education to continue this positive trend.

The 75 reported claims in 2024 are categorized by type in Table 1.

Table 1

Total # of Reported Claims	Motor Vehicle Accidents	Operations Action/Inaction	Falls	Professional Error	Property	Misc Liability	Automobile Owned
75	19	23	18	2	4	5	4

Risk Management Strategies

The Town of Whitby is continuing to work with the DMIP on mitigating the Town's insurance related risks as follows:

- Ensuring procedures, training, documentation, including the use of AVL/GPS technology, complies with Minimum Maintenance Standards (MMS);
- The Town has an annual sidewalk inspection program;
- The DMIP conducts annual inspections of a number of Town facilities to identify building and property hazards. A written risk control inspection report including recommendations is provided and staff follow up on completing recommendations;
- Town staff review agreements, certificates of insurance, programs, and procedures i.e., include insurance and indemnity clauses to transfer risk and potential future liability from the Town to the appropriate party;
- The DMIP and Intact Public Entities provide proactive/preventative risk management seminars to educate staff on mitigating risk to the Town;
- Procuring additional insurance coverages, as required, including volunteer accident benefit coverage;
- The Town has a facility user liability program. The facility user liability insurance program minimizes risk to the facility rental user and the municipality by providing an option to purchase insurance for the facility rental for those who do not have the required insurance;
- Obtaining insurance coverage for specific programs and events including the Town's Adult Hockey League Program and various amateur performers at Town events.

Renewal of Insurance Contract for 2025/2026

At the time of writing this report, the DMIP has not yet received renewal quotation information from IPE. The 2025/2026 renewal application has been completed and

there is a board meeting scheduled for June 13, 2025 in which the renewal will be further discussed.

The Town's 2025 budget assumed an overall 8% increase for corporate insurance premium and deductible costs. If the renewal exceeds the budget estimate the pressure will be reflected in the 2025 year-end operating budget projection and staff will look to offset this with other operating budget savings from across the corporation. If there are no other 2025 year-end operating savings to help offset this budget pressure, then the Insurance Reserve Fund may be used to offset an overall operating budget deficit.

Insurance Reserve Fund

The Town's insurance reserve fund, as per policy (F160), may be used to fund expenditures beyond the budgeted deductible and premium amounts, claims payments in excess of insurance coverage, payments required under the Town's indemnification by-law and additional insurance/risk management related expenditures/studies.

Industry experts anticipate that the trend is for municipal insurance premiums to continue to rise and experience upward pressures on rates throughout the remainder of 2025 due to the hard market. There is a cycle of hard and soft markets in the insurance industry. A soft market allows for more competition in the marketplace, lower rates, and more favourable terms whereas a hard market results in less competition, higher rates, and more restrictive terms. The DMIP met with the pool's insurer and was advised the hard market will continue and that the trend is for municipal insurance premiums to continue to rise. They advised the hard market is reflective of the following factors:

- increasing costs of claims due to increase in judicial awards and increasing litigious nature of society
- significant property loss claims related to weather events and climate change including wildfires, fires, flooding, ice storms

At the end of 2024 the balance of the Insurance Reserve Fund adjusted for budgetary commitments is \$1,776,762.

5. Financial Considerations:

The financial considerations are outlined throughout this report.

6. Communication and Public Engagement:

An electronic claims intake form was launched March 1, 2022 on the Town's website, where residents/other claimants receive automatic notification of receipt of a claim. The DMIP and Town staff are immediately notified and can begin the claims investigation process.

7. Input from Departments/Sources:

Claims and in particular those going through the litigation process require considerable staff resources. Staff resources from across the organization are involved in the investigation of claims, preparing and participating in the claims litigation process and identifying and implementing lessons learned. Further, staff work together to mitigate the Town's risks by establishing/updating policies and procedures and keeping records that demonstrate such and ensuring appropriate transfer of risk when procuring goods and services and permitting Town facilities and special events.

8. Strategic Priorities:
